THE WORLD ALMANAC AND BOOK OF FACTS 2023

Top 10 News Topics of 2022

1. Russia Invades Ukraine. In the biggest military conflict in Europe since World War II, Russian troops poured into Ukraine, Feb. 24, launching what Russian Pres. Vladimir Putin called a “special military operation” to protect ethnic Russians. The UN General Assembly, voting 141-5 with 35 abstentions, condemned the invasion; the U.S. and other nations imposed escalating economic sanctions. Millions of Ukrainians were internally displaced or fled to other countries. Forces mobilized by Ukrainian Pres. Volodymyr Zelenskyy, aided by weaponry from the West, repelled an attempted assault on Kyiv and fought to turn back Russian troops in the east and south. Observers reported widespread atrocities by occupying Russians. At home, Russia censored media and jailed dissidents. In Sept., responding to serious military setbacks, the Kremlin instituted partial conscription, threatened to deploy nuclear weapons, and declared four territories in Ukraine annexed, after sham referenda. Later, reacting to the bombing of a vital Crimean bridge, Russia began missile and drone attacks on cities and critical infrastructure across Ukraine.

2. “Red Wave” Fails to Materialize in U.S. Midterm Elections. Republicans, relying on inflation concerns and the historic pattern of substantial midterm losses by the president’s party, had expected to win big in Nov. 8 elections. Instead, the GOP failed to win the Senate and appeared headed for only a thin majority in the House. With the declared loss of a Senate race in Nevada Nov. 12, Democrats had the 50 seats needed for control, with one seat, in Georgia, undecided. The Georgia race was headed for a Dec. 6 runoff between Sen. Raphael Warnock (D) and former NFL star Herschel

Walker (R), a political novice whose nomination was propelled by Trump's backing. Results of races for governor were mixed, but the GOP enjoyed a decisive victory in Florida, where Gov. Ron DeSantis won reelection. His win, by a strong margin, positioned him as a possible viable candidate for the party's presidential nomination in 2024.

3. Amid Global Economic Problems, U.S. Grapples With Record Inflation. Economies around the world suffered high inflation, supply chain disruptions, low growth, and often severe shortages of energy and food supplies; high food and fuel prices led to unrest in some nations. In the U.S., average gas prices peaked at over \$5 a gallon in June, before showing declines. Inflation hit 9.1% in the 12 months ending in June 2022, the biggest rise in over 40 years. It remained high but showed signs of moderating in Nov. The Fed sought to tame inflation with a series of aggressive interest rate hikes, ending an era of often rock-bottom rates that had lifted the economy following the 2008 recession. Average interest rates on 30-year fixed mortgages rose above 7%. The economy started to grow, but slowly; job numbers were back to pre-pandemic levels and unemployment remained low, but wages did not keep up with rising prices.

4. COVID-19 Pandemic Lingers. By Nov., COVID-19 had killed more than 6.5 mil people worldwide, according to WHO data. The U.S. led all other nations in cases reported (close to 100 mil) and deaths (over 1 mil). The highly infectious but milder Omicron variant was dominant in the U.S. and globally. COVID cases and deaths, which spiked early in the year, later showed declines in most regions, with precautions often relaxed. The rise of Omicron subvariants caused concern; booster shots appeared effective in reducing hospitalizations and deaths but were not widely taken up. As of Nov., 68% of Americans had received at least the basic COVID vaccine; distribution was uneven globally, with poorer nations at a disadvantage.

5. Supreme Court Overturns *Roe v. Wade*; New Justice Appointed. On June 24 the U.S. Supreme Court, in *Dobbs v. Jackson Women's Health Org.*, voted 6-3 to uphold a Mississippi law

banning most abortions after 15 weeks and, 5-4, overturn *Roe v. Wade*, the landmark 1973 decision that asserted a federal constitutional right to abortion. The *Dobbs* decision left the legality of abortion to be decided by individual states. More than a dozen acted to end or greatly restrict abortions, while voters in several states supported abortion rights in ballot proposals. The Senate, 53-47, confirmed Pres. Joe Biden's nomination of Judge Ketanji Brown Jackson as the first Black woman to serve on the Court; she was sworn in June 30 upon the retirement of Justice Stephen Breyer, another Democratic appointee.

6. Shootings in U.S. Stir Concern. On May 24 a man fatally shot 19 students and 2 teachers in an Uvalde, TX, elementary school. Hundreds of law enforcement officers arrived but for over an hour did not enter classrooms controlled by the shooter. Ten days earlier, a gunman apparently motivated by racist beliefs fatally shot 10 Black people at a grocery in Buffalo, NY. By early Nov., more than 38,000 Americans had died in 2022 from gun violence, according to the Gun Violence Archive. Congress in June reached a compromise to pass a federal gun control bill, the first in decades. A survey of crime trends in 29 U.S. cities by the Council on Criminal Justice found that homicides fell 2% between the first half of 2021 and the same period in 2022 but were up 39% from 2019.

7. Trump Falls Under Legal Fire, While Rallying Support. In televised public hearings starting in June, a House select committee presented evidence from witnesses suggesting that Pres. Donald Trump orchestrated an attempt to overturn the 2020 presidential election results, ignored advisors' warnings that his accusations of election fraud were groundless, whipped up supporters to storm the Capitol on Jan. 6, 2021, and resisted pleas to call them off as violence flared. Trump was also investigated for the alleged illegal retention of documents, many classified, that turned up in an FBI search of his Florida estate, and faced a probe in Georgia, set off by a Jan. 2021 phone call in which he unsuccessfully pressed the Georgia secretary of state to "find" votes needed to overturn the election. The Trump Organization, charged with tax fraud, went on trial in Manhattan, while Trump, three of his children, and his

company were sued in New York state for allegedly inflating assets. Despite legal troubles, Trump drew crowds at rallies, where he repeated charges of fraud in the 2020 election, promoted candidates who backed him, and hinted at plans to run for president in 2024.

8. Actions on Climate Change Fall Short, as 2022 Sees Record Weather Disasters. The Intergovernmental Panel on Climate Change, in a report finalized in Apr., concluded that average global temperatures were on track to reach 1.5° C (2.7°F) above pre-industrial levels in two decades and that only drastic cuts in carbon emissions could prevent environmental tragedy. A UN report in Oct. found that only 24 of 193 countries that agreed to step up actions on climate change had followed through. The year brought many disasters scientists attributed at least in part to climate change, including deadly monsoon rains that flooded one-third of Pakistan and record heat waves in China and across Europe, accompanied by wildfires and drought. Summer 2022 was the second hottest on record for Asia and North America, according to NOAA.

9. United Kingdom in Transition. Queen Elizabeth II died Sept. 8 at Balmoral Castle in Scotland at age 96. The longest serving British monarch in history, she had presided over every prime minister since Winston Churchill, including new Conservative Party leader Liz Truss, whom she installed on Sept. 6. An estimated 250,000 people lined up for miles to file by as she lay in state prior to her funeral at Westminster Abbey. Elizabeth's eldest son, the 73-year-old Prince of Wales, acceded to the throne as King Charles III. One of his first duties was to install the Conservatives' new leader, Rishi Sunak, as prime minister, after Truss's unfunded tax cut plan rocked financial markets, leading to her resignation.

10. Amid Tensions Over Taiwan, Xi Cements Power. After U.S. House Speaker Nancy Pelosi, in Aug., traveled to Taiwan to meet with its president, China launched live missiles near Taiwan and paused cooperation with the U.S. in eight policy areas, including climate change. The Biden administration reiterated the U.S. "one China" policy, acknowledging Taiwan as a part of China while maintaining unofficial relations with the island and authorizing arms sales to bolster its defenses. Chinese Pres. Xi Jinping dominated the

Party Congress in Oct., at which he was returned as party leader for a third term with no future limit. The party's upper ranks were filled with loyalists believed to embrace his priorities, such as intolerance of dissent, aggressive expansion of China's power and influence, and unification with Taiwan.

THE WORLD AT A GLANCE

Number Ones

World's most populous country	China, 1.41 billion population in 2022 (p. 733)
World's most populous urban area	Tokyo, Japan, 37.3 million population in 2022 (p. 732)
World's wealthiest person	Elon Musk, \$219.0 billion net worth as of Apr. 2022 (p. 55)
Most-used U.S. social networking website	Facebook, 70% of social media users visited daily in 2021 (p. 304)
Most-used U.S. search engine	Google, 76% of all searches in July 2022 (p. 304)
Most popular U.S. smartphone app	Google sites (incl. YouTube), accessed by 91% of mobile users in June 2022 (p. 305)
U.S. airline that carried the most passengers	American Airlines, 123.7 million passengers in 2021 (p. 95)
Busiest world airport by passenger traffic	Hartsfield-Jackson Atlanta Intl., 75.7 million passengers in 2021 (p. 95)
Nations with the most days off work per year	Austria and Malta, 38 days off (p. 737)
Most popular musical artist by digital singles sales	Eminem, 166.0 million units sold as of Aug. 2022 (p. 259)
Most popular YouTuber	T-Series, 222.0 million U.S. subscribers as of Aug. 2022 (p. 252)
World's all-time top-grossing movie	<i>Avengers: Endgame</i> , \$2.8 billion gross as of Sept. 2022 (p. 249)
Highest-rated prime-time TV show	<i>Sunday Night Football</i> , watched in 9.8% of TV-owning households in 2021-22 (p. 262)
Highest-rated syndicated TV show	<i>Jeopardy!</i> watched in 5.6% of TV-owning households in 2021-22 (p. 262)
Highest-rated basic cable TV series	<i>Yellowstone</i> , watched in 6.3% of TV-owning households in 2021-22 (p. 263)
Highest-rated premium cable TV series	<i>House of the Dragon</i> , watched in 1.8% of TV-owning households in 2021-22 (p. 263)
Most watched original streaming series	<i>Stranger Things</i> , viewed for 46.5 billion minutes as of Sept. 2022 (p. 261)
Most watched streaming movie	<i>Encanto</i> , viewed for 20.5 billion minutes as of Sept. 2022 (p. 261)

Surprising Facts

As of June 2022, the inflation rate for all items tracked in the Consumer Price Index (CPI) had increased 9.1% over the past year. Gasoline prices had increased 59.9%, and food at home costs were up 12.2%. ([p. 55](#))

In 2021, about 23% of student loan debt in the U.S. was held by people over the age of 50. ([p. 389](#))

The median amount of debt outstanding on home loans in 2021 was \$150,000, up from \$120,000 in 2011. ([p. 79](#))

In 2021, 40.5% of 12th graders said they had ever tried vaping nicotine, marijuana, or just flavoring, compared to 17.8% who had ever tried smoking cigarettes. ([p. 152](#))

About one-third of internet users reported receiving obscene or abusive emails in 2020, an increase from 22% of users in 2013. The percent of users who reported receiving a virus decreased from 43% in 2013 to 17% in 2020. ([p. 304](#))

The U.S. divorce rate has declined steadily since it peaked at 5.3 per 1,000 pop. in 1981; in 2020, it was 2.3. The U.S. marriage rate has been hovering around all-time lows of 6.8-6.9 per 1,000 pop. since 2009 and fell even lower, to 5.1, in 2020. (Both rates in 2020 were likely affected by pandemic-related legal slowdowns.) ([p. 169](#))

In 2021, U.S. life expectancy fell for the second straight year, primarily due to deaths from COVID-19. Life expectancy in 2021 was 76.1 years, declining from 78.8 years in 2019. The American Indian/Alaska Native population saw the largest decline between 2019 and 2021 (6.6 years). ([p. 179](#))

Americans paid an average of 24.8% of their gross earnings in income tax and Social Security contributions in 2021; Belgians, who had some of the highest personal income tax rates, paid an average of 39.8%. ([p. 736](#))

U.S. workers saw their productivity and compensation grow at similar rates, 1948-79, with 118.4% and 107.5% growth, respectively. But in 1979-2020, those rates diverged, with

61.8% in productivity gains and just 17.5% in compensation growth. ([p. 104](#))

The number of refugees in the world increased from 10.5 million in 2012 to 21.3 million in 2021. The number of internally displaced persons (IDPs) increased even more steeply, from 17.7 million in 2012 to a record-high 51.3 million in 2021. ([p. 738](#))

In 1950, the U.S. produced 75.7% of the world's motor vehicles manufactured that year; by 2021, that number had dropped to 11.4% (up from a low of 9.5% in 2009). ([p. 86](#))

ELECTION, 2022

Republicans Make Gains in House as Democrats Hold Senate

Republicans likely gained at least narrow control of the U.S. House of Representatives—with a number of races still being tallied as of Nov. 13, 2022—adding a check on the party that had held the legislative and executive branches since Pres. Joe Biden’s inauguration in 2021. Falling far short of the decisive “red wave” House takeover predicted in the run-up to Election Day, Nov. 8, 2022, the midterm results offered a portrait of an exceptionally divided electorate.

The Uncertain Outcome

Though voter turnout nationally appeared to be below that of the 2018 midterms, voting levels were high in multiple battleground states. Republicans had an edge as the opposition party in a midterm election—an historic advantage—but needed to defend a third more Senate seats than Democrats. In Pennsylvania, Democrats picked up one seat vacated by a retiring GOP senator. A closely watched contest in Georgia required a runoff election to be held in early Dec. after neither candidate reached the state-required 50% vote threshold. By Nov. 12, tight races in Arizona and Nevada both went to incumbent Democrats, leaving the party with narrow control of the Senate before Georgia’s outcome was known.

In the House, where a Republican takeover had been widely anticipated and 2020 census redistricting appeared likely to benefit the GOP in multiple states, candidates from that party added a net total of at least 13 seats as of Nov. 11, with a number of races still too close to call. Overall, Democrats lost fewer net House seats than under any Democratic president in their first midterm election in the last four decades.

Democrats gained at least two governors’ seats, in Maryland and Massachusetts, for 25 total, with races in two states still undecided

as of Nov. 11. Based on preliminary results, Democrats also made gains in state legislature control in both Michigan and Minnesota, securing complete control of state government in at least 15 states; Republicans would control all branches of government in at least 20.

Pres. Biden, in remarks delivered in a post-election press conference Nov. 9, hailed the midterms as a “good day” for democracy and celebrated the Democrats’ better-than-expected success. He also pledged to work with Republican lawmakers, though House Minority Leader Kevin McCarthy (R, CA) had earlier pledged that if Republicans took control of the House, they would launch investigations into Biden’s administration as well as his son Hunter’s business matters.

The overall results of the midterms were widely considered to amount to a setback to former Pres. Donald Trump—whose endorsed candidates drew mixed results in key races—as well as his potential 2024 presidential reelection bid.

Electorate Issues and Concerns

The narrative of the midterm was framed, as always, as a referendum on the president and current leadership. A mid-Oct. NBC News poll of registered voters found that 71% felt the country was “off on the wrong track,” while only 20% thought it was headed in the right direction. Biden’s job approval rating, according to the RealClearPolitics (RCP) polling average, stood at 42.1% on Nov. 7. (Among Democrats in a Reuters/Ipsos poll, his level of approval stood at 75%.) In a Quinnipiac Univ. poll of U.S. adults released Nov. 2, Americans named inflation (the number-one issue for 36% of respondents) as the most urgent issue facing the country, reflecting concern over the widespread surge in consumer prices in 2022—including for gasoline—as inflation rates reached 40-year highs in the summer and continued to affect household bottom lines during the campaign season. Another 10% of respondents named abortion the number-one issue in the wake of the U.S. Supreme Court’s overturning of *Roe v. Wade*. Among Republicans, 57% pointed to inflation as the top issue, followed by immigration (15%) and crime (8%); 19% of Democrats marked abortion as most pressing, ahead

of inflation (15%), gun violence (14%), climate change (10%), and overly restrictive election laws (10%).

Balance of Power, 2022 (as of Nov. 12, 2022)						
	Senate		House		Governors	
Party	Before	After	Before	After	Before	After
Dem.	48	48	220	204	22	25
Rep.	50	49	212	211	28	23
Ind.	2	2	—	—	—	—
Note: Both independent senators were expected to continue caucusing with the Democrats. Two Senate seats, 20 House seats, and 2 state governorships were undecided.						

In an ABC News/Ipsos poll of registered voters published Oct. 23, 38% of respondents trusted Republicans over Democrats to handle both inflation and gas prices compared to 21% of those who trusted Democrats; margins were similar on the economy (38% to 24%), crime (37% to 22%), and immigration (37% to 32%). But respondents favored Democrats overwhelmingly on handling abortion (48% to 25%), climate change (46% to 16%), and gun violence (38% to 24%), and, to a lesser degree, in mitigating the Russia-Ukraine war (31% to 25%). Further illustrating America's deep political divide, an NBC News poll from mid-Oct. revealed that 81% of Democrats and 79% of Republicans surveyed believed that the opposing party's agenda, if not blocked, would destroy the country.

Republican incumbents and challengers largely focused election advertising on the economy, inflation, and crime as well as perennial GOP targets government spending and taxes. Public safety was mentioned in 44.8% of GOP Senate and 51.5% of GOP gubernatorial ads over the last two weeks in Oct., according to the Wesleyan Media Project (WMP), with ads alleging Democratic opponents supported defunding police or sought to end cash bail for suspects awaiting trial. On the House GOP side, messaging that attempted to blame Democrats for rising inflation appeared in more than 40% of ads, according to WMP, including those specifically blaming price hikes on the \$1.9-tril COVID relief legislation passed without any Republican support in Mar. 2021. Some Republican ads

also claimed the IRS would use a recent \$80 bil funding increase to audit middle-class Americans. According to the LGBTQ advocacy group Human Rights Campaign, conservative groups in the final weeks of the races sent mailers and ran misleading anti-transgender rights ads in at least 25 states.

In contrast, Democrats during much of the campaign cycle focused their messages on abortion access—mentioned in nearly half of all Democratic TV ads in early Oct., according to AdImpact—including some ads that warned against a prospective federal ban on the procedure. To a lesser extent, Democrats targeted voters with ads stressing other traditional party concerns, such as voting rights, public education, gun control, and maintaining Medicare and Social Security spending. Others touted Pres. Biden's commitment to lowering prescription drug prices through the Inflation Reduction Act signed in Aug. Some Democrats also attempted to counter Republicans' "soft on crime" attacks with ads featuring endorsements from law enforcement. Notably, climate change was mentioned in only 1.8% of pro-Democratic ads in 2022 for federal office, according to WMP.

Stumping on behalf of Democratic candidates nationwide, Biden was joined in the final weeks on the campaign trail by former Pres. Barack Obama. The former running mates crisscrossed the country separately on behalf of Senate incumbents in close races and converged for the first time at a rally for Senate candidate John Fetterman in Philadelphia Nov. 5. Trump, campaigning that same day elsewhere in Pennsylvania, hinted (as he had done at earlier midterm rallies) at a possible 2024 presidential bid for himself and continued to further unproven claims of voter fraud in the 2020 election. Former Pres. Bill Clinton (D) and Vice Pres. Kamala Harris made a number of campaign stops as well.

According to CNN analysis of exit polling data compared with 2018 midterm voting, Democrats lost 11% support from women (while their GOP counterparts gained 10% additional backing from men) and drew 7% less support from younger voters (18-29), at the same time Republicans increased their appeal to those aged 45 and older. While Republicans also won a majority of votes from white

women, according to the poll, Democrats' support eroded among Latino voters, particularly men, by 21%.

Election Spending

The nonpartisan OpenSecrets projected that reportable total spending on the 2022 congressional elections would reach \$8.9 bil, far surpassing the then-record \$5.7 bil spent on the 2018 midterms. According to their estimates, "Team Red" (GOP candidates, parties, committees, and outside groups supporting them) would outspend "Team Blue" (their Democratic counterparts), 52.4%-47.6%. Estimates showed that outside groups (funded mostly by a handful of megadonors) exceeded \$2 bil in spending, or over 22% of CRP's projected total for congressional races in 2022. As of early Oct., conservative groups were contributing nearly twice as much overall as liberal ones. The biggest outside contributors supporting Republicans were the Senate Leadership Fund, Congressional Leadership Fund, and National Republican Congressional Committee; the biggest Democrat-supporting outside contributors were the Senate Majority PAC, House Majority PAC, and Democratic Congressional Campaign Committee.

Election Integrity

Former Pres. Donald Trump's unfounded accusations of widespread voter fraud against him in the 2020 presidential election continued to play a significant role in the political landscape of the midterms. According to a comprehensive *New York Times* report published Oct. 13, more than 370 candidates on the Nov. 2022 ballot—roughly half the incumbents and a large majority of Republicans running—had "questioned or spread misinformation" about the results of the previous election. The same report found that about 20% of those candidates were existing members of Congress who, on the day of the Capitol attack, Jan. 6, 2021, opposed the Electoral College's vote totals. (A *Washington Post* report in early Oct. tallied 291 "election deniers" on the ballot in 48 states for congressional and state posts.) A *PBS NewsHour* report Oct. 2 said 20 of 26 Republicans running for secretary of state posts—the office with election oversight duties in most states—had "denied or fueled doubts" about the 2020 results. A number of Republican candidates

running in battleground states, including incumbent Sen. Ron Johnson (WI) and gubernatorial candidate Kari Lake (AZ) refused to confirm before Election Day whether they would accept voting results. In late Oct. and early Nov., Trump via social media cast doubt on Pennsylvania's election over a debunked claim that the state had sent out over 240,000 unverified mail-in ballots.

Despite assertions in late 2020 by the Homeland Security Dept.'s Cybersecurity and Infrastructure Security Agency that the 2020 election was the "most secure in American history" and testimony in summer 2022 by former Trump attorney gen. William Barr disputing election fraud claims, Republican voters ahead of midterm voting largely continued to give credence to Trump's claims, with nearly two-thirds in a mid-Oct. 2022 NBC news poll agreeing that Biden was not legitimately elected. According to the Brennan Center for Justice, state legislatures in 21 states—nearly all Republican led—since early 2021 had passed at least 42 laws tightening voting access, 33 of which were at least partially in effect for midterm voting in 20 states. Provisions included stricter voter ID requirements, more stringent rules for applying for mail-in ballots, reduced drop box access, and rules criticized for their potential to inappropriately purge eligible voters from states' rolls. Seven states also had in effect "interference laws," which shifted aspects of election control to partisan bodies or put in place new criminal or civil penalties for election officials that could be used to intimidate them.

Campaign Spending, 2021-22

Source: Federal Election Commission, for Jan. 1, 2021-Nov. 1, 2022, unless otherwise noted

Between Jan. 1, 2021, and Oct. 31, 2022, a combined \$7.38 bil in campaign spending was reported by candidates (\$2.74 bil), political action committees (PACs) (\$3.13 bil), and political party committees (\$1.51 bil).

Campaign spending by candidates does not reflect spending on candidates' behalf by other groups.

Rank	Senate candidate	Spending (mil)
1.	Raphael Warnock (D, GA)	\$135.81

2.	Mark Kelly (D, AZ)	75.93
3.	Val Demings (D, FL)	69.14
4.	John Fetterman (D, PA)	52.74
5.	Catherine Cortez Masto (D, NV)	48.28
6.	Tim Ryan (D, OH)	45.32
7.	Marco Rubio (R, FL)	42.99
8.	Mehmet Oz (R, PA)	37.79
9.	Maggie Hassan (D, NH)	36.70
10.	Chuck Schumer (D, NY)	36.17

Rank	House candidate	Spending (mil)
1.	Nancy Pelosi (D, CA)	\$25.16
2.	Katie Porter (D, CA)	24.40
3.	Kevin McCarthy (R, CA)	23.31
4.	Steve Scalise (R, LA)	19.70
5.	Dan Crenshaw (R, TX)	15.58
6.	Adam Schiff (D, CA)	15.04
7.	Marcus Flowers (D, GA)	14.73
8.	Jim Jordan (R, OH)	11.41
9.	Alexandria Ocasio-Cortez (D, NY)	10.09
10.	Marjorie Taylor Greene (R, GA)	10.06

Ballot Issues

There were more than 130 statewide measures on Nov. 8 ballots. After voters in Aug. in reliably red state Kansas surprised anti-abortion activists by overwhelmingly rejecting an amendment to give the state legislature authority to ban abortion access—no longer federally protected after the Supreme Court’s reversal of *Roe v. Wade*—state electorates weighed in on the issue in Nov. California and Vermont voters by a wide margin solidified abortion and contraception access at the same time those in Michigan enshrined abortion rights into their state constitution and Kentucky voters, by 18 points, rejected a measure specifying theirs did not protect the right to abortion.

South Dakotans voted to expand Medicaid access (leaving 11 states that have not). Voters in Missouri and Maryland chose to legalize recreational marijuana, while those in Arkansas, North Dakota, and South Dakota rejected marijuana legalization.

Coloradans approved legalizing the personal use of psychedelic mushrooms.

Voters in Connecticut and Michigan chose to increase voter access through early in-person voting and expanded absentee and other voting conveniences for the latter state. At the same time, Arizonans appeared to narrowly reject stricter ID requirements for both in-person and absentee voting, and Nebraskans approved by a wide margin establishing a photo-ID requirement for voters. In Iowa, voters overwhelmingly approved bolstering gun rights.

In California, voters by 17 points nixed imposing a 1.75% tax increase on residents with annual incomes greater than \$2 mil to subsidize electric vehicle purchases and build more charging stations statewide and fund additional wildfire prevention efforts. They also rejected a measure allowing in-person sports betting at tribal casinos and four horse racetracks and voted against legalizing online sports betting, currently legal in 21 states and DC.

Alabama, Oregon, Tennessee, and Vermont voters, mostly by a wide margin, approved prohibiting convict labor as an exception to slavery, while Louisianans did not. Both Nevadans and Nebraskans chose to increase their states' minimum wage, and DC voters did so specifically for tipped employees. While Illinois voters approved a right-to-unionize amendment guaranteeing collective bargaining, those in Tennessee voted to make it illegal for workplaces to require mandatory labor union membership, maintaining it as a so-called Right to Work state.

Notable House Races

A large number of House members (31 Democrats and 18 Republicans) did not seek reelection, and a 20-year-high number (15) lost their primaries, though almost half were competing in redistricted seats against fellow incumbents. Those who lost their seats in primary voting included 27-year-old Trump stalwart Madison Cawthorn (R, NC) as well as Trump critic Liz Cheney (R, WY), who drew less than 29% support in her primary against attorney Harriet Hageman. Vice chair of the House select committee investigating the Jan. 6, 2021, attack on the U.S. Capitol, Cheney was previously in Republican House leadership but was stripped of her No. 3-ranked

role in May 2021; her fellow Jan. 6 committee member Rep. Adam Kinzinger (R, IL) announced his retirement in 2021. Of the eight other GOP House members who voted to impeach Trump for inciting the attack, three retired, and three lost their own primary contests.

Among unseated House incumbents, Democratic Congressional Campaign Committee chair Sean Patrick Maloney (D, NY) conceded to GOP state assemblyman Michael Lawler. Virginia state sen. Jen Kiggans (R) narrowly defeated incumbent Democratic Rep. Elaine Luria (52%-48%) in the competitive district encompassing the state's northern coastal region. Democratic Cincinnati City Council member Greg Landsman defeated 13-term Rep. Steve Chabot (R, OH) by 5 points.

In other notable races, North Carolina state sen. Wiley Nickel (D) defeated Trump-backed GOP nominee Bo Hines in the state's newly redrawn 13th Congressional District. Twenty-five-year-old Maxwell Frost (D) won an open Orlando, FL-based seat, making him easily the youngest member of Congress. Conspiracy theory-backing Rep. Marjorie Taylor Greene (R, GA) easily won reelection; pulled from her committee assignments in early 2021 over social media posts showing support for executing Democrats, she was expected to regain them if Republicans took control of the chamber in Jan.

Key Senate Results

In the most expensive Senate race (over \$374 mil spent as of Oct. 19, more than \$240 mil of it from outside groups), Pennsylvania Lt. Gov. John Fetterman (D) edged Republican nominee Mehmet Oz (former longtime host of daytime TV's *Dr. Oz Show*), 50.9%-46.8%, in an open seat vacated by GOP Sen. Pat Toomey. Oz, branded by Fetterman as a "carpetbagger" for his limited residence in the state, attempted to portray his opponent as ineffective on public safety and questioned Fetterman's health as he recovered from a stroke in May.

The race in Georgia between political novice and former football star Herschel Walker (R) and incumbent Sen. Raphael Warnock (D) headed for a Dec. 6 runoff, with neither candidate reaching the 50% threshold required by Georgia election law. Endorsed by Trump, the staunchly anti-abortion Walker faced repeated scandals, including

separate accusations by two women that he pressured them to have abortions after impregnating them; Walker denied the accusations.

Two-term Sen. Ron Johnson (R, WI), criticized by Democrats for spreading COVID-19 disinformation and conspiracy theories about the Jan. 6 attack on the U.S. Capitol, fended off a strong challenge by Lt. Gov. Mandela Barnes, 50.5%-49.5%. Johnson trailed Barnes by five points in Aug. polls but gained support after an onslaught of ads funded by outside money accused Barnes of being soft on crime. Republicans also celebrated a victory in Ohio by *Hillbilly Elegy* memoirist and Trump-backed political neophyte JD Vance over Democratic Rep. Tim Ryan, 53%-47%, for an open seat.

In Arizona, narrowly won by Biden in 2020, first-term Democratic Sen. Mark Kelly defeated Trump-endorsed venture capitalist and GOP challenger Blake Masters. Fellow incumbent Democrat Catherine Cortez Masto pulled out a narrow win over former Nevada state attorney gen. Adam Laxalt (R), following a neck-and-neck contest that saw 14 members of Laxalt's family publicly endorse Cortez Masto via a letter in the *Nevada Independent*.

The only Republican senator to face her constituents in midterms after voting to convict Trump in his 2021 impeachment trial, moderate Lisa Murkowski (AK) trailed Trump-endorsed fellow Republican Kelly Tshibaka with nearly a quarter of votes left to tally. (Both vied in general voting due to Alaska's ranked-choice system.)

Governors' Races

Of the 36 governors' seats at stake in 2022, Republicans were defending 20 to the Democrats' 16. Though the overwhelming majority of incumbents, such as Democrat JB Pritzker (IL) and Republicans Kay Ivey (AL), Kim Reynolds (IA), and Mike DeWine (OH) easily won, a number faced strong challenges.

In Massachusetts, the state's attorney gen. Maura Healey (D) easily defeated Trump-backed former state rep. Geoff Diehl (R) by more than 20 points, returning the seat to Democratic control after eight years under Charlie Baker (R), who chose not to run. The win made Healey the country's first openly lesbian governor-elect. Democrats also flipped Maryland's governorship, after political newcomer Wes Moore handily defeated far-right state lawmaker Dan

Cox. Moore would be the state's first Black governor, as well as only the third Black person elected governor since Reconstruction. In arguably the country's most closely watched governor's race, Trump-backed former news anchor and election denier Kari Lake was, as of Nov. 10, locked in a tight race with sec. of state Katie Hobbs in Arizona.

Among other races, Gov. Tony Evers (D) maintained his governorship in battleground Wisconsin against former army officer Tim Michels. Michigan Gov. Gretchen Whitmer (D) defeated GOP opponent Tudor Dixon as voters there also flipped both chambers of the state's legislature to Democratic control. By a 28-point margin, former Trump White House Press Sec. Sarah Huckabee Sanders won in the GOP stronghold of Arkansas the top seat previously occupied by her father, Mike Huckabee (1996-2007). Texas Gov. Greg Abbott (R) secured a third term (54.8%-43.8%) against former U.S. Rep. Beto O'Rourke (D). Gov. Brian Kemp (R), who refused to comply with Trump requests that he overturn Georgia's 2020 election results, improved his winning margin (53.4%-45.8%) in a rematch against former state rep. Stacey Abrams. Former state senator and retired U.S. Army colonel Doug Mastriano, who led efforts to overturn Biden's 2020 victory in Pennsylvania, lost his gubernatorial bid to state attorney gen. Josh Shapiro.

Members of the 118th Congress: U.S. Senate

Source: *Nominees for the Offices of U.S. Senator and U.S. Representative in the 118th Congress*, Office of the Clerk, U.S. House of Representatives; local secretaries of state and state elections offices; Ballotpedia. All results are preliminary as of Nov. 9-12, 2022.

Boldface denotes the 2022 election winner. * = Incumbent. Third-party, independent, or write-in candidates receiving fewer than 70,000 votes are not necessarily listed.

Terms are for six years and end Jan. 3 of the year preceding the senator's name in the following table. Annual salary: \$174,000; President Pro Tempore, Majority Leader, and Minority Leader:

\$193,400. To be eligible to serve in the Senate, a person must be at least 30 years old, a U.S. citizen for at least nine years, and a resident of the state from which elected.

D = Democrat; R = Republican; DFL = Dem.-Farmer-Labor; Ind. = Independent; LB = Libertarian.

Governors of U.S. States, Commonwealths, and Territories

Source: Natl. Governors Assn.; local secretaries of state and state elections offices; Ballotpedia. All results are preliminary as of Nov. 9-11, 2022.

Boldface denotes the 2022 election winner. * = Incumbent. Third-party or independent candidates receiving fewer than 70,000 votes are not necessarily listed. Governors of states not holding elections in Nov. 2022 are shown for reference, with date of term end in place of results. Terms are for four years, with the exception of two-year terms for governors of New Hampshire and Vermont.

D = Democrat; R = Republican; DFL = Dem.-Farmer-Labor; Ind. = Independent; LB = Libertarian.

CORONAVIRUS PANDEMIC: STATUS REPORT

The respiratory disease COVID-19, or coronavirus disease 2019, was first identified in Dec. 2019. Over the ensuing months it grew into a global pandemic that has infected 627.6 million people and caused 6.6 million deaths worldwide as of Nov. 1, 2022.

Rates of U.S. COVID-19 Hospitalizations and Deaths by Vaccination Status, 2021-22

Source: Centers for Disease Control and Prevention

Data on deaths come from 30 participating U.S. jurisdictions—representing some 72% of the total U.S. population—that link case surveillance and immunization data. Monthly hospitalization data are for Jan. 2021-July 2022 (updated Sept. 15, 2022), ages 18+. Weekly death data are for Apr. 3, 2021-Sept. 3, 2022 (updated Oct. 21, 2022), ages 6 months+. Vaccinated data include those who received at least a primary vaccination series. Unvaccinated people 6 months of age and older had 6 times the risk of dying from COVID-19.

U.S. COVID-19 Vaccination Rates

Source: Centers for Disease Control and Prevention

As of Oct. 27, 2022. Rates are percentages of the population that have been vaccinated.

State/territory	At least one dose		Fully vaccinated	
	Total	Ages 65+	Total	Ages 65+
Alabama	64.3%	95.0%	52.5%	84.1%

CHRONOLOGY OF EVENTS

Nov. 1, 2021, to Oct. 31, 2022

The Chronology of Events reports the top National, International, and General news stories, month by month. Unless otherwise noted, COVID-19 statistics were per the Centers for Disease Control and Prevention (CDC) and World Health Organization (WHO).

November 2021

National

Gubernatorial Elections Split Results in New Jersey, Virginia

—Trump-endorsed Republican businessman Glenn Youngkin defeated former Virginia Gov. Terry McAuliffe (D) for the state's governorship Nov. 2. Edging McAuliffe (50.6%-48.6%) after Pres. Joe Biden won the state by 10 points in 2020, Youngkin in his campaign focused on parents' opposition to COVID-19 school mask mandates, transgender student rights, and racial justice curriculum issues, including critical race theory (CRT). (CRT is a 40-year-old academic concept that, broadly defined, holds that racial prejudice and bias are not limited to individual actors and acts but are part of laws and policies.)

In the only other governor's race in the 2021 off-year cycle, New Jersey Gov. Phil Murphy (D) defeated GOP former state lawmaker Jack Ciattarelli, 51.2%-48.0%.

Trump Adviser Bannon Charged With Contempt of Congress; Other House News—A federal grand jury Nov. 12 charged former Pres. Donald Trump's longtime adviser Steve Bannon with contempt of Congress for defying a subpoena to testify before and provide documents to the House's select committee investigating the Capitol riot on Jan. 6, 2021. Bannon had refused to cooperate, citing Trump's claim of executive privilege, which a federal judge rejected three days before the indictment. Bannon had formally departed from Trump's White House staff in 2017. Mark Meadows, Trump's chief of staff from Mar. 2020 to the end of

Trump's term, failed to meet a Nov. 12 deadline to appear before the House and faced similar legal action. Jacob Chansley, 34, the man nicknamed "QAnon Shaman" after appearing shirtless at the Capitol riot with a horned headdress, was sentenced in mid-Nov. to almost 3.5 years in prison. As of Nov. 9, more than 650 people had been charged for actions related to the Jan. 6 Capitol attack; 132 had pleaded guilty.

The House Nov. 17 voted, 223-207, to censure Rep. Paul Gosar (R, AZ) and remove him from two committees after he posted an anime video depicting himself attacking Pres. Biden and killing Rep. Alexandria Ocasio-Cortez (D, NY). The censure, the first in the chamber since 2010, was supported by just two Republican lawmakers. Rep. Lauren Boebert (R, CO) also sparked criticism by refusing to apologize publicly for implying in a video that Rep. Ilhan Omar (D, MN) could be a suicide bomber.

Biden Ratifies Hard-Fought \$1.2 Trillion Infrastructure Bill—Pres. Joe Biden Nov. 15 signed a sweeping bill providing \$1.2 tril over eight years to repair and modernize aging U.S. infrastructure. The final legislation allocated \$110 bil for road and bridge projects; \$66 billion to Amtrak; \$39 bil to other public transit; \$65 bil for broadband internet; \$65 bil for power grid modernization; \$55 bil for water/sewage systems; and \$25 bil to airports. The U.S.'s largest infrastructure package in over a decade was approved in the Senate Aug. 10 in a rare instance of bipartisan cooperation (69-30, with the support of 19 Republicans) after Biden reduced the measure's initial price tag—unveiled by the White House in late Mar.—by nearly half and Democrats reversed their earlier position requiring simultaneous passage of the related "Build Back Better" bill, which contained spending provisions related to social programs, family leave, and climate change. A group of progressive House members tried to hold out for a dual vote on both bills, but the House Nov. 5 passed the infrastructure measure without that requirement, 228-206.

Biden underwent a medical exam Nov. 19, during which his presidential powers briefly transferred to Vice Pres. Kamala Harris.

Teenager Acquitted in Wisconsin Vigilantism Shooting—A Wisconsin jury Nov. 19 acquitted 18-year-old Kyle Rittenhouse—who

fatally shot two unarmed men during a protest in response to the police shooting of a black man in Kenosha, WI, in Aug. 2020—of all charges. Prosecutors had argued that Rittenhouse provoked the shootings by attending the protest with an illegally acquired weapon, and Rittenhouse, a then-17-year-old resident of Illinois armed with a military-style semiautomatic rifle, had testified that he had intended to protect businesses from looters and acted in self-defense.

Inflation Hits Over 30-Year High in Oct.; Other Business, Economic News—Supply chain disruptions continued to drive inflation, with the Bureau of Labor Statistics reporting Nov. 19 that its Consumer Price Index (CPI) climbed 6.2% from Oct. 2020 to Oct. 2021, the highest increase since 1990. Within that indicator, food prices rose 5.4% and overall energy prices were up 30%. Average gasoline prices, which had shot up 49.6% in the Oct. CPI and continued to surge in Nov., prompted Pres. Biden Nov. 23 to order the release of a record 50 mil barrels from the U.S.'s strategic oil reserve, reportedly in coordination with the release of oil reserves by other nations. According to the Labor Dept. Nov. 5, the economy added a higher-than-anticipated 531,000 jobs in Oct., and the unemployment rate edged down 0.2 points to 4.6%.

On Wall Street, the Dow Jones Industrial Average closed Nov. at 34,483.7, down 3.7% from Oct., driven in part by a 2.5% single-day loss Nov. 26. The Nasdaq Composite Index gained 0.3% to close Nov. at 15,537.69; the S&P 500 finished the month at 4,567.0, down 0.8%.

Jury Convicts Three in Death of Black Jogger—Three white defendants, Travis McMichael, his father Greg McMichael, and William Bryan, were convicted Nov. 24 of murdering 25-year-old Black jogger Ahmaud Arbery in Feb. 2020. After pursuing Arbery—whom the defendants said they suspected of burglary—through their neighborhood outside Brunswick, GA, in two vehicles, the men attempted to physically detain him, and the younger McMichael shot Arbery three times during a struggle. Defense lawyers argued the men were permitted to carry out a citizen's arrest based on a Civil War-era law then still in effect (it was repealed May 2021). The investigation of the incident was highly criticized, and the men were

arrested only after Bryan's cellphone video of the pursuit and killing was made public, two months after Arbery's death.

Travis and Greg McMichael both were sentenced in Jan. 2022 to life in prison without parole; Bryan received life with parole eligibility in 30 years.

CDC Recommends Vaccine for Children; COVID Case Numbers Trend Up; Other Pandemic News—The CDC Nov. 2 recommended the Pfizer vaccine for children ages 5-11. Though the announcement was greeted eagerly by many parents (according to the CDC, 172 children in that age group had died from COVID-19, and more than 8,300 had been hospitalized), almost 30% of parents in a Kaiser Family Foundation poll said they would not vaccinate their children. The CDC Nov. 19 also expanded eligibility for booster shots to all adults.

A Texas state study released Nov. 8 found that unvaccinated people were 20 times more likely to die of COVID-19 than those fully vaccinated (around 60% of Americans as of Nov. 30). One of the strictest vaccine mandates in the U.S. went into effect Nov. 8 in the city of Los Angeles, requiring proof of full vaccination (or negative COVID-19 test results) to enter most indoor public spaces. Federal vaccine mandates on larger employers and health care workers received repeated legal challenges. Beginning Nov. 8, fully vaccinated non-U.S. citizens from 33 countries, including Canada, Mexico, and many EU nations, were allowed entry into the U.S. for the first time in 20 months.

The White House starting Nov. 29 barred travelers from eight southern African countries after the World Health Org. declared a more highly contagious strain (B.1.1.529) of COVID-19 a "variant of concern." After recording declines in much of the country in Oct., the CDC Nov. 25 reported a 47% boost in new infections since late Oct., with caseloads growing by 10% or more over the prior two weeks in 35 states. The U.S. reached 48.5 mil cumulative confirmed cases (including 781,942 deaths) Nov. 30 according to the CDC, up 2.6 mil from Oct.

International

Ethiopia Announces Emergency Measure as Tigrayans Advance—Responding to widening conflict in Ethiopia's year-old civil war, its national government Nov. 2 declared a countrywide, six-month state of emergency after rebel forces from the northernmost region of Tigray threatened to attack the capital, Addis Ababa, after seizing Dessie and Kombolcha, two strategic cities. The U.S. Nov. 12 sanctioned the Eritrean military and Eritrea's ruling party for participating on the side of Ethiopian government forces. International aid organizations said the fighting had killed thousands of civilians, displaced more than 2.5 mil, and left more than 400,000 in Tigray in famine conditions. A joint UN-Ethiopian report released Nov. 3 accused all sides of war crimes, including torture and summary killings. In early Dec., Ethiopian forces said they recaptured Dessie and Kombolcha, and on Dec. 20, Tigrayan forces withdrew from the Amhara and Afar northern regions, raising hopes for an eventual cease-fire.

Glasgow Climate Summit Ends in "Insufficient" Compromise—Following two weeks of negotiations, diplomats from 197 countries at the 2021 United Nations Climate Change Conference in Glasgow, Scotland, Nov. 13 adopted a climate pact directing governments to set more ambitious plans for reducing greenhouse gas emissions. The agreement will almost certainly fail to achieve the 2015 Paris accord's goal of confining warming to 1.5°C (2.7°F) over preindustrial levels, given sluggish global action thus far. (Attaining that objective, according to the UN climate report released in Aug. 2021, would require countries to reduce global emissions by close to half by just 2030, and reach net zero by 2050.) The agreement was the first UN pact to mention fossil fuels' main role in the crisis and called for a "phasedown" of the use of coal and "phase-out of inefficient fossil fuel subsidies."

WHO Identifies Highly Contagious New Variant "Omicron"; Global COVID-19 Deaths Exceed 5 Million; Other Pandemic News—On Nov. 26, the World Health Org. said a much more highly contagious strain (B.1.1.529) of COVID-19 was a "variant of concern." First identified in South Africa and detected in 20 countries by the end of the month, the Omicron variant prompted some

countries to restrict travel from southern African nations and, along with the continued spread of the Delta variant (B.1.617.2), spurred health officials to encourage more fully vaccinated people to receive booster shots. As of Nov. 30, 43.3% of the world's pop. was fully vaccinated against COVID-19, up from about 38.7% at the close of Oct., and multiple national health agencies had approved use of the Pfizer-BioNTech vaccine for children ages 5 to 11.

Worldwide cumulative confirmed cases of coronavirus surpassed 262.2 mil (with over 5.2 mil deaths), by Nov. 30, with WHO reporting Europe as the only region with increased average new weekly cases throughout the month. The U.S. continued to lead all other nations, with 48.1 mil cases (including 775,036 deaths), ahead of India (32.2% vaccinated), with 34.6 mil cases (468,980 deaths), and Brazil (62.6% vaccinated), with close to 22.1 mil cases (614,278 deaths). The UK (68.0% vaccinated) led in Europe with 10.4 mil cases (144,810 deaths), but numerous European countries set records for new infections, including the Netherlands, which instituted western Europe's first partial lockdown since summer, and Russia (38.9% vaccinated), with over 9.6 mil cases (275,193 deaths). South Africa (24.1% vaccinated) continued to far outpace other African nations, with nearly 3 mil cases (89,822 deaths), as Iran (54.7% vaccinated) topped the Middle East with over 6.1 mil cases (129,711 deaths). The Philippines (33.6% vaccinated) reported over 2.8 mil cases (48,501 deaths), the most in the Western Pacific.

General

Atlanta Topples Houston to Win World Series—The Atlanta Braves won the World Series over the Houston Astros in a decisive Game 6 win, 7-0, on Nov. 2 at Minute Maid Park in Houston, TX. The Game 6 shutout gave the Braves their fourth title in franchise history and marked the Astros' second World Series loss since their 2017 title. After giving up 7 runs in Game 2, Atlanta's pitchers, led by 24-year-old rookie Ian Anderson, held their opponent hitless in Game 3 for 7 innings—the longest hitless streak in a Series game since 1967. Braves outfielder Jorge Soler, with a 3-run homer in Game 6, was named World Series MVP.

Texas Concert Surge Turns Fatal—A crowd surge at a music festival Nov. 5 at Houston's NRG Park killed 10 people—including a 9-year-old boy knocked off his father's shoulders. Medical examiners said the victims died by accidental "compression asphyxia." Some 50,000 people attended the annual Astroworld Festival, organized by hometown rapper Travis Scott, whose performance sparked the fatal surge toward the stage. The festival's second day was canceled following the tragedy.

Sierra Leone Truck Explosion Kills More Than 100—An oil tanker exploded after colliding with another truck at a busy intersection outside of Sierra Leone's capital, Freetown, Nov. 5, killing at least 115 people and critically injuring dozens. Though casualties included those in nearby vehicles, many of the victims had reportedly tried to salvage the leaking fuel before the tanker exploded.

Pop Star Britney Spears Released From Conservatorship—A Los Angeles judge Nov. 12 terminated a nearly 14-year conservatorship (court-ordered guardianship) over pop singer Britney Spears, ending months of legal wrangling and public pressure from devoted Spears fans, who had earlier launched a #FreeBritney campaign. The ruling followed the judge's suspension in late Sept. of her father, James Spears, as her conservator, and came less than five months after the 39-year-old Spears had publicly voiced her dissatisfaction, claiming she was forced to take medications and perform against her will and was prevented from having more children. Spears's efforts to dissolve the conservatorship, put in place after a mental health crisis in 2008, drew attention to abuse within adult guardianships and criticism of media coverage of female celebrities.

Driver Kills Six at Wisconsin Parade—Tragedy unfolded at an annual Christmas parade in Waukesha, WI, Nov. 21 when the driver of a sport utility vehicle plowed through barricades and, according to police, intentionally targeted attendees, killing 6 people and injuring over 60. The suspect, 39-year-old Darrell E. Brooks, was charged with six counts of first-degree intentional homicide; he had been

accused earlier in Nov. of using the same vehicle to injure his child's mother but was released on a \$1,000 bond.

Dozens Die in Russian Mine Blast—A methane explosion at the Listvyazhnaya coal mine in Russia in Siberia's Kemerovo region Nov. 25 killed 46 miners and six rescuers. In the aftermath, the mine group's owner and director were arrested for safety violations.

Michigan High School Shooting Kills Four—A 15-year-old was charged with terrorism and murder for a school shooting Nov. 30 in which four Oxford High School students were killed and seven more people, including a teacher, were injured, in Oxford, MI. Prosecutors also levied involuntary manslaughter charges against the parents of the student, identified as Ethan Crumbley, for failing to secure the semiautomatic handgun used and dismissing the school's concerns over their son's potential for violence. After attempting to evade arrest, both parents were taken into custody Dec. 4 in Detroit. The shooting was the 34th in a U.S. school in 2021, according to *Education Week*.

December 2021

National

Inflation Hits Near 40-Year High in Nov.; Jobless Claims Mark 50-Year Low; Other Economic News—Inflation continued to impact Americans' wallets, with the Bureau of Labor Statistics reporting Dec. 10 that its Consumer Price Index (CPI) climbed 6.8% from Nov. 2020 to Nov. 2021, the highest increase since 1982. Notable changes within the indicator included a 6.4% increase for groceries, 33.0% for overall energy, and 11.1% and 31.4%, respectively, for new and used cars. To combat inflation, the Federal Reserve in a mid-Dec. policy statement said it would end its coronavirus pandemic stimulus policies earlier than expected amid strong domestic economic growth and that it expected to raise near-zero interest rates three times in 2022. According to the Labor Dept. Dec. 3, the economy added a lower-than-anticipated 210,000 jobs in Nov., as the unemployment rate nevertheless fell to 4.2%; jobless claims in early Dec. reached their lowest level since 1969. The Bureau of Economic Analysis Dec. 22 in its final estimate for the third quarter of

2021 said that U.S. GDP grew at an annualized rate of 2.3%, down from 6.7% growth the prior quarter.

The Dow Jones Industrial Average closed Dec. at 36,338.30, up 5.4% from Nov., while the Nasdaq Composite Index gained 0.7% to close at 15,644.97. The S&P 500 finished the month at 4,766.18, a 4.4% increase. In 2021, the Dow was up over 18.7% for the year, the tech-heavy Nasdaq gained 21.4%, and the S&P 500 surged for 26.9% growth.

Former Trump Chief of Staff Held in Contempt for Defying Capitol Insurrection Probe—The House Dec. 14 passed a resolution recommending criminal contempt charges against Mark Meadows, former Pres. Donald Trump's chief of staff, for defying a subpoena to testify to the chamber's committee probing the Jan. 6 attack on the U.S. Capitol. Approved 222-208 with all but two Republicans—Reps. Liz Cheney (WY) and Adam Kinzinger (IL)—in opposition, the measure followed Meadows's announcement a week earlier that he was reversing his decision to cooperate with the panel, citing executive privilege, despite previously providing roughly 9,000 documents to the committee, including text messages from Donald Trump Jr., Fox News hosts, and GOP members of Congress.

On Dec. 9, a federal appeals court unanimously denied Trump's attempt to block Congress from obtaining some White House records pertaining to the Jan. 6 attack, setting the stage for a showdown over the matter in the Supreme Court.

U.S. Exceeds 800,000 Pandemic Deaths as Omicron Variant Spreads; Other COVID-19 News—The U.S. Dec. 14 exceeded 800,000 deaths from COVID-19, approx. 75% of which were among people 65 years and older according to the CDC. The grim milestone came as the highly contagious Omicron (B.1.1.529) strain of the virus named by the World Health Org. in late Nov. spread widely, pushing U.S. case numbers to more than 54.9 mil (with 825,017 deaths) by the end of Dec. By Jan. 1, the CDC estimated that Omicron made up nearly 51% of new COVID-19 cases and reported an unprecedented seven-day-average of 396,000+ new confirmed daily cases on Dec. 31—up more than 64% over the prior seven-day average—after a record-shattering 602,600+ documented infections

the day before. Many municipalities reinstated or expanded restrictions, including an indoor statewide mask mandate, Dec. 15, by California Gov. Gavin Newsom (D), and a sweeping vaccine requirement for private sector employees by outgoing New York City mayor Bill de Blasio (D), in effect Dec. 27. Beginning Dec. 6, all international airline passengers arriving in the U.S. were required to show a negative coronavirus test result to gain entry.

Life expectancy in the U.S. declined by 1.8% in 2020 to 77 years, the greatest one-year drop in 75 years, as COVID-19 moved in line behind heart disease and cancer as the third leading cause of death. An NPR analysis found that people residing in counties that voted 60% or more for Pres. Trump in the 2020 election were 2.73 times more likely to die from COVID-19 since May 2021 (when vaccines became readily available) than residents of counties that voted for now-Pres. Joe Biden; misinformation over vaccines and masking was blamed for the differences. As of Dec. 30, 65.9% of Americans 5 years or older were fully vaccinated; 36.3% of those 18 years and older had received a COVID-19 booster shot. On Dec. 22 the FDA granted Pfizer emergency use authorization for the COVID-19 oral antiviral, Paxlovid, the first at-home treatment approved by the agency.

International

Biden and Putin Hold Virtual Summit Over Ukraine-Russia Tension—U.S. Pres. Joe Biden reportedly warned Russian Pres. Vladimir Putin during a two-hour video summit Dec. 7 that an attack by Russia on neighboring Ukraine would lead to burdensome sanctions, defensive assistance to Ukraine, and realignment of NATO troops in Europe. Putin insisted on guarantees that NATO would not allow Ukraine to join as a member country and accused NATO of threatening Russia's security. Biden the following day ruled out sending U.S. troops to Ukraine as a deterrent to an invasion.

In mid-Dec., Putin announced additional demands deemed unacceptable by the U.S. and NATO, including the withdrawal of NATO military personnel/infrastructure from NATO member countries Estonia, Latvia, and Lithuania—all former Soviet republics—and

Poland, and a ban on the use of intermediate-range missiles in the region. With roughly 70,000 Russian troops poised near the Russia-Ukraine border, Putin continued to deny a possible offensive in Ukraine amid U.S. intelligence assessments that found otherwise, and a Dec. 30 phone call between Biden and Putin failed to lower tensions. On Dec. 13, Russia's intelligence service said it had arrested 106 Ukrainian neo-Nazi supporters in Russia who were planning attacks, allegations Ukrainian officials denied and called disinformation.

Since 2014, when Russia annexed Ukraine's Crimean Peninsula in an act almost universally denounced by the international community, ongoing fighting in eastern Ukraine's Donbas region between Russia-backed separatists and Ukrainian forces had killed more than 14,000 people.

Merkel Successor Sworn in as Germany's New Chancellor—Head of the center-left Social Democratic Party Olaf Scholz was sworn in Dec. 8 as Germany's chancellor, replacing Angela Merkel, who had served in that role for a near-record 16 years. Scholz, Merkel's finance minister and vice chancellor, received a clear majority of votes to lead an alliance with the Greens and the liberal Free Democratic Party (FDP). Formed after two months of negotiations following a close election that saw climate change emerge as the main issue among voters, the coalition pledged to phase out coal use by 2030 and greatly increase electric vehicle use. It also planned to legalize cannabis and increase the minimum wage. Merkel, who announced her planned retirement in 2018, was credited with steadily leading Germany amid challenges that included the euro zone debt crisis, an influx of more than a million migrants in 2015-16, and the ongoing coronavirus pandemic.

Omicron Variant Drives COVID-19 Caseloads; Other Pandemic News—Global cumulative confirmed cases of COVID-19 increased to nearly 287 mil (with over 5.4 mil deaths) by Dec. 31 according to the World Health Org., as the highly contagious strain of the coronavirus named Omicron (B.1.1.529) by WHO in late Nov. spread at what public health officials called an unprecedented rate. Detected in 77 countries by Dec. 14, Omicron before the end of the

month became a dominant strain, with multiple nations achieving record-high case totals. Although preliminary studies in the UK found patients infected with the Omicron variant to be significantly less likely to require hospitalization than those with the Delta strain (B.1.617.2), numerous governments hoping to forestall strained health care systems due to Omicron's much higher transmissibility reinstated restrictions; some EU countries began banning flights from the UK amid the surge there. Hong Kong also controversially mandated the use of a tracing app for residents under the age of 65. South Africa, where Omicron was first identified the month prior, eased its curfew Dec. 30 as officials reported subsiding infections, giving other countries hope their increasing caseloads would recede quickly after spiking.

As of Dec. 31, 49.4% of the world's population was fully vaccinated against COVID-19, according to Our World in Data, up from about 43.3% at the end of Nov. Stark differences in inoculation rates persisted between regions through the end of the year, with the European Union leading with 69.1% of its population fully vaccinated and Africa at a little over 9.1%. Ecuador Dec. 23 became the first country to mandate that all eligible adults be inoculated. More nations throughout Dec. advocated residents receive COVID-19 vaccine boosters, and Israel in late Dec. began administering fourth doses.

General

Indonesian Volcano Eruption Kills Dozens—Mount Semeru, the tallest peak on Indonesia's most populous island of Java, erupted Dec. 4, killing at least 48 people and displacing more than 10,000. According to geologists, heavy monsoon rains partially collapsed a dome of dried lava capping the 12,000+-ft-tall active volcano about 50 mi south of Surabaya, sending a plume of ash some 9 mi into the sky and burying several villages in more than 13 ft of volcanic debris. Over 5,200 houses/buildings were destroyed. In its present eruptive phase since 2014, the volcano continued to spew lava periodically throughout Dec.

Deadly Tornadoes Strike U.S. Midwest, Southeast—Nearly 70 tornadoes tore across 10 states the night of Dec. 10-11 in what was reportedly the deadliest U.S. Dec. outbreak on record, killing at least 90 people across five states, including at least 77 in western Kentucky and 6 employees at an Amazon warehouse in Edwardsville, IL. Most of the deaths in Kentucky, including 17 in Bowling Green and 9 at a candle factory in Mayfield, were attributed to a mile-wide EF-4 tornado that began in northwestern Tennessee and tracked over 165 mi—including 128 mi on the ground in Kentucky—the longest on record in the U.S. since 1975. Leveling most of Mayfield and about half of Dawson Springs, KY, the tornado, along with others that weekend, caused \$4 bil in damages according to NOAA estimates.

On Dec. 15, close to 100 tornadoes reported in the upper Midwest and Great Plains were blamed for the deaths of at least five people, due mostly to storm-related vehicle crashes.

NYCFC Claims MLS Cup Championship—New York City FC defeated the Portland Timbers, 4-2, at Providence Park stadium in Portland, OR, Dec. 11, to claim the seven-year-old franchise's first Major League Soccer Cup. Tied 1-1 at the end of regulation, the teams remained deadlocked after 30 min. of extra time, forcing a penalty shoot-out during which goalie Sean Johnson pulled off two saves that earned him Cup MVP designation.

NASA Craft Reaches Sun—NASA's Parker Solar Probe became the world's first spacecraft to reach the sun's upper atmosphere, agency scientists announced Dec. 14 at an American Geophysical Union meeting. Launched in 2018, the probe first crossed into the sun's corona Apr. 28 for about five hours.

Typhoon Rai Kills Hundreds in Philippines—Typhoon Rai killed more than 400 people in the southern Philippines after making landfall Dec. 16 on Siargao Island with sustained winds over 120 mph and gusts of nearly 170 mph. The 15th and deadliest tropical storm to affect the country in 2021, Rai struck six other provinces Dec. 16-17, destroying or damaging some 1.5 mil homes according to the International Federation of the Red Cross and Red Crescent Societies, leaving an estimated 2.4 mil people in need of

humanitarian assistance by early Jan. The Philippines national disaster office estimated damages of approx. \$500 mil.

Epstein Accomplice Convicted of Sex-Trafficking—More than two years after the death of convicted pedophile Jeffrey Epstein, a New York City jury Dec. 29 found his partner, British socialite Ghislaine Maxwell, guilty on five of six federal sex-trafficking charges. Prosecutors alleged Maxwell lured and groomed girls as young as 14 for Epstein to abuse in 1994-2004. During the two-week trial, four accusers alleged Maxwell sometimes abused them as well. Maxwell was sentenced June 28, 2022, to 20 years in prison.

Colorado Grass Fire Destroys 1,000+ Homes—The most destructive wildfire in Colorado history ignited Dec. 30 about 20 mi northwest of Denver, killing one person and destroying close to 1,100 homes before snowfall helped extinguish it the following day. Dubbed the Marshall Fire, the grass-fed blaze torched more than 6,000 acres within hours, spread by dry conditions and hurricane-force winds. Officials said the low loss of life was “miraculous” and credited the quick evacuation by some 30,000 residents of Boulder County’s Superior and Louisville; Boulder County officials assessed the damage at over \$513 mil.

January 2022

National

Biden Delivers Address on Capitol Attack Anniversary; Committee Investigation Proceeds; Other Developments—Speaking at the U.S. Capitol on the one-year anniversary of the deadly attack there by supporters of then-Pres. Donald Trump, Pres. Joe Biden Jan. 6 said Trump had created a “web of lies about the 2020 election” because he “values power over principle.” A CBS News/YouGov poll conducted Dec. 27-30, 2021, showed that among the public, 85% of Democrats believed the Jan. 6 events were an “insurrection” compared to 21% of Republicans, 56% of whom believed those who participated were “defending freedom.” As of Dec. 30, more than 725 people had been charged federally in connection with the attack and 31 had been jailed.

News reports revealed Trump Attorney Gen. William Barr and key members of former Vice Pres. Mike Pence's staff had testified or spoken with the House select committee investigating Jan. 6, but House minority leader Kevin McCarthy (R, CA) and Rep. Jim Jordan (R, OH) declined to cooperate. The U.S. Supreme Court Jan. 19 rejected Trump's claim of executive privilege to block the National Archives from releasing to congressional investigators 700+ pages of documents including—as Politico revealed days later—an unsigned draft executive order instructing the military to take control of voting machines.

Inflation Continues at Near 40-Year High in Dec.; Theranos Founder Convicted; Other Economic News—Elevated inflation persisted, with the Bureau of Labor Statistics reporting Jan. 12 that its Consumer Price Index (CPI) rose 7.0% from Dec. 2020 to Dec. 2021, the highest rate since mid-1982. Within the indicator, increases included a 6.5% jump in prices for groceries, 29.3% for overall energy (after a 7% drop in 2020), and price hikes for new and used cars of 11.8% and 37.3%, respectively. U.S. home prices surged 18.8% throughout 2021, according to the S&P CoreLogic Case-Shiller home price indices, the biggest calendar-year increase in 34 years of tracking. Average rent also spiked, up 10.1% in 2021 nationwide over the year prior, according to [Realtor.com](https://www.realtor.com). Wages increased 4.7% in 2021, well below the rate of inflation. The unemployment rate dropped to a pandemic low 3.9% in Dec. as the U.S. added a lower-than-predicted 199,000 jobs, bringing new job creation in 2021 to a record annual high 6.4 mil total as the pandemic recovery continued. (There were still about 3.6 mil fewer jobs than in Feb. 2020.) Meanwhile, a record 47.4 million workers voluntarily quit their jobs in 2021.

A California jury Jan. 3 ruled that Elizabeth Holmes, founder of the blood-testing startup Theranos, was guilty of 4 of 11 fraud charges related to claims to investors. Once valued at \$9 bil, Theranos was found in a 2015 *Wall Street Journal* investigation to have falsified claims of its testing accuracy and use; the 15-year-old company shut down in 2018.

For the first time since 1931, General Motors in 2021 ranked second in U.S. auto sales (behind Toyota). Apple Jan. 3 become the first publicly traded company to reach \$3 tril market valuation, just 16 months after reaching the \$2 tril mark. Microsoft announced plans Jan. 18 to acquire gaming leader Activision Blizzard for \$68.7 bil. The Dow Jones Industrial Average closed Jan. at 35,131.86, down 3.3% from Dec.; the Nasdaq Composite Index dropped 9.0% to close at 14,239.88; and the S&P 500 finished the month at 4,515.55, a -5.3% change.

Omicron Variant Infections Skyrocket; Supreme Court Blocks Vaccine Mandate; Other COVID-19 News—The highly contagious Omicron (B.1.1.529) strain of the coronavirus catapulted infection rates to unprecedented levels, including a seven-day moving average of daily U.S. cases exceeding 800,000 leading up to an approximate peak on Jan. 15, according to the CDC. Over the second half of the month, new infections decreased markedly in the places first affected by Omicron (including California, Florida, Illinois, and New York City and the Northeast). Though experts considered the strain milder than the Delta variant (B.1.617.2), the exponentially larger caseload strained hospitals, with daily COVID-19 hospitalizations reaching a record high 160,000 mid-month. The seven-day daily average for COVID-19 deaths exceeded 2,630 by Jan. 27, the highest in nearly a year. At the close of the month, the CDC reported nearly 75.2 mil cumulative U.S. cases (with 891,637 deaths), up almost 37% from Dec. The surge caused a temporary shortage of workers and subsequent disruptions in key industries, including transit and air travel. More than 70 colleges and universities in 26 states returned to virtual learning, as did some large public schools. Chicago Public Schools system teachers staged a walkout over coronavirus safety protocols that closed schools for five days before an agreement was reached Jan. 10.

Americans faced a shortage of at-home rapid tests, as well as overbooked testing centers, prompting Pres. Joe Biden, among other capacity boosting measures, to allot households up to four free at-home tests. The U.S. Supreme Court Jan. 13 struck down (6-3) as overreach the Biden administration's vaccine-or-test mandate for

private companies with 100 or more employees, which would have affected roughly 84 mil Americans. Even so, Citigroup terminated unvaccinated employees at the end of Jan., making it the first major Wall Street bank to impose its own mandate. As of Jan. 31, 63.8% of all Americans were fully vaccinated, 41.5% of whom had received a booster dose.

Republicans Thwart Federal Voting Rights Reform—For the fifth time in six months, Senate Republicans Jan. 19 employed the filibuster to block Democrats' efforts to pass sweeping federal voting rights legislation. The House in Aug. 2021 had passed a similar federal voting rights bill. The law—aimed in part at invalidating recent GOP-led state voting laws said to suppress voting mainly by Black, minority, and underprivileged Americans—was supported by all 50 Democrats, far short of the 60 votes required to override the filibuster. That same evening, Sens. Kyrsten Sinema (D, AZ) and Joe Manchin (D, WV) joined Republicans voting in opposition to lowering the filibuster threshold to 50 votes. According to the Brennan Center for Justice, 19 states passed 34 restrictive voting laws in 2021, and as of Jan. 14, more than 250 such bills were pending in state legislatures.

Supreme Court Justice Breyer Announces Retirement—U.S. Supreme Court Justice Stephen G. Breyer confirmed he planned to retire at the end of the current term in a letter to Pres. Biden Jan. 27, paving the way for Biden to appoint a successor. The 83-year-old Breyer, who was nominated by former Pres. Bill Clinton in 1994, usually voted with the Court's liberal bloc. He was described by legal scholars as a judicial pragmatist, as demonstrated in nuanced opinions over 1st Amendment challenges; he also authored strong dissents against the death penalty and 2nd Amendment expansion. Reiterating a campaign pledge, Biden said he would nominate the first Black woman to serve on the Court.

International

Kazakhstan Govt. Resigns as Violent Protests Leave 200 Dead—Initially peaceful protests that started in Kazakhstan Jan. 2 over sharply rising fuel prices resulted in about 230 people dead

(including 19 police/military personnel) within days, marking the most violent demonstrations in the authoritarian former Soviet republic since it gained independence three decades earlier. Spreading nationwide from the oil-producing city of Zhanaozen, the demonstrations reportedly drew people also opposing income inequality, high unemployment, and corruption. Almaty, the country's largest city, experienced the most unrest, with civilians reportedly looting, burning a government building and security vehicles, and attacking police. Amid the rising violence, Pres. Kassym-Jomart Tokayev declared a state of emergency Jan. 5, and the government of Prime Min. Askar Mamin resigned. Rights groups alleged police were using excessive force, including torture, and criticized Tokayev's Jan. 7 order for police to shoot without warning. Troops from the Russia-led Collective Security Treaty Organization aided police, and Tokayev Jan. 10 declared order restored.

U.S., Europe Brace for Russian Invasion of Ukraine—The Pentagon Jan. 24 put 8,500 U.S. troops on high alert for deployment to Eastern Europe as part of a NATO effort to strengthen the alliance's eastern borders, as a Russian offensive in Ukraine looked inevitable. The development, which Russia criticized as NATO aggression, followed multiple diplomatic efforts, including Russia-NATO talks Jan. 12 in Brussels and Jan. 13 in Vienna, among the larger Organization for Security and Co-operation in Europe. Ukraine Jan. 14 reported a cyberattack, which Kyiv's information security service blamed on Russia, on roughly 70 federal and local government websites. With Russian troops along the Russia-Ukraine border numbering more than 100,000 in Jan., the Kremlin continued to demand NATO guarantee it would never admit Ukraine as a member and pull back its military from Central and Eastern Europe, both of which NATO refused. U.S. intelligence officials Jan. 14 had accused Russia of preparing a so-called false flag operation to legitimize an invasion. U.S. Pres. Biden in late Jan. told Ukrainian Pres. Volodymyr Zelenskyy that Russia could invade the following month, but Russian Foreign Min. Sergey Lavrov denied any such plans.

Among other developments, the Biden administration permitted the three Baltic countries to send U.S.-made weapons to Ukraine, and on Jan. 23 the U.S. State Dept. ordered its diplomats' families to evacuate Ukraine and withdrew nonessential embassy staff.

Burkinabe Soldiers Overthrow President—Military officers in Burkina Faso staged a coup Jan. 24, arresting and detaining second-term Pres. Roch Marc Christian Kaboré in the national capital, Ouagadougou. The new military leadership suspended parliament and the constitution and instituted a nationwide curfew, a day after mounting protests at several military bases called on Kaboré to overhaul his administration's fight against Islamic insurgents. (Since 2015, violence by jihadists had killed more than 2,000 people in Burkina Faso and displaced some 1.5 mil.) By the end of the month, both the African Union and Economic Community of West African States (ECOWAS) had suspended Burkina Faso's membership. The takeover marked West Africa's fourth coup in less than two years.

Omicron Variant Spikes; Other Global Pandemic News—Global cumulative confirmed cases of COVID-19 increased to more than 376 mil (with close to 5.7 mil deaths) by Jan. 31 according to the World Health Org., a 31% jump from the end of the previous month, driven by the highly contagious Omicron strain (B.1.1.529) of the coronavirus. Though deaths over the same period increased at a much lower rate (less than 4.5%), the heavy volume of cases caused hospitalizations to spike in numerous countries, and a number of governments passed more stringent vaccination status-based restrictions, including in Greece (monthly fines for unvaccinated people over 60), the Philippines (unvaccinated individuals not permitted on public transport), and France and Italy (proof of vaccination required to use public transit or enter many public places). In the UK, anger continued to swell over "Partygate," involving government staff parties—including two reportedly attended by Prime Min. Boris Johnson—during 2021-21 lockdown periods.

As of Jan. 31, 52.9% of the world's population was fully vaccinated against COVID-19, according to Our World in Data, up

from about 49.4% at the end of Dec. 2021. The regional difference continued to be stark, with 71.2% of the European Union population fully vaccinated, and Africa trailing all other regions, at 10.7% vaccinated.

General

Man Receives First Pig-to-Human Heart Transplant—Marking a medical first, doctors Jan. 7 at the Univ. of Maryland Medical Center in Baltimore transplanted a heart from a genetically modified pig into a human. Though the 57-year-old patient died two months later, the transplant was initially declared successful and eclipsed the previous breakthrough in cardiac “xenotransplantation” set in 1984, when California infant Baby Fae lived 21 days with a baboon’s heart. Ineligible for a human heart transplant, the recipient underwent the experimental surgery under “compassionate use” FDA authorization.

Apartment Fires Kill Nearly 30 in New York, Philadelphia—A fire in a 19-story apartment building in the Bronx, New York, killed at least 17 people, including 8 children, Jan. 9. Sparked by a malfunctioning space heater, the blaze was reportedly contained to the third floor, but a door that did not automatically close as legally required caused smoke to disperse throughout upper floors. Four days earlier, a fire in a three-story rowhouse in Philadelphia that was owned and operated by the city’s housing authority killed 12 people, including 8 children.

***Power of the Dog*, *Succession* Big Winners at Untelevised Golden Globes**—The Hollywood Foreign Press Assn. (HFPA) awarded best drama film to *The Power of the Dog* and best musical/comedy to Steven Spielberg’s *West Side Story* remake at a markedly scaled down, untelevised, and unstreamable 79th Golden Globe Awards ceremony Jan. 9. Among TV awards, HBO’s *Succession* won best TV drama, and HBO’s *Hacks* earned best comedy series.

NBC announced the year prior that it would not broadcast the 2022 awards show amid accusations of financial impropriety and lack of transparency and diversity in the HFPA.

Georgia Triumphs in College Football Championship—The Univ. of Georgia Bulldogs won their first College Football Playoff title since 1980, dethroning the defending champion Univ. of Alabama Crimson Tide, 33-18, at Lucas Oil Stadium in Indianapolis, IN, Jan. 10. Former walk-on quarterback Stetson Bennett, the game's offensive MVP, completed 17 of 26 passes for 224 yards and two touchdowns. Georgia's win ended a 14-year losing streak to Bama.

Australia Deports Unvaccinated Djokovic Ahead of Open; Barty, Nadal Take Singles Titles—Defending Australian Open men's singles champ Novak Djokovic of Serbia was deported from Australia Jan. 16, the same day a three-judge panel unanimously upheld revocation of Djokovic's visa over his not being vaccinated for COVID-19. The legal action capped a roughly two-week saga that began after Tennis Australia controversially granted the No. 1-ranked superstar a medical exemption due to Djokovic's claim he had recovered from the virus in Dec. Though Victoria's state government allowed the exemption, the federal government canceled it Jan. 6 and held Djokovic in temporary detention. Djokovic days later admitted he gave false information on travel documents.

Top-ranked Ashleigh Barty routed No. 27-seed American Danielle Collins in straight sets (6-3, 7-6) in the Australian Open women's singles final at Rod Laver Arena in Melbourne, Jan. 29, to claim her third major title. Barty was the first Australian (male or female) to win the tournament since 1978. The following night, No. 6-seed Rafael Nadal of Spain rallied after losing the first two sets to No. 2-seed Russian Daniil Medvedev, winning (2-6, 6-7, 6-4, 6-4, 7-5) in a marathon 5 hr., 24 min. match that gave Nadal his men's record 21st Grand Slam singles win.

"Big Papi" Elected to Baseball Hall of Fame—The Baseball Writers' Assn. of America elected slugger David Ortiz to the National Baseball Hall of Fame Jan. 25. Ortiz hit 541 home runs over 20 seasons primarily with the Boston Red Sox and was a 10-time All-Star and 3-time World Series champ. The Dominican Republic native was selected in his first year on the ballot with 77.9% of the vote. On Dec. 5, 2021, former players Gil Hodges, Jim Kaat, Minnie Miñoso, and Tony Oliva were chosen by the Golden Days Era Committee;

Bud Fowler and Buck O'Neil were elected by the Early Baseball Era Committee.

February 2022

National

U.S. Passes 900,000 Coronavirus Deaths; Omicron Wave Recedes; Other Pandemic News—The U.S. exceeded 900,000 cumulative COVID-19 deaths Feb. 3 according to the CDC, as new infections plunged to a seven-day daily average of 349,000, down from more than twice that level almost three weeks earlier, at the crest of the pandemic's largest wave yet, fueled by the highly contagious Omicron (B.1.1.529) strain. (Average daily deaths also declined in Feb. from a pandemic-high 4,200+ on Feb. 1.) By the close of the month, the agency's reported seven-day daily average fell to just over 65,000 cases, while total confirmed cases reached nearly 79 mil (with 954,427 deaths). All but a handful of states by mid-Feb. had lifted mask mandates, but the CDC Feb. 25 recommended Americans in approximately 30% of counties—those continuing to report high transmission levels—wear masks indoors.

By Feb. 28, 65.4% of Americans were fully vaccinated, according to Our World in Data. The CDC in early Feb. released data showing that, as of Dec. 4, 2021, Americans fully vaccinated with a booster shot were 97 times less likely to die from COVID-19 than those unvaccinated, compared to a 14-fold lower rate for those fully vaccinated but not boosted. Nevertheless, only 29.3% of the population had received boosters by Feb. 28.

Inflation Reaches Four-Decade High; Remington Agrees to Historic Mass-Shooting Payout; U.S. Soccer Settles Equal Pay Lawsuit; Other Economic News—Inflation continued to surge, with the Bureau of Labor Statistics (BLS) reporting Feb. 10 that its Consumer Price Index (CPI) rose 7.5% from Jan. 2021 to Jan. 2022, the largest 12-month increase since Feb. 1982. Within the indicator, prices for food rose 7.0%; overall energy increased 27.0%, with gasoline up 40.0%; and new and used car prices up 12.2% and 40.5%, respectively. The BLS reported Feb. 4 that the economy added 467,000 jobs in Jan. and revised upward growth in Nov. and

Dec. by a combined 709,000 jobs. The unemployment rate ticked up a tenth of a point to 4.0%. Shares of Facebook's parent company, Meta, fell 26.4% on Feb. 3, a day after it reported Facebook's first drop in daily users. The \$232 bil loss was the largest one-day valuation drop in U.S. stock market history. The Dow Jones Industrial Average experienced a roller-coaster month, closing Feb. at 33,892.60, -3.5% from Jan. The Nasdaq Composite Index dropped 3.4% to close at 13,751.40, while the S&P 500 finished the month at 4,373.94, a 3.1% loss.

Gun manufacturer Remington Feb. 15 agreed to pay \$73 mil to families of 9 of the 26 victims killed in the Sandy Hook, CT, elementary school shooting in 2012, in the reportedly largest settlement by a gunmaker over a mass shooting. U.S. women's national soccer team members Feb. 22 reached a \$24 mil settlement with the U.S. Soccer Federation on guaranteeing equal pay with the men's team and providing back pay. Drug maker Johnson & Johnson and wholesalers AmerisourceBergen, Cardinal Health, and McKesson agreed Feb. 24 to pay a combined \$26 bil to settle roughly 3,000 lawsuits by 46 states and over 7,000 local governments over the companies' alleged roles in the opioid crisis.

Supreme Court Ends Trump Bid to Shield Records; Other Trump Administration News—The Supreme Court Feb. 22 rejected former Pres. Donald Trump's appeal to block the House Select Committee investigating the Jan. 6, 2021, attack on the U.S. Capitol from accessing records from his last weeks in the White House, over which he had claimed executive privilege. Earlier in the month, the Republican National Committee censured GOP Reps. Liz Cheney (WY) and Adam Kinzinger (IL) for participating in the investigation. On Feb. 10, the House Oversight Committee launched an investigation into reports Trump illegally moved 15 boxes of official White House records to his Mar-a-Lago, FL, residence, and attempted to destroy others.

International

U.S. Raid in Syria Kills ISIS Chief—Islamic State leader Abu Ibrahim al-Hashimi al-Qurayshi died Feb. 3 in an overnight U.S. raid

on a residence in northwestern Syria. Preempting capture, Qurayshi detonated explosives that killed himself, his wife, and his two children. A senior ISIS deputy was also killed in the raid. Qurayshi replaced ISIS founder Abu Bakr al-Baghdadi as leader in Oct. 2019 after Baghdadi's death in a U.S. operation. Qurayshi was said to have played a key role in the mass killing of the Yazidi religious minority in Iraq in 2014 and, more recently, a late-Jan. 2022 prison break in al-Hasakah, Syria, that freed some 90 ISIS fighters—most since recaptured, according to Syrian Democratic Forces officials—and led to U.S.-led coalition air strikes.

Russia Invades Ukraine in Sweeping Attack—Russian forces numbering more than 150,000 launched widespread strikes on neighboring Ukraine Feb. 24—primarily from Belarus in the north, annexed Crimea in the south, and Russia to the east—in a full-scale invasion following months of official denials from Russian Pres. Vladimir Putin of an impending attack. Though most initial targets were military in nature, Russian missiles and artillery also struck civilian and residential targets, with blasts reported in the country's three largest cities (Kyiv, the capital, in the north; Kharkiv in the northeast; and Odesa on the southwestern coast). Russia quickly took control of strategic Hostomel air base, just 20 mi northwest of Kyiv, despite major resistance from Ukrainian forces. Russian troops also captured the contaminated former nuclear plant at Chernobyl in far northern Ukraine and reportedly held staff hostage.

Ukrainian Pres. Volodymyr Zelenskyy suspended diplomatic relations with Russia, declared nationwide martial law, activated reservists, and ordered a general military mobilization—including conscription and the prohibition of men aged 18-60 from leaving the country—and promised weapons to any civilian wanting to defend Ukraine. By midafternoon Feb. 24, some 100,000 Ukrainians had already left their homes, according to the UN Refugee Agency.

Immediately preceding the invasion, the largest attack in Europe since World War II, Putin delivered a televised address declaring the start of a “special military operation” to end what he said was Ukrainian “genocide” against Russian speakers in the eastern region of Donbas, where Russia-backed separatists had been fighting

Ukrainian forces since 2014. Western observers dismissed Putin's repeated accusations of ethnic cleansing, along with his claim that Ukraine's military was led by neo-Nazis, as propaganda. Putin said Russia's aim was to "demilitarize" Ukraine, leaving open the possibility of a long conflict given early and continued pledges by the U.S., NATO, and non-NATO EU nations to supply the greatly outgunned and outnumbered Ukraine with heavy weapons, including anti-tank/antiaircraft systems, tanks, and helicopters. U.S. Pres. Joe Biden Feb. 25 approved \$350 mil in security assistance, pushing the past year total to over \$1 bil.

Numerous nations condemned the attack and ramped up economic sanctions against Russia. The U.S., Canada, Japan, and the EU froze Russian central bank assets and wealth funds under their discretion and banned Russian banks from using the SWIFT electronic money transfer system. A number of corporations liquidated their Russian assets, including British Petroleum's nearly 20% stake in Russian-owned oil company Rosneft. Canada became the first G7 member to ban imports of Russian oil, and Germany suspended its portion of the Nord Stream 2 pipeline. By the end of trading Feb. 28, Russia's currency, the ruble, reached a record low, losing 30% of its value at one point.

Russian troops by the close of Feb. reportedly began to encircle and attempt to enter Kyiv while continuing to direct missile and artillery attacks against it, heavily damaging multiple high-rise residences, as they awaited a reportedly 40-mi convoy of tanks and artillery from Belarus. Nonetheless, Ukrainian forces maintained control of the capital as local officials reported fierce battles in surrounding towns and notably held off a takeover of Kharkiv, the site of intense street-level fighting. The Ukrainian military said it had damaged Russian fuel and ammunition supply lines, while Russian military officials said their forces had successfully blockaded the strategic southern port cities of Kherson and Berdyansk and, Feb. 27, launched a first attack on Mariupol. Both NATO and the U.S. declined Pres. Zelenskyy's request to enforce a no-fly zone over Ukraine; a day after the invasion, Zelenskyy had criticized Western leaders for inaction.

By the end of Feb., Ukrainian officials estimated Russian actions had killed over 350 civilians (a number believed to be much higher), and in early Mar. reported roughly 9,000 Russian personnel killed (with a much lower 498 reported by Russian officials, who claimed nearly 3,000 Ukrainian troops had been killed). Between 3,000 and 6,000 anti-war activists had been detained in Russia since the start of the invasion. As of Feb. 28, more than 500,000 Ukrainians had crossed into neighboring countries, a majority into Poland, as refugees.

Omicron Variant Spike Ebbs; Trucker Convoy Challenges Canada's Vaccine Requirements; Other Pandemic News—Global cumulative confirmed cases of COVID-19 increased to roughly 435 mil (with nearly 6 mil deaths) by Feb. 28 according to the World Health Org., a 16% increase from the beginning of Feb., as nearly all countries reported decreasing daily infections of the highly contagious Omicron strain (B.1.1.529). The Western Pacific region, the only area that saw accelerating cases throughout most of Feb., recorded seven-day jumps of 29% and 32% over the latter two weeks ending Feb. 27. (Hong Kong, Indonesia, Japan, Malaysia, New Zealand, and South Korea all reported record daily cases.) European countries loosened restrictions on the downswing of Omicron surges.

Prime Min. Justin Trudeau, on Feb. 14, became Canada's first leader to apply an emergency act, passed 34 years earlier, to break up a "freedom convoy" of truck drivers and their supporters that had blocked downtown Ottawa since late Jan., to protest border-crossing vaccine requirements. Police started arresting demonstrators Feb. 17, and Trudeau lifted the emergency order Feb. 23 amid waning protests. Earlier in the month, Canadian police cleared demonstrators from the Ambassador Bridge linking Windsor, ON, to Detroit, MI (through which 25% of all U.S.-Canadian trade crosses), after they blockaded it for nearly a week protesting coronavirus-prevention measures.

As of Feb. 28, close to 55.7% of the world's population was fully vaccinated against COVID-19, according to Our World in Data.

General

Ancient Child's Tooth Turns Back Clock on Humans' Arrival in Europe—According to a study published Feb. 9 in *Science Advances*, a fossilized child's molar dating to 54,000 years ago, found in a cave in southeastern France, suggests modern humans may have lived in Europe nearly 10,000 years earlier than researchers previously estimated. The discovery at the cave Grotte Mandrin was notably unearthed between strata of Neanderthal remains, suggesting a more complex coexistence between the two hominid species than was commonly thought.

Rams Victorious at Super Bowl; Other NFL News—The Los Angeles Rams overcame the Cincinnati Bengals, 23-20, at SoFi Stadium in Inglewood, CA, to win Super Bowl LVI on Feb. 13. The Rams' second title was their first based in L.A. and followed a back-and-forth nail-biter that saw Los Angeles maintain its lead through the first half, relinquish it in the third quarter, and seize it back with just 1:25 remaining. Wide receiver Cooper Kupp was named the Super Bowl MVP, with eight receptions for 92 yards and two touchdowns, including the winning catch. The broadcast, which included a halftime show headlined by Dr. Dre, Snoop Dogg, Eminem, Mary J. Blige, and Kendrick Lamar, was watched by an average 112.3 mil viewers, up over 16% from 2021.

The Washington Football Team franchise Feb. 2 announced its new name, the Commanders, replacing the Redskins name it had discontinued in mid-2020 after 87 years. Former Miami Dolphins head coach Brian Flores filed suit Feb. 1 against the NFL and three of its teams, claiming racist hiring and interview practices against Black coaches.

Flooding, Mudslides Kill Over 200 in Brazil—Torrential rains triggered heavy flooding and massive landslides that killed over 230 people in Petrópolis, Brazil, Feb. 15. The mountainous city of roughly 300,000 residents was doused with over 10 in. of rain within three hours, according to state officials. Landslides in two other Brazilian states—Minas Gerais and São Paulo—killed more than 40 people the month prior.

Cindric Claims Daytona 500—Austin Cindric won the 64th Daytona 500 on Feb. 20 in Daytona, FL, holding off Bubba Wallace by just 0.036 sec. in a two-lap overtime shootout following multiple late-race fender benders and restarts, including a crash that eliminated then-frontrunner Ricky Stenhouse Jr. with just six laps remaining. Leading 21 of the last 45 laps in just his eighth Cup Series start, the 23-year-old Cindric was technically the first rookie to triumph at Daytona.

Norway Wins Big at XXIV Olympic Winter Games—Nearly 2,900 athletes from about 90 countries competed in 109 events at the XXIV Winter Olympic Games hosted Feb. 4-20 in and outside of Beijing, China. As was the case with the Tokyo Summer Olympic Games held less than seven months earlier, athletes were forbidden from leaving the Olympic Village other than for competitions held with limited spectators due to the ongoing coronavirus pandemic. At least 10 countries, including the U.S., UK, and Canada, boycotted the games diplomatically, sending athletes but no official representatives over accusations of severe human rights abuses by China against its Uyghur Muslim population. Norway, for the second straight Winter Olympics, led the medal count, with 37 medals: 16 gold, 8 silver, 13 bronze. The Russian Olympic Committee (ROC), comprised of Russians competing as “neutral” athletes due to Russia’s World Anti-Doping Agency ban, was second overall, with 32 medals (6-12-14), ahead of Germany (27; 12-10-5), Canada (26; 4-8-14), and the U.S. (25; 8-10-7).

Norwegian biathlete Johannes Thingnes Boe won a Beijing-high four golds, while Dutch speed skater Ireen Wüst became the only athlete to win an individual gold medal at five separate Olympics after narrowly claiming the women’s 1,500-m race. Among top-performing Americans, Erin Jackson became the first Black woman to medal in speed skating, winning the 500-m race; dominant figure skater Nathan Chen won the men’s individual event; and bobsledder Elana Meyers Taylor earned her fifth Olympic medal, the most by a Black Winter Olympian. The least watched Winter Olympics in U.S. television history, the event drew an average total audience of 11.4 mil viewers, down 40% from 2018.

Beijing's Olympic venues also hosted the Paralympic Games, Mar. 4-13, at which some 564 athletes with disabilities from 46 countries competed in 78 events across six sports. The Chinese team finished first, with 61 medals (18 gold, 20 silver, 23 bronze), followed by Ukraine (29; 11-10-8), Canada (25; 8-6-11), and the U.S. (20; 6-11-3). Russian and Belarussian athletes were banned by the International Paralympic Committee over Russian's invasion of Ukraine.

March 2022

National

Inflation Reaches 40-Year High; Puerto Rico Concludes 5-Year Bankruptcy; Other Business News—Increases in gas, food, and housing prices pushed inflation higher, with the Bureau of Labor Statistics (BLS) reporting Mar. 10 that its Consumer Price Index (CPI) rose 7.9% from Feb. 2021 to Feb. 2022. Energy prices jumped further in Mar. amid Russia's continuing invasion of Ukraine, pushing Brent crude oil prices to an almost 14-year closing high of \$123.2 per barrel Mar. 7. Aiming to slow inflation, the Federal Reserve Mar. 16 approved a 0.25% benchmark interest rate hike, the first since Dec. 2018. The BLS Mar. 4 reported that the economy added 678,000 jobs in Feb., moving the country to within 2.1 mil jobs of pre-COVID-19 job levels at the same time the unemployment rate fell to a pandemic-era low of 3.8%. The Bureau of Economic Analysis's revised GDP figures, released Mar. 30, showed that in the fourth quarter of 2021, real GDP grew at an annual rate of 6.9%, compared to 2.3% the previous quarter. The Dow Jones Industrial Average closed Mar. at 34,678.35, up 2.3% from Feb., while the Nasdaq Composite Index gained 3.4% to close at 14,220.52; the S&P 500 finished the month at 4,530.41, up nearly 3.6%.

Puerto Rico formally exited bankruptcy Mar. 15 after finalizing the largest debt restructuring plan in U.S. history. The island territory declared bankruptcy in 2017 after announcing in 2015 it was unable to pay more than \$70 bil in public debt and \$50 bil in public pension obligations following years of massive borrowing, driven by negative

economic growth due to factors including the 2006 loss of advantageous federal tax incentives for U.S. manufacturers.

Pres. Biden Signs First Major Spending Bill, Delivers First State of the Union—Pres. Joe Biden signed a \$1.5-tril spending bill Mar. 15 that funded the federal government through Sept. The bill provided \$730 bil in non-defense spending, an increase of 6.7% from fiscal year 2021; funding for opioid crisis response and law enforcement; \$13.6 bil in assistance to Ukraine; and the reauthorization of the Violence Against Women Act that expired in 2019. Other budget priorities included \$782 bil in defense spending, up 5.6%; Congress also included historic cybersecurity reporting requirements for federal agencies and critical infrastructure providers. After months of negotiations requiring the passage of several stopgap bills, the omnibus bill's final version passed quickly through the House, on a 361-69 vote Mar. 9, a day before the Senate approved it, 68-31.

For FY 2023, Biden Mar. 28 unveiled a \$5.8-tril federal budget proposal that the White House said would reduce the deficit over the next decade by more than \$1 tril while increasing military and domestic spending by about 4% and 7%, respectively. Paid for in part by \$2.5 tril in tax increases on corporations and wealthy Americans that would reverse parts of the 2017 tax reform bill, Biden's proposal did not contain some popular elements of his stalled Build Back Better Act, such as paid family leave and universal pre-kindergarten. (In early Feb., swing vote Sen. Joe Manchin [D, WV] proclaimed the House-approved social spending and climate bill "dead" in the Senate.)

Biden Mar. 1 delivered his first State of the Union speech to a joint session of Congress, focusing the first half of his roughly hour-long address on affirming U.S. support for Russia-besieged Ukraine, during which he received a rare bipartisan standing ovation after vowing to work with allies to confiscate Russian oligarchs' "ill-begotten" luxuries and ramp up economic sanctions. Confronting low approval ratings as Americans faced high inflation, Biden pledged to boost U.S. manufacturing to reduce dependence on imports. Receiving another bipartisan ovation for disavowing calls by a

handful of Democratic lawmakers to defund police, Biden also reiterated his commitment to abortion access, LGBTQ rights, and federal voting rights.

Senate Confirms First Black Woman to Serve on Supreme Court; Other SCOTUS News—In confirmation hearings before the Senate Judiciary Committee beginning Mar. 21, federal appeals court judge Ketanji Brown Jackson faced questioning from senators over abortion, critical race theory, gender, and gun ownership, and was accused by Republican committee members of dispensing overly lenient sentences to child pornography offenders. Analyses by the American Bar Association debunked that claim, and a group of retired federal judges, which included two GOP appointees, in a letter to the committee declared her sentencing methods “entirely consistent” with judges nationwide. The Senate voted (53-47) to confirm the 51-year-old Jackson to the U.S. Supreme Court Apr. 7. Nominated Feb. 25 by Pres. Joe Biden to take the seat of retiring moderate liberal Associate Justice Stephen G. Breyer, Jackson was the first Black woman as well as the first public defender nominated to the post.

Republican lawmakers rejected Democrats’ calls for Supreme Court Justice Clarence Thomas to recuse himself from future election-related cases after CBS and the *Washington Post* in late Mar. jointly reported that his wife, Ginni Thomas, had sent text messages in 2020 and early 2021 to then-Pres. Donald Trump’s chief of staff, Mark Meadows, requesting that Meadows work to overturn the results of the 2020 election, which she said Trump had won.

Congress Passes Federal Anti-Lynching Bill—Pres. Joe Biden signed legislation Mar. 29 making lynching a federal crime. Passed by the House by a 422-3 vote and unanimously by the Senate, the Emmett Till Antilynching Act of 2022 was named after a 14-year-old Black youth from Chicago who, while visiting relatives in Mississippi in 1955, was abducted, brutally beaten, and killed for allegedly whistling or flirting with a white woman. Till’s public open-casket funeral and the defendants’ acquittal had sparked national outrage.

According to Tuskegee Univ., over 4,700 people, the large majority of them Black, were lynched from 1882 to 1968.

International

Russia Escalates Military Assault on Ukraine; Bombing of Mariupol Theater Kills Hundreds; Other Invasion Developments

—Russian Pres. Vladimir Putin intensified his country's attack on Ukraine, capturing on Mar. 2 the strategic Black Sea city of Kherson (pop. approx. 300,000). Up to 300 civilians and fighters were killed in Kherson, according to the city's mayor. Russian forces at the same time stepped up assaults on the key cities of Kharkiv and Mariupol as well as the capital, Kyiv, outside of which a reportedly 40-mi military convoy had amassed. The UN General Assembly Mar. 2 passed a nonbinding resolution demanding Russia immediately withdraw forces from Ukraine; the measure was supported by 141 of the 193 member states, but 35, including China, did not vote. In early Mar., Russian troops, after heavy fighting, seized control of the Zaporizhzhia Nuclear Power Plant—Europe's largest—in southeast Ukraine. Ukrainian Pres. Volodymyr Zelenskyy again appealed to NATO to enforce a no-fly zone over the country, but NATO officials maintained it would not get involved directly in the conflict.

Ukrainian officials and aid groups accused Russia of repeatedly targeting civilians, obstructing aid convoys, and bombing temporary humanitarian corridors the two sides had agreed to in early Mar. Multiple hospitals were attacked in Mariupol and Zhytomyr, west of Kyiv. On Mar. 15, Russian forces took control of an intensive care center in Mariupol, taking hostage some 400 people. The following day, they bombed the city's Donetsk Academic Regional Drama Theater, killing roughly 600 civilians, according to a later Associated Press investigation, among some 1,000 people reportedly sheltering there. (An earlier government estimate put the death toll at 300.) Ukraine rejected Russia's ultimatum to surrender Mariupol, and by Mar. 28, more than 5,000 of its civilian residents had been killed, according to Mariupol officials, with 170,000 unable to leave and an estimated 40% of buildings destroyed. Russian troops also severely damaged several major airports and abducted multiple mayors,

some of whom were executed, according to Ukrainian officials. Despite the invasion's heavy toll—the UN said by the end of Mar., some 4 mil Ukrainians had fled the country, with 2.3 mil refugees in Poland—military analysts said Western-backed Ukrainian forces provided stiffer-than-anticipated resistance. Russian forces at the end of Mar. ceded control of the former Chernobyl nuclear power plant. On Mar. 25, Russia's defense ministry said that it was shifting its objective to “fully liberating” southeastern Ukraine's Donbas region.

The Kremlin found itself heavily sanctioned and increasingly isolated at the close of the first full month after its invasion. The World Bank Mar. 2 suspended its programs in Russia and Belarus, and the value of Russia's currency by mid-Mar. had plummeted by some 40% since early 2022 against the U.S. dollar. U.S. Pres. Biden banned imports of Russian oil and other energy, while the EU announced it would phase out most Russian oil by the end of 2022 and reduce its use of Russia's natural gas. Major global companies, including Mastercard, McDonald's, Coca-Cola, General Electric, and Goldman Sachs, halted operations in Russia. In addition to \$13.6 bil in military and humanitarian aid in the U.S. budget for FY 2022 signed Mar. 15, Pres. Biden the following day announced an additional \$800 mil in security assistance. Biden Mar. 24 said the U.S. would receive up to 100,000 Ukrainian refugees. He said two days later that Putin “cannot remain in power.” Confronting dissent on Russia's home front, including 4,300 protesters reportedly detained on Mar. 6 alone, Putin in early Mar. signed into law a bill effectively criminalizing reporting on the war that ran counter to state media; in response, multiple international news networks, including CNN, halted Russian operations. The first face-to-face peace negotiations between the two sides in two weeks occurred Mar. 29 in Istanbul, Turkey.

Dozens Killed in Suicide Blast at Pakistani Mosque—A suicide bombing and gun attack claimed by ISIS struck a Shiite mosque in Peshawar in northwestern Pakistan, Mar. 4, killing about 60 people and injuring nearly 200. Carried out by a lone militant, the assault on the minority Muslim sect, frequently targeted by both

Sunni ISIS and Taliban terrorists, was the deadliest in Pakistan in nearly four years.

COVID-19 Cases Surge in Western Pacific as Omicron Wave Recedes Elsewhere; Other Pandemic News—Global cumulative confirmed deaths from COVID-19 surpassed 6 mil on Mar. 4, according to the World Health Org., reaching close to 6.16 mil by the end of month as cases surpassed 486 mil. Although all regions by late Mar. reported decreasing new weekly cases, the Western Pacific—particularly Hong Kong, New Zealand, South Korea, Thailand, and Vietnam—experienced a surge in cases driven by the highly contagious Omicron strain (B.1.1.529). China recorded a pandemic high of nearly 57,200 new cases Mar. 4; by Mar. 13 multiple Chinese cities, including Shanghai and Shenzhen, placed stringent movement restrictions on residents in line with the country's so-called zero-tolerance COVID-19 policy. The recent Omicron hotspot of Europe tallied mostly decreasing or stable daily infections. But a number of countries faced another round of sharply rising cases due to the even more highly transmissible Omicron “stealth” subvariant, BA.2, eased restrictions, and decline in vaccine immunity. The U.S. reported decreasing infections, finishing Mar. with nearly 79.4 mil cases (incl. 975,135 deaths) several days after Hawaii dropped its indoor mask mandate, the last state to do so amid the Omicron wave.

As of Mar. 31, almost 58% of the world's population was fully vaccinated against COVID-19, according to Our World in Data. The CDC reported that just under 66% of U.S. residents were fully vaccinated, some 45% of whom had received follow-up booster shots. On Mar. 29, the CDC recommended fourth doses of the Pfizer and Moderna vaccines for people aged 50 and older.

Conservative Outsider Wins Close South Korean Presidential Election—South Korean voters Mar. 9 narrowly elected conservative party candidate Yoon Suk-yeol in the country's tightest presidential race since free elections were first held in 1987. (Liberal incumbent Moon Jae-in, limited to one 5-year term, was not eligible for reelection.) With just under 48.6% support—less than three-quarters of a point ahead of governing party candidate Lee

Jae-myung—in a race that saw high turnout despite record daily COVID-19 infections, former prosecutor general Yoon campaigned on stronger security relations with the U.S. and Japan and tougher stances toward China and North Korea. The conservative party's return to the presidency came amid soaring housing prices, sluggish economic growth, widening gender and financial inequality, and persistent unemployment among younger South Koreans.

General

Polar Explorer Shackleton's Ship Found—The London-based Falklands Maritime Heritage Trust on Mar. 5 located famed British explorer Ernest Shackleton's ship *Endurance* at the bottom of the Weddell Sea, off Antarctica's northern coast, nearly 107 years after pack ice crushed the 144-ft hull, causing it to sink. Appearing notably well-preserved in images released by the search team, the wooden ship will remain where it rests, legally protected as a historic site. Despite the loss of their ship, the entire 28-man crew of the *Endurance* were rescued in what became one of the era's most renowned survival tales.

Major League Baseball Lockout Ends on 99th Day—The owners of MLB's 30 clubs unanimously reached an agreement Mar. 10 with a somewhat divided players' association, ending a more than three-month-long lockout of players from club facilities since the two sides failed at the start of Dec. to reach a new five-year collective bargaining agreement. Though the league Mar. 1 canceled the first two series of the 2022 season, the new agreement maintained the full 162-game season, beginning a week later than its original start date. Most visibly, the new deal expanded the use of the designated hitter to the National League and the postseason from 10 teams to 12.

Chinese Plane Crash Kills 132—A China Eastern Airlines Boeing 737-800 crashed Mar. 21 in southern China's mountainous Guangxi region, killing all 132 people on board. En route from Kunming to Guangzhou, the six-year-old jet went into a sudden dive from a cruising altitude of 29,000 ft, regaining altitude momentarily at about 7,400 ft before crashing. The *Wall Street Journal* in May

reported that data recovered from the craft's black box indicated the crash was likely intentional, citing a source familiar with a preliminary report from the U.S. National Transportation Safety Board assisting China's investigation.

Slap Incident Eclipses Oscars Ceremony; CODA Wins Best Picture—Actor Will Smith slapped comedian Chris Rock in the face onstage at the 94th Academy Awards, overshadowing the ceremony held Mar. 27 at the Dolby Theatre in Los Angeles. While presenting an award, comedian Rock had ad-libbed a joke about Smith's wife, Jada Pinkett Smith, that apparently angered Smith. Smith apologized to the Academy and other nominees a short time later while accepting the best actor award for his performance in the biopic *King Richard*. Though the Academy Mar. 28 formally condemned Smith's actions, the organization drew criticism for not removing Smith immediately after the slap, said to be the first known incident of onstage violence in the ceremony's history. In early Apr., Smith was banned from attending all Academy events for 10 years.

CODA picked up the best picture prize and also claimed best adapted screenplay, while Troy Kotsur won best supporting actor for his work on the family drama. Jessica Chastain won best actress for her portrayal of the titular character in *The Eyes of Tammy Faye*, and Ariana DeBose won best supporting actress for Steven Spielberg's *West Side Story* revival. Regina Hall, Amy Schumer, and Wanda Sykes split hosting duties, drawing 16.6 mil viewers, the second fewest ever but up 58% from the previous ceremony's record low.

April 2022

National

House Holds Trump Aides in Contempt; Other Trump Investigation News—The House of Representatives on Apr. 6, voting mostly on party lines (220-203), recommended contempt charges against Peter Navarro and Dan Scavino, former aides to Pres. Donald Trump, for defying subpoenas from the House select committee investigating the Jan. 6 Capitol insurrection. Former White House chief of staff Mark Meadows and strategist Steve Bannon had previously been held in contempt for refusing to

cooperate with the committee. In a court filing, the House panel said Meadows was made aware of the illegality of a Trump campaign scheme involving fake electors but proceeded to further it, bringing Trump to speak at the Ellipse rally on Jan. 6 despite intelligence warnings of a probability of violence that day. Audio recordings of House Minority Leader Kevin McCarthy (R, CA) released by the *NY Times* Apr. 21 contradicted McCarthy's repeated claim that he had never pressed for Trump's resignation following the Capitol attack.

A New York state judge Apr. 25 held Trump in contempt and fined him \$10,000 each day he continued to refuse to turn over documents sought by the office of New York Atty. Gen. Letitia James in its investigation into the Trump Organization for alleged business fraud.

Inflation Deepens as Gasoline Prices Jump; Staten Island Amazon Workers Unionize; Other Business, Economic News— Inflation accelerated in Mar., with prices up 8.5% over Mar. 2021 according to a Bureau of Labor Statistics report released Apr. 12. The largest 12-month increase since Dec. 1981, the Consumer Price Index surge was driven by gasoline, food, and shelter increases of 48.0%, 8.8%, and 5.0%, respectively. Gasoline prices grew 18.3% over Mar. to a record-high \$4.33 per gallon nationally as the ban on oil imports from Ukraine's aggressor, Russia, went into effect. According to real estate research firm CoStar Group, rents in 2021 rose by an average 11.3%.

Employers in the U.S. added 431,000 jobs in Mar., according to the Apr. 1 Labor Dept. report; unemployment ticked down to a pandemic-era low of 3.6%. Wall Street suffered in Apr., with the Dow Jones Industrial Average finishing down nearly 940 points (2.8%) Apr. 29, the last trading day of the month, at 32,977.21, a 4.9% decline from Mar. The S&P 500 closed Apr. at a 2022 low of 4,131.93, down almost 8.8% for the month, and the Nasdaq Composite Index fell 13.3% in Apr. to close at 12,334.64.

Workers in a Staten Island, NY, warehouse Apr. 1 formed Amazon's first union in the U.S., after just under 55.5% voted in favor in late Mar.

Federal Travel Mask Mandate Overturned; Other COVID News—A federal judge in Florida Apr. 18 struck down the White

House's mask mandate for air travel and other public transportation. While some local and state travel mandates remained in place, most U.S. airlines immediately shed their face mask requirements. According to an analysis of blood samples released Apr. 26 by the CDC, 58% of all Americans, including three-quarters of children, had been infected with COVID-19 at least once by the close of Feb. 2022—up from about 34% at the close of 2021—as the country came out of the pandemic's largest wave of cases yet, dominated by the highly contagious Omicron strain (B.1.1.529). Health officials stressed that official tallies such as the CDC's—totaling nearly 81.3 mil cases by the end of Apr., including over 993,000 deaths—were undercounting infections increasingly detected by unreported at-home tests. Blamed on the now dominant and even more infectious “stealth” BA.2 variant of Omicron, the uptick in cases (about 55,000 per day) by the end of Apr. included Vice Pres. Kamala Harris, who was treated with the oral antiviral Paxlovid.

On Apr. 25, a federal judge temporarily blocked Pres. Joe Biden from moving to lift Title 42, a Trump administration rule allowing undocumented migrants to be sent back to their home countries without going through the asylum process due to the COVID-19 health crisis. According to the CDC, as of Apr. 30, 66.2% of the U.S. population was fully vaccinated, 45.8% of whom had received a booster dose.

Florida “Don’t Say Gay” Law, Texas Anti-Trans Directive Among Surge of State-Level LGBTQ Measures—Florida Gov. Ron DeSantis (R) signed a bill Apr. 22 revoking Walt Disney Co.’s special tax privileges and self-governing authority from the theme park operator’s Orlando, FL-area operations in apparent response to its public disapproval of a controversial 2022 state law restricting instruction of sexual orientation/gender identity issues to grades K-3 students. Disney Mar. 28 had issued a statement vowing to help repeal the state’s Parental Rights in Education law, dubbed the “Don’t Say Gay” bill by its opponents. The Texas Supreme Court May 13 unanimously struck down a temporary injunction blocking state agencies from investigating gender-affirming health care for transgender youths as child abuse. At the same time, the court said

Gov. Greg Abbott's (R) binding Feb. directive ordering the investigations overstepped his authority.

The Florida law and Texas directive contributed to a record increase in anti-LGBTQ bills by states. According to an NBC News analysis of data from the ACLU and advocacy group Freedom for All Americans, states in 2022 had filed 238 bills restricting LGBTQ rights (154 targeting trans persons) by Mar. 15, compared to an already unprecedented 191 in 2021 and 41 bills in 2018. Alabama Gov. Kay Ivey (R) Apr. 8 signed legislation criminalizing transition surgeries and prescription of puberty blockers/hormones to transgender youth under age 19; a federal judge in May temporary blocked the ban on the latter. Govs. Kristi Noem (R, SD) and Kim Reynolds (R, IA) signed bills in Feb. and Mar., respectively, banning transgender girls and women from participating in high school and college athletics.

International

Yemen Rivals Agree to Two-Month Truce—Warring parties in Yemen's seven-year-old civil conflict agreed Apr. 1 to a UN-negotiated two-month truce to take effect the following evening, marking the first national cease-fire since 2016. Under the agreement between Iran-backed Houthi Shiite rebels and the Saudi-led Sunni coalition supporting Yemen's internationally recognized government-in-exile, fuel ships were also allowed entry to the rebel-controlled Hudaydah port. On Apr. 7, Yemen Pres. Abd Rabbuh Mansur Hadi resigned, transferring power to a presidential council assigned with brokering a permanent political solution with the Houthis, in a move reportedly intended to galvanize peace negotiations.

In the weeks preceding the agreement, Houthis claimed responsibility for multiple cross-border attacks on the UAE and Saudi Arabia; the coalition had intensified air strikes ahead of announcing a unilateral cease-fire Mar. 30. After a significant reduction in attacks, both sides in early June renewed the truce for another 60 days. The U.S.-based Armed Conflict Location & Event Data Project (ACLED) in early 2022 directly attributed more than 150,000 deaths, including those of more than 14,500 civilians, to the conflict in Yemen.

China Tightens Shanghai COVID-19 Lockdown; Infections Decline Globally—Maintaining China's zero-tolerance policy against COVID-19, authorities Apr. 5 expanded a strict lockdown in Shanghai to all residents of the country's largest city. More than 38,000 workers were dispatched to carry out mandatory testing in what was reportedly China's largest medical response since Wuhan shut down in early 2020. The 24-hour testing spree revealed more than 13,000 positive cases, which increased to a record 27,000+ by Apr. 14. Public discontent mounted over the harsh measures, which included metal fencing and guards to restrict people to their apartments, and many residents reported running low on essential supplies such as food and medicine.

New global cases and deaths continued to decline from the end of Mar., with nearly all regions reporting decreasing numbers throughout Apr. Among countries facing increases, South Africa tallied three-month high case levels, and in the Western Pacific, both Samoa and Taiwan recorded daily high levels of Omicron variant infections. As of Apr. 30, worldwide cumulative confirmed cases surpassed 511 mil (with over 6.2 mil deaths) according to the World Health Org. By the end of the month, 58.9% of the world's population was fully vaccinated, according to Our World in Data, with 72.8% of residents in high-income countries inoculated versus less than 11.7% in low-income nations. In early Apr., Russia's health ministry announced the first nasal spray COVID-19 vaccine, Sputnik V.

Russia Initiates Major Offensive in Eastern Ukraine; U.S., Others Condemn Alleged War Crimes—Russian forces Apr. 18 launched a ground offensive to take control of the mostly Russian-speaking eastern Donbas region, where Kremlin-backed separatists have battled Ukrainian forces since 2014, and unilaterally declared independent two republics—Donetsk and Luhansk—formally recognized by Russian Pres. Vladimir Putin in Feb. Russia's operation spanned a 300-mi front that quickly took the city of Kreminna in Luhansk but failed to make additional significant gains in Apr. The offensive had been immediately preceded by powerful missile strikes on targets throughout Ukraine, including the western city of Lviv, a refuge for displaced civilians. Russian forces were

accused in Apr. of using so-called bunker-busting bombs against Mariupol's Azovstal steel plant, under which an estimated 2,500 Ukrainian troops and 1,000 civilians sheltered in a network of tunnels. Surrounded by Russian forces, the plant was reportedly the last Ukrainian stronghold in the city, which Russia desired to complete a corridor between Russian-occupied Crimea and Donbas. The Russian warship *Moskva*, flagship of the navy's Black Sea Fleet, sank Apr. 14, either after being hit by two anti-ship missiles (per Ukrainian officials) or due to a fire (per Russian sources).

In early Apr., Ukrainian troops retook the northern province of Kyiv from Russian troops regrouping to fight in the east. Ukrainian Pres. Volodymyr Zelenskyy reported that mass graves with some 900 bodies were discovered in the province, and the mayor of Bucha said dozens of civilians—including children—were executed by Russian forces. Human Rights Watch documented evidence of war crimes in Bucha. The U.S., EU, and UK imposed further sanctions against Russia. On Apr. 7, the UN General Assembly voted to suspend Russia from the Human Rights Council.

Since the start of the invasion, aid agencies, Ukrainian and Russian government officials, and others had provided widely varying estimates of the rising death toll. The UN High Commissioner for Human Rights cited over 2,100 civilian deaths between Feb. 24 and Apr. 18, while Mariupol's mayor said an estimated 21,000 civilian residents of the city had been killed. At least 50 people died Apr. 8 when Russian missiles struck a railway station in Kramatorsk in Donetsk. According to a UK estimate in late Apr., some 15,000 Russian troops had been killed in the fighting, and its military had lost more than 2,000 tanks. Zelenskyy estimated 3,000 Ukrainian fighters killed as of Apr. 16. The UN assessed the number of internally displaced Ukrainians at over 7 mil, with some 15.7 mil within the country needing humanitarian assistance. Some 5 mil Ukrainians had fled to neighboring countries since the start of the invasion, though as of Apr. 14, more than 870,000 had returned.

Nations continued to provide critical security and financial assistance to Ukraine, with \$3.8 bil from the U.S. since the start of the invasion through Apr., according to the State Dept. Germany

agreed Apr. 26 to supply Ukraine with anti-aircraft tanks. Among other developments, Zelenskyy Apr. 18 formally submitted an EU membership questionnaire, and Russia in late Apr. suspended deliveries of natural gas to both Poland and Bulgaria after they declined to pay in rubles. Former U.S. Marine Trevor Reed, held in detention in Russia since 2019, was freed Apr. 27 in a prisoner swap.

France's Macron Fends Off Right-Wing Challenge for Presidency—Centrist French Pres. Emmanuel Macron secured a second term Apr. 24, defeating far-right nationalist Marine Le Pen by a markedly smaller margin than in 2017. Drawing more than 58.5% support to nearly 41.5% for Le Pen in the relatively low turnout runoff, the pro-EU and pro-business Macron had campaigned heavily on addressing climate change and pledged to increase pensions and food vouchers in the face of inflationary pressure. (A national strike in mid-Mar. over wages and fuel prices echoed the dissent of so-called yellow-vest demonstrations earlier in Macron's presidency.) Macron also accused Le Pen's National Rally party of being dependent on Russian loans.

Macron's alliance had lost its absolute majority in legislative elections held in June, winning 245 of 577 seats, a loss of more than 100 seats, as Le Pen's RN surged to 89 (a gain of 82 seats).

General

South Carolina, Kansas Win NCAA Basketball Tournaments—The Univ. of South Carolina Gamecocks bested the Univ. of Connecticut Huskies, 65-49, to win the school's second women's NCAA basketball championship at Target Center in Minneapolis, MN, Apr. 3. Staking out an early lead, the Gamecocks widened their advantage by as much as 18 points and picked up their final two on a pair of free throws by junior forward Aliyah Boston. Named the most outstanding player of the Final Four, Boston claimed 11 points, 16 rebounds, and 2 blocks.

The next day, the Univ. of Kansas Jayhawks edged the Univ. of North Carolina Tar Heels, 72-69, at Caesars Superdome in New Orleans, LA, to claim the school's fourth men's NCAA championship.

Pulling off the largest comeback victory in NCAA title history, Kansas overcame a 16-point deficit, scoring 47 points in the last two quarters. Jayhawks guard Ochai Agbaji was named the tournament's most outstanding player.

Silk Sonic Wins Big at Grammy Awards—R&B duo Silk Sonic (Bruno Mars and Anderson .Paak) won record and song of the year as well as best R&B song and best R&B performance for “Leave the Door Open” at the 64th Grammy Awards held Apr. 3 at MGM Grand Arena in Las Vegas, NV. Multi-genre artist Jon Batiste, with an evening-high 11 nominations, claimed album of the year for *We Are*.

South African Flooding Kills Hundreds—Flooding and landslides killed at least 448 people in South Africa's KwaZulu-Natal province Apr. 9-13. The flooding—centered on the port city of Durban and surrounding cities and townships—caused an estimated \$1.57 bil in property damage. The World Weather Attribution group of international climate scientists, in a May 2022 study, said that climate change had nearly doubled the likelihood of record-breaking rain levels, totaling over 12 in. over 24 hr in some places.

Scheffler Wins Masters Tournament—American Scottie Scheffler held off late-charging golfer Rory McIlroy of Northern Ireland at Augusta Natl. Golf Club in Augusta, GA, Apr. 10 to win the Masters Tournament and his first major title. Despite double-bogeying the final hole, Scheffler finished 10-under-278, three ahead of McIlroy, who began the day 10 strokes back before pulling off the tournament's only bogey-free round. Playing in his first PGA Tour event since suffering severe injuries in a Feb. 2021 car crash, five-time green-jacket winner Tiger Woods finished 47th.

Large Forest Fires Rage in New Mexico—New Mexico Gov. Michelle Lujan Grisham (D) declared a state of emergency Apr. 22-23 for five northern counties due to large wildfires. The Hermits Peak/Calf Canyon fires by May 17 were the largest in state history, with close to 300,000 acres burned at just 26% containment. Fueled by unusually dry and windy conditions, the fires started from prescribed burns on Apr. 6 and 19, respectively. At the time of Lujan Grisham's declaration, close to a dozen extensive and uncontained wildfires burned from Arizona to the Texas Panhandle.

May 2022

Leaked Supreme Court Draft Portends End to Constitutional Right to Abortion—News website Politico May 2 published a leaked U.S. Supreme Court draft opinion, in a case challenging Mississippi's 15-week abortion ban, that would overturn the landmark precedent set in *Roe v. Wade* (1973) establishing a constitutional right to abortion. Reportedly written by Associate Justice Samuel Alito, the draft decision drew immediate condemnation from abortion-rights supporters and muted celebration among those in the anti-abortion movement. U.S. Supreme Court Chief Justice John Roberts confirmed the draft's authenticity May 3 and announced an investigation into the unprecedented leak, which he called an "egregious breach of trust."

If the opinion were to stand as drafted, some 26 states would certainly or likely prohibit abortion, according to the New York-based Guttmacher Institute; 13 states had so-called trigger-law bans that would go into effect immediately or soon after the decision was formalized. The U.S. House in Sept. 2021 had passed a measure protecting nationwide abortion access, but the Senate had blocked the legislation in Feb. 2022.

Federal Reserve Announces Interest Rate Hikes; Cryptocurrency Market Sinks; Other Economic News—Aiming to help curb the U.S.'s worst inflation in four decades, the Federal Reserve on May 4 raised interest rates by half a point, the largest increase in 22 years. Annual inflation was up 8.3% from a year earlier according to a Bureau of Labor Statistics (BLS) report released May 11. The BLS May 6 reported that the economy added 428,000 jobs in Apr., bringing the U.S. to within 1.2 mil jobs of pre-pandemic levels, as the unemployment rate held at 3.6%.

The cryptocurrency market suffered a massive sell-off, losing \$300 bil in value over four days beginning May 9 (including \$200 bil within 24 hours), reflecting investors' decreasing confidence in unregulated digital currencies amid surging inflation and other factors. The value of the digital "stablecoin" TerraUSD—pegged to

the U.S. dollar—fell to less than \$0.30 on May 11; largest cryptocurrency Bitcoin May 12 dropped below \$26,000 for the first time since Dec. 2020. The Dow Jones Industrial Average and S&P 500 were basically flat for the month, closing May at 32,990.12 and 4,132.15, respectively. The Nasdaq Composite Index fell 2.1% to close at 12,081.39.

White Gunman Targets Black Neighborhood Supermarket, Killing 10—An 18-year-old gunman allegedly motivated by racist beliefs fatally shot 10 people—all Black—at a supermarket in Buffalo, NY, May 14. Driving more than 200 miles to target a Tops grocery store in a mostly Black neighborhood, the suspected gunman livestreamed the shooting that killed four employees, including an armed security guard, as well as six shoppers, reportedly while shouting slurs. Wearing body armor and armed with an AR-15-style semi-automatic rifle, Payton S. Gendron surrendered to police and faced state murder and federal hate crimes charges, among others. Gendron reportedly legally purchased the rifle even after he threatened murder-suicide; his mental health was evaluated less than a year before the attack.

In a manifesto purportedly published online by Gendron before the shooting, he outlined plans to shoot Black people and espoused racist “replacement theory.”

White House Takes Steps to Address Infant Formula Shortage—Amid a deepening nationwide shortage of baby formula, Pres. Joe Biden on May 18 invoked the Defense Production Act to help increase production. Baby formula—the only food option for hundreds of thousands of infants—was 43% out-of-stock across the U.S. the week ending May 8, and 74% for the seven days ending May 28, according to [Datassembly.com](https://www.datasembly.com). The shortage was attributed to pandemic-related supply-chain issues, as well as to Abbott Nutrition halting operations in mid-Feb. 2022 at its Sturgis, MI, plant—at which one-quarter of U.S. infant formula was manufactured—amid a voluntary recall as the FDA investigated possible links between the facility and illnesses, including the death of one infant (a second death was reported by the end of Feb.). A military air

shipment of 39 tons of formula from Europe arrived in the U.S. May 22.

Texas School Shooter Kills 21; Law Enforcement Face Scrutiny Over Response—An 18-year-old gunman killed 19 students (ages 9-11) and two teachers at Robb Elementary School in the mostly Hispanic town of Uvalde, TX, May 24. The massacre was the second-deadliest U.S. school shooting. The shooter, identified as Salvador Ramos, a former Uvalde High School student, shot and critically injured his grandmother before arriving at the school armed with one of two semi-automatic rifles and more than 300 rounds of ammunition he legally purchased shortly after his 18th birthday, eight days earlier. Ramos reportedly fired most of the shots soon after entering two connecting classrooms where the victims were found; federal agents killed Ramos more than an hour after the start of his attack.

Within days, criticism mounted over law enforcement's delay in entering the classrooms and subduing Ramos, as well as over conflicting law enforcement reports on how events transpired. While police training dictates officers immediately confront school shooters, local and school district officers, who arrived on site within minutes, waited outside the classrooms, even as 911 calls were made by children inside, pleading for help and reporting serious injuries. Border Patrol and other federal agents ultimately entered the school and, ignoring what they said was a local police order, engaged the shooter.

A Texas House of Representatives report released July 17 cited "systemic failures" and faulted federal and state law enforcement for not immediately taking charge; among 376 officers present, the large majority were federal and state officers, while the local school force comprised just 5 officers.

U.S. Surpasses 1 Million COVID-19 Deaths; Omicron Subvariants Propel Spike in Infections—The U.S. in May crossed the threshold of 1 mil reported COVID-19 deaths, according to the CDC. Pres. Joe Biden May 12 ordered flags be flown at half-staff for five days and appealed to Congress at the second virtual Global COVID-19 Summit to increase funding to combat the virus, now the

third-leading cause of death in the U.S. By May 18, the seven-day moving average for new cases exceeded 100,000 for the first time since Feb., according to the CDC, due to the dominant BA.2 Omicron subvariant of the coronavirus—nicknamed “stealth” Omicron—as well as an even more highly infectious BA.2.12.1 subvariant. A day later, media reported a 168% rise nationally in infections over the past month, as new cases climbed in 41 states and hospitalizations increased in 40, though deaths remained far lower than in Jan. and Feb. As of May 31, 70.8% of the U.S. population over the age of five was fully vaccinated.

International

Sinn Féin Leads in Northern Ireland Elections—In a historic first, the Irish nationalist party Sinn Féin won the most seats in Northern Ireland Assembly elections on May 5, securing 29% support and 27 of 90 seats, followed by 21% and 25 seats for the Democratic Unionist Party (DUP). Though Sinn Féin was entitled to appoint its vice pres. Michelle O’Neill to the post of Northern Ireland’s first minister, the DUP refused to nominate the deputy minister necessary for a functioning power-sharing government. Long linked with the once-militant Irish Republican Army, Sinn Féin advocates for reunification of Ireland.

Sri Lankan Prime Minister Resigns as Protest-Related Violence Kills Parliament Member—Sri Lankan Prime Min. Mahinda Rajapaksa resigned May 9 after clashes that same day between antigovernment demonstrators and loyalists of the governing Sri Lanka People’s Front (SLPP) resulted in at least five people killed in Colombo. Following weeks of mostly peaceful protests over the country’s severe economic crisis, the violence was reportedly triggered by rural Rajapaksa supporters who traveled to the capital and attacked demonstrators. In retaliation, protesters set fire to some 40 homes belonging to SLPP politicians and surrounded a SLPP member of parliament who shot into the crowd, killing one; he and his bodyguard were later found dead. Its residents facing surging prices and nationwide power cuts, Sri Lanka May 19 defaulted on its debt for the first time.

Dictator's Son Wins Philippines Presidency—Ferdinand “Bongbong” Marcos Jr.—the 64-year-old namesake son of the corrupt and dictatorial Philippine president toppled by mass uprisings in 1986 after 20 years in power—won the island nation’s presidential election held May 9. With nearly 58.8% of votes, Marcos succeeded autocratic Pres. Rodrigo Duterte, who was constitutionally limited to one six-year term. Marcos’s running mate, Sara Duterte, Duterte’s daughter, won the separately elected vice presidency with over 61.5% support. Marcos was expected to maintain Pres. Duterte’s controversial extrajudicial drug war and to continue to seek closer relations with China. Its economy heavily impacted by the COVID-19 pandemic, the Philippines faced enduring income inequality as well as steepening inflation and mounting debt.

Palestinian-American Journalist Killed in West Bank—Veteran Palestinian-American Al Jazeera news correspondent Shireen Abu Akleh was shot and killed May 11 while reporting on Israeli military raids on a Palestinian refugee camp in Jenin in the West Bank; another Al Jazeera journalist was wounded. A U.S.-led investigation determined in early July that the 51-year-old reporter was likely killed by Israeli Defense Forces, though it said it did not find evidence indicating her death was intentional.

Europe Exceeds 2 Million Coronavirus Deaths; Other Pandemic News—Cumulative documented deaths from COVID-19 surpassed 2 mil in Europe, the World Health Org. said May 12, with the UK reporting the most in the region, at over 177,000; followed by Europe’s first hotspot, Italy, with close to 165,000; and France at nearly 144,000. Daily cases across the 53 countries in the WHO’s European region continued to decline throughout May. In the Western Pacific region, Taiwan and China both saw record daily infections, with the latter recording a pandemic high 94,700 on May 28. North Korea announced its first outbreak May 12 and locked down its cities. At the end of May, WHO tallied nearly 527.7 mil global cumulative cases, including close to 6.3 mil deaths. (WHO in early May assessed total COVID-19 deaths due to direct and indirect causes, such as compromised health care, at 14.9 mil worldwide in 2020-21.) As of May 31, 59.8% of the world’s population was fully

vaccinated against COVID-19, according to Our World in Data, up from about 58.9% at the end of Apr. On May 12, world leaders pledged \$3.1 bil to further the fight against COVID-19.

Russia Claims Victory in War-Ravaged Mariupol, Deepens Assault on Eastern Ukraine; Other Invasion Developments—

Russia's Defense Ministry on May 20 announced that its forces had taken full control of the southern Ukrainian port city of Mariupol after hundreds of Ukrainian soldiers who had sheltered for 80-plus days in tunnels under the besieged Azovstal steel plant surrendered. The UN and the Red Cross in early May had negotiated an agreement with Ukraine and Russia to evacuate the estimated 50 to 300 civilians sheltering under the plant to eastern Ukraine; a Ukrainian official May 7 said all had been evacuated. Russia's takeover of the plant—an oft-cited symbol of Ukrainian resistance—and the whole of Mariupol secured a land corridor between Russian-occupied Crimea and the Donbas region. The most heavily bombed city in Russia's ongoing campaign, Mariupol suffered massive devastation, including the deaths of more than 20,000 residents, according to city officials. The UN human rights office (OHCHR) on May 27 said it had tallied more than 4,030 civilians killed in Ukraine since the start of the invasion, while noting the actual number was likely much greater.

Unleashing multiple missile attacks on the southwestern port of Odesa, Russia continued to make gains in the separatist southeastern Donetsk and Luhansk regions amid fierce clashes, including in the strategic city of Severodonetsk, most of which Russia controlled by the end of the month. Ukrainian forces staged a counterattack in the northeast, reportedly pushing Kremlin troops to the Russian border about 25 mi north of Kharkiv by mid-May. Ukrainian Pres. Volodymyr Zelenskyy publicly preconditioned a cease-fire on Russia fully withdrawing its troops. Responding to Russia's aggression, nearby Sweden and bordering Finland on May 18 both applied to join NATO, in direct opposition to Russian Pres. Vladimir Putin's stated wishes. U.S. Pres. Biden May 21 approved \$40 bil in additional military and humanitarian aid to Ukraine, a day after the G7 nations agreed to extend about \$20 bil in temporary economic support. The UN Refugee Agency May 12 said more than

6 mil people had left Ukraine since Feb. 24. On May 30, the EU announced it would ban 90% of Russian oil imports by the end of 2022.

Australians Vote Out Conservative Government—Australians casting compulsory votes in their country's parliamentary election May 21 ended the conservative Liberal-National Coalition's (LNP) nine-year rule in favor of candidates campaigning on dissatisfaction with wage growth and surging inflation and pledging greater action on climate change in the wake of record heat, floods, and wildfires. Opposition leader Anthony Albanese and his fellow Australian Labor Party (ALP) candidates secured a slim majority with 77 of 151 total seats (up 9) as the LNP won 58 seats, down 19. Notably, the combined LNP-ALP portion of the vote was a record-low 68.3%; the Green Party increased its share to more than 12%, winning 4 seats.

General

Extreme Long Shot Rich Strike Victorious at Kentucky Derby; Early Voting Wins Preakness Stakes—Entered as a late replacement, 80-1 long shot Rich Strike held off race favorite Epicenter to win the 148th Kentucky Derby May 7 in 2:02.61 at Churchill Downs in Louisville, KY. The 3-year-old colt pulled off the second-largest upset in race history (after Donerail in 1913, at 91-1 odds). It was the first Derby win for both Venezuelan jockey Sonny Leon and trainer Eric Reed.

At the 147th Preakness Stakes at Pimlico Race Course in Baltimore two weeks later, Early Voting (at 5-1 odds) seized the lead around the final turn to finish in 1:54.54, besting repeat runner-up Epicenter by 1 ¼ lengths. Rich Strike did not run.

Overdose Deaths Reach Record Levels—U.S. drug overdose deaths in 2021 surpassed the previous year's record high, reaching nearly 108,000 according to preliminary data released May 11 by the CDC. Most deaths involved the potent synthetic opioid fentanyl, which accounted for 71,000 of the deaths, and the cheaply obtainable stimulant methamphetamine, which made up about 33,000 deaths.

Thomas Takes PGA Championship—Justin Thomas overcame fellow American golfer Will Zalatoris in a three-hole aggregate playoff to win the 104th PGA Championship and his second major title at Southern Hills Country Club in Tulsa, OK, May 22. Starting the final round seven strokes behind then-leader Mito Pereira of Chile, Thomas pulled off four birdies over the last 10 holes of regulation play and edged Zalatoris by one stroke in overtime to finish with a 5-under-275.

Sweden's Ericsson Wins Indy 500—Marcus Ericsson won the 106th Indianapolis 500 at Indianapolis Motor Speedway May 29 after seizing the lead with 11 laps remaining and holding off Mexico's Pato O'Ward by nearly two seconds at the finish as the two coasted across under a yellow caution flag. Only the second Swedish driver to win the event, 31-year-old Ericsson led just 13 laps total compared to 95 by New Zealander Scott Dixon, a six-time race winner who was penalized out of contention after speeding at the pit lane entrance with 25 laps remaining.

June 2022

National

House Jan. 6th Committee Airs Public Hearings—The House select committee investigating the Jan. 6, 2021, attack on the U.S. Capitol held its first public televised prime-time hearing June 9, followed by five others throughout the month, focusing on former Pres. Donald Trump's attempts to overturn the presidential election result and his alleged responsibility for the insurrection. The hearings aired almost 20 hours of in-person testimony from over a dozen witnesses and video statements from some 40 others, including ex-White House officials and Trump family members. The first hearing showed never-before-seen footage of the attack, including rioters echoing Trump's criticism of then-Vice Pres. Mike Pence for certifying the election. Former Trump aides testified that the president resisted pleas to call off the rioters and believed Pence deserved to be hanged, as some rioters had threatened. Officials also testified that Trump had been advised there was no credible evidence of election fraud. In taped testimony that aired June 13,

former Atty. Gen. William Barr dismissed Trump's allegations as groundless, describing him as "detached from reality if he believes this stuff."

Other notable testimony provided evidence that Trump had attempted to install a sympathetic acting attorney general to back his fraud theories, ordered the illegal seizure of voting machines, and pressured Arizona and Georgia state officials to "find votes" for him. An assistant to then-White House Chief of Staff Mark Meadows, in headline-grabbing testimony June 28, said that Trump and Meadows knew Trump supporters on Jan. 6 were armed, yet Trump wanted less security at the rally and even encouraged them to march on the Capitol.

On June 6, five members of the nationalist group Proud Boys were charged with seditious conspiracy (an effort by two or more people to "overthrow, put down, or to destroy by force" the U.S. government) for their involvement in the attack; similar charges had been filed against members of the Oath Keepers militia in Jan. 2022.

Federal Reserve Announces More Rate Hikes; Other Economic News—After raising benchmark interest rates a half-point the month before, the Federal Reserve June 15 raised them a further 0.75%, deploying one of their only tools believed to have a chance of quelling inflation. Annual inflation was up 8.6% in the 12 months since May 2021—the highest in 41 years—according to the monthly Bureau of Labor Statistics (BLS) report released June 10. The cost of groceries and gasoline remained particular concerns; the national average gas price reached \$5 per gallon in mid-June. The Dow Jones Industrial Average closed June at 30,775.43, down 6.7% from May; the S&P 500 finished the month at 3,785.38, down 8.4%. The Nasdaq Composite Index lost 8.7% to close at 11,028.74.

The BLS June 3 reported that the economy added 390,000 jobs in May—decreasing the balance of some 22 mil jobs lost at the early phase of the pandemic to 822,000—while the unemployment rate held at 3.6% for the third straight month. The Bureau of Economic Analysis's revised figures, released June 29, showed that in the first quarter of 2022, real GDP decreased at an annual rate of 1.6%, compared to a 6.9% gain the prior quarter.

Supreme Court Ends Constitutional Right to Abortion—

Formalizing a draft opinion that leaked a month earlier, the U.S. Supreme Court on June 24 overturned its own landmark *Roe v. Wade* (1973) precedent that established a federal constitutional right to abortion and its later ruling in *Planned Parenthood v. Casey* (1992) reaffirming that right. Writing for the majority, Justice Samuel Alito said, “We... hold that the Constitution does not confer a right to abortion. *Roe* and *Casey* must be overruled, and the authority to regulate abortion must be returned to the people and their elected representatives.” The Court voted along expected 6-3 ideological lines to uphold Mississippi’s 15-week abortion ban in the case of *Dobbs v. Jackson Women’s Health Organization*. But Chief Justice John Roberts joined the three liberal justices in the 5-4 minority on the vote to overturn *Roe*. In a joint dissenting opinion, Justices Stephen Breyer, Elena Kagan, and Sonia Sotomayor said that the decision “breaches a core rule-of-law principle, designed to promote constancy in the law.... It places in jeopardy other rights.... And finally, it undermines the Court’s legitimacy.” (Justice Clarence Thomas in his concurring opinion urged the reconsideration of other Court rulings, including decisions protecting same-sex marriage and access to contraceptives.)

By July 1, more than a dozen mostly GOP-led states in the Midwest and South had banned or heavily restricted abortion, and more were expected to do so. According to a Pew Research Poll conducted June 27-July 4, 62% of those surveyed believed abortion should be legal in all or most cases.

Biden Signs Gun Bill in Aftermath of Mass Shootings—Pres.

Joe Biden June 25 signed the most extensive federal gun safety legislation in nearly three decades after mass shootings the month prior in Uvalde, TX, and Buffalo, NY, created another crescendo of calls for action. Passed by the Senate, 65-33, and by the House, 234-193, the Bipartisan Safer Communities Act strengthened background checks for gun buyers under age 21; provided funding to states to administer “red flag” laws and community violence intervention programs; expanded mental health programs and school security funding; and banned dating partners convicted of domestic

abuse—rather than just spouses, closing the so-called boyfriend loophole—from purchasing a gun. The bill, supported by just over a dozen Republican members each in both the Senate and House, did not include long-sought regulations such as a renewal of the assault rifle ban or the instating of universal background checks. On June 11, rallies in support of gun reform led by March for Our Lives, formed in the wake of the 2018 Parkland school shooting, were held in more than 450 cities.

Over 50 Migrants Die After Being Trapped in Overheated Truck—Fifty-three dead or dying migrants were discovered June 27 in a sweltering tractor-trailer abandoned near an interstate highway in San Antonio, TX, in what was reportedly the deadliest smuggling incident in U.S. history. (Two suspects were indicted July 20.) Most of the victims were from Mexico or Guatemala. The tragedy occurred as numbers of migrants crossing the southern border were increasing, with U.S. Customs and Border Protection stopping migrants a record 239,000+ times the month prior.

Supreme Court Ends Term With Rulings on Climate Change, Gun Rights, Separation of Church and State—The U.S. Supreme Court concluded its 2021-22 term June 30 with a 6-3 ruling in *West Virginia v. EPA* that restricted the federal agency's ability to regulate carbon emissions from existing power plants. Writing for the majority, Chief Justice John Roberts said the EPA “must point to ‘clear congressional authorization’ for the power it claims.” (Congress, perennially polarized, had failed to pass legislation in support.) Roberts was joined by his fellow conservative justices Thomas, Alito, Gorsuch, Kavanaugh, and Coney Barrett; Breyer, Kagan, and Sotomayor dissented. The same 6-3 majority a week earlier issued a landmark ruling in *New York State Rifle & Pistol Association, Inc. v. Bruen* that struck down the state's 108-year-old law limiting the carrying of concealed handguns. Writing for the majority, Associate Justice Clarence Thomas wrote that the Second Amendment safeguards “an individual's right to carry a handgun for self-defense outside the home.”

Another 6-3 decision June 21, *Carson v. Makin*, found a Maine school voucher program used by rural parents to send their children

to private or public schools could not exempt religious schools from eligibility. Roberts, again writing for the majority, said the program engaged in “discrimination against religion,” while Sotomayor in a dissenting opinion said the Court “continues to dismantle the wall of separation between church and state that the Framers fought to build.” On June 27, the same 6-3 majority in *Kennedy v. Bremerton School District*, sided with a Washington state high school football coach whose on-field, post-game prayers resulted in his dismissal.

The Court decided 66 cases during the 2021-22 term, the 28th and last for retiring Justice Stephen Breyer. After an armed man was arrested outside the home of Justice Kavanaugh June 8, 2022, Congress expanded security protections to justices’ immediate families.

International

Terror Attacks Kill 130 in Mali, 40 at Nigerian Church—Jihadist gunmen killed some 132 people in three villages June 18-19 in central Mali’s Mopti region, according to Mali officials. The attack was reportedly the deadliest since a 2020 military coup. Separately, a UN peacekeeper in Mali was killed that same weekend, followed by two more in early July, highlighting the ongoing danger facing the UN’s deadliest peacekeeping mission; more than 250 UN-affiliated personnel had been killed there since 2013.

Islamic militants were also suspected of an attack in southwestern Nigeria on a Catholic church in Owo, Ondo state, on June 5 that killed at least 40 people.

CDC Clears Coronavirus Vaccine for Young Children; Other Pandemic Developments—The CDC June 18 recommended that children as young as six months should receive either the Pfizer-BioNTech or Moderna COVID-19 vaccine. Though the agency’s announcement was eagerly anticipated by some parents, a Kaiser Family Foundation poll in July found more than 40% of parents of children under 5 would “definitely not” get them vaccinated. The expansion came as the CDC’s seven-day moving average for new reported positive cases was down slightly from the beginning of June, to less than 99,000 (up from about 25,000 in early Apr.). By

the end of the month, the CDC tallied nearly 87.5 mil confirmed cases, including over 1 mil deaths. A U.S. Census Bureau survey conducted June 1-13 revealed 19% of Americans were experiencing symptoms of long COVID, or post-COVID conditions, three or more months after being infected. According to the CDC, 71.2% of Americans 5 years and older were fully vaccinated as of June 29, 47.8% of whom had received a booster shot. Beginning June 12, the CDC no longer required negative test results for passengers boarding international flights to the U.S.

The World Health Org. tallied nearly 544.9 mil cumulative confirmed global cases (incl. close to 6.4 mil deaths) by June 30. According to Our World in Data, nearly 60.7% of people worldwide were vaccinated for COVID-19 as of June 30.

Leftist Wins Colombia's Presidency—Former FARC rebel Sen. Gustavo Petro narrowly won Colombia's runoff June 19, making him the country's first left-wing president as voters voiced discontent over inflation, inequality, and rural violence. Drawing around 50.5% support to about 47.3% for conservative businessman Rodolfo Hernández, Petro pledged to increase education opportunities, expand health care access and land ownership, and revamp the pension system.

Russia Intensifies Assault on Ukraine's Donbas; Other Invasion Developments—After weeks of heavy fighting, Russian forces on June 25 claimed complete control of the southeastern Ukrainian city of Severodonetsk. Previously home to some 100,000 residents, Severodonetsk, Luhansk's administrative center, was now almost completely occupied by Russian forces. Russia also controlled roughly half of neighboring Donetsk, which along with Luhansk makes up the pro-separatist Donbas region targeted by Russia since Apr. Ukrainian troops retreated to Lysychansk, where fighting continued to rage. On June 30, Ukraine retook Snake Island, a small, strategic island in the Black Sea seized by Russia Feb. 24, the first day of the invasion.

An aide to Ukrainian Pres. Volodymyr Zelenskyy told the BBC June 9 that up to 200 Ukrainian soldiers were being killed daily and appealed for more weapons from the West. Leaders of the G7

nations met in Bavaria, Germany, June 26-28, and pledged to back Ukraine “for as long as it takes” as across Ukraine, Russia launched missile strikes, including at a shopping mall in Kremenchuck, killing at least 15 civilians.

General

Johnny Depp Awarded \$10 Million in Defamation Suit—Actor Johnny Depp came out ahead with the June 1 verdict in a highly publicized defamation lawsuit against his former wife, actress Amber Heard, who in a 2018 *Washington Post* op-ed implicitly alleged abuse by Depp. The overseeing Fairfax, VA, judge allowed the six-week trial to be televised, contributing to a deluge of media commentary. Depp, awarded over \$10 mil—with \$2 mil awarded to Heard in a simultaneous defamation suit against him—had lost in 2020 a similar libel case in the UK.

UK Celebrates Queen Elizabeth’s Platinum Jubilee—Britons June 2-5 celebrated Elizabeth II’s seven decades as queen, the longest reign in British history. With more than 7,500 events and street parties, according to the official Platinum Jubilee website, the formal festivities commenced with the annual Trooping the Color ceremony (not held for two years due to COVID-19) in honor of the Queen’s 96th birthday.

Swiatek and Nadal Claim French Open Titles—Top-ranked Iga Swiatek of Poland easily defeated American Coco Gauff, ranked No. 23, in straight sets (6-1, 6-3) to win her second Grand Slam victory and French Open women’s singles title June 4 at Roland Garros in Paris, France. It also marked the 21-year-old Swiatek’s 35th straight victory. The following night, No. 1-ranked Rafael Nadal of Spain overpowered No. 8-ranked Norwegian Casper Ruud (6-3, 6-3, 6-0) to win his 14th French Open title and increase his men’s singles titles record to 22.

Mo Donegal Wins Belmont Stakes—Mo Donegal won the 154th Belmont Stakes June 11 at Belmont Park in Elmont, NY. Ridden by Puerto Rican-born jockey Irad Ortiz Jr., the 5-2 race favorite seized the lead in the final stretch and crossed the finish in 2:28.28, three lengths ahead of runner-up Nest.

Flooding Closes Yellowstone National Park—Record flooding and accompanying landslides at the 150-year-old Yellowstone National Park forced its closure June 13, for the first time in 34 years. Severely damaging roads and other infrastructure in the U.S.'s first national park, located mostly in northwestern Wyoming, the intense flooding was driven by heavy rains June 10-13 that triggered rapid snowmelt.

Golden State Warriors Win NBA Championship—The Golden State Warriors won Game 6, 108-90, over the Boston Celtics at TD Garden in Boston, MA, June 16, bringing them their fourth NBA championship in eight years. Thwarting an early 22-16 lead by the Celtics, the Warriors—with under three minutes remaining in the first quarter of Game 6—pulled off a 21-0 run that helped secure a 54-39 lead at the half. Veteran Warriors point guard Stephen Curry earned his first Finals MVP; he averaged 31.2 points, 6 rebounds, and 5 assists in the Finals.

Fitzpatrick Wins Dramatic U.S. Open; Lee Wins Women's Open—The UK's Matt Fitzpatrick won the 122nd U.S. Open and his first major title June 19 at the Country Club in Brookline, MA. Starting the final round tied for the lead with American Will Zalatoris, Fitzpatrick bogeyed the 10th and 11th holes before seizing the lead outright on the 15th with a 19-ft birdie putt and finishing with a 6-under-274, one shot ahead of Zalatoris and American Scottie Scheffler. The PGA on June 9 suspended 17 players, including six-time major winner Phil Mickelson, for participating in the rival Saudi-funded LIV Golf Series.

On June 5, Australia's Minjee Lee won the 77th U.S. Women's Open and her second major title at the Pine Needles Lodge and Golf Club in Southern Pines, NC. Lee held off American Mina Harigae by four strokes to finish in 13-under-271 and claim a \$1.8-mil payout, the largest ever in women's golf.

Earthquake Kills Over 1,100 in Afghanistan—A magnitude 5.9 earthquake struck southeastern Afghanistan early morning June 22, killing over 1,100 people and injuring more than 6,000. The relatively shallow quake most heavily impacted remote villages in the mountainous Khost and Paktika provinces.

Colorado Avalanche Take Home Stanley Cup—The Colorado Avalanche edged two-time defending champion Tampa Bay Lightning, 2-1, June 26 in Game 6 at Amalie Arena in Tampa Bay, FL, to win the franchise's third Stanley Cup. Trailing Tampa Bay for most of the first period, the Avs tied and then gained the lead in the second. Avalanche defenseman Cale Makar unanimously won the Conn Smythe Trophy as the playoff MVP, achieving 8 goals and 21 assists in 20 games.

Amtrak-Truck Collision, Derailment Kills Four—An Amtrak train derailed, killing three passengers and injuring about 150 others in north-central Missouri, June 27. The train, traveling from Los Angeles to Chicago, left the tracks after colliding with a dump truck whose driver, also killed, failed to yield at an uncontrolled crossing with no lights or automatic barriers. The crossing was on the state's list of potential safety upgrades.

July 2022

National

Public Hearings on Jan. 6 Capitol Attack Continue; Other Developments—The House select committee investigating the Jan. 6, 2021, attack on the U.S. Capitol by supporters of Pres. Donald Trump convened two more public televised hearings, July 12 and July 21, during which more witness testimony detailed ties between the violent unrest and Trump, including the role of extremist groups and their alleged links with the White House. At the July 12 hearing, a former spokesperson for the far-right Oath Keepers testified that Trump's tweet to "be wild" at the Capitol galvanized supporters, and convicted rioter Stephen Ayres said he was "riled up" by Trump's words at the rally and "following what [Trump] said" when he went to the Capitol; White House counsel Pat Cipollone, in clips from a video deposition, testified that he told Trump, without effect, that the election was not fraudulent. The July 21 hearing scrutinized 187 min. of the attack during which Trump failed to act. Testimony showed that lawmakers, aides, and his daughter Ivanka Trump all appealed to Trump to condemn the rioters during that period; Trump resisted doing so and failed to alert law enforcement or national security

agencies. Witnesses said Vice Pres. Mike Pence, who had come dangerously close to rioters in video shown of the attack, contacted the Defense Dept.

News media reported July 21 that the Dept. of Homeland Security's Inspector General had launched a criminal probe into deleted Secret Service text messages potentially relevant to the Jan. 6 riot. Former Trump advisor Steve Bannon was found guilty July 22 of contempt of Congress after defying a subpoena from the House committee. As of July 7, the Justice Dept. had charged more than 855 people in connection with the Capitol break-in, more than 325 of whom had pleaded guilty.

Federal Reserve Hikes Interest Rates Again to Combat Inflation; Other Business, Economic News—The Federal Reserve raised benchmark interest rates July 27 by another three-quarters of a percent—its second increase at that level in six weeks, and fourth hike in five months—to attempt to limit surging inflation. Annual inflation hit a new 40-year high, up 9.1% in June from a year earlier according to a Bureau of Labor Statistics (BLS) report released July 13. Food and energy prices were primary contributors, with gas prices increasing about 60% and grocery prices up 12.2%. Though the economy entered a “technical recession” after the Bureau of Economic Analysis's July 28 estimate showed real GDP in the second quarter of 2022 decreased at an annual rate of 0.9% after dropping 1.6% the previous quarter, the White House and some economists said the strength of the labor market and other indicators were not consistent with recession. The BLS July 8 reported that employers added 372,000 jobs in June while the unemployment rate held at a near-50-year-low 3.6% for the fourth straight month.

Tesla and SpaceX CEO Elon Musk July 8 terminated his \$44 bil attempted acquisition of Twitter, prompting a legal suit from the social media company against Musk. The Dow Jones Industrial Average closed July at 32,845.13, up 6.7% from June, and the S&P 500 finished the month at 4,130.29, a 9.1% increase. The Nasdaq Composite Index gained 12.3% to close at 12,390.69.

International

Russia Claims Full Control of Ukraine's Luhansk; Other Invasion Developments—Russia's military July 3 claimed complete control of the eastern region of Luhansk after driving Ukrainian troops out of their last remaining stronghold of Lysychansk. Heavy fighting continued throughout July in adjoining Donetsk, which, along with Luhansk, makes up the pro-Russian separatist Donbas. Ukraine controlled roughly half of Donbas at the start of the month. Late on July 28, an explosion at a detention camp in Olenivka in a Russian-occupied section of Donetsk killed at least 50 Ukrainian prisoners of war; Russia, without evidence, blamed their deaths on a Ukrainian missile. The Office of the UN High Commissioner for Human Rights (OHCHR) recorded 5,327 civilians killed and 7,257 injured Feb. 24-July 31, though it said the actual number was likely much higher. Briefing U.S. lawmakers, the White House in late July said it believed up to 75,000 Russian troops had been killed or injured over that span.

Russia and Ukraine signed a UN-negotiated agreement July 22 permitting Ukraine to export grain from Black Sea ports amid a global food crisis. Russia nonetheless carried out a missile attack the next day on the port city of Odesa.

UK Prime Minister Steps Down Amid Scandals—British Prime Min. Boris Johnson resigned July 7 as Conservative Party leader after nearly 60 members of Parliament (MPs) quit his government within 48 hours. (He would remain in office until a new party leader was chosen.) Though the 58-year-old politician survived a no-confidence vote in June, Johnson faced a full-scale revolt in early July after he admitted he was aware of sexual harassment allegations against MP Chris Pincher before promoting him in Feb. 2022. (Pincher resigned June 30 after he was accused of groping two men.) Johnson, who was mayor of London in 2008-16, became prime minister in 2019 and expedited Brexit's completion.

Former Prime Minister Assassinated in Japan—Former conservative Japanese prime minister Shinzo Abe was assassinated July 8 while delivering a speech in Nara, outside of Osaka. The shooting death of 67-year-old Abe, Japan's longest-serving prime minister (2006-07; 2012-20) by a gunman using a homemade

firearm amounted to a rare act of gun violence in the country, which has among the world's strictest gun laws. The 41-year-old suspect, Tetsuya Yamagami, was arrested at the scene; he told authorities he shot Abe over his ties to the Unification Church (UC). (The UC has faced criticism and lawsuits alleging it pressured congregants into making large donations.) Abe's tenure as prime minister included his "Abenomics" program that aimed to revive Japan's struggling economy.

At the time of his assassination, Abe was campaigning for candidates representing the Liberal Democratic Party, which along with allied parties won a supermajority two days later in the less powerful upper house; the coalition already controlled over two-thirds of the lower house.

U.S. Strike Kills ISIS Leader in Syria—American military officials announced that a U.S. drone strike in northwestern Syria near Aleppo, July 12, killed the leader of the Islamic State's Syrian branch. The death of Maher al-Agal followed a U.S. raid in Feb., also in northwestern Syria, that led to the death by suicide bombing of the Islamic State's then leader. At its peak, in late 2014, the Islamic State (also known as ISIS) held roughly 40% of Iraq and about a third of Syria.

Sri Lankan President Flees Country Amid Protests, Resigns in Exile—Sri Lankan Pres. Gotabaya Rajapaksa resigned July 14, a day after he left the country amid demonstrators' demands he step down as Sri Lanka continued to face its worst economic emergency since obtaining independence in 1948. With the assistance of the military, Rajapaksa July 9 escaped his official residence in Colombo just before protesters breached its exterior. Fleeing to the Maldives and then Singapore, Rajapaksa appointed Prime Min. Ranil Wickremesinghe acting president. Protesters demanded Wickremesinghe step down as well, even as Wickremesinghe declared a state of emergency giving police and military broad powers. Since Mar., mass demonstrations had protested the government's corruption and handling of the economic crisis, marked by frequent power outages and insufficient fuel and basic goods. According to a July 6 UN World Food Program assessment, nearly

6.3 mil Sri Lankans were food insecure, as inflation in the country reached 57.4%.

Biden Meets With Saudi Crown Prince—U.S. Pres. Joe Biden, as part of a Middle East trip, met with Saudi Arabian Crown Prince Mohammed bin Salman (MBS) in Jiddah, July 15, drawing objections from some claiming the meeting—particularly a fist bump between the two—served to downplay the crown prince’s link to the 2018 assassination of Saudi dissident journalist Jamal Khashoggi. (U.S. intelligence in early 2021 concluded MBS had approved the killing.) Biden said he raised the issue during the meeting, which also reportedly included a failed attempt to reach a deal for Saudi Arabia to ramp up oil production amid high energy prices.

Biden Contracts COVID; Other Pandemic News—Pres. Biden announced July 21 that he had contracted COVID-19 and was working at the White House in isolation. Biden, who was twice vaccinated and twice boosted, was treated with therapeutic Paxlovid. The president’s infection coincided with a rise in U.S. cases driven by the highly contagious Omicron subvariant BA.5; it was responsible for almost 78% of new cases, which had almost tripled over the last three months according to the CDC. As of July 31, the CDC tallied nearly 91.3 mil cumulative confirmed cases in the U.S., including some 1.03 mil deaths. Cases were likely being undercounted because of widespread home testing. On July 19, the CDC recommended Novavax’s non-mRNA COVID-19 vaccine for adults as a fourth vaccine option.

The World Health Org. at the end of July reported nearly 575 mil total cases and more than 6.4 mil deaths globally. According to Our World in Data, about 61.6% of the world’s population was fully vaccinated as of July 31. The most highly vaccinated region remained the EU, at over 73.1%, versus the lowest, Africa, at 20.7%.

WHO Declares Monkeypox a Global Health Emergency—The World Health Org. July 23 declared an outbreak of the monkeypox virus a “public health emergency of international concern” after the case count grew to more than 16,500 (incl. 5 deaths) in at least 74 countries and territories. Related to the far more deadly smallpox virus, monkeypox causes painful rashes and flu-like symptoms but is

preventable by vaccines. As of WHO's declaration, its second in three years after COVID-19 in 2020, the majority of reported infections were in Europe, led by Spain with over 3,100 cases; most cases identified to date were among gay men. Second highest was the U.S., at nearly 2,900 cases, while Germany and Britain each tallied over 2,200. New York and California led within the U.S., with 1,345 and 799 cases, respectively, as of July 29. Both states' governors declared public health emergencies, and on Aug. 4, the Biden administration declared a national emergency. By Aug. 22, all 50 states had reported cases.

U.S. Kills al-Qaeda Leader; Taliban Cracks Down on Women a Year After Takeover—A CIA drone strike on a Kabul residence July 31 killed Ayman al-Zawahiri, leader of al-Qaeda since Osama bin Laden's death in 2011 and reportedly a key planner in the Sept. 11, 2001, attacks. The precision drone strike on the 71-year-old was the U.S.'s first significant use of force in Afghanistan following the Taliban's takeover of the country in Aug. 2021. On Aug. 13, the Taliban violently broke up a demonstration by roughly 40 women in Kabul who were protesting the regime's restrictive rule. While the Taliban had pledged to respect women's rights upon their return to power, the group instead ordered women to cover their faces in public, prevented high-school-age girls from attending school, and barred women from traveling abroad solo.

According to the UN Office for the Coordination of Humanitarian Affairs, Afghanistan faced a deepening crisis, with roughly 24 mil people—over half the country's population—including 3 mil severely malnourished children in need of humanitarian relief amid a severe and ongoing drought.

General

Shooter Kills Seven at Parade in Chicago Suburb—A rooftop shooter opened fire July 4 at parade onlookers in the affluent northern Chicago suburb of Highland Park, IL, killing seven and injuring more than 30. Among those killed were both parents of a 2-year-old boy found unattended but unharmed. Police after an hours-long hunt arrested 21-year-old Robert E. Crimo III, whom they said

admitted to the shooting. He had passed background checks to purchase the semi-automatic rifle he used despite violent threats in 2019 that caused a relative to call police, who had confiscated a sword and more than a dozen knives.

Heat Waves Grip Europe, U.S., China—Another heat wave struck much of Europe, killing more than 1,000 mostly elderly residents in Portugal July 7-18 and more than 850 people July 10-18 in neighboring Spain. The extreme temps migrated north to France, Germany, and the UK. Hot, dry conditions exacerbated wildfires that forced thousands to evacuate in France, Greece, Portugal, and Spain.

In the U.S., 43 locations primarily in southern and western states set or tied July heat records, and roughly 60% of Texas faced severe drought. In late July, some 90 wildfires blazed in a dozen states; California's fast-moving Oak Fire threatened Yosemite Natl. Park's 2,000-year-old sequoias.

China by the end of Aug. weathered a 70+-day record-setting heat wave that started in mid-June and dried up numerous lakes and rivers, severely affecting hydropower generation.

Rybakina and Djokovic Take Wimbledon Titles—No. 23-ranked Elena Rybakina rallied after a first-set loss to win the Wimbledon Championship in London July 9, defeating Ons Jabeur of Tunisia (3-6, 6-2, 6-2). Her victory made Rybakina the first player representing Kazakhstan to win a Grand Slam singles title; No. 2-ranked Jabeur was the first Arab woman to play in a Grand Slam final. The next day, No. 3-ranked Novak Djokovic of Serbia defeated Australia's unseeded Nick Kyrgios (4-6, 6-3, 6-4, 7-6) to win his 7th Wimbledon and 21st career Grand Slam singles title.

NASA Shows Off First Webb Telescope Images—NASA on July 12 released the first much-heralded images from the James Webb Space Telescope (JWST), the 100-times-more-powerful successor to the still-operating Hubble Space Telescope (launched 1990). Initial images from JWST, which was developed in collaboration with European and Canadian space agencies, revealed previously unseen details of galaxy clusters and the birth of a star.

Launched from French Guiana via rocket in Dec. 2021, the tennis-court-sized scope orbits the Sun.

Smith Takes British Open—Australian Cameron Smith won the 150th Open Championship and his first major title at the Old Course at St. Andrews, Scotland, July 17. In the last round, Smith pulled off eight birdies (five consecutively) to finish at 20-under-268, one stroke ahead of American Cameron Young and two ahead of Rory McIlroy of Northern Ireland.

Danish Racer Wins Tour de France—Jonas Vingegaard of Denmark won the 109th Tour de France July 24, completing the grueling 2,081-mi., 21-stage race in 79 hr., 33 min., 20 sec., ahead of two-time defending champion Tadej Pogacar of Slovenia by 2 min., 43 sec. Brit Geraint Thomas, 2018's winner, finished third. Belgium's Wout van Aert claimed the coveted green sprinter's jersey. The 2022 Tour had the smallest finishing field (135) since 2000, due in large part to COVID-19, which disqualified at least 17 riders; high temperatures were also a factor.

Flooding Kills Dozens in Kentucky—Nearly 40 people were killed as a result of historic flooding and mudslides brought on by torrential rains July 26-28 in Kentucky's Appalachian foothills. The flooding, which had been made more likely due to climate change and unrestored strip mines, washed away houses after deluging roads and waterways, including the North Fork of the Kentucky River, which rose 18 ft in 10 hours July 28 at Whitesburg, KY, 6 ft above its prior record set in 1957. Pres. Biden July 29 approved a disaster declaration for 13 Kentucky counties.

The same storm system dropped over 9 in. of rain July 25-26 on the St. Louis area, triggering flash flooding that killed at least two people.

England Victorious at Women's EURO 2022—England narrowly edged Germany, 2-1 in extra time, at the 2022 UEFA (Union of European Football Associations) Women's European Championship July 31 at Wembley Stadium in London, England. It was England's first championship final appearance since 2009 and gave the country its first major international soccer title for any men's or women's team since 1966.

August 2022

National

FBI Executes Mar-a-Lago Search Warrant—The FBI Aug. 8 executed a search warrant at Mar-a-Lago, former Pres. Donald Trump's Palm Beach, FL, residence, over a Justice Dept. investigation into whether Trump illegally took classified documents out of the White House and tried to obstruct the resulting probe. The search found more than 100 classified documents including 31 labeled "confidential," 54 "secret," and 18 "top secret." In total, more than 11,000 documents were recovered that day, along with 48 empty folders marked classified. In Jan. 2022, the National Archives and Records Admin. (NARA), the independent federal agency that legally retains ownership of a president's documents after leaving office, had retrieved 15 boxes from Mar-a-Lago that should have been transferred to the archives a year earlier. That revelation, which included 184 classified docs, reportedly triggered the ongoing probe.

Trump, who publicized the FBI's raid via a personal statement, accused the FBI of misconduct and the "weaponization of the Justice System" and alleged that "Radical Left Democrats" organized the probe to subvert his potential 2024 presidential run. Threats against the FBI surged, and in Cincinnati, an armed man in body armor was killed by police Aug. 11 after he tried to breach FBI offices. Atty. Gen. Merrick Garland in a brief speech said the DOJ had filed a motion to unseal the search warrant, a redacted version of which was released Aug. 26. Media reports later in the month detailed the extremely sensitive nature of some of the found documents, including ones on U.S. intelligence gathering.

Inflation Eases Slightly as Gas Prices Decline; Economy Recovers Remaining Pandemic Job Losses; Other Economic News—The rate of annual consumer inflation eased slightly, according to a Bureau of Labor Statistics (BLS) report released Aug. 10, dipping from 9.1% in June to 8.5% in July, as energy prices began to decline. The national average price for a gallon of regular gas dropped from \$4.93 in June to \$4.56 in July, still up \$1.42 from a year earlier, according to the Energy Information Admin. Single-

family home sales were down 12.6% in July from the month prior, and 29.6% from a year earlier, according to an Aug. 23 Census Bureau and Dept. of Housing and Urban Development report; analysts attributed the decline to persistently high prices and fast-rising mortgage rates.

The BLS Aug. 5 reported that the economy added 528,000 jobs in July, replacing the balance of the roughly 22 mil jobs lost in the early months of the COVID-19 pandemic. The unemployment rate fell a tenth of a point, to 3.5%. The Dow Jones Industrial Average closed the month at 31,510.43, down 4.1% from July, while the S&P 500 finished Aug. at 3,955.00, a 4.2% decrease. The Nasdaq Composite Index lost over 4.6% to close at 11,816.20.

Southern Border Migrant Arrests at Record Levels; Texas Steps Up Controversial Migrant Busing Program—Apprehensions of migrants on the U.S. southern border during the first 10 months of FY2022 reached nearly 1.95 mil, easily surpassing the previous record of more than 1.73 mil during all of FY2021, according to data released Aug. 15 by U.S. Customs and Border Protection (CBP). Analysts cautioned that CBP's figures included multiple attempts by "repeat crossers"; 26% of migrants stopped in June and 22% the next month had been apprehended at least once before in the past 12 months.

Texas Gov. Greg Abbott (R) continued his administration's controversial program, introduced in Apr. 2022, of busing migrants from the Texas-Mexico border to northern U.S. cities such as Washington, DC; New York City; and Chicago; as of Aug. 26, Texas had bused over 7,400 migrants to the nation's capital and over 1,500 to New York. Abbott July 7 had signed an executive order authorizing the Texas National Guard and state law enforcement to arrest migrants entering illegally from Mexico and return them to federal border crossings.

Biden Signs Major Climate Bill, PACT Act—Pres. Joe Biden signed a sweeping \$700-bil climate, health care, and tax package Aug. 16, providing \$369 bil for clean energy investments and consumer tax credits for electric cars and solar panels that, along with other provisions, were projected to cut U.S. carbon emissions

by 40% by 2030. The Inflation Reduction Act of 2022 also provided for Affordable Care Act insurance premium subsidies, capped seniors' Medicare out-of-pocket drug expenses at \$2,000 per year, allowed the government to negotiate prices with drugmakers, and allocated \$80 bil to the IRS to hire more agents and modernize. Raising nearly \$740 bil in revenue over the next decade, mainly through a 15% minimum tax on corporations making over \$1 bil and a 1% tax on stock buybacks, the act was forecast to shrink the federal budget deficit by approx. \$300 bil over the same span. Despite the bill's name, the Congressional Budget Office said it would have a "negligible effect" on inflation in 2022-23.

The Senate passed the bill Aug. 7 on a party-line 51-50 vote—with Vice Pres. Kamala Harris breaking the tie—before the House Aug. 12 approved it as amended, 220-207, with all Republicans in opposition. The bill's passage followed 18 months of sometimes contentious negotiations, during which an earlier iteration, the roughly \$2-tril Build Back Better Act, had stalled.

Biden on Aug. 10 signed into law the bipartisan PACT Act, expanding health care for veterans who were in contact with toxic "burn pits" the U.S. military regularly used overseas.

Biden Cancels \$10,000 in Student Debt for Most Borrowers— Pres. Biden signed an executive order Aug. 24 canceling up to \$10,000 in federal student loans for persons earning less than \$125,000 per year and up to \$20,000 in debt for students who received Federal Pell Grants. According to the White House, the action would benefit 43 mil borrowers. Biden also extended the COVID-era pause on student loan repayment—in effect since Mar. 2020—through Dec. 31, 2022. Though the order applied to existing federal loans and Pell Grants only, it also eased repayment, including loan forgiveness after 10 years for initial loans of \$12,000 or less and elimination of accruing interest for those making payments. Republicans threatened legal challenges against Biden's authority to unilaterally forgive the loans, and critics declared the move unfair to those who had already paid while lambasting the cost of the change.

International

U.S. House Speaker Visits Taiwan—U.S. House Speaker Nancy Pelosi (D, CA), met with Taiwanese Pres. Tsai Ing-wen and other lawmakers Aug. 3 in Taipei, the capital, and said publicly afterwards that China “will not isolate Taiwan by preventing us to travel there.” But both Pelosi and the Biden administration—which reportedly opposed her visit—said the U.S. would maintain its “one China” policy recognizing Beijing and the Communist Party as China’s official government and acknowledging diplomatically China’s claim that Taiwan is part of China, while allowing the U.S to have unofficial and defense relations with Taiwan. The day after Pelosi’s Taiwan visit, China conducted military drills in waters surrounding Taiwan, including launching live missiles at offshore targets. China Aug. 5 also paused cooperation with the U.S. in eight policy areas, including climate change. On Aug. 12, the *Wall Street Journal* reported that Chinese officials were preparing for an in-person meeting between Pres. Xi Jinping and Pres. Biden at the upcoming G20 summit in Nov. in Bali, Indonesia.

Ukraine Strikes Targets in Russia, Announces Offensive in South; Other Invasion News—Ukraine’s military Aug. 9 appeared to carry out its first large-scale strike on bases in the Russian-annexed Crimean Peninsula at Saky airfield and ammunition warehouses in Novooleksiivka. Other strikes by Ukraine, targeting ammunition depots and other military facilities within Russia, were reported the following week, including one near Timonovo, in Belgorod province. At multiple points in Aug., each side blamed the other for the shelling of Europe’s largest nuclear power plant, in Zaporizhzhia in southeastern Ukraine. Stressing nuclear risk, 42 countries and the EU called Aug. 15 for Russia to immediately withdraw from the plant, which had been in its control since Mar. but was still operated by Ukrainian technicians.

Ukraine’s military Aug. 29 announced an offensive to retake areas across its southern region; officials that same day claimed troops pushed through Russia’s outer line of defense in the port city of Kherson. Under a UN-brokered agreement, the first cargo ship

carrying grain since the start of the invasion left Odesa Aug. 1. The U.S. on Aug. 24—the six-month anniversary of Russia’s invasion—announced nearly \$3 bil in military assistance to Ukraine, its largest such package to date, bringing the total since Biden took office to over \$13.5 bil.

Russia Imposes Harsh Sentence on WNBA Star—A Russian court sentenced American WNBA star and two-time Olympic gold medalist Brittney Griner Aug. 4 to nine years in a penal colony after she pleaded guilty to bringing two cannabis vape cartridges into the country, where they are illegal. Detained since mid-Feb., Griner told the court she had accidentally packed the cartridges, which she obtained using a medical prescription in Arizona. Amid strained relations between Russia and the West over its invasion of Ukraine, the U.S. State Dept. had designated Griner as “wrongfully detained” and was expected to attempt a prisoner swap.

CDC Announces Agency Revamp; China Imposes Additional Lockdowns; Other Pandemic News—U.S. CDC Dir. Rochelle Walensky Aug. 17 announced a restructuring of the agency, acknowledging it had not responded effectively at the start of the coronavirus pandemic and at various points since. At the end of Aug., the CDC reported that average life expectancy in the U.S. in 2021 dropped for the second straight year, by nearly one full year, to 76.1 years; half of the decline was attributed to COVID-19. As of Aug. 31, the CDC reported nearly 94.4 mil cumulative confirmed cases in the U.S. (incl. 1.04 mil deaths), as the seven-day moving average of new infections declined from more than 122,000 at the beginning of Aug. to less than 87,000 at its close.

The World Health Org. tallied over 600 mil cumulative global cases (incl. nearly 6.5 mil deaths) as of Aug. 31. Maintaining China’s zero-tolerance policy, authorities Aug. 29 closed the largest wholesale electronics market in the world, in Shenzhen, for several days after infection flare-ups were detected; millions were ordered under lockdown. According to Our World in Data, 62.2% of the global population was fully vaccinated as of Aug. 31, compared to 67.6% in the U.S. In mid-Aug., the UK became the first country to approve a vaccine booster targeting the Omicron variant.

Unrest Afflicts Baghdad as Prominent Cleric Leaves Politics

—Amid Iraq's longest political impasse since the U.S. invasion in 2003, supporters of the popular Iraqi Shiite cleric Muqtada al-Sadr Aug. 29-30 stormed the presidential palace in Baghdad, igniting clashes with security personnel in which at least 30 people were killed and over 400 injured. The incident came after al-Sadr announced his retirement from politics via Twitter. Violence quelled only after he made an appeal for calm on a live TV broadcast. Iraq's parliament had been deadlocked since Oct. 2021 elections, when al-Sadr's party won the most seats but lacked a governing majority; his entire political bloc resigned their seats in June. In late July, al-Sadr supporters began holding extended sit-ins at parliament as parties struggled to agree on the specifics of dissolving parliament and holding new snap elections.

UN Releases Damning Report on Treatment of Uyghur Minority in China—On Aug. 31, the UN human rights office released a long-anticipated report on northwestern China's Uyghur ethnic minority that concluded the treatment of the mostly Muslim group, numbering around 11 mil, as well as other Turkic communities in the Xinjiang region, may constitute crimes against humanity. The report confirmed abuses including forced labor, torture, and large-scale arbitrary detention.

General

Water Shortage on Colorado River Declared; Flooding Shuts Down Arid Death Valley; More Climate News—The Interior Dept. Aug. 16 declared a first-ever water shortage for the Colorado River Basin after the U.S.'s largest water reservoir, Lake Mead, sank to around 28% capacity, its lowest level since the Hoover Dam's construction in the 1930s. Lake Mead, on the Arizona-Nevada border, has dropped more than 140 ft since the start in 2000 of a megadrought in the Southwest. The reservoir provides water to about 25 mil people in Arizona, Nevada, California, and Mexico. The designation of a Tier 2a shortage triggered water supply cuts to Arizona, Nevada, and Mexico by 21%, 8%, and 7%, respectively, beginning in Jan. 2023.

Amid continuing drought, near-record rain fell Aug. 5 on California's Death Valley Natl. Park, causing flash flooding that damaged roadways and closed the park for two weeks. The parched Dallas-Fort Worth, TX, area received 15 in. of rain in 24 hours Aug. 21-22, killing at least one person and causing an estimated \$4.5-\$6 bil in damages, according to AccuWeather. Regional heat waves continued, with more than 80 mil in the central and eastern U.S. under heat alerts Aug. 4, and 40-60 mil people across multiple Western states suffering soaring temps through early Sept.

Monsoon Rains Kill 1,300+ in Pakistan—Record rains killed more than 1,300 people in Pakistan between mid-June and early Sept. and left more than a third of the country underwater, according to satellite images released Aug. 30 by the European Space Agency. Officially the wettest monsoon season since the start of national record keeping in 1961, the amount of rain that fell was 3 to 10 times above normal, depending on the province. Pakistan's largest river, the Indus, swelled to roughly 60 mi wide, forming an enormous lake. According to Pakistan's National Disaster Management Authority, flooding affected some 33 mil people as of Aug. 28 and damaged over 2 mil acres of crops and some 2,100 mi of roads.

Flooding Incapacitates Water System in Mississippi Capital—Residents of Jackson, MS, the state's capital and largest city, were left without safe drinking water from their taps beginning Aug. 29 after the Pearl River, flooded from heavy rains, overwhelmed the city's main water treatment plant. Pres. Biden declared the crisis a federal emergency Aug. 30, the same day Gov. Tate Reeves (R) activated the National Guard to distribute water and implemented a state of emergency. A boil-water advisory, in place since late July due to persistent water quality issues, was lifted on Sept. 15. The Environmental Protection Agency, which has documented issues with the city's water treatment system dating back to a Mar. 2000 investigation, launched a more exhaustive probe in Sept. Jackson mayor Chokwe Antar Lumumba (D) said it would take \$2 bil to completely repair and replace the failing system.

Judge Orders “Special Master” in Trump White House Documents Probe—A federal judge Sept. 5 approved former Pres. Donald Trump’s request to appoint an independent arbiter, known as a “special master,” to review White House documents seized by the FBI from his Mar-a-Lago, FL, estate in Aug. The judge’s order temporarily suspended the Justice Dept.’s review of the records, some of which were believed to be sensitive or classified. The ruling by Judge Aileen Cannon, appointed by Trump in 2020, was criticized by many legal experts—including Trump’s own attorney general William Barr—as unprecedented overstepping of federal investigatory powers and likely to be overturned on appeal on different legal grounds. The Justice Dept. was successful in its appeal to a federal appeals court, Sept. 21, allowing the department to continue examining a subset of seized documents with classification markings.

Florida Governor’s Migrant Flights Draw Scrutiny—Florida Gov. Ron DeSantis (R) Sept. 14 sent nearly 50 Venezuelan asylum seekers aboard two chartered flights from San Antonio, TX, to the Massachusetts resort island of Martha’s Vineyard. The flights, which were unannounced and sent local officials scrambling to shelter and feed the migrants, followed several relocations of migrants from GOP-controlled border states to Democrat-led cities. Those efforts included buses sent by Arizona Gov. Doug Ducey (R) and Texas Gov. Greg Abbott (R) to the Democrat-controlled “sanctuary cities” of Washington, DC; New York City; and Chicago. Paid for as part of a Florida legislature-approved \$12 mil allocation to send migrants out of the state, the flights to Martha’s Vineyard were lambasted by Democrats as a possibly illegal political stunt. Bexar County (TX) Sheriff Javier Salazar (D) opened a criminal investigation amid allegations that the migrants were falsely promised jobs and housing to recruit them onto the flights.

Federal Reserve Announces Third Straight Interest-Rate Hike, Targeting Inflation; Other Economic News—The Federal Reserve on Sept. 21 raised benchmark interest rates by 0.75% for

the third time in three months as inflation remained its chief concern. In spite of previous rate hikes, the inflation rate eased only slightly in Aug., according to a Bureau of Labor Statistics (BLS) report released Sept. 13, with the Consumer Price Index up 8.3% over the previous Aug., compared to 8.5% in July. Though gas prices fell for a third straight month, grocery prices rose by 13.5% for the highest annual increase in 43 years, and the cost of electricity soared 15.8%.

A tentative deal reached Sept. 15 between freight rail workers' unions and management headed off a strike that would have halted roughly 7,000 freight trains and disrupted Amtrak passenger rail service at an estimated cost of \$2 bil per day to the national economy; however, the deal still needed to be ratified by union member vote. The BLS reported that employers added 315,000 jobs in Aug. while the unemployment rate ticked up to 3.7%. The Dow Jones Industrial Average closed the month at 28,725.51, down 8.8% from Aug., while the S&P 500 finished Sept. at 3,585.62, a 9.3% decrease. The Nasdaq Composite Index, meanwhile, lost nearly 10.5% to close at 10,575.62.

New York Civil Suit Accuses Trump of “Staggering” Business Fraud—Compounding former Pres. Trump's legal woes, New York State Atty. Gen. Letitia James filed a broad \$250-mil civil lawsuit Sept. 21 in the State Supreme Court alleging that Trump, three of his children, and his company systematically defrauded lenders and insurers by overstating Trump's wealth. The suit, which accused Trump and the others of more than 200 such violations over 10 years, cited numerous instances of alleged overvaluation of real estate, including Trump's Florida estate, Mar-a-Lago, which had been valued at almost 10 times its actual value. The suit also sought to revoke Trump's ability to oversee companies in the state.

In Aug., former Trump Org. chief financial officer Allen Weisselberg pleaded guilty to accepting more than \$1.7 mil in untaxed compensation and other criminal charges brought by the Manhattan district attorney.

International

Truss Installed as British Prime Minister—Former foreign sec. Liz Truss took office as the UK's new Conservative Party prime minister on Sept. 6, replacing Boris Johnson following multiple scandals. The country's fourth prime minister since 2016, Truss faced several immediate challenges, including spiking inflation and energy prices, labor strikes, tensions with China, and a splintered governing party. Later in the month, Truss announced plans for the largest tax cuts in a half-century, which would slash the top income tax rate while also increasing government debt through borrowing. Truss abandoned the tax proposal in early Oct. after its unveiling rattled UK financial markets. The British pound on Sept. 26 fell briefly to a record-low \$1.035 against the U.S. dollar.

Ukrainian Forces Carry Out Successful Counteroffensive; Other Invasion Developments—Ukrainian forces Sept. 6 launched a successful blitz to retake territory in the northeast from Russian occupying forces, claiming nearly all of the Kharkiv region, adjacent to the Russian-occupied Donbas region, within a week. Ukrainian Pres. Volodymyr Zelenskyy Sept. 12 said the counteroffensive and efforts in the east and south reclaimed over 2,300 sq mi.

Russian Pres. Vladimir Putin in a national address Sept. 21 called for a partial mobilization of up to 300,000 reservists to be deployed to Ukraine; he warned Western leaders he was not bluffing on threats to use nuclear weapons. Putin's order triggered demonstrations that led to the arrests by the end of the month of more than 2,000 protesters, and within a week, at least 200,000 Russians had fled to nearby countries. Four Russian-controlled regions of Ukraine (Donetsk, Luhansk, Kherson, and Zaporizhzhia) held referenda on joining Russia—widely denounced as shams that easily passed—and Putin Sept. 30 announced their annexation. Large gas leaks detected in late Sept. in two natural gas pipelines from Russia to Europe triggered allegations of sabotage.

Queen Elizabeth II Dies After Seven Decades on British Throne—Queen Elizabeth II, the UK's longest reigning monarch, died Sept. 8 at the age of 96 at Balmoral Castle in Scotland. Her death, after months of declining health, came just two days after she formally appointed Liz Truss the UK's new prime minister. After

serving as an Army auto mechanic during World War II, Elizabeth acceded to the throne in 1952 upon the death of her father, King George VI. As the country elected 16 prime ministers and the world went through tremendous geopolitical, economic, and cultural changes, Queen Elizabeth's symbolic role was a constant for Britain in a post-imperial, post-industrial era.

Upon Elizabeth's death, her eldest son, 73-year-old Prince Charles, acceded to the throne as King Charles III. Prince William, heir apparent to the throne, and his wife Catherine were named by Charles as Prince and Princess of Wales. Charles on Sept. 9 delivered his first address to the nation as king. Ten days later, a state funeral for Elizabeth was held at Westminster Abbey in London.

Kyrgyzstan-Tajikistan Border Clashes Kill Dozens—Clashes along a disputed portion of the 600-mi-long border between former Soviet republics Kyrgyzstan and Tajikistan killed approx. 100 people, including at least 37 civilians, Sept 14-19. Each side blamed the other for triggering the hostilities, which were said to have broken out between border guards in Batken and Soghd provinces. Nearly 60 of the fatalities reportedly occurred in Kyrgyzstan, where authorities said nearly 140,000 people were displaced after homes were burned. Tajik authorities said numerous houses on their side were also torched. Security officials reached an agreement Sept. 25 to demilitarize the afflicted section.

Death of Woman Arrested for Dress-Code Violation Sparks Iran Protests—Anti-government demonstrations in Iran were triggered by the death in police custody Sept. 16 of 22-year-old Kurdish woman Mahsa Amini, who had been arrested in Tehran for allegedly disobeying hijab dress-code laws. The women-led demonstrations began in Amini's hometown, Saqqez, in Kurdistan province, and spread to at least 80 cities. Security forces fired live rounds into crowds, killing at least 83 people as of Sept. 29, according to Norway-based NGO Iran Human Rights; Iran state media put the number of protesters and security forces killed at 41.

Accusing armed groups in Iraq's Kurdish region of fomenting unrest, Iran in late Sept. launched cross-border rocket and drone

attacks that killed 13 people. In Zahedan, Iran, at least 66 were killed Sept. 30 in a confrontation that became known as “Bloody Friday.” While state media described the incident as a separatist attack, other media later reported it as a crackdown on protesters by security forces.

Biden Declares COVID-19 Pandemic “Over”; Other Pandemic News—Pres. Joe Biden, in a CBS *60 Minutes* interview airing Sept. 18, said the “pandemic is over,” despite the country still having “a problem with COVID.” (A week earlier, World Health Org. head Tedros Adhanom Ghebreyesus said the pandemic’s end was “in sight.”) Some in the Biden administration expressed concerns that Biden’s comments, made as U.S. daily deaths from the virus exceeded 400, could deter efforts to secure funding for anti-COVID measures and slow uptake of booster vaccines. The CDC on Sept. 1 recommended Omicron variant-targeted booster vaccines for those eligible.

As of Sept. 30, the CDC reported nearly 96.2 mil cumulative confirmed cases (incl. 1.05 mil deaths) in the U.S., with a seven-day moving average case count of less than 46,100, the fewest since Apr. 2022. Globally, the World Health Org. reported 614.7 mil cases (incl. over 6.5 mil deaths). According to Our World in Data, more than 62.7% of the global population was fully vaccinated as of Sept. 30, compared to just over 68.0% in the U.S.; South America was the most vaccinated region, at nearly 77.0%, while Africa remained the least vaccinated, at 23.2%.

Far-Right Candidates Dominate Italian Election, Lead in Swedish Vote—A center-right coalition led by far-right leader Giorgia Meloni won an absolute majority of seats in Italy’s parliament in a snap general election held Sept. 25, bringing the country its first far-right government since World War II. Some leaders expressed concern over the neo-fascist roots of the coalition’s largest party, the far-right populist Brothers of Italy (Fdi), despite assurances from Fdi leader Meloni that the coalition would “govern for everyone.” Meloni’s alliance drew about 44% of the total vote, with Fdi alone garnering 26%, up from less than 4.5% in 2018. Saddled with public debt exceeding 150% of its GDP, Italy’s immediate challenges included

high unemployment, weak economic growth, and soaring inflation. Meloni took office as prime minister Oct. 22.

Sweden Prime Min. Magdalena Andersson Sept. 14 announced her resignation after her center-left coalition narrowly lost to a right-wing alliance in general voting Sept. 11. Though the far-right, neo-Nazi-rooted Sweden Democrats won the most support (over 20%, and 73 seats) in the winning bloc, the party's leader, Jimmie Akesson, was unlikely to become prime minister due to lack of support from the other parties. Center-right Moderate party (68 seats) leader Ulf Kristersson was instead tasked with working to form Sweden's next government; he took office as prime minister Oct. 18.

Cuba Legalizes Same-Sex Marriage—Cubans overwhelmingly approved legalizing same-sex marriage in a referendum held Sept. 25. Roughly two-thirds of those who turned out voted to support the measure, which also allows same-sex couples to adopt children, permits surrogate pregnancies, and codifies punishment for domestic violence. The development was a departure from earlier government policies, which had sent LGBTQ people to forced labor camps in the 1960s and 1970s. Cuba formally legalized homosexuality in 1979.

General

Swiatek, Alcaraz Take U.S. Open Tennis Titles; Serena Williams and Federer Retire—Top-ranked 21-year-old Iga Swiatek of Poland defeated Tunisia's Ons Jabeur in straight sets (6-2, 7-6) to win the U.S. Open women's singles championship and her third Grand Slam singles title Sept. 10 at Arthur Ashe Stadium in Flushing, NY. On Sept. 11, Spaniard Carlos Alcaraz overcame Norway's Casper Ruud (6-4, 2-6, 7-6, 6-3), securing his first Grand Slam title.

Retiring tennis legend Serena Williams was eliminated from her final competitive tournament following a third-round U.S. Open loss Sept. 2 to Australian Ajla Tomljanovic'. Over a 27-year professional career, the 41-year-old Williams amassed 4 Olympic gold medals, 23 Grand Slam singles titles—a record for any player in the Open era—and 14 Grand Slam doubles titles. Men's tennis great Roger Federer

of Switzerland announced his retirement ahead of London's Laver Cup, from which he and doubles partner Rafael Nadal of Spain—his rival for nearly his entire career—were eliminated Sept. 23. The 41-year-old Federer had collected 20 Grand Slam singles titles over his 24-year professional career.

Ted Lasso, Succession Triumph Again at Emmys—HBO's dynastic saga *Succession* won its second Emmy for outstanding TV drama series at the 74th Primetime Emmy Awards Sept. 12 in Los Angeles. Apple TV+'s soccer-team sitcom *Ted Lasso* won four awards, including its second straight Emmy for outstanding comedy series. HBO's social satire *The White Lotus* took home an evening-high five Emmys, including outstanding limited/anthology series.

Las Vegas Wins WNBA Championship—The Las Vegas Aces won Game 4 over the Connecticut Sun, 78-71, at Mohegan Sun Arena in Uncasville, CT, Sept. 18, to claim the franchise's first WNBA Championship. The match-up was a back-and-forth crowd-pleaser in the final quarter, with Las Vegas reclaiming the lead with less than 2.5 min. remaining. Aces point guard Chelsea Gray, who sank 9 of 13 for 20 points in Game 4 and averaged 18.3 points per game in the series, was named Finals MVP.

Hurricane Fiona Slams Puerto Rico, Caribbean, Canada—Hurricane Fiona on Sept. 18 reached Puerto Rico's southwestern coast as a Category 1 storm, delivering 85 mph winds and torrential rain that caused deadly flash flooding and mudslides and cut off power to the U.S. territory's 3.3 mil residents. A week later, roughly 45% of customers remained without electricity, and 20% did not have running water. Pres. Joe Biden Sept. 21 approved a major disaster declaration, making additional FEMA funds available. At least 15 deaths were attributed to the storm, according to Puerto Rican health officials, but more were being investigated as hurricane related.

After damaging more than 8,000 homes in the Dominican Republic, Fiona strengthened into a Category 3 storm, then crashed into the British territory of Turks and Caicos. Downgraded to a post-tropical cyclone, Fiona made landfall in Canada's Nova Scotia Sept. 24.

NASA Impacts Asteroid in Planetary Defense Test—An unmanned NASA spacecraft successfully collided with an asteroid some 6.8 mil mi from Earth on Sept. 26. The space agency's Double Asteroid Redirection Test (DART) mission was intended to assess the potential to alter the trajectories of asteroids that pose a danger to Earth. The probe, launched in Nov. 2021, slammed into the approx. 530-ft asteroid Dimorphos at about 14,000 mph, modifying its orbit.

Hurricane Ian Strikes Cuba, Florida—After knocking out power to Cuba, Hurricane Ian strengthened to a Category 4 storm and made landfall Sept. 28 on the barrier island of Cayo Costa, FL, with up to 150 mph winds. Ian then tracked across central Florida as a weakened tropical storm, bringing more than 20 in. of rain to some areas, before it headed over open water and subsequently made landfall in South Carolina Sept. 30 as a Category 1 hurricane with 85 mph winds. Ian was responsible for more than 110 deaths, nearly all in Florida; roughly half of the fatalities occurred in Lee County, where a 15-ft storm surge lashed Fort Myers.

Ian was Florida's deadliest storm since 1935. A CoreLogic projection assessed Ian's damage in Florida at up to \$47 bil, making it the state's costliest hurricane since Andrew in 1992.

October 2022

National

Inflation Persists Despite Rate Hikes; OPEC Cuts Production; Musk Acquires Twitter; Other Economic News—Annual U.S. inflation eased only slightly in Sept., to 8.2% from 8.3% in Aug. according to a Bureau of Labor Statistics (BLS) report released Oct. 13, despite five Federal Reserve benchmark interest rate hikes in 2022. Overall, consumer prices rose by a greater-than-expected 0.4% in Sept. from the month prior, due largely to food, housing, and medical care costs. Average rates Oct. 27 for a 30-year fixed-rate mortgage exceeded 7%, the highest average in two decades. The 24-member OPEC Plus coalition, led by Russia and Saudi Arabia, on Oct. 5 announced a 2 mil barrel per day cut in oil production, a move likely to increase U.S. and global energy costs.

The U.S. economy added 263,000 jobs in Sept., the BLS reported Oct. 7, as the unemployment rate returned to a 50-year-low 3.5%. The Bureau of Economic Analysis Sept. 29 in its third and final estimate for the second quarter of 2022 said that U.S. GDP declined at an annualized rate of 0.6%, compared to a 1.6% drop the previous quarter. The Dow Jones Industrial Average closed Oct. at 32,732.95, up nearly 14.0% from Sept., as the S&P500 finished the month at 3,871.98, an 8.0% increase; the Nasdaq Composite Index, meanwhile, gained 3.9% to close at 10,988.15.

In early Oct., Tesla and SpaceX CEO Elon Musk reversed course amid a legal battle and agreed to complete the acquisition of social media site Twitter for his original proposed \$44 bil offer; the sale was finalized Oct. 27.

House Jan. 6 Committee Subpoenas Trump; Bannon Sentenced for Contempt of Congress; Other Developments— Marking a major escalation, the House select committee investigating the Jan. 6, 2021, attack on the U.S. Capitol voted unanimously in its ninth public hearing, Oct. 13, to subpoena testimony and documents from former Pres. Donald Trump relevant to his alleged role in the events. Committee Chair Bennie Thompson (D, MS) and Vice Chair Liz Cheney (R, WY), in their subpoena letter the following week, accused Trump of playing a central role in an intentional and “multi-part effort” to reverse the results of the 2020 election. The hearing also included testimony from former White House aide Cassidy Hutchinson, via video deposition, that Trump knew he lost the election while publicly claiming otherwise. According to depositions from campaign staff and White House aides and archived emails, Trump planned as early as July 2020 to declare victory regardless of the election outcome. The committee made public text messages and emails showing the Secret Service had received warnings of threats before Jan. 6, including against then-Vice Pres. Mike Pence if he certified the election results. The committee also showed previously unseen videos, including footage documenting calls between House Speaker Nancy Pelosi (D, CA) and Pence as they attempted to coordinate an emergency response after they were evacuated.

As a consequence of his refusal to comply with the committee's subpoena, former Trump strategist Steve Bannon was sentenced Oct. 21 to four months in prison. Jeremy Bertino Oct. 6 became the first member of the far-right Proud Boys group to plead guilty to seditious conspiracy in the Jan. 6 Capitol riot, strengthening the Justice Dept.'s case against the organization. As of Oct. 17, over 925 people had been federally charged for participating in the attack.

House Speaker's Spouse Injured in Politically Motivated Attack—Paul Pelosi, the 82-year-old husband of House Speaker Nancy Pelosi (D, CA), was violently attacked and injured by an intruder while alone in the couple's San Francisco home Oct. 28. Identified as David DePape, the 42-year-old assailant was armed with a hammer and reportedly broke in through a glass door. According to charging documents, DePape—who said he was on a “suicide mission”—demanded to know where Nancy was with the intent of taking her hostage and interrogating her over the “lies coming out of Washington, DC.” Mr. Pelosi, who was able to call 911, sustained a skull fracture and other serious injuries before police could subdue DePape.

U.S. Capitol police opened more than 1,820 cases involving concerning statements or threats against members of Congress in the first three months of 2022; threats against federal lawmakers had more than doubled over the past five years, with over 9,600 investigated in 2021 alone.

International

Violence Intensifies in Tigray; Twin Somalia Bombings Kill at Least 100—More than 50 people were killed by an Ethiopian air strike on a school allegedly sheltering internally displaced persons (IDPs) Oct. 4 in Adi Daero in northern Ethiopia's breakaway Tigray region, according to Tigray forces and at least two aid workers cited in a Reuters report. The airstrike, if confirmed, would be one of the deadliest attacks since the start of the conflict nearly two years earlier; researchers estimated some 500,000 Tigrayans had died because of the fighting and resulting famine, and millions had been displaced. Amid an ongoing offensive that shattered a five-month

truce in Aug., Ethiopian and Eritrean forces Oct. 17 took control of the strategic city of Shire about 15 mi south of Adi Daero.

Twin car bombs detonated in the Somali capital of Mogadishu Oct. 29, killing at least 100 people outside the national education ministry. Claimed by the extremist group al-Shabab, the bombings were the deadliest civilian attack in Somalia since a truck bombing killed more than 500 people at the same intersection five years earlier.

Russia Targets Ukrainian Cities, Energy Infrastructure; Ukraine Retakes More Territory in East and South; Other Invasion News—Russia's military on Oct. 10 subjected Ukraine's civilians to the heaviest and most widespread round of air strikes since the start of the war, after Russian Pres. Vladimir Putin accused Ukraine of orchestrating a large explosion on the Kerch Strait Bridge linking Russian-annexed Crimea with Russia. Three people were killed in the explosion, which partially disabled the bridge. Air strikes were launched against more than a dozen cities including Kyiv, Kharkiv, and Lviv, killing at least 19 civilians. Russian air assaults on water, electricity, and heating infrastructure continued throughout the month; more than 1,100 towns and villages throughout Ukraine were without electricity as of Oct. 18, after 30% of Ukraine's power stations were destroyed, according to Pres. Volodymyr Zelenskyy.

Ukrainian forces Oct. 1, after weeks of fighting, retook the strategic city of Lyman in northeastern Donetsk; soon after, Ukrainian forces broke through Russia's defenses in northern Kherson province, leaving Russia no longer in complete control of any of the four regions it had claimed as "annexed." Putin, without citing evidence, repeatedly claimed Ukraine was planning to detonate a radioactive "dirty bomb," which some feared portended Russia's own use of such a device. In late Oct., Russia pulled out of a UN-brokered agreement that guaranteed safe passage for ships carrying grain from Ukraine, in response to what it claimed was a large-scale drone attack on its Black Sea naval fleet in Crimea Oct. 29.

British Prime Minister Resigns; Sunak Installed—After just 45 days in office, British Prime Min. Liz Truss resigned Oct. 20 amid financial chaos and rebellion within her own Conservative Party.

Truss in early Oct. canceled her proposed tax plan—reportedly to be financed by increased borrowing—after its unveiling shook domestic financial markets and forced a round of bond-buying to regain stability. Truss Oct. 14 fired Finance Min. Kwasi Kwarteng before stepping down. Truss's replacement, Rishi Sunak, was sworn in Oct. 25. The 42-year-old Sunak, a Brexit supporter who served as finance minister under former Prime Min. Boris Johnson, was the UK's first non-white leader and first of Asian ancestry, as well as its youngest PM in more than 200 years. In his first speech, Sunak stressed the economic challenges facing Britain, including an inflation rate that exceeded 10% in the 12 months through Sept. 2022.

Chinese President Granted Unprecedented Third Term—Chinese Pres. Xi Jinping secured a third five-year term as the country's Communist Party leader in a closed-door vote Oct. 23. The extension of Xi's rule was a break from precedent; China's congress in 2018 had abolished the two-term limit established by Deng Xiaoping in 1982. Further cementing his power, Xi was believed to have handpicked the other six members of the powerful Politburo Standing Committee.

Omicron-Targeted Booster Reception Sluggish; Other COVID-19 News—U.S. residents were slow to receive an updated bivalent COVID-19 vaccine booster shot, with less than 9% of those 18 years and older and just over 20% of those 65 years and older receiving the Omicron-targeted boosters by Oct. 27, according to the CDC. (68.4% of U.S. residents had received the full primary series.) According to Our World in Data, 62.5% of the world's population was fully vaccinated.

Weekly U.S. cases of COVID-19 fell to less than 266,000 (with 2,649 deaths) for the week ending Oct. 26, the lowest level since mid-Apr., according to the CDC, at the same time confirmed cumulative cases in the U.S. reached nearly 97.4 mil cases (with nearly 1.1 mil deaths). Globally, the World Health Org. reported 627 mil confirmed cumulative cases as of Oct. 31, with over 6.5 mil deaths.

Leftist Brazilian President Makes Political Comeback—Leftist former Pres. Luiz Inácio Lula da Silva (2003-10) narrowly denied

incumbent right-wing Pres. Jair Bolsonaro a second term in Brazil's presidential runoff held Oct. 30. Defeating Bolsonaro 50.9% to 49.1% in a contentious race, Lula had vowed to curb deforestation in the Amazon, which had surged more than 70% under Bolsonaro's mining-friendly administration. The former labor organizer had also pledged to raise wages and boost social spending. Lula's prior presidency had been plagued by allegations of corruption, for which he had been tried and served 19 months in prison before his convictions were annulled in 2021.

In the months leading up to voting, Bolsonaro claimed electronic voting machines were vulnerable to fraud and that he might not accept the results; though Bolsonaro did not formally concede after the runoff, his administration on Nov. 1 agreed to a transition of power.

General

Indonesian Soccer Stadium Stampede Kills 130+ Fans—Over 130 people were killed Oct. 1 in a stampede at a soccer match at Kanjuruhan Stadium in Malang, East Java, Indonesia. The incident occurred after some 3,000 disappointed fans rushed the field following the loss of the home team, Arema FC. Security personnel used batons and shields against fans, then fired numerous rounds of tear gas that reportedly triggered the deadly stampede. Some exit gates were locked and police criticized club officials for allowing an over-capacity crowd and exits that were too narrow.

American Grandmaster Accused of Cheating—Rocking the chess world, an investigation released Oct. 4 by [Chess.com](https://www.chess.com) alleged that U.S. grandmaster Hans Niemann, then ranked 40th in the world, "likely cheated" in more than 100 virtual matches on its online platform. [Chess.com's](https://www.chess.com) cheating-detection algorithm identified matches as recently as Aug. 2020 in which the then-17-year-old had allegedly employed dishonest tactics. The findings contradicted Niemann's public admission in late Sept. to cheating twice in his career. World No. 1-ranked Magnus Carlsen had withdrawn from an online match Sept. 19 after only one move and subsequently accused Niemann, his opponent, of cheating.

Sandy Hook Families Awarded \$965 Mil; Parkland Shooter Sentenced—A Connecticut jury Oct. 12 ordered InfoWars host Alex Jones to pay \$965 mil to families of eight victims of the 2012 mass shooting at Sandy Hook Elementary School over repeated false claims that the shooting, which killed 20 children and six educators, was a hoax staged to justify gun control. It was the second judgment against Jones for spreading the conspiracy, after a nearly \$50-mil Texas settlement in Aug.

On Oct. 13, the person who fatally shot 17 people at Florida's Marjory Stoneman Douglas High School in 2018 was spared the death penalty and given life in prison without the possibility of parole. The non-unanimous jury decision came after Nikolas Cruz's lawyers argued mitigating circumstances, including his mother's abuse of drugs and alcohol while pregnant with Cruz.

Heavy Flooding in Nigeria Kills 600—Nigeria's worst flooding in 10 years killed more than 600 people as of Oct. 16, including over 75 reportedly drowned after a boat capsized in a swollen river in Anambra state, according to the country's humanitarian affairs ministry. Starting in early summer, the rainy-season flooding affected most of the country (27 of 36 states). Displacing some 1.3 mil people and destroying over 80,000 houses, the flooding was blamed by officials on climate change-exacerbated rainfall and water released from Lagdo Dam in adjacent Cameroon.

Seoul Crowd Crush Kills Halloween Revelers—South Korean Pres. Yoon Suk-yeol declared a national period of mourning after at least 156 people, mostly teens and young adults, were killed Oct. 29 in a crowd crush in an alleyway in Itaewon, Seoul's nightlife district. The victims were among up to 100,000 gathered for the country's first major Halloween celebration since the lifting of pandemic restrictions.

Gujarat Suspension Bridge Collapse Kills Over 130 People—A 143-year-old cable suspension bridge over the Machchhu River in Gujarat, India, collapsed Oct. 30, killing at least 134 people. Previously closed for almost seven months for repairs, the bridge was reopened just four days prior to the tragedy. At least 177 people were rescued from the river after the bridge's failure.

OBITUARIES

For those whose deaths occurred Nov. 1, 2021 to Oct. 31, 2022.

A

Abe, Shinzo, 67, Japanese prime minister (2006-07, 2012-20) known for economic policy “Abenomics”; assassinated in Nara, Japan, July 8, 2022.

Abloh, Virgil, 41, fashion designer who founded noted streetwear label Off-White (2013); Chicago, IL, Nov. 28, 2021.

Adams, Neal, 80, comic book artist who revitalized the Batman character in the 1960s; New York, NY, Apr. 28, 2022.

Adnan, Etel, 96, Lebanese-American writer and visual artist, best known for acclaimed novel *Sitt Marie Rose*; Paris, France, Nov. 14, 2021.

Adolfo, 98, Cuban-born American fashion designer whose garments were favored by first lady Nancy Reagan; New York, NY, Nov. 27, 2021.

117TH CONGRESS

117th Congress: Key Information

The 117th Congress convened Jan. 3, 2021, with Republicans in control of the Senate (51-46, 2 ind., 1 vacancy) until Jan. 20, when Democrats took majority control after a pair of Democrats elected in Georgia special elections were sworn in and Vice Pres. Kamala Harris (D) was inaugurated, holding the deciding vote (50 Republicans, 48 Democrats, and 2 ind. caucusing with Democrats). Democrats maintained their majority in the House (222-211, 2 vacancies). As of Mar. 9, 2021, a record 147 women were serving in Congress, of whom 24 were in the Senate and 123 (including 3 nonvoting delegates and Puerto Rico's Resident Commissioner) in the House. The 117th Congress also had record minority representation, including seven Hispanic lawmakers serving in the Senate and 47 (including 2 nonvoting delegates and the resident commissioner) in the House. The Senate included three Black senators and two senators of Asian heritage. The House had 58 Black members (including 2 nonvoting delegates); 18 Asian/South Asian/Pac. Isl. representatives (including 3 nonvoting delegates); and 6 Native Americans. Five lawmakers died during the 117th Congress: 2-term Rep. Ron Wright (R, TX), on Feb. 7, 2021; 15-term Rep. Alcee L. Hastings (D, FL), Apr. 6, 2021; 2-term Rep. Jim Hagedorn (R, MN), Feb. 17, 2022; 25-term Rep. Don Young (R, AK), Mar. 18, 2022; and 5-term Rep. Jackie Walorski (R, IN), Aug. 3, 2022.

Leadership. Nancy Pelosi (D, CA) was reelected Speaker of the House; Majority Leader Steny Hoyer (D, MD), Minority Leader Kevin McCarthy (R, CA), Majority Whip James Clyburn (D, SC), and Minority Whip Steve Scalise (R, LA) all retained their House leadership roles. In the Senate, Majority Leader Mitch McConnell (R, KY), Minority Leader Charles Schumer (D, NY) retained their positions from the 116th Congress until Jan. 20, at which time they

switched roles. Sen. Richard Durbin (D, IL) became Majority Whip and Sen. John Thune (R, SD) became Minority Whip.

Ethics. Two House lawmakers resigned amid separate ethics breaches. Six-term Rep. Tom Reed (R, NY) resigned May 10, 2022, after apologizing the previous year for inappropriate actions toward a woman lobbyist in 2017. After he was convicted of lying to federal agents about an illegal campaign donation, nine-term Rep. Jeff Fortenberry (R, NE) stepped down at the end of Mar. 2022. On Nov. 17, 2021, the House voted, 223-207 (with the support of two Republicans), to censure Rep. Paul Gosar (R, AZ) after he posted online an anime video altered to show him appearing to kill Rep. Alexandria Ocasio-Cortez (D, NY) and assaulting Pres. Joe Biden. The censure, the first handed down in the chamber since 2010, also stripped Gosar of his two committee assignments. Following a *NY Times* report that Rep. Matt Gaetz (R, FL) was under investigation by the Justice Dept. for possible sex trafficking, the House ethics committee in Apr. 2022 initiated a not-yet resolved investigation into allegations that Gaetz had sex with an underage girl, used illegal drugs, and accepted a bribe. At least 13 Republican lawmakers were fined at various times for not wearing a mask as mandated by COVID-19 protocols; among those, frequent repeat offenders Andrew Clyde (R, GA) and Marjorie Taylor Greene (R, GA) accrued fines totaling more than \$100,000 and \$90,000, respectively. The House select committee investigating the Jan. 6 attack on the Capitol issued subpoenas May 12, 2022, for five Republican lawmakers after they failed to voluntarily cooperate.

For Further Information. Detailed legislative information can be accessed at www.congress.gov.

Major Actions of the 117th Congress

Major actions taken by the 116th Congress through Sept. 19, 2022.

Laws are identified by their Public Law (PL) number.

Presidential Impeachment. On Jan. 11, 2021, the House initiated an article of impeachment charging outgoing Pres. Donald Trump with inciting the attack on the U.S. Capitol five days earlier. By a 232-197 vote with 10 Republicans voting with all Democrats, the

chamber Jan. 13 impeached Trump. The Senate, which had acquitted him in Feb. 2020 in his prior impeachment over his dealings with Ukraine, did so again on Feb. 13, 57-43, with seven Republicans joining all Democrats in favor of impeachment.

COVID-19 Stimulus. American Rescue Plan Act of 2021 package provided most tax-filing households with a third and largest-yet round of direct payments—up to \$1,400 for individuals—and other support, including a six-month extension of federal unemployment benefits and expanded child tax credit and health insurance premium subsidies. Funding allocations included \$350 billion to state/local govt.; \$160 bil for vaccine development; \$130 bil to schools; \$50 bil in small business assistance, including \$28.6 bil to small- to mid-size restaurants; and \$21.5 bil to landlords and renters. Package cost of \$1.9 tril brought sum of pandemic aid to roughly \$5.3 tril since 2020. Passed by the Senate (as amended), Mar. 6, 50-49; agreed to by the House, Mar. 10, 220-211; signed by Pres. Biden, Mar. 11, 2021 (PL 117-2).

Infrastructure Funding. Infrastructure Investment and Jobs Act—the U.S.’s largest such package in over a decade—allocated \$1.2 tril to repair and modernize infrastructure across the country. Allocations included \$110 bil for road/bridge projects; \$66 bil to Amtrak, \$39 bil for other public transit, \$65 bil for broadband internet expansion, \$65 bil for power grid modernization, \$55 bil for water/sewage systems, \$25 bil to airports, and \$7.5 billion for electric vehicle charging stations. Passed by the Senate (as amended) Aug. 10, 69-30; agreed to by the House, Nov. 5, 228-206; signed by Biden, Nov. 15, 2021 (PL 117-58).

Hate Crimes. Emmett Till Antilynching Act made lynching a federal hate crime, punishable by up to 30 years in prison if a perpetrator’s actions result in death or serious bodily injury, or if the offense includes attempted or actual kidnapping or aggravated sexual abuse. Named for the 14-year-old Black youth from Chicago who, while visiting relatives in Mississippi in 1955, was abducted, brutally beaten, and killed for allegedly flirting with a white woman. Passed by the House, Feb. 28, 422-3; passed by the Senate, Mar. 7, unanimous consent; signed by Biden, Mar. 29, 2022 (PL 117-107).

Support for Ukraine. Ukraine Democracy Defense Lend-Lease Act of 2022 expedited the leasing or lending of military equipment to the Ukrainian government (and potentially other E European countries) through FY2023 for use against Russia's ongoing military invasion. Passed by the Senate, Apr. 6, voice vote; passed by the House, Apr. 28, 417-10; signed by Biden, May 9, 2022 (PL 117-118).

Gun Violence. Bipartisan Safer Communities Act, passed in the wake of mass shootings in Buffalo, NY, and Uvalde, TX, allocated new funding to states to administer "red flag" laws preventing individuals deemed dangerous from obtaining guns. Other parts of the bill funded community violence intervention programs, strengthened background checks for gun buyers under age 21, expanded mental health programs and funding for school security, and banned dating partners convicted of domestic abuse—rather than just spouses—from purchasing a gun. Agreed to by the Senate (as amended) June 23, 65-33; agreed to by the House, June 24, 234-193; signed by Biden, June 25, 2022 (PL 117-159).

Microelectronics. CHIPS and Science Act provided \$52.7 bil for U.S. semiconductor research, development, manufacturing, employee development, including a tax credit for manufacturers' capital expenses. Passed by the Senate (as amended) July 27, 64-33; agreed to by the House, July 28, 243-187; signed by Biden, Aug. 9, 2022 (PL 117-167).

Veteran Health Care. Honoring our Promise to Address Comprehensive Toxics Act of 2022 greatly boosted health care and disability benefits for veterans exposed to toxic substances through overseas burn pits, including those whose claims had previously been denied. Passed by the House, July 13, 342-88; Agreed to by the Senate (as amended) Aug. 2, 86-11; signed by Biden, Aug. 10, 2022 (PL 117-168).

Climate Change and Health Care. Inflation Reduction Act of 2022 provided \$370 bil to combat climate change through clean energy investments and tax credits for electric cars and solar panels. The bill also extended Affordable Care Act insurance premium subsidies, capped seniors' Medicare out-of-pocket drug expenses at \$2,000/year and monthly insulin payments at \$35/month, allowed the

U.S. govt. to negotiate drug prices with manufacturers, and allocated \$80 bil to the IRS to hire more agents/modernize. Other provisions were projected to raise nearly \$740 bil over the next decade—mostly through a 15% minimum. tax on companies making over \$1 bil and a 1% tax on stock buybacks. Introduced in House as Build Back Better Act, Sept. 27, 2021; passed by the Senate (as amended) Aug. 7, 2022, 51-50; agreed to by the House, Aug. 12, 220-207; signed by Biden Aug. 16, 2022 (PL 117-169).

U.S. SUPREME COURT

The U.S. Supreme Court's 2021-22 term began Oct. 4, 2021. The justices decided 66 cases, 3 of them without oral argument. Chief Justice John G. Roberts Jr., nominated by Pres. George W. Bush in 2005, presided over his 17th full term. The eight associate justices, in order of seniority, were Clarence Thomas, Stephen G. Breyer, Samuel A. Alito Jr., Sonia Sotomayor, Elena Kagan, Neil M. Gorsuch, Brett M. Kavanaugh, and Amy Coney Barrett.

Justice Barrett, appointed by Pres. Donald Trump, was seated in Oct. 2020, replacing Justice Ruth Bader Ginsburg, who died the month before. The change bolstered the conservative wing of the Court, which subsequently issued key decisions opposed by the liberal minority, notably overturning the landmark *Roe v. Wade* (1973) precedent on abortion rights in June 2022. A draft of the majority opinion in the abortion case was leaked in May 2022, in an unprecedented breach of Court procedure. After an armed man was arrested outside the home of Justice Kavanaugh June 8, 2022, Congress passed legislation to expand security protections to justices' immediate families.

Judge Ketanji Brown Jackson, appointed by Pres. Joe Biden, was sworn in at the end of the 2021-22 term, replacing Justice Breyer upon his retirement.

Notable Supreme Court Decisions, 2021-22

Note: Gray shading in the columns on the right indicate justices who voted with the majority; unshaded boxes indicate justices who dissented. MO = wrote majority opinion; DO = wrote or co-wrote dissenting opinion; CO = wrote concurring opinion; COJ = wrote opinion concurring in judgment but not in its reasoning; COP = wrote opinion concurring in part of the judgment. In some cases a majority opinion was issued *per curiam* ("by the Court"), with no justice signing it.

Abortion Rights

In *Dobbs v. Jackson Women's Health Organization*, the Court, June 24, 6-3, ruled that a Mississippi law banning most abortions after 15 weeks was constitutional. A 5-4 majority, with Chief Justice Roberts and the liberal minority opposed, also entirely overturned *Roe v. Wade*, the landmark 1973 Supreme Court decision that had asserted a federal constitutional right to abortion.

Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
DO	DO	DO	COJ	CO	MO		CO	

Environment

In *West Virginia v. Environmental Protection Agency* the Court ruled, 6-3, June 30, that the federal Clean Air Act did not provide the EPA with broad authority to establish a plan to shift away from coal toward cleaner energy sources via carbon emissions caps for power plants.

Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
DO			MO			CO		

Executive Privilege

In *Trump v. Thompson* the Court, Jan. 19, in unsigned order, allowed release of Trump-era White House records to a House committee investigating the Jan. 6, 2021, attack on the Capitol, rejecting the particular executive privilege claims presented by the former president.

Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
							CO	

First Amendment

In *Houston Community College v. Wilson* the Court ruled 9-0, Mar. 24, that elected bodies do not violate the First Amendment when they censure a member for public statements that they wish to condemn.

Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
						MO		

In *Shurtleff v. Boston*, the Court ruled May 2, 9-0, that the city violated free speech rights of a religious group by denying it

permission to fly a “Christian flag” at City Hall when groups without religious ties were permitted to fly flags.

Kagan	Sotomayor	Breyer	Roberts	Thomas	Alito	Gorsuch	Kavanaugh	Barrett
		MO			COJ	COJ	CO	

Gun Control

In *NY State Rifle & Pistol Assn. v. Bruen*, the Court, 6-3, on June 23, struck down a New York state law that required “special need” for a license to carry guns outside the home, finding that the Second Amendment gives Americans a broad right to carry firearms in public.

NOTABLE QUOTES, 2022

National News

“For the first time in our history, a president had not just lost an election, he tried to prevent the peaceful transfer of power... [W]e must make sure that such an attack never, never happens again.”

—**Pres. Joe Biden**, in speech at the U.S. Capitol on the first anniversary of the Jan. 6, 2021, attack.

“Representatives [Liz] Cheney and [Adam] Kinzinger are participating in a Democrat-led persecution of ordinary citizens engaged in legitimate public discourse.”

—**Republican National Committee** resolution, Feb. 4, censuring the two GOP members of the House committee probing the Capitol attack.

“Tonight, I say this to my Republican colleagues who are defending the indefensible: There will come a day when Donald Trump is gone, but your dishonor will remain.”

—**Rep. Liz Cheney** (R, WY), June 9, in opening statement as vice-chair of the House Jan. 6 committee public hearings.

“I never would have imagined that an American president would not only not come to the aid of law enforcement officers defending the Capitol but encourage that crowd to march on it... [M]y colleagues and I... walked into an ambush.”

—**Capitol Police Officer Aquilino Gonell**, in *NY Times* opinion piece published July 10.

“How many more innocent American lives must be taken before we say ‘enough’? Enough.”

—**Pres. Biden**, June 2, after mass shootings in a Tulsa, OK, hospital; a Buffalo, NY, grocery; and an Uvalde, TX, elementary school.

“We have come a long way toward perfecting our union. In my family, it took just one generation to go from segregation to the Supreme Court of the United States.”

—**Judge Ketanji Brown Jackson**, Apr. 8, a day after being confirmed as the first Black woman to serve on the U.S. Supreme Court.

“Abortion presents a profound moral question. The Constitution does not prohibit the citizens of each State from regulating or prohibiting abortion... We now... return that authority to the people and their elected representatives.”

—**U.S. Supreme Court Justice Samuel Alito**, in majority opinion in *Dobbs v. Jackson Women’s Health Organization*, June 24, overturning *Roe v. Wade*, the landmark 1973 decision that found there was a constitutional right to abortion.

“Either the mass of the majority’s opinion is hypocrisy, or additional constitutional rights are under threat.”

—**U.S. Supreme Court Justices Stephen Breyer, Sonia Sotomayor, and Elena Kagan**, in joint opinion dissenting from the *Dobbs* decision, June 24.

“He had so many dreams.”

—**María Tutul**, speaking to CNN en Español about her 14-year-old cousin, one of 53 migrants who died after being trapped in a truck, found June 27 in San Antonio, TX.

“It’s 100% real.”

—**Alex Jones**, far-right radio host, at his defamation trial Aug. 3, admitting that the 2012 Sandy Hook school shooting was not fake, as he had famously charged.

“These are dark times for our Nation, as my beautiful home... is currently under siege... It is... an attack by Radical Left Democrats who desperately don’t want me to run for President in 2024.”

—**Former Pres. Donald Trump**, in statement Aug. 8, after the FBI executed a search warrant seeking classified documents improperly stored in Mar-a-Lago, his Palm Beach, FL, compound.

Around the World

“In the late 1980s, the Soviet Union grew weaker and subsequently broke apart. That experience... has shown us that the

paralysis of power and will is the first step towards complete degradation and oblivion.”

—**Russian Pres. Vladimir Putin**, in televised speech to the nation, Feb. 24, announcing the invasion of Ukraine.

“I need ammunition, not a ride.”

—**Ukrainian Pres. Volodymyr Zelenskyy**, indicating his determination to stay in Ukraine and resist the Russian invasion, as reported Feb. 26; though widely quoted, the exact wording was not confirmed.

“Any further delay in concerted anticipatory global action... will miss a... rapidly closing window of opportunity to secure a livable and sustainable future for all.”

—**Intergovernmental Panel on Climate Change**, in report issued Feb. 28.

“[Putin] thought he could roll into Ukraine and the world would roll over. Instead, he met with a wall of strength he never anticipated or imagined. He met the Ukrainian people.”

—**Pres. Biden**, in State of the Union speech, Mar. 1.

“My heart hurts every time my child looks for food that is not there.”

—**Walid al-Ahdal**, a refugee with four children in a tent camp in Yemen, where more than 20 mil were in need of humanitarian aid, as quoted in *NY Times* story published May 17.

“Those who conceived this war want only one thing—to remain in power forever, live in pompous tasteless palaces, sail on yachts comparable in tonnage and cost to the entire Russian Navy... [T]hey are willing to sacrifice as many lives as it takes.”

—**Russian diplomat Boris Bondarev**, in May 23 email to colleagues after resigning from Russia’s UN mission in Geneva, Switzerland.

“I know that there will be many people who are relieved and perhaps quite a few who will also be disappointed. And I want you to know how sad I am to be giving up the best job in the world. But them’s the breaks.”

—**British Prime Min. Boris Johnson**, in resignation speech, July 7.

“I humbly beg forgiveness for the evil committed by so many Christians against the Indigenous peoples.”

—**Pope Francis**, speaking July 25 at former church-run Canadian residential school in Maskwacis, Alberta, one of many such schools where Indigenous children often faced abuse.

“And to my darling Mama, as you begin your last great journey to join my dear late Papa, I want simply to say this: thank you. Thank you for your love and devotion to our family and to the family of nations you have served so diligently all these years. May ‘flights of angels sing thee to thy rest.’”

—**King Charles III**, in address to the nation, following the death Sept. 8 of his mother and the UK’s longest-ruling monarch, Queen Elizabeth II.

“They told us that, where we’re going, there’s a lot of civilians walking around. And they gave us the order to kill everyone we see.”

—**Russian soldier**, identified as Sergey, in phone call to his girlfriend (audio obtained by *NY Times*, reported Sept. 28).

People and Culture

“I think that the best part for me has been being on TV as my true self, expressing myself and representing the entire community of trans people.”

—***Jeopardy!* champion Amy Schneider**, Jan. 24, on *Good Morning America*.

“Also, if anybody has some snacks in their pockets, maybe? I’m starving.”

—**Chloe Kim**, Olympic snowboarder for Team USA, at press conference after the first run in her bid for a second straight halfpipe gold medal, Feb. 10, at the 2022 Winter Games in Beijing, China.

“I would like to publicly apologize to you, Chris. I was out of line and I was wrong... [M]y actions were not indicative of the man I want to be.”

—**Will Smith**, Mar. 28, a day after the actor, heatedly reacting to a joke about his wife, had slapped comedian Chris Rock on

camera at Oscar ceremonies.

“I can’t rest as her humanity is being stripped from her.”

—**Cherelle Griner**, wife of jailed WNBA star Brittney Griner, the day before the player pleaded guilty in a Russian court, July 7, to carrying cannabis vape cartridges into the country.

“That was always out there... We just had to build a telescope to go see what was there.”

—**Jane Rigby**, project scientist for operations, after the unveiling July 12 of dramatic images captured by NASA’s James Webb Space Telescope.

“I want it to be good, and I wasn’t sure I could be. But I didn’t sound too bad tonight.”

—**Joni Mitchell**, on her surprise performance at the Newport Folk Festival, July 24; it was the singer-songwriter’s first show since suffering a brain aneurysm in 2015.

“I’d like to think that thanks to me, women athletes can be themselves. They can play with aggression and pump their fists. They can wear what they want and say what they want and kick butt and be proud of it all.”

—**Serena Williams**, discussing her tennis career and retirement plans in *Vogue* magazine, Aug. 9.

“I am an endangered species / But I sing no victim’s song / I am a woman I am an artist / And I know where my voice belongs.”

—**Sheryl Lee Ralph**, breaking into song (“Endangered Species” by Dianne Reeves & Jeanne Pisano), Sept. 12, while accepting her Emmy as supporting actress in a comedy series for *Abbott Elementary*.

“It’s a big relief... I think everybody can finally sit down in their seats and watch the ballgame.”

—**Aaron Judge**, NY Yankees slugger, after hitting his 62nd home run of the season, Oct. 4, breaking the 61-year-old American League single-season record set by Roger Maris.

OFFBEAT NEWS, 2022

The Future Is Female

There's a new boss at Japan's Takasakyama Natural Zoological Garden, and for the first time in the reserve's 70-year history, the boss in question is female. Yakei, a nine-year-old macaque, fought her own mother to become the highest-ranking female in the reserve's troop of nearly 700 monkeys. She then bested all four of the males who still outranked her in the hierarchy, including the troop's 31-year-old alpha. After Yakei's ascension, she ate first during the reserve's mealtimes and displayed other traits typically associated with dominant males, like walking with her tail up.

Macaques are traditionally patriarchal; hostile takeover by a female is extremely rare. Yu Kaigaishi, a research fellow at the Japan Society for the Promotion of Science, told the *NY Times* in Jan. 2022 that "only a few cases have been reported in the history of primatology." There were fears her reign might be short-lived, thanks to a potential monkey love triangle. In earlier breeding seasons, Yakei paired off with Goro, a 15-year-old male. But Goro lost interest in Yakei as the alpha female, and Luffy, a higher-ranking 18-year-old male, made an unrequited attempt to mate with Yakei. Primatologists thought Yakei's pursuit of a mate might distract her and allow a different male to rob her of her rank. But during the mating season that ended in Mar., no such attempt was made, and Yakei expressed interest in five males before mating with a 15-year-old named Maruo, described by a park guide as "calm and kind to baby monkeys."

Taking Self-Publishing to a New Level

From the time he was five years old, Dillon Helbig of Boise, ID, wanted to have a book in the library—or as he might have pronounced it, the "liberry." At the age of eight, he fulfilled the ambition that had fueled him for nearly half his life. Over the course of three days, Dillon filled 81 pages of a blank journal with drawings and a handwritten holiday story titled, *The Adventures of Dillon*

Helbig's Crismis by Dillon Helbig His Self. On a visit to his local public library, he slipped it onto a shelf in the fiction section. The next time he went to the library, the book was gone.

Dillon's mom called the library and was told that librarians had found the book. Charmed by Dillon's authorial debut, they decided to enter the title into their catalog system and make it a full-fledged library book, in the graphic novels section. Since Jan. 2022, when local news outlets first reported on the library's newest local author, several publishers have contacted Dillon about acquiring the rights to the book, and by Feb., more than 100 people joined a waiting list to check it out.

You'll Inherit the Earth, But Not for Another 150 Years

To celebrate its 150th birthday in 2022, Yellowstone National Park in Apr. began offering an ultra-exclusive annual pass with a big catch: it can't be used for another century and a half. In exchange for a \$1,500 donation to the popular park, supporters receive an "Inheritance Pass" that they can pass down to their descendants for use beginning in 2172.

Lisa Diekmann, president and CEO of the nonprofit Yellowstone Forever, told the *Billings Gazette* the pass was a novel way to ensure the park will remain pristine for the next 150 years. Yellowstone saw a record 4.86 million visitors in 2021 but could barely keep up with essential maintenance projects. The funds raised through the Inheritance Pass program will be used for projects like scientific studies, trail maintenance, and wildlife conservation. And donors needn't worry about misplacing the pass before 2172; Yellowstone Forever's website promises the organization will keep a record of all passholders.

Guess Who's Not Coming to Dinner

Next time you visit a friend's home in Sweden, don't be surprised if you're not invited to share in the meatballs. A viral post on Reddit in May 2022 unearthed an unusual-to-non-Swedes custom of excluding children's visiting friends from family mealtimes. Instead of eating with the family, the visiting child might go home, remain in the friend's room playing alone, or sit at the table without a plate while

everyone else dines. The practice startled multitudes, but it didn't surprise some Swedes, including Swedish pop star Zara Larsson, who tweeted that the practice was "peak Swedish culture."

Hakan Jonsson, a food studies professor at Sweden's Lund University, told the *NY Times* that the tradition likely dated back to an era of greater food insecurity and partially attributed it to the country's strong independent streak. Adding an extra place setting might jeopardize the amount of food a family has to eat over the long winter, or worse, could be seen as insulting, implying that the visiting child's family didn't have enough to support themselves.

A Dogg's Breakfast

He's a rapper. He's an actor. He's a game-show host. He's a vintner. He's a cookbook author. He's a celebrity spokesman. He's—curiously—pals with homemaking queen Martha Stewart, with whom he co-hosts a TV show. And as of Aug. 2022, he's a cereal maker. Snoop Dogg (a.k.a. Calvin Broadus) announced he was getting into the breakfast business with his very own line of "Snoop Loopz." Recalling Kellogg's Froot Loops, Snoop's gluten-free cereal will come in two variations: with and without marshmallows. The cereal even has its own mascot: a blue dog (of course) wearing an L.A. Lakers-style jersey named Captain Ace. Broadus Foods, a partnership between Snoop and Percy Miller (a.k.a. rapper Master P), is also rolling out Momma Snoop's line of oatmeal, pancake mix, syrup, and grits to address any other breakfast needs. The company website says that Broadus Foods supports charities that address hunger and homelessness.

The Best Candidate for the Job Is... Me

Much has been written about people quitting their jobs during the height of the COVID-19 pandemic. But for Australia's former Prime Minister Scott Morrison, the lockdown was an opportunity to take on a second (and third, and fourth, and fifth, and sixth) job.

In Aug. 2022, current Australian Prime Min. Anthony Albanese revealed that Morrison had appointed himself minister of finance, minister of health, minister of home affairs, minister of industry and science, and minister of treasury between Mar. 2020 and May 2021.

The appointments were carried out in secret, and without the knowledge of the existing ministers. With his new offices, Morrison was potentially the final word on dozens of issues affecting the country, although he only used his powers on one occasion. In Apr. 2021, he overturned the approval of a controversial gas project off the coast of New South Wales.

“I took the precaution of being given authority to administer various departments of state should the need arise due to incapacity of a minister or in the national interest,” said Morrison, citing the “extraordinary” situation created by the pandemic. But Morrison lost his self-appointed jobs (and his position as Liberal Party leader) in Australia’s May 2022 national election, when Albanese’s Labor Party took 77 of the 151 seats in the House of Representatives. He retained his seat in parliament, however, and as of Sept. 2022, had resisted calls for his resignation.

Walking in Their Footsteps

How do we know dinosaurs walked the earth millions of years ago? Thanks to the western U.S.’s worst drought in more than 1,200 years, we can see more of their footsteps, right down to the toenails. In Aug. 2022, water levels in Texas’s Paluxy River, at Dinosaur Valley State Park, receded so much that dinosaur tracks dating to the Cretaceous Era became visible once again. Most of the footsteps belonged to the *Acrocanthosaurus*, a 15-ft-tall carnivorous beast that walked on two legs and weighed up to seven tons. Other tracks in the park are the footwork of the even more massive *Sauroposeidon*, which stood 60 ft tall and weighed 44 tons. Silt and sediment from the river had protected the tracks against the effects of weather and erosion.

“Those [new] footprints—they’re spectacular because they’re deep,” said Louis Jacobs, a vertebrate paleontologist at Southern Methodist Univ. in the *NY Times*. “You can see the toenails. There’s more than one kind, and there’s a lot of them.” Size and spacing of the footprints may improve researchers’ understanding of the animals’ posture and speed.

HISTORICAL ANNIVERSARIES

1923 — 100 Years Ago

Hyperinflation crisis in Germany makes the currency nearly valueless over the course of the year, causing widespread political instability.

First issue of *Time* magazine, dated Mar. 3, is published by Briton Hadden and Henry Luce.

Treaty of Lausanne is signed July 24, formalizing the breakup of the Ottoman Empire; Mustafa Kemal begins serving as first president of the Republic of Turkey Oct. 29.

Vice Pres. Calvin Coolidge becomes the 30th U.S. president following the sudden Aug. 2 death of Pres. Warren Harding.

Interpol is founded in Sept. to create a formal, permanent framework for international police coordination.

On Sept. 1, the 7.9 magnitude Great Kanto Earthquake—and subsequent tsunami and fires—devastates Yokohama and Tokyo and kills more than 140,000.

Miguel Primo de Rivera leads a successful military coup Sept. 13 to take power in Spain.

Brothers Walt and Roy Disney Oct. 16 establish the Disney Brothers Cartoon Studio in Los Angeles.

Nazi Party leader Adolf Hitler's attempted Beer Hall Putsch, Nov. 8-9 in Bavaria, Germany, fails but raises the profile of the party and its leader.

Art. Marcel Duchamp completes *The Bride Stripped Bare by Her Bachelors, Even*. Henri Matisse's *Odalisque With Raised Arms*, Suzanne Valadon's *The Blue Room*.

Film. First public demonstration of "Phonofilm" sound-on-film motion pictures at New York City's Rivoli Theater. *The Covered Wagon*, *Safety Last!*, and Cecil B. DeMille's first *The Ten Commandments* (which he remade in a different, expanded form, in 1956).

Health and medicine. First diphtheria toxoid vaccine is developed. Eliot Cutler performs first successful heart valve surgery.

Literature. Kahlil Gibran's *The Prophet*, Robert Frost's *New Hampshire* (incl. "Stopping by the Woods on a Snowy Evening"), Felix Salten's serialized *Bambi*, Dorothy L. Sayers's *Whose Body?*

Music. Béla Bartók's *Dance Suite*, Jean Sibelius's *Symphony No. 6*, Igor Stravinsky's *Octet*.

Nonfiction. Le Corbusier's *Toward an Architecture* is first published in French. Sigmund Freud's "The Ego and the Id," D.H. Lawrence's *Studies in Classic American Literature*.

Pop music. Louis Armstrong, Jelly Roll Morton, and Bessie Smith all make their first sound recordings. Wendell Hall's "It Ain't Gonna Rain No Mo'" recording; "Who's Sorry Now?" by Ted Snyder, Bert Kalmar, and Harry Ruby; "Yes! We Have No Bananas," by Frank Silver and Irving Cohn.

Science and technology. Spanish engineer Juan de le Cierva takes the first successful flight in autogiro. Vladimir K. Zworykin files a U.S. patent for "television systems." First velociraptor and dinosaur egg fossils discovered.

Sports. Original Yankee Stadium opens in the Bronx, NY; Yankees finish the season by defeating NY Giants to win World Series.

Theater. George Bernard Shaw's *Saint Joan* premieres.

Miscellaneous. Real estate developers erect "Hollywoodland" sign in the hills above Los Angeles, creating an unintentional landmark.

1973 — 50 Years Ago

The U.S. Supreme Court rules, 7-2, in landmark abortion case *Roe v. Wade* Jan. 22, that the Constitution protects a the right to obtain an abortion.

Vietnam peace agreements are signed in Paris Jan. 27; last U.S. troops depart Mar. 29.

American Indian Movement occupies Wounded Knee, SD, for 71 days ending May 8.

White House Counsel John Dean, fired by Pres. Richard Nixon two months earlier, testifies to Senate June 25 that Nixon, his aides, and his Justice Dept. had conspired to cover up Watergate facts.

Gen. Augusto Pinochet leads a Sept. 11 military coup that seizes power in Chile; Socialist Pres. Salvador Allende dies by suicide.

Egypt and Syria attack Israel on Oct. 6, Yom Kippur; Israel counterattacks, and a cease-fire is declared Oct. 24.

Vice Pres. Spiro Agnew, Oct. 10, resigns and pleads no contest to charge of tax evasion.

Total ban on oil exports to U.S. is imposed by Arab oil-producing nations from Oct.

In the "Saturday Night Massacre," Oct. 20, Pres. Nixon orders Atty. Gen. Elliot Richardson to fire Watergate special prosecutor Archibald Cox. Richardson refuses to comply and resigns; Deputy Atty. Gen. William Ruckelshaus refuses and is fired. Solicitor Gen. Robert Bork, as acting atty. gen., then fires Cox.

Congress Nov. 7 overrides Pres. Nixon's veto of war powers bill to curb president's power to commit forces abroad without congressional approval.

House Minority Leader Gerald R. Ford is sworn in as first appointed vice president under 25th Amendment Dec. 6.

Art. Pablo Picasso dies at the age of 91. William Eggleston's *The Red Ceiling*, Alma Thomas's *Fiery Sunset* and *Wind and Crepe Myrtle Concerto*.

Film. Actress and Native American rights activist Sacheen Littlefeather declines an Academy Award on behalf of Marlon Brando at Oscar ceremonies Mar. 27. *American Graffiti*, *Enter the Dragon* starring Bruce Lee, *The Exorcist*, Peter Bogdanovich's *Paper Moon* starring Ryan and Tatum O'Neal, *Serpico* starring Al Pacino, *The Sting* starring Paul Newman and Robert Redford, *The Way We Were* starring Barbra Streisand and Robert Redford.

Health and medicine. "Stockholm syndrome" diagnosis arises out of bank robbery in Sweden. Noninvasive fetal heart monitoring is developed at Boston Hospital for Women. American Psychiatric Association resolution asserts homosexuality is no longer considered a mental disorder.

Literature. U.S. Supreme Court decision establishes “Miller test” for determining obscenity. Martin Amis’s *The Rachel Papers*; Rita Mae Brown’s *Rubyfruit Jungle*; William Goldman’s *The Princess Bride*; Toni Morrison’s *Sula*; Tim O’Brien’s *If I Die in a Combat Zone, Box Me Up and Ship Me Home*; Thomas Pynchon’s *Gravity’s Rainbow*; Kurt Vonnegut’s *Breakfast of Champions*.

Music. Carl Orff’s *De temporum fine comoedia*.

Nonfiction. David Rosenhan publishes landmark paper “On Being Sane in Insane Places” in *Science*. Flora Rheta Schreiber’s *Sybil*, E.F. Shumacher’s *Small is Beautiful: A Study of Economics as if People Mattered*.

Pop music. DJ Kool Herc and other New York artists begin to lay foundation for hip-hop at house and block parties like Kool Herc’s legendary “back to school jam.” Roberta Flack’s “Killing Me Softly With His Song,” Elton John’s *Goodbye Yellow Brick Road*, Pink Floyd’s *The Dark Side of the Moon*, Bob Marley and the Wailers’ *Catch a Fire*, the Rolling Stones’ “Angie,” Bruce Springsteen’s *Greetings From Asbury Park, N.J.*, Stevie Wonder’s *Innervisions*.

Science and technology. U.S. launches *Skylab* space station. U.S. biochemists Stanley Cohen and Herbert Boyer invent recombinant DNA genetic engineering. First handheld mobile phone call is made. Endangered Species Act is signed into law.

Sports. Designated hitter rule is adopted by American League. Secretariat becomes Triple Crown winner, winning all three races in record time. Billie Jean King defeats Bobby Riggs in tennis’s “Battle of the Sexes.” George Foreman TKOs Joe Frazier to win heavyweight title. Miami Dolphins achieve the NFL’s first and only perfect season.

Television. Elvis Presley’s *Aloha From Hawaii via Satellite* is broadcast to huge ratings in dozens of countries; *All in the Family* wins third straight best comedy Emmy.

Theater. Peter Shaffer’s *Equus* debuts in London. *A Little Night Music* and *That Championship Season* win Tony Awards.

Miscellaneous. Chicago’s Sears Tower becomes world’s tallest building; Australia’s distinctive Sydney Opera House is dedicated. An arson attack on New Orleans gay bar UpStairs Lounge kills 32.

1998 — 25 Years Ago

Drudge Report website, Jan. 17, breaks the story of an alleged affair between Pres. Bill Clinton and a White House intern; U.S. House of Representatives votes Dec. 19 to impeach Clinton over his actions related to the scandal.

Good Friday Agreement is signed Apr. 10, mostly bringing an end to the period known as the Troubles in Northern Ireland.

India and Pakistan conduct separate nuclear weapons tests in May; U.S., Japan, and other nations respond with economic sanctions.

After three decades in power, Indonesian president Suharto resigns May 21 and is succeeded by B.J. Habibie.

James Byrd Jr.'s June lynching-by-dragging in Texas and the Oct. killing of gay college student Matthew Shepard in Wyoming increase calls for federal hate crimes legislation.

Bombings at U.S. embassies in Kenya and Tanzania linked to Osama bin Laden and al-Qaeda kill more than 200 people, Aug. 7.

On Sept. 30, Pres. Clinton announced a federal budget surplus—the first since 1969—of \$70 bil for fiscal year 1998.

Former Chilean dictator Augusto Pinochet is arrested Oct. 16 in London, England, UK, on charges of human rights violations.

Hurricane Mitch makes landfall in Honduras Oct. 29; the storm kills at least 11,000 in Central America.

Major U.S. tobacco companies, Nov. 23, agreed to a settlement that would pay states and territories at least \$206 bil over 25 years to cover public health costs linked to tobacco use.

Running on an anti-poverty, anti-corruption platform, former attempted coup leader Hugo Chávez wins Venezuelan presidential election held Dec. 6.

The U.S. and UK unleash a campaign on military targets in Iraq Dec. 16-19 over the country's failure to comply with UN inspectors looking for weapons of mass destruction.

Art. Tracey Emin's *My Bed*, Antony Gormley's *Angel of the North*, Chris Ofili's *No Woman No Cry*.

Film. *American History X*, *Armageddon*, Joel and Ethan Coen's *The Big Lebowski* starring Jeff Bridges and John Goodman, Todd Solondz's *Happiness*, *Life Is Beautiful*, *Rush Hour* starring Jackie Chan and Chris Tucker, Wes Anderson's *Rushmore*, Steven Spielberg's *Saving Private Ryan*, *Shakespeare in Love* starring Gwyneth Paltrow, *Smoke Signals*, *There's Something About Mary*, *The Truman Show* starring Jim Carrey, *The Wedding Singer* starring Drew Barrymore and Adam Sandler, Nora Ephron's *You've Got Mail* starring Tom Hanks and Meg Ryan.

Health and medicine. *The Lancet* publishes widely discredited study (fully retracted in 2010) falsely showing link between MMR vaccines and autism. Viagra is introduced to treat erectile dysfunction.

Literature. Michael Cunningham's *The Hours*, Barbara Kingsolver's *The Poisonwood Bible*, Ian McEwan's *Amsterdam*, Toni Morrison's *Paradise*, Louis Sachar's *Holes*.

Music. Anthony Payne premieres his completed version of Edward Elgar's incomplete *Third Symphony*.

Nonfiction. Tom Brokaw's *The Greatest Generation*, Eric Liu's *The Accidental Asian*, Independent Counsel Ken Starr's *Starr Report*.

Pop music. MTV introduces *Total Request Live*. Aerosmith's "I Don't Want to Miss a Thing," Brandy and Monica's "The Boy Is Mine," Cher's "Believe," Goo Goo Dolls' "Iris," Lauryn Hill's *The Miseducation of Lauryn Hill*, the Offspring's "Pretty Fly (for a White Guy)," OutKast's *Aquemini*, Jason Nevins's remix of Run-D.M.C.'s "It's Like That," Will Smith's "Gettin' Jiggy Wit It," Britney Spears's "... Baby One More Time," Shania Twain's "You're Still the One."

Science and technology. Google is founded by two graduate students. First American to orbit Earth almost four decades earlier, 77-year-old Sen. John Glenn returns to space on NASA shuttle. First International Space Station module is launched into orbit.

Sports. Denver Broncos win first Super Bowl over Green Bay after losing all previous four appearances. Chicago Bulls complete their second championship "Threepeat." Host nation France beats Brazil in the FIFA men's soccer World Cup. Mark McGwire and

Sammy Sosa chase (and break) Roger Maris's 1961 single-season home run record.

Television. Long-running sitcoms *Family Matters*, *Murphy Brown*, and *Seinfeld* air finales; *Dawson's Creek*, *Sex and the City*, and *Will & Grace* debut.

Theater. *Art* (starring Alan Alda, Victor Garber, and Alfred Molina) and *The Lion King* win major Tony Awards; *Cabaret* revival debuts, starring Alan Cumming.

Miscellaneous. Former pro wrestler Jesse Ventura wins independent bid to serve as governor of Minnesota. Robotic Furby toys are a must-have sensation.

WORLD ALMANAC EDITORS' PICKS 2022 Time Capsule

The editors of *The World Almanac* have selected the following items as representative of the year 2022.

- Ukrainian Pres. Volodymyr Zelenskyy's army-green T-shirt, worn in multiple videos as he addressed the world following Russia's invasion of Ukraine Feb. 24, 2022.
- The Intergovernmental Panel on Climate Change's report, released Apr. 4, 2022, concluding that the world is nearing an irreversible tipping point on climate change.
- A can of baby formula, a commodity in dangerously short supply in May 2022, and an average family's receipt for their weekly grocery run, likely reflecting the 13.0% increase in food costs at home over the previous year as of Sept. 2022.
- The May 2 leaked draft opinion in U.S. Supreme Court's *Dobbs v. Jackson Women's Health Organization* and the final ruling released June 24, overturning the *Roe v. Wade* (1973) precedent, which established a right to abortion.
- NASA's first images from the James Webb Space Telescope, released July 12, showing previously unseen details of galaxy clusters.
- A dose of monkeypox vaccine, available after WHO declared the outbreak a "public health emergency of international concern" on July 23, 2022.

- A cache of classified documents retrieved by the FBI Aug. 8, 2022, from former Pres. Trump's Mar-a-Lago compound in Palm Beach, FL.
- Tennis rackets retired by legendary players Serena Williams and Roger Federer as both announced their decades-long pro careers would end in 2022.
- A wristband from Queen Elizabeth's lying-in-state queue—in which some mourners waited for over 24 hours—following the long-ruling monarch's death Sept. 8, 2022.
- A symbolically discarded head scarf from the women-led protests that arose in Iran in Sept. following the death of 22-year-old Mahsa Amini while in police custody.
- NY Yankees slugger Aaron Judge's 62nd home run ball, which set a new American League single-season record on Oct. 4, 2022.
- A copy of The January 6th Report, scheduled for release in late 2022.

2022 YEAR *in* PICTURES

WORLD

TIME OF TRANSITION German Chancellor Angela Merkel was succeeded by Olaf Scholz Dec. 8, 2021, after 16 years in office.

COVID CONVOY Truck drivers rallied Jan.-Feb. 2022 in Ottawa, Canada, and elsewhere, in protest of the country's COVID-19-related public health rules and mandates.

Net dividends	1,394.9	1,418.6
Undistributed profits with inventory valuation and capital consumption adjustments	573.3	1,006.0
Net interest and miscellaneous payments	618.8	686.1

Note: Numbers may not add up to totals because of rounding and incomplete enumeration. (1) National income is the aggregate of labor and property earnings that arise in the production of goods and services. It is the sum of employee compensation, proprietors' income, rental income, adjusted corporate profits, and net interest. It measures the total factor costs of goods and services produced by the economy. Income is measured before deduction of taxes. Total national income figures include adjustments not itemized.

Measuring Inflation: Consumer Price Index

The Consumer Price Index (CPI) is a measure of the change in prices over time of one or more kinds of basic consumer goods and services. The overall CPI is based on the price of food, clothing, shelter, and fuels; transportation fares; charges for doctors' and dentists' services; drug prices; and the cost of other goods and services bought for day-to-day living. Since Jan. 1988, the base period for comparison has been 1982-84, which equals 100.0. The price of apparel, entertainment and recreation, and education and communication have not risen significantly, while the cost of medical care has more than quadrupled since 1982-84. The Consumer Price Index for all urban consumers (CPI-U) covers about 93% of the total U.S. population. The Bureau of Labor Statistics also publishes a separate Consumer Price Index for urban wage earners and clerical workers (CPI-W), which covers about 29% of the total U.S. population.

2019	14,544.5	2,887.5	16.6
2020	16,226.3	2,281.3	12.3

Year	Disposable personal income per capita	
	Current dollars	Constant (2012) dollars
1930	\$609.0	\$6,836.0
1940	588.0	7,957.0

Year	Disposable personal income per capita	
	Current dollars	Constant (2012) dollars
1950	1,416.0	10,687.0
1960	2,080.0	12,654.0
1970	3,715.0	17,768.0
1980	8,888.0	21,584.0
1990	17,264.0	27,303.0
2000	26,274.0	33,645.0
2005	31,732.0	36,526.0
2010	36,654.0	38,282.0
2015	42,672.0	41,383.0
2017	47,536.0	43,886.0
2018	49,073.0	44,644.0
2019	52,544.0	47,241.0
2020	55,710.0	48,219.0

Note: Personal income minus current taxes equals disposable income; disposable income minus outlays equals savings. Figures may not add up to totals because of rounding. (1) Personal savings as a percentage of disposable personal income.

Inflation: U.S. Consumer Price Index, 1915-2021

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

In general, prices as measured by the U.S. Consumer Price Index have risen steadily since World War II. What cost \$1.00 in 1982-84 cost about \$0.10 in 1915, \$0.18 in 1945, and \$2.71 in 2021. (Annual averages of monthly figures, for all urban consumers. **1982-84 = 100.**)

Inflation: U.S. Consumer Price Index by Major Group, 1915-2021

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

For all urban consumers. **1982-84 = 100**, unless otherwise noted.

U.S. Inflation Rate, 1915-2022

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

Inflation is the rate at which the Consumer Price Index increases year over year. If the CPI decreases, as it did during the Great Depression, that is known as deflation.

Note: The Census Bureau revised race categories in 2002, so data after 2002 are not directly comparable with data for previous years. (1) Beginning in 2010, totals for white include only those who identified themselves as white alone; totals for Black and Asian include those who identified themselves as that race alone or in combination with some other race. (2) Persons of Hispanic origin may be of any race.			

Poverty Rates by State, 1990-2021

Source: U.S. Census Bureau, U.S. Dept. of Commerce

The poverty rate is the proportion of the population with income below the government's official poverty level, which is the same nationwide but is adjusted each year for inflation.

State	1990	2000	2010	2020	2021
Alabama	19.2%	13.3%	17.2%	14.9%	15.9%

Income Inequality in the U.S., 1970-2021

Source: U.S. Census Bureau, U.S. Dept. of Commerce

Top earners' share of income has grown considerably over the past half century. In 1970, the richest 5% of Americans earned 16.6% percent of all income while the share earned by the poorest 20% was 4.1%. By 2021, the top 5% took home 23.5% of income and the poorest 20% earned just 2.9% of the total. The middle quintile's share declined from 17.4% to 13.9% over the same period.

Income group	Mean Income in 2021	Percentage of income earned by each quintile				
		1970	1980	1985	1990	1995

Lowest 20%	\$14,859	4.1%	4.2%	3.9%	3.8%	3.7%
Second quintile	41,025	10.8	10.2	9.8	9.6	9.1
Middle 20%	70,879	17.4	16.8	16.2	15.9	15.2
Fourth quintile	115,462	24.5	24.7	24.4	24.0	23.3
Highest 20%	269,356	43.3	44.1	45.6	46.6	48.7
Top 5%	480,236	16.6	16.5	17.6	18.5	21.0

Income group	Percentage of income earned by each quintile					
	2000	2005	2010	2015	2020	2021

NA = Not available. **Note:** Small businesses are firms employing fewer than 500 people. Figures include only businesses with paid employees.

Denominations of U.S. Currency

Since 1969 the largest denomination of U.S. currency that has been issued is the \$100 bill. As larger-denomination bills reach the Federal Reserve Bank, they are removed from circulation. Because

some discontinued currency is expected to be in the hands of holders for many years, the description of the various denominations below is continued.

Note	Portrait	Embellishment on back
\$1	George Washington	Great Seal of U.S.
2	Thomas Jefferson	Signers of Declaration
5	Abraham Lincoln	Lincoln Memorial
10	Alexander Hamilton	U.S. Treasury
20	Andrew Jackson	White House
50	Ulysses S. Grant	U.S. Capitol
100	Benjamin Franklin	Independence Hall
\$500	William McKinley	Ornate denominational marking
1,000	Grover Cleveland	Ornate denominational marking
5,000	James Madison	Washington resigning as Army commander
10,000	Salmon Chase	Embarkation of the Pilgrims
100,000	Woodrow Wilson	Ornate denominational marking

(1) John Marshall appeared on the earliest version of the \$500 bill. (2) Alexander Hamilton appeared on the earliest version of the \$1,000 bill, but these were discontinued to avoid confusion with the \$10 bill. (3) For use only in transactions between Federal Reserve System and Treasury Department.

The U.S. \$1 Bill

Plate position: Shows where on the 32-note plate this bill was printed.

Serial number: Each bill has its own.

Federal Reserve Bank number: Shows which district issued the bill.

Federal Reserve seal: The name of the Federal Reserve Bank that issued the bill is printed in the seal. The letter also tells you which bank distributed the bill. Here are the number and letter codes for the 12 Federal Reserve Banks:

- 1/A: Boston
- 2/B: New York
- 3/C: Philadelphia
- 4/D: Cleveland
- 5/E: Richmond
- 6/F: Atlanta
- 7/G: Chicago
- 8/H: St. Louis
- 9/I: Minneapolis
- 10/J: Kansas City
- 11/K: Dallas
- 12/L: San Francisco

Treasurer of the U.S. signature

Series indicator: Year note's design was first used.

Secretary of the Treasury signature

Treasury Department seal: The balancing scales represent justice. The pointed stripe across the middle has 13 stars for the original 13 colonies. The key represents authority.

Plate serial number: Shows which printing plate was used for the face of the bill.

Reverse of the Great Seal of the United States: The pyramid symbolizes something that endures for ages. The eye, known as the Eye of Providence, probably comes from an ancient Egyptian symbol. The pyramid has 13 levels; at its base are the Roman numerals for 1776, the year of American independence. "Annuit Coeptis" is Latin for "God has favored our undertaking." "Novus Ordo Seclorum" is Latin for "a new order of the ages." Both phrases are from the works of the Roman poet Virgil.

Plate serial number: Shows which plate was used for the back.

Front of the Great Seal of the United States: The bald eagle is the national bird. The shield has 13 stripes for the 13 original colonies. The eagle holds 13 arrows (symbol of war) and an olive branch with 13 olives and leaves (symbol of peace). Above the eagle is the motto "E Pluribus Unum," Latin for "out of many, one," and a constellation of 13 stars.

U.S. Budget Receipts and Outlays, Fiscal Years 2000-21

Source: Congressional Budget Office; *Budget of the U.S. Government*, Office of Mgmt. and Budget, Exec. Office of the President

A \$236-bil government surplus in 2000 ballooned into a \$1.4-tril deficit by 2009. The deficit was reduced by nearly \$1 tril, 2009-15,

but it began rising again in 2016 and was close to \$1 tril again by 2019. In 2020, the deficit soared past \$3 tril, in large part because of COVID-19. Projections for 2022, however, show the deficit will be cut by more than half.

(in millions of current dollars; numbers may not add up to totals because of independent rounding or omitted subcategories, including some subcategories with negative values)

— = \$500,000 or less. Figures in **bold** denote annual surplus. **Note:** Budget figures prior to 1933 are based on administrative budget concepts rather than unified budget concepts. Through 1976, fiscal year ends June 30; after 1976, fiscal year ends Sept. 30. Surplus or deficit column may not equal difference between figures because of rounding. (1) Estimate as of Mar. 2022.

Federal Deposit Insurance Corporation (FDIC)

The Federal Deposit Insurance Corporation (FDIC) was created by Congress during the height of the Depression to maintain stability and public confidence in the nation's banking system. It covered depositors for up to \$2,500 in case of bank failure in 1934; the limit today is 100 times that much, or \$250,000. In its unique role as deposit insurer of banks and savings associations, and in cooperation with other federal and state regulatory agencies, the FDIC seeks to promote the safety and soundness of insured depository institutions in the U.S. financial system.

The quarterly premiums on deposit insurance are paid by the banks rather than by consumers. The amount of the premium is based on the institution's balance of insured deposits for the preceding quarter and the institution's risk to the insurance fund. In 2009, Congress permanently increased the limit that the FDIC may borrow from the U.S. Treasury from \$30 bil to \$100 bil.

U.S. Banks, 1935-2022

Source: *Summary of Deposits*, Federal Deposit Insurance Corp. (FDIC)

Comprises all FDIC-insured commercial and savings banks, including savings and loan institutions (S&Ls).

Status of Top Recipients of Treasury Department “Bailout” Funds, 2022

Source: ProPublica

Since Oct. 2008, the federal government has spent \$635 bil to bail out 987 institutions severely affected by that year’s financial crisis. As of Aug. 18, 2022, the government had recouped \$390 bil in loans and \$353 bil in dividends, interest, and other returns, leading to an overall profit of more than \$109 bil. Disbursements to some companies currently appear as losses but may ultimately turn a

profit; those investments are listed in *italics*. Companies that failed to repay the government and never will are listed in ***bold italics***.

Federal Reserve System

The Federal Reserve System is the central bank for the U.S. The system was established on Dec. 23, 1913, originally to give the country an elastic currency, provide facilities for discounting commercial paper, and improve the supervision of banking. Since then, the system's responsibilities have been broadened. Over the years, stability and growth of the economy, a high level of employment, stability in the purchasing power of the dollar, and reasonable balance in transactions with other countries have come to be recognized as primary objectives of governmental economic policy.

The Federal Reserve System consists of three key entities: the Board of Governors, 12 District Reserve Banks and their branches, and the Federal Open Market Committee. Several advisory councils help the board meet its varied responsibilities.

The hub of the system is the seven-member **Board of Governors** in Washington, DC. The members of the board are appointed by the president and confirmed by the Senate to 14-year terms. The president also appoints the chair and vice chair of the board from among the board members for four-year terms. As of Oct. 2022, the board members were Jerome H. Powell, chair; Lael Brainard, vice chair; Michael S. Barr, vice chair for supervision; Michelle W. Bowman; Lisa D. Cook; Philip N. Jefferson; and Christopher J. Waller.

The 12 **Federal Reserve Banks** and their branch offices serve as the decentralized portion of the system, carrying out day-to-day operations such as circulating currency and coin and providing fiscal agency functions and payments mechanism services. The 12 Reserve Banks are located in Boston, New York, Philadelphia, Cleveland, Richmond, Atlanta, Chicago, St. Louis, Minneapolis, Kansas City, Dallas, and San Francisco.

The system's principal function is monetary policy, which it controls using three tools: reserve requirements, the discount rate, and open market operations.

Uniform **reserve requirements**, set by the board, are applied to the transaction accounts and nonpersonal time deposits of all depository institutions. Responsibility for setting the **discount rate** (the interest rate at which depository institutions can borrow money from the Reserve Banks) is shared by the Board of Governors and the Reserve Banks. Changes in the discount rate are recommended by the individual boards of directors of the Reserve Banks and are subject to approval by the Board of Governors.

The most important tool of monetary policy is **open market operations**, or the purchase and sale of government securities. Responsibility for influencing the cost and availability of money and credit through the purchase and sale of government securities lies with the **Federal Open Market Committee** (FOMC), which comprises the seven members of the Board of Governors, the president of the Federal Reserve Bank of New York, and four other Federal Reserve Bank presidents, who each serve one-year terms on a rotating basis. The committee bases its decisions on economic and financial developments and outlook, setting yearly growth objectives for key measures of money supply and credit. The decisions of the committee are carried out by the domestic trading desk of the Federal Reserve Bank of New York.

A Federal Advisory Council of banking industry representatives meets with the Federal Reserve Board four times a year to discuss business and financial conditions, as well as to make recommendations.

Website: www.federalreserve.gov

Federal Reserve Board Benchmark Interest Rates, 1955-2022

The interest rate that the Federal Reserve charges its member banks to borrow money overnight, the discount rate, was divided into two categories in 2003: primary credit, for banks in sound financial

condition, and secondary credit, for banks that do not qualify for primary credit. The secondary credit rate is $\frac{1}{2}$ a percentage point higher than the primary credit rate shown here for Jan. 9, 2003, and thereafter. Banks typically raise or lower the rates they extend to customers in accordance with changes in these rates.

NA = Not available. (1) On Feb. 18, 2002, the U.S. Treasury discontinued the 30-year constant maturity yield and reintroduced it on Feb. 9, 2006; rates in the interim are for 20-year yields. (2) Treasury series based on 3-week moving average of reoffering yields of new corporate bonds rated Aa by Moody's Investors Service with an original maturity of at least 20 years. Treasury discontinued yield index after Jan. 31, 2003. Rates thereafter are for Moody's seasoned Aaa corporate bonds as listed by Federal Reserve. (3) Index of new reoffering yields on 20-year general obligations rated Aa by Moody's Investors Service; discontinued by Treasury Jan. 31, 2003; rates thereafter are from Bond Buyer Index of general obligation, 20 years to maturity, mixed quality state and local bonds. (4) Rates are for Sept. 2022.

Ownership of U.S. Treasury Securities, 1990-2021

Source: *Treasury Bulletin*, Sept. 2022, Financial Management Service, U.S. Dept. of the Treasury

In 1990, just over 14% of U.S. treasury securities were held by foreign and international investors. By 2021, the total public debt had grown almost ninefold, while the portion held by investors outside the U.S. had grown to 26%.

Who Owns What: Familiar Consumer Products and Services

The following is a partial list of well-known consumer brands with their (U.S.) parent companies as of Sept. 2022. Among brands not listed are many whose parent companies have the same or a similar name (e.g., Colgate is owned by Colgate-Palmolive Co.).

ABC broadcasting: Walt Disney

Ace bandages: 3M

Advil: Haleon

Ajax cleanser: Colgate-Palmolive

Amana appliances: Whirlpool

American Girl: Mattel

Aquafina water: PepsiCo

Arm & Hammer: Church & Dwight

Band-Aid bandages: Johnson & Johnson

Barbie dolls: Mattel
Ben & Jerry's ice cream: Unilever
Benadryl: Johnson & Johnson
Ben's Original Rice: Mars
Betty Crocker products: General Mills
Bounty paper towels: Procter & Gamble
Braun appliances: Procter & Gamble
Brita water systems: Clorox
Cadbury chocolates: Mondele-z International
Calphalon cookware: Newell Rubbermaid
Canada Dry ginger ale: Keurig Dr Pepper
Cap'n Crunch cereal: PepsiCo
Cascade dishwasher detergent: Procter & Gamble
ChapStick: Haleon
Charmin toilet tissue: Procter & Gamble
Cheer detergent: Procter & Gamble
Chips Ahoy!: Mondele-z International
Claritin allergy products: Bayer
Contadina tomatoes: Del Monte
Crest toothpaste: Procter & Gamble
Crisco shortening: B&G Foods
Dairy Queen: Berkshire Hathaway
Dasani water: Coca-Cola
Depends adult diapers: Kimberly-Clark
Dove soap: Unilever
Dreyer's ice cream: Nestlé
Elmer's glue: Newell Rubbermaid
ESPN networks: Walt Disney
Febreze: Procter & Gamble

Fisher-Price toys: Mattel
Folgers coffee: J.M. Smucker
Frito-Lay's snacks: PepsiCo
Fruit of the Loom apparel: Berkshire Hathaway
Gatorade sports drinks: PepsiCo
GEICO auto insurance: Berkshire Hathaway
Gerber baby food: Nestlé
Gillette: Procter & Gamble
Glad products: Clorox
Glade air fresheners: S.C. Johnson
Green Giant vegetables: B&G Foods
Grey Poupon mustard: Kraft Heinz
Halls cough drops: Mondele-z International
HBO: Warner Bros. Discovery
Head & Shoulders shampoo: Procter & Gamble
Healthy Choice meals: ConAgra
Hebrew National meats: ConAgra
Hellmann's mayonnaise: Unilever
Hidden Valley Salad dressings: Clorox
Hill's Pet Nutrition: Colgate-Palmolive
Hillshire Farm: Tyson Foods
Hot Pockets: Nestlé
Hot Wheels/Matchbox cars: Mattel
Huggies diapers: Kimberly-Clark
Hulu: Walt Disney
Hunt's tomatoes: ConAgra
Iams pet food: Mars
Irish Spring soap: Colgate-Palmolive
Ivory soap: Procter & Gamble

Jell-O: Kraft Heinz
Jennie-O turkey: Hormel
Jif peanut butter: J.M. Smucker
Jimmy Dean sausages: Tyson Foods
Jolly Rancher candy: Hershey
Keebler cookies: Ferrero
KFC restaurants: Yum! Brands
Kibbles 'n Bits pet food: J.M. Smucker
Kingsford charcoal: Clorox
KitchenAid appliances: Whirlpool
Kiwi shoe products: S.C. Johnson
Kleenex: Kimberly-Clark
Knorr soups: Unilever
Kool-Aid: Kraft Heinz
Lipton tea: Ekaterina
Listerine mouthwash: Johnson & Johnson
Maxwell House coffee: Kraft Heinz
Maytag appliances: Whirlpool
Milk-Bone dog snacks: J.M. Smucker
Minute Maid juices: Coca-Cola
Mr. Clean: Procter & Gamble
Mr. Coffee: Newell Rubbermaid

Note: Figures are for 2nd quarter of year shown, except in 2020, which shows 1st-quarter data (COVID-19 impaired completion of the survey for 2nd quarter). Not seasonally adjusted. (1) Hispanic householders may be of any race. "Other" includes householders self-identifying as Asian, Native Hawaiian/Pacific Islander, and American Indian/Alaska Native, as well as combinations of two or more races/ethnicities. (2) Due to a change in survey methodology, data from 2010 and later are not directly comparable with prior years.

U.S. Housing Affordability, 1990-2022

Source: National Association of REALTORS®

Year ¹	Median priced existing home	Avg. mortgage rate ²	Monthly principal & interest payment	Payment as % of median monthly income
1990	\$92,000	10.04%	\$648	22.0%
1995	110,500	7.85	639	18.9
2000	139,000	8.03	818	19.3
2005	219,000	5.91	1,040	22.4
2010	173,100	4.89	734	14.5
2015	223,900	4.03	858	15.1
2016	235,500	3.88	886	15.0
2017	\$248,800	4.20%	\$973	15.8%
2018	261,600	4.72	1,088	17.1
2019	274,600	4.04	1,054	15.7
2020	300,200	3.17	1,035	14.7

2021	357,100	3.01	1,206	16.5
2022	423,300	5.60	1,944	25.4

(1) 2022 figures are for June, the latest available. All other figures are annual averages.
(2) All figures assume a down payment of 20% of the home price. Based on effective rate on loans closed on existing homes for the period shown.

S&P/Case-Shiller National Home Price Index, 1975-2022

Source: S&P Dow Jones Indices

This index compares the median price of existing U.S. homes over time. The baseline for comparison is Jan. 2000; all numbers before or after reflect home prices in relation to it. For example, the June 2022 index of 308.2 means that home prices were more than triple what they were 22 years earlier, while the Jan. 1975 index of 25.2 means prices then were 25.2% of what they were in 2000.

Median Price of Existing Single-Family Homes, by Metropolitan Area, 2010-22

Source: National Association of REALTORS®

Median prices are in thousands of dollars and based on all transactions within time period shown.

TRADE

U.S. Trade in Goods With Selected Countries and Major Areas, 2021

Source: U.S. Census Bureau and U.S. Bureau of Economic Analysis, U.S. Dept. of Commerce; *World Development Indicators 2022*, The World Bank

Weighted mean tariff rate is the average of tariffs applied to all products weighted by the product's share of the country's imports. A low tariff on a heavily imported product, therefore, has more impact on the weighted mean tariff rate than a high tariff on a product that is rarely imported. Weighted mean tariff rates in 2021 were generally based on 2020 trade data.

(trade in millions of dollars; top 25 countries as ranked by amount of total trade in goods with U.S.)

Rank	Country	Total trade with U.S.	U.S. exports to (rank)	U.S. imports from (rank)

Trends in U.S. Foreign Trade, 1790-2021

Source: U.S. Census Bureau and U.S. Bureau of Economic Analysis, U.S. Dept. of Commerce

In 1790, U.S. exports and imports combined came to \$43 mil, and there was a \$3 mil trade deficit. The trade balance was positive for much of the 20th century, but the U.S. has had a trade deficit every year starting in 1976.

(in millions of dollars)

Year	Exports	Imports	Trade balance

World Trade Organization (WTO)

The World Trade Organization is an international body that seeks to promote free trade by eliminating barriers to trade. Founded in 1995, the WTO had grown to 164 member countries as of Oct. 2022,

with 25 others, including Belarus, Iran, Iraq, and Vatican City, granted observer status. International intergovernmental organizations, such as the International Monetary Fund and the World Bank, have also been granted observer status. With the exception of Vatican City, observers must start accession negotiations within five years of becoming observers.

Note: Figures for exports are “free alongside ship” values; figures for imports are “cost, insurance, and freight” values. Neither is directly comparable with the Census Bureau basis shown in other tables in this section. Trade balance is with U.S.; subtracting imports from exports may not equal trade balance due to rounding. Total includes categories not shown

here. (1) Not classified elsewhere. (2) Total includes animal and vegetable oils, fats, and waxes, not shown separately.

Exchange Rates for Foreign Currencies, 1970-2021

NA = Not available. **Note:** The euro, the European Union's single currency, replaced the national currencies in the EU nations shown above. Since 1999 (or 2001 in the case of Greece), the euro has been fixed at the following conversion rates: 13.7603 Austrian schillings, 40.3399 Belgian francs, 6.55957 French francs, 1.95583 German marks, 340.750 Greek drachmas, 0.787564 Irish pounds, 1,936.27 Italian lire, 2.20371 Netherlands guilders, 200.482 Portuguese escudos, and 166.386 Spanish pesetas. (1) West Germany before 1991. (2) Mexico re-based its currency in 1993; earlier values are not comparable.

NA = Not available. **Note:** On a historical cost basis. Direct investment is a category of cross-border investment associated with a resident in one economy having control or a significant degree of influence on the management of an enterprise resident in another economy. Ownership or control of 10% or more of the voting securities of an entity in another economy is the threshold for separating direct investment from other types of investment. (1) Totals and subtotals include countries or territories not shown in table. (2) Curaçao figures before 2010 are for the entire Netherlands Antilles, a confederation that ended in 2010. (3) Incl. British Virgin Islands, Cayman Islands, Montserrat, and Turks and Caicos Islands.

U.S. Light-Duty Vehicle Fuel Efficiency, 1975-2021

Source: Natl. Vehicle and Fuel Emissions Laboratory, Office of Transportation and Air Quality, U.S. Environmental Protection Agency

Cars and light-duty trucks (SUVs, minivans, passenger vans, and pickup trucks) showed significant fuel-efficiency improvements from 1975 through 1987, when the fuel economy for both combined reached a high of 22 miles per gallon (mpg). The fuel economy value mainly declined, 1988-2004, but since 2005, fuel economy has generally increased, reaching a new all-time high of 25.4 mpg in 2020.

Year ¹	Cars (mpg)	Light-duty trucks (mpg)	All light-duty vehicles (mpg)
1975	13.5	11.6	13.1
1980	20.0	15.8	19.2
1985	23.0	17.5	21.3
1990	23.3	17.4	21.2
1995	23.3	17.0	20.5
2000	22.5	16.8	19.8
2004	22.9	16.5	19.3
2005	23.1	16.9	19.9
2006	23.0	17.2	20.1
2007	23.7	17.4	20.6

2008	23.9	17.8	21.0
2009	25.0	18.5	22.4
2010	25.7	18.8	22.6
2011	25.4	19.1	22.3
2012	26.9	19.3	23.6
2013	27.6	19.8	24.2
2014	27.6	20.3	24.1
2015	28.2	21.1	24.6
2016	28.5	21.2	24.7
2017	29.2	21.3	24.9
2018	29.9	21.9	25.1
2019	29.9	22.0	24.9
2020	30.7	22.4	25.4
2021 ²	31.3	22.6	25.3

Note: Adjusted mpg composite values (city and highway fuel efficiency combined in a 55%/45% ratio) are used for all vehicles and are intended to reflect real-world use. (1) Because of changes in methodology, mpg figures prior to 1986 are not entirely comparable with later values. (2) Preliminary.

STATE**Annual miles driven****Per gal used****Per reg. vehicle****Per lic. driver**

Note: Most states have graduated licensing systems that phase in full driving privileges. During the learner's stage, driving generally is not permitted without adult supervision. In an intermediate stage, young licensees may be allowed to drive unsupervised under certain conditions. (1) Min. age at which all restrictions may be lifted on private passenger car operation. (2) Applicants under a specified age (typically between 17 and 19) must complete driver education. (3) Home training (CT) or more hours of supervised driving (OR) may be substituted for driver ed. (4) Learner's stage mandatory for all license applicants regardless of age. (5) Includes 18.4 cents per gallon in federal excise taxes. (6) P = Officer may stop vehicle for violation (primary); S = Officer may issue seat belt citation only when vehicle is stopped for another moving violation (secondary). (a) Secondary enforcement for rear seat occupants; (b) Primary enforcement for children under a specified age.

Characteristics of U.S. Travelers Visiting Overseas Destinations, 2020

Source: Survey of Intl. Air Travelers, National Travel and Tourism Office, Intl. Trade Admin., U.S. Dept. of Commerce

Total U.S. resident travelers	44,808,000
Males	47.7%
Females	52.2%
Avg. age of males (yrs.)	45.5

Avg. age of females (yrs.)	43.4
Median annual household income	\$100,000
Used prepaid package	8.0%
Visited only one country	90.2%
Advanced trip decision (median days)	60
Mean number of persons in travel party	1.5
Median number of nights	10
Main purpose of trip	% of travelers
Vacation/holiday	49.9%
Visit friends/relatives	33.3
Business	7.3
Education	3.7
Convention/conference/trade show	2.5
Religion/pilgrimage	1.3
Health treatment	0.8
Leisure/recreational activities¹	% of travelers
Sightseeing	72.7%
Shopping	66.4
Small towns/countryside	39.3
Experience fine dining	36.0
Historical locations	31.1
Guided tours	30.4
Cultural/ethnic heritage sites	26.5
National parks/monuments	26.4
Art galleries/museums	24.7
Water sports	21.1
Nightclubbing	19.7
Concert/play/musical	9.1
Environmental/ecological excursions	8.7
Amusement/theme parks	8.1
Casino/gamble	7.5
Camping/hiking	6.8
Sporting event	5.6
Hunting/fishing	4.2
Golfing/tennis	3.0
Snow sports	2.8

Note: Attendance in 2020 declined largely due to restrictions limiting operating days and capacities in the COVID-19 pandemic. World list excludes North American parks. (1) Located at Walt Disney World. (2) Located at Universal Orlando.

Passports, Foreign Travel, and Regulations for Air Travel

Source: Bureau of Consular Affairs, U.S. Dept. of State; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services; World Health Organization (WHO); Transportation Security Administration (TSA), U.S. Dept. of Homeland Security

Passports, Visas

Passports are issued by the Dept. of State to U.S. citizens and nationals to provide documentation for foreign travel. As of Oct. 2022, the fees for a new passport book and passport card for persons ages 16 and over total \$195; provided certain criteria are met, these can be renewed for \$160. For a passport book alone, fees are \$165 for a new passport and \$110 for passport renewal.

In 2008, the U.S. government began issuing passport cards. Travelers arriving by land or sea from Canada, Mexico, the Caribbean, and Bermuda may present a passport card to enter the U.S. Passport cards may not be used for air travel, however. The fees for a new passport card for persons ages 16 and over total \$65 (\$30 to renew).

As of Oct. 2022, the processing time for passport applications was 7-10 weeks, and expedited processing time was 4-6 weeks (at an additional \$60 fee).

A U.S. passport is often sufficient for U.S. citizens to gain admission for a limited stay in another country. Some countries also require an entry visa. Each country has its own specific guidelines concerning length and purpose of visit, among other considerations. Visitors may need to provide proof of sufficient funds for their intended stay, onward/return tickets, and/or at least six months remaining validity on their U.S. passports.

All persons traveling by air outside of the U.S. (excluding direct travel to and from a U.S. territory) are required to present a passport or other valid document upon reentering the U.S.

For up-to-date passport and international travel information, visit the State Dept.'s Consular Affairs website (travel.state.gov) or call U.S. Passports at 1-877-487-2778.

COVID-19 Impact on Foreign Travel

The COVID-19 pandemic had a devastating effect on international travel in 2020, although travel began to increase in early 2021 and continued to approach pre-pandemic levels in 2022. In June 2022, the CDC rescinded the order requiring air passengers traveling from a foreign country to the U.S. to show a negative COVID-19 test or documentation of recovery from COVID-19 before they board their flight. Because countries were affected differently, the U.S. State Dept. urged travelers to check the travel advisory for their destination before traveling, found at travel.state.gov.

As of Sept. 2022, travelers were recommended to follow safety precautions related to the COVID-19 pandemic while traveling, including the wearing of face masks in crowded areas.

Summary of TSA Regulations

Airplane carry-ons. TSA promotes the liquids (or “3-1-1”) rule regarding carry-on items. Containers with liquids, gels, aerosols, creams, or pastes must hold **3.4** oz (100 mL) or less; these containers should be packed inside a single **1**-quart, clear plastic, resealable bag; and this **1** bag must go through checkpoint security. Exceptions to the liquids rule include medication, baby formula and food, and breast milk; these items must be removed and screened separately.

Security checkpoint identification. Adult travelers (18 years of age and over) must present a photo ID. Acceptable documents include a U.S. passport or passport card; foreign government-issued passport; state-issued driver’s license; permanent resident card; or U.S. military ID, among others. Starting May 3, 2023, travelers using a state-issued driver’s license must have the enhanced version or one that is compliant with the REAL ID Act.

Screening process. Travelers may wear loose fitting or religious garments (incl. head coverings) through security. They may be subject to additional screening if clothing could conceal prohibited items. Travelers may request a private area if selected for personal screening. Travelers will be screened by someone of the same gender.

In Dec. 2011, the TSA began the TSA PreCheck program, allowing expedited screening at airport security for preapproved passengers; the 5-year membership cost \$85. As of Oct. 2022, this was available at more than 200 U.S. airports and by around 83 participating airlines.

Disability-related permitted carry-on items:

- Wheelchairs, mobility scooters
- Crutches, canes, and walkers
- Portable oxygen concentrators (if they meet specific FAA criteria)
- Medications and associated supplies
- Service animals

Permitted carry-on items:

- Disposable and electric razors (blades not allowed)
- Eye drops and contact lens solution (3.4 oz or less)
- Strollers, baby carriers, child car seats
- Beverages (any size) purchased after security screening

Prohibited carry-on items:

- Knives (except plastic or round-bladed butter knives), incl. pocket knives and knives that are religious objects
- Firearms or realistic firearm replicas, ammunition
- Screwdrivers, wrenches, pliers, and other tools more than 7 in. in length; hammers
- Self-defense sprays

Persons Not in the U.S. Labor Force, 2021

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

The Labor Dept.'s unemployment rate, based on its household survey, shows the number of people out of work as a percentage of adults age 16 and older in the labor force. That rate excludes the millions of adults considered to be not in the labor force.

(in thousands)

Age in years	Sex
--------------	-----

	Number	Age in years			Sex	
		16 to 24	25 to 54	55 and over	Men	Women
Total not in the labor force	100,241	16,574	23,241	60,426	40,983	59,259
Do not want a job now ¹	93,912	14,919	20,272	58,722	37,999	55,913
Want a job ¹	6,329	1,656	2,969	1,704	2,984	3,346

Ill health or disability	142	18	70	54	79	63
Other ⁵	820	190	444	187	435	385

(1) Includes some persons who are not asked if they want a job. (2) Persons who had a job in the prior 12 months must have searched since the end of that job to be considered unemployed. (3) Of those available to work now. (4) Includes believing no work is available, not being able to find work, lacking necessary schooling or training, thought of as too young or old by employers, and other types of discrimination. (5) Includes those who did not actively look for work in the prior four weeks for such reasons as child-care and transportation problems, as well as a small number for which reason for nonparticipation was not ascertained.

Projected Employment by Typical Entry-Level Education, 2021-31

Source: Employment Projections Program, Bureau of Labor Statistics, U.S. Dept. of Labor

Typical entry-level education	Employment, 2021		% change in employment, 2021-31	Median annual wage, 2021
	Number (thous.)	Percent distribution		
Total, all occupations	158,134.7	100.0%	5.3%	\$45,760
Doctoral or professional degree	4,272.4	2.7	9.1	115,010
Master's degree	2,983.7	1.9	13.6	77,750
Bachelor's degree	38,360.1	24.3	8.2	78,580

Typical entry-level education	Employment, 2021		% change in employment, 2021-31	Median annual wage, 2021
	Number (thous.)	Percent distribution		
Associate's degree	3,368.0	2.1	8.8	59,260
Postsecondary nondegree award	9,793.1	6.2	6.7	44,420
Some college, no degree	4,133.2	2.6	0.8	37,960
High school diploma or equivalent	60,945.8	38.5	2.9	38,290
No formal educational credential	34,278.3	21.7	4.8	29,420

Note: The occupational employment and growth rates shown in this table include projected growth in all jobs from 2021-31, not just entry-level jobs. Entry-level education reflects 2021 requirements—BLS does not project educational requirements.

Highest Average Weekly Wages by County, 2021

Source: Bureau of Labor Statistics, U.S. Dept. of Labor

County	Avg. weekly wage	% change, 2020-21
Santa Clara, CA	\$4,005	8.7%
San Francisco, CA	3,737	2.6
San Mateo, CA	3,615	5.9
New York, NY	3,240	5.4
Suffolk, MA	2,595	1.4
King, WA	2,333	6.7
Washington, DC	2,320	1.0
Arlington, VA	2,224	0.0
Middlesex, MA	\$2,155	5.2%
Fairfield, CT	2,142	6.0
Fairfax, VA	2,090	4.6
Morris, NJ	1,929	-3.4
Westchester, NY	1,914	14.3
Alexandria City, VA	1,871	2.4
Alameda, CA	1,854	1.8

Note: Figures shown are for the 4th quarter, from among the 357 largest U.S. counties, which comprise 73.1% of total covered workers. Cameron County, TX, recorded the lowest average weekly earnings among the largest counties, with an average of \$760. It was followed by Hidalgo, TX (\$776); Horry, SC (\$808); Webb, TX (\$829); Harrison, MS (\$863);

Baldwin, AL (\$876); Cleveland, OK (\$880); Osceola, FL (\$885); El Paso, TX (\$892); and Lake, FL (\$892). Data include all workers covered by state and federal unemployment insurance programs.

Fatal Occupational Injuries, 2020

— = Data do not meet publication guidelines or may be too small to be displayed. **Note:** Because of rounding and data exclusion of nonclassifiable responses, data may not sum to the totals. (1) Cases include those that resulted in days away from work, some of which also included job transfer or restriction. (2) Number of nonfatal occupational injuries and illnesses involving days away from work for private industry workers.

Federal Minimum Hourly Wage Rates

Source: Bureau of Labor Statistics, U.S. Dept. of Labor; as of Apr. 2022

Effective date	Minimum wage	% avg. earnings ¹	In 2022 dollars
Oct. 24, 1938	\$0.25	40%	\$5.16
Oct. 24, 1939	0.30	48	6.20
Oct. 24, 1945	0.40	39	6.39
Jan. 25, 1950	0.75	52	9.23
Mar. 1, 1956	1.00	51	10.79
Sept. 3, 1961	1.15	50	11.08
Sept. 3, 1963	1.25	51	11.77
Feb. 1, 1967	1.40	49	12.30
Feb. 1, 1968	1.60	53	13.53
May 1, 1974	2.00	45	11.90
Jan. 1, 1975	2.10	43	11.65
Jan. 1, 1976	2.30	44	11.96
Jan. 1, 1978	\$2.65	43%	\$12.26
Jan. 1, 1979	2.90	43	12.28
Jan. 1, 1980	3.10	43	11.52
Jan. 1, 1981	3.35	42	11.13
Apr. 1, 1990	3.80	35	8.52

Apr. 1, 1991	4.25	38	9.09
Oct. 1, 1996	4.75	37	8.68
Sept. 1, 1997	5.15	39	9.24
July 24, 2007	5.85	34	8.12
July 24, 2008	6.55	37	8.61
July 24, 2009	7.25	40	9.73

Note: Before 1961, the minimum wage applied primarily to employees engaged in, or producing goods for, interstate commerce. The 1961 amendments extended coverage primarily to employees in large retail and service enterprises and to local transit, construction, and gas station employees. The 1966 and subsequent amendments extended coverage to farm workers; government employees; workers in various retail and service trades; and certain domestic workers. Starting in 1978, minimum wage applied equally to all covered, nonexempt workers. Exceptions apply to certain workers with disabilities, full-time students, persons under age 20 in their first 90 days of employment, and tipped employees. (1) Percent of gross hourly earnings of production workers in manufacturing.

Public administration	57,943	65,972	49,984	75.8

Note: Data are 5-year estimates from the 2016-20 ACS, for the civilian employed population 16 years of age and over including workers not employed full-time.

Net Productivity and Workers' Hourly Compensation, 1948-2020

Source: Economic Policy Institute (EPI), based on U.S. Bureau of Economic Analysis and U.S. Bureau of Labor Statistics data This graph shows the cumulative percent change since 1948 in net productivity and hourly compensation in the U.S. Net productivity is the growth of goods and services produced minus depreciation per hour worked. Hourly compensation is average wages and benefits for private sector production and nonsupervisory workers, who make up around 80% of private payroll employment.

2019	25	426	3,244
2020	8	27	966
2021	16	81	1,552

Note: Numbers cover stoppages that began in the year indicated. Workers are counted more than once if they are involved in more than one stoppage during the year. For work stoppages ongoing at the end of a calendar year, days idle include only the days for the calendar year.

NA = Not available. — = Less than 0.005 quadrillion Btu. (s) = Less than 0.5 trillion Btu. E = Estimate. **Note:** Numbers may not add up to totals because of rounding. (1) Incl. waste coal supplied beginning in 1989 and refuse recovery beginning in 2001. (2) Incl. lease condensate. Imports incl. crude oil for the Strategic Petroleum Reserve, which began in 1977. (3) Starting in 1990, pumped storage was removed and expanded coverage of industrial use of hydroelectric power was included. (4) Category known as “wood, waste, and alcohol” for years prior to 2000. Includes wood, waste, and alcohol fuels (ethanol blended into motor gasoline). Ethanol is included in both Petroleum and Biomass categories but is only counted once in totals. (5) Imports incl. crude oil for the Strategic Petroleum Reserve, which began in 1977. Imports/exports excl. biofuels. (6) Incl. unfinished oils, natural gasoline, and gasoline blending components; excl. biofuels. (7) Beginning in 1993, incl. fuel ethanol (minus denaturant); also incl. biodiesel (beginning in 2001), renewable diesel fuel (beginning in 2011), and other biofuels (beginning in 2021). (8) Beginning in 2001, incl. biodiesel; beginning in 2010, also incl. fuel ethanol (minus denaturant); beginning in 2016, also incl. wood and wood-derived fuels. (9) Excl. supplemental gaseous fuels. (10) Petroleum products supplied; excl. biofuels.

U.S. Production of Crude Oil by State, 1990-2021

Source: *Petroleum Supply Annual 2021*, Energy Information Administration (EIA), U.S. Dept. of Energy

Oil production in North Dakota more than tripled between 2010 and 2021 through the use of hydraulic fracturing, or fracking, a process by which water, sand, and chemicals are injected at high pressure to create fractures in shale rock, releasing the oil or natural gas within. Fracking accounted for just 2% of U.S. oil production in 2000 but grew to 65% by 2021.

U.S. Crude Oil Imports by Selected Countries, 1975-2021

Source: Energy Information Administration (EIA), U.S. Dept. of Energy

The United States' dependence on foreign oil continued to decline as a consequence of increased U.S. production of crude oil, natural gas, and domestic biofuels like ethanol and biodiesel. Imports stood at just 6.1 mil barrels a day in 2021, down from more than 10.1 mil barrels per day in 2005. Since 2004, Canada has been the largest foreign supplier of U.S. oil. In 2021, it was responsible for about 62% of all U.S. oil imports, nearly five times as much as those from all OPEC countries combined.

(1) The ratio of power generated to the maximum potential generation expressed as a percentage.

Renewable Energy Sources

Source: U.S. Dept. of Energy

Concern over the environmental impact of burning fossil fuels has helped spur interest in alternative fuels that are less polluting. And because the supply of fossil fuels is finite and diminishing, there is interest in “renewable” sources that do not deplete existing supplies. However, renewable energy sources still make up only a small share of U.S. domestic energy production (about 12.6% in 2021). The main reason for this is their relatively higher cost (in some cases two to four times that of power obtained from traditional fuels). The following are the major renewable energy sources available.

Biomass is plant- and animal-derived material usable as an energy source. It includes wood and wood processing waste; agricultural crops and waste materials; food, yard, and wood waste in garbage; and animal manure and human sewage. As of Apr. 2022, biomass was the most common renewable energy source in the U.S. Biomass such as wood can be burned to produce heat and generate electricity. Agricultural crops can be burned as a fuel or converted to liquid biofuels such as ethanol and biodiesel; these are usually blended with petroleum fuels but can also be used on their own. Second-generation biofuels are made from non-food crops. While biomass fuels provide some benefits to the environment, such as reduced waste in landfills, they still produce carbon dioxide and other pollutants.

Geothermal energy is generated from heat inside the Earth. This form of energy is both clean and renewable. The technology has caught on in countries with substantial geothermal activity such as Iceland, where it accounts for approximately two-thirds of primary energy use. In the U.S., the best sources for geothermal power are in the West, Alaska, and in Hawaii, where geothermal energy resources are close to the Earth’s surface. Drilling wells and testing the temperature deep underground is the most reliable method for locating geothermal reservoirs, which are largely undetectable above ground.

Hydrogen is the most abundant element in the universe. It does not naturally occur on Earth as a pure gas or liquid but is always combined with other elements (such as oxygen, to form water, or carbon, to form methane). If hydrogen is to be used for energy, it

must be separated from these other elements. The two most common methods for producing hydrogen are steam reforming and electrolysis (water splitting).

NASA began using liquid hydrogen in the 1950s as a rocket fuel and used hydrogen fuel cells to power electrical systems on spacecraft. Fuel cells produce electricity by combining hydrogen and oxygen atoms. Hydrogen use in vehicles is a major focus of fuel cell research and development, and several vehicle manufacturers have begun making light-duty hydrogen fuel cell electric vehicles available in regions where hydrogen fueling stations have been built.

Hydropower, or hydroelectric power, is generated by water flowing through turbines. Along with biomass fuels and wind power, it is one of the most common renewable energy sources in the U.S. today by amount of energy produced. A dam on a river is a common hydropower producer. No harmful air pollutants are produced, but the dams needed to generate power can harm river ecosystems. Researchers are working on technologies to maximize use of hydropower and reduce adverse environmental effects.

Ocean energy can be generated in two ways. Ocean thermal energy conversion uses heat that the ocean absorbs from the sun to power generators, sometimes producing drinkable desalinated water as a byproduct. Mechanical ocean energy is generated by the movement of tides and waves through turbines. In both cases, power generation is not very efficient with current technology. New methods of capturing this energy are under development. Mechanical ocean energy requires the building of large dams or breakwater-type structures called tidal barrages, which could harm coastal ecosystems.

Solar energy is generated using light from the sun. Solar energy is increasingly used to generate electricity. Photovoltaic (PV) cells, also called solar cells, are made of semi-conducting materials that can directly convert sunlight to electricity without producing any harmful waste. Arrays of mirrors can concentrate the sun's rays onto PV panels, making solar collectors more efficient. Solar thermal systems can use sunlight to heat water. According to the Dept. of Energy, homes incorporating solar heating designs can save 50% or

more on heating bills. Solar energy is limited by its dependence on a range of factors, including location, time of day, time of year, and weather conditions.

Wind energy uses wind turbines to produce energy. It is one of the most common renewable energy sources in the U.S. today. Wind turbines typically are perched on towers 100 ft tall or higher; they are often placed in large groups (“farms”), which are sometimes located offshore. Farmers and homeowners sometimes use stand-alone turbines to generate supplemental electricity. Tax credits for wind energy producers and government incentives for homeowners have lowered the price of wind power. But some object to wind farms because of their appearance or the noise the turbines make. Wind power raises few other environmental problems, but the turbines can pose a danger to birds. In addition, because weather is involved, consistent energy generation can be a challenge.

CRIME

Crime in the U.S., 1990-2020

Source: *Crime in the United States, 2020*, Uniform Crime Reporting Program, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Reported offenses are classified as **violent crimes** if they involve force or the threat of force: murder and nonnegligent manslaughter, rape, robbery, and aggravated assault. The following offenses are considered **property crimes**: burglary, larceny-theft, motor vehicle theft, and arson (excluded from this table because of insufficient data to make estimates).

Year(s)	Violent crime

(1) In 2013, the FBI began collecting rape data under a revised definition. For comparison purposes, this table presents data under the legacy definition of rape: “carnal knowledge of a female forcibly and against her will.” That definition does not include statutory rape, other types of sexual offenses, or attacks with male victims. (2) Attack or attempted attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (3) The unlawful taking of another’s property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excludes crimes such as embezzlement and check fraud.

Violent Crime Rates in the U.S., 1970-2020

Source: *Crime in the United States, 2020*, Uniform Crime Reporting (UCR) Program, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

After rising during much of the 1970s and 1980s, the violent crime rate dropped sharply, from a historic high of 758.2 reported offenses per 100,000 population in 1991 to nearly half that in 2020 (387.8). The rates of aggravated assault and robbery decreased even more precipitously over that same time period. The UCR program began collecting rape data under a revised definition in 2013, but the data here uses the legacy definition of rape to allow for comparison.

Note: Offense totals are based on all law enforcement agencies in the UCR program and include estimates for agencies that submitted less than 12 months of data. Only the most serious offense in a multiple-offense incident is used in calculating crime rates. (1) Excl. arson because of insufficient data to make estimates. (2) Unless otherwise noted, figures estimated using FBI definition of rape (revised 2013): “penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.” (3) Attack or attempted attack upon another with the intent of doing serious bodily harm; usually accompanied by the use of a weapon or other means likely to produce death or great bodily harm. (4) The unlawful taking of another’s property not involving force or fraud (e.g., theft of motor vehicle parts, shoplifting). Excl. crimes such as embezzlement and check fraud. (5) Limited data available for state. (6) Does not incl. figures that the FBI determined did not follow UCR reporting guidelines. (7) State’s agencies submitted rape data according to the legacy rape definition. (8) Incl. offenses reported by Metro Transit Police and DC Fire and Emergency Medical Services Arson Investigation Unit.

Crime Rates in the Largest U.S. Metropolitan Areas, 2020

NA = Not available because FBI determined agency data were over- or underreported

or that agency did not follow reporting guidelines. (1) Data in category includes nonnegligent manslaughter. (2) Data submitted using only the revised definition of rape. (3) Includes burglary, larceny-theft, and motor vehicle theft but not arson because of insufficient data to make estimates. (4) Figures are for 2018. (5) Figures are for 2019. (6) Figures are for 2017.

Criminal Victimization, 2016-20

Source: *Criminal Victimization, 2020*, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

A crime committed against an individual or single household—whether threatened, attempted, or completed—counts as one victimization. Because more than one person may be victimized during a criminal incident, the number of victimizations may be greater than the number of personal crime incidents. **Victimization rates** measure the frequency with which victimizations occurred per 1,000 persons age 12 or older or per 1,000 households.

Crime type	Number			
	2016	2017	2019	2020

Note: Details may not add up to totals due to rounding. Because of survey changes, the number of property crimes for 2017 and on should not be compared with that number in 2016. (1) Excl. homicide because survey is based on interviews with victims. (2) Incl. rape or sexual assault, robbery, and aggravated assault. (3) Victimization by intimate partners or family members. (4) Incl. victimizations by current or former spouses, boyfriends, or girlfriends. (5) Incl. unlawful, forcible, or attempted entry of places, incl. a permanent residence, other residence (e.g., hotel room), or other structure (e.g., garage). Incl. victimizations where the offender stole, attempted to steal, or did not attempt to steal. Excl. trespassing on land. (6) Incl. only crimes where the offender committed or attempted a theft. (7) Incl. crimes where the offender did not commit or attempt a theft. Excl. trespassing on land. (8) Incl. other unlawful or attempted unlawful taking of property or cash without personal contact with victim.

Prison Population by State, 2000-20

Source: National Prisoner Statistics Program, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

As of Dec. 31, 2020, 1,215,821 prisoners were under the jurisdiction, or legal authority, of state (87.5%) or federal (12.5%) correctional authorities, a 24.7% decrease from a peak U.S. prison population of 1,615,487 in 2009. Multiple states reported large

changes in prison populations in 2019-20 due to criminal justice reforms enacted to address the COVID-19 pandemic. Jails, which are locally operated, typically hold persons awaiting trial or sentencing as well as those sentenced to one year or less.

— = Not calculated because counts for 2019 and 2020 are not comparable, not applicable, or not available. (1) Includes BJS-imputed counts for Oregon, which did not submit 2019 prisoner data. (2) Includes adult prisoners held in nonsecure community-corrections facilities and adults and persons age 17 or younger held in privately operated facilities. (3) DC has not operated a prison system since year-end 2001. 2000 figure includes jail and prison population. Felons sentenced under DC's criminal code are currently housed in federal facilities. (4) Prisons and jails form one integrated system. Data include total jail and prison populations. (5) Includes persons in county jails waiting to be moved to state prison.

Death Penalty by State, 1930-2022

Source: *Capital Punishment*, Natl. Prisoner Statistics Program, BJS, USDOJ; Death Penalty Information Center (DPIC)

In 2020, five states executed 7 inmates while 2,469 prisoners remained under sentence of death at year's end, according to the most recent data available from the Bureau of Justice Statistics (BJS). The death row population has decreased every year since 2000, but the demographic composition has changed little: as of year-end 2020, 56.5% of prisoners were white and 41.1% were Black.

As of mid-2022, 27 states and the federal government authorized the death penalty. Of the 23 states without the death penalty, 8 are not shown here (Alaska, Hawaii, Maine, Michigan, Minnesota, North Dakota, Rhode Island, and Wisconsin); they did not execute anyone after 1930. More recently, capital punishment was abolished in New Mexico (2009), Illinois (2011), Connecticut (2012), Maryland (2013), New Hampshire (2019; one person remains on state's death row as repeal was not retroactive), Colorado (2020), and Virginia (2021). State supreme courts have struck down the death penalty as unconstitutional in Delaware (2016) and Washington (2018). Governors have issued moratoriums on executions in Oregon (2011), Pennsylvania (2015), and California (2019). Nebraska voters, in a 2016 referendum, overturned their state's ban on capital punishment. The federal government resumed executions in July 2020, after a nearly 17-year hiatus, but the Biden administration imposed a moratorium July 1, 2021.

All death penalty states authorized lethal injection as their primary method of execution in 2021. Some states also permitted execution by electrocution, lethal gas, hanging, firing squad, and nitrogen hypoxia.

— = Not available or applicable. (1) As of year end. Excludes persons held under Armed Forces jurisdiction with a military death sentence for murder. (2) Excludes 160 executions carried out by military authorities between 1930 and 1961. (3) Advance count.

U.S. Prison Population, 1925-2020

Source: National Prisoner Statistics Program, Bureau of Justice Statistics (BJS), U.S. Dept. of Justice

As recently as 1970, the U.S. had fewer than 200,000 people behind bars nationwide, or less than 1 in 1,000 residents. That number rose steadily from the 1970s on, reaching an all-time high of 1.62 mil prisoners in 2009. The imprisonment rate has declined since its high of 506 prisoners per 100,000 residents in both 2007 and 2008.

Year	Prisoners	Imprisonment rate
1925	91,669	79
1930	129,453	104
1940	173,706	131
1950	166,165	109
1960	212,953	117
1970	196,441	96
1980	329,821	138
1990	773,919	295
1995	1,125,874	411
2000	1,394,231	470
2005	1,525,910	492
2010	1,613,803	500
2013	1,576,950	477
2015	1,526,603	459
2016	1,508,129	450
2017	1,489,189	441
2018	1,464,385	432
2019	1,430,805	419

Note: Imprisonment rate is per 100,000 U.S. residents of all ages at year end based on U.S. Census Bureau pop. ests. Since 1971, the rate is of prisoners sentenced to more than one year. Data for 1940-70 include all adult felons serving sentences in state and federal institutions. In 1977, the BJS began to include persons under state jurisdiction but not in a state's physical custody, such as persons in private prisons, local jails, and other facilities. Figures may not be directly comparable over time.

NA = Not applicable. **Note:** Jurisdiction refers to the legal authority of state or federal correctional officials over a prisoner, regardless of where the prisoner is held, at year end. Sentenced felons from DC were the responsibility of the Federal Bureau of Prisons. OR did not submit 2019 prisoner data or 2020 capacity data. BJS-imputed counts are included in U.S. and state totals. Multiple states reported large changes in prison populations in 2019-20 due to criminal justice reforms enacted to address the COVID-19 pandemic. (1) Rankings do not incl. MT or OR. (2) Prisoners sentenced to more than one year per 100,000 U.S. residents based on Census Bureau pop. figures except OH, which incl. a small number of prisoners sentenced to one year or less. (3) Based on custody counts, not jurisdiction population, excl. inmates held in local jails, other states, or private facilities unless otherwise noted. As % of rated, operational, or design capacity. Some states define capacity differently from BJS. CT and OH do not report capacity data. (4) Incl. adult prisoners held in nonsecure community corrections facilities and adults and persons age 17 or younger held in privately operated facilities. (5) Incl. persons waiting in county jails to be moved to state prison. (6) Prisons and jails form integrated system. Data incl. total jail and prison pops. (7) Incl. state-owned facilities staffed by private-company employees. (8) Excl. nontraditional confinement (e.g., halfway houses). (9) Incl. persons in private facilities.

Imprisonment Rates by Gender, Race, Hispanic Origin, and Age, 2020

Law Enforcement Officers and Civilian Employees, 2020-21

Source: *Crime in the United States, Law Enforcement Officers Killed and Assaulted*, Crime Data Explorer (CDE); Federal Bureau of Investigation (FBI); U.S. Dept. of Justice

As of Oct. 31, 2021, city, county, state, college and university, and tribal agencies around the country collectively employed 954,549 full-time law enforcement workers. About 69.2% of these employees were sworn officers. The FBI defines a law enforcement officer as a person who ordinarily carries a firearm and badge, has full arrest powers, and is paid from specific dedicated government funds. Civilians (e.g., clerks, radio dispatchers, correctional officers) made up the remainder.

Altogether, they provided service to an estimated 283.0 mil people around the country, meaning there were 3.4 full-time law enforcement employees and 2.3 sworn officers per 1,000 residents.

The great majority of officers (86.7%) were men, while women made up 60.3% of civilian employees. The most populous state, California, employed the greatest number of full-time law enforcement workers (117,584). Washington, DC, had the highest rate, with 7.6 full-time law enforcement employees per 1,000 residents, followed by New Jersey (5.6) and Illinois (5.1). Washington state had the lowest, with 2.0 per 1,000 residents.

Nationwide, according to preliminary data, 73 law enforcement officers were killed feloniously (that is, willfully and intentionally by the offender) in the line of duty in 2021, compared to 46 officers in 2020 and in the highest total since 2011 (72). Of the 73 officers, 61 were killed by firearms. Twenty-four were killed in unprovoked attacks, the highest total in over 30 years of reporting. On average, the officers were 39 years of age and had served in law enforcement for 12 years when killed. An additional 56 officers were killed accidentally in 2021 while on the job, 31 of them in motor vehicle crashes. In 2020, 60,105 officers were reported to have been assaulted in the line of duty. The highest percentage (29.6%) were

assaulted while responding to disturbance calls such as family quarrels.

Note: Year-end estimates based on prisoners with a sentence of more than one year under the jurisdiction, or legal authority, of state correctional officials. Details may not add up to totals due to rounding and missing offense data. Hispanics may be of any race. (1) Includes race categories not shown here and persons of two or more races. (2) Excludes persons of Hispanic origin. (3) Includes possession, trafficking, and other and unspecified drug offenses. (4) Includes weapons, driving under the influence or while intoxicated, and court offenses; commercialized vice, morals, and decency offenses; liquor law violations; probation and parole violations; and other public order offenses. (5) Includes juvenile offenses and other unspecified offense categories.

Arrests by Race and Hispanic Origin, 2020

Source: *Crime in the United States, 2020*, Uniform Crime Reporting (UCR) Program, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Each instance in which a person is arrested, cited, or summoned for an offense is counted as one arrest. Some arrest data could therefore represent multiple arrests of the same person. Arrest

estimates are based on statistics from law enforcement agencies that reported 12 months of arrest data, including race information.

 (1) From 2019 on, includes homicide, murder, unintentional shootings, and defensive gun use. (2) Calculation based on Centers for Disease Control and Prevention suicide data. (3) Four or more people shot and/or killed in a single event, at the same general time and location, not including the shooter.

Hate Crimes by Offense Type and Bias Motivation, 2020

Source: *Hate Crime Statistics, 2020, Uniform Crime Reporting (UCR) Program*, Federal Bureau of Investigation (FBI), U.S. Dept. of Justice

Hate crimes are defined as crimes motivated in whole or in part by the offender's bias against a characteristic such as race, ethnicity, or religion. The Hate Crime Statistics Act of 1990 led to the collection of hate crime data as part of the FBI's UCR program. Not all law enforcement agencies that participate in the UCR program submit hate crime data, so the data presented is not representative of the nation as a whole.

Women in the U.S. Armed Forces

Source: U.S. Dept. of Defense; U.S. Census Bureau, U.S. Dept. of Commerce; U.S. Coast Guard, U.S. Dept. of Homeland Security

Women in the Army, Navy, Air Force, Marines, and Coast Guard are fully integrated with male personnel. All enlisted jobs were opened to women when the draft ended June 30, 1973. Admission to service academies began in 1976. Under rules instituted in 1993, women began to fly combat aircraft and serve aboard warships. By the mid-1990s, 80% of all jobs and more than 90% of all career fields had been opened to women. A woman first achieved the rank of four-star general in 2009. In 2010, the Navy removed its ban on women serving on submarine crews. The Pentagon in 2013 lifted its ban on women serving in direct ground combat units. In 2015, the first two women graduated from the Army's Ranger School. Adm. Linda Fagan was sworn in as commandant of the Coast Guard in June 2022, making her the first woman to lead a U.S. military branch.

Service	% women
Army	15.6%
Navy	20.7

NA = Not applicable. **Note:** Basic pay rate for Academy cadets/midshipmen and ROTC members/applicants is \$1,218. See Dept. of Defense Financial Management Regulations for details on pay-scale limitations and eligibility requirements. **Over 30 years**—O-10: \$16,975; O-9: \$16,975; O-8: \$16,366; O-7: \$14,446; O-6: \$12,980; W-5: \$10,113; W-4: \$8,926; E-9: \$8,152; E-8: \$6,759. **Over 34 years**—O-10: \$16,975; O-9: \$16,975; O-8: \$16,774; W-5: \$10,618; E-9: \$8,560. **Over 38 years**—O-10: \$16,975; O-9: \$16,975; W-5: \$11,150; E-9: \$8,989. (1) Applicable to E-1 with 4 months or more of active duty. Basic pay for an E-1 with less than 4 months of active duty is \$1,695.

U.S. Veteran Population, 2022

Source: U.S. Dept. of Veterans Affairs
(projected population, in thousands, as of Sept. 30)

Period of service	Vet. pop.
Total peacetime veterans¹	4,063
Service between Vietnam War era and Gulf War era	2,878
Service between Korean War and Vietnam War era	1,148
Service between WWII and Korean War	35
Pre-WWII service	1
Total wartime veterans²	14,730
Total World War II ³	174
WWII only	159
Total Korean War ³	819
Korean War with no other wartime service	730
Korean War with service in WWII	11
Total Vietnam War era ³	5,842
Vietnam War era with no other wartime service	5,385
Vietnam War era with service in Korea	74
Vietnam War era with service in Korea and WWII	5
Total Gulf War era ³	8,367
Gulf War era pre-9/11 with service in Vietnam era	261
Gulf War era pre-9/11, post-9/11, and with service in Vietnam War era	61
Gulf War era pre-9/11	2,705
Gulf War era pre-9/11 and post-9/11	1,562
Gulf War era post-9/11	3,722
TOTAL VETERANS IN CIVILIAN LIFE	18,792

Note: Figures are for U.S. veterans worldwide. Includes those who served on active duty in Army, Navy, Air Force, Marines, Coast Guard, uniformed Public Health Service and NOAA, and reservists called to federal active duty. Excludes those dishonorably discharged, those whose only active duty was training, and those currently on active duty. (1) Veterans with both wartime and peacetime service are counted only as "wartime veterans." (2) Veterans serving in more than one period are counted only once in total. (3) Total includes veterans who also served in other periods.

African American Service in U.S. Wars

Source: U.S. Dept. of Defense; U.S. Census Bureau, U.S. Dept. of Commerce

American Revolution. About 5,000 served in the Continental Army, mostly in integrated units, some in all-black combat units.

Civil War. Some 180,000 served in 163 units of the Union Army's U.S. Colored Troops, and 200,000 worked in service units—10% of the Union Army in all; about 37,000 died, 31,000 wounded.

World War I. 350,000-400,000 served in the armed forces, 100,000 in France. Some 40,000 fought.

World War II. Some 1 mil served in the armed forces—8% of all troops—mostly in Army service units; all-black fighter and bomber Army Air Force units and infantry divisions gave distinguished service.

Korean War. More than 600,000 served in the military; 3,075 lost their lives in combat. By 1954, armed forces were completely desegregated.

Vietnam War. 274,937 served in the armed forces (1965-74)—9.8% of all troops; 7,243 were killed in combat.

Persian Gulf War. About 104,000 served in the Kuwaiti theater—20% of all U.S. troops; 66 died in combat.

Operation Enduring Freedom/Freedom's Sentinel. 204 military deaths and 1,458 wounded in Afghanistan and elsewhere.

Operation Iraqi Freedom/Operation New Dawn/Operation Inherent Resolve. 465 military deaths and 2,796 wounded.

With service- connected disability	8.7	9.6	NA	349	311	38
Without service- connected disability	5.1	4.9	6.3	1,887	1,723	164

NA = Not available. **Note:** Veterans in survey were on active duty in the U.S. Armed Forces during these periods of service: Gulf War era II (Sept. 2001-present), Gulf War era I (Aug. 1990-Aug. 2001), Vietnam era (Aug. 1964-Apr. 1975), Korean War (July 1950-Jan. 1955), World War II (Dec. 1941-Dec. 1946), and other service periods. Veterans who served in more than one wartime period are classified in the most recent period only. A service-connected disability is a health condition or impairment caused or made worse by military service.

Total	31,479	31,878	27,326	27,501	23,679	25,637	334,391

Note: SIPRI data on arms transfers relate to actual deliveries of major conventional weapons, using TIV. TIV is based on the known unit production costs of a core set of weapons and is intended to represent the transfer of military resources rather than the financial value of the transfer. A weapon that has been in service in another armed force is valued at 40% of a new weapon. A significantly refurbished or modified used weapon is valued at 66% of that of a new weapon. Total includes suppliers/countries not shown here.

U.S. Foreign Military Sales, 1950-2021

Source: Defense Security Cooperation Agency (DSCA), Dept. of Defense

Listed are sales of military articles, services, and/or training to foreign governments and international organizations through the DSCA-administered Foreign Military Sales (FMS) program for the Dept. of Defense. Transfers may in some cases be completed through grants/leases.

NA = Not available or applicable. **Note:** Numbers for the individual decorations shown here represent only those awards that were properly processed and reported to Dept. of the Army Headquarters. The actual number of individual decorations awarded under combat conditions, when award approval authority is delegated to field commanders, cannot be stated with absolute certainty. Numbers here reflect the current statistics recorded by the Military Awards Branch, as of Aug. 5, 2021, unless noted, except for MOH, which was reported by the Congressional Medal of Honor Society as of Aug. 10, 2022. (1) Operation Enduring Freedom and Operation Freedom's Sentinel. May include awards for actions related to operations but occurring outside of Afghanistan. As of Dec. 10, 2019. (2) Operation Iraqi Freedom, Operation New Dawn, and Operation Inherent Resolve. May include awards for actions related to operations but occurring in other nations, including Syria. As of Dec. 10, 2019.

Medal of Honor

Source: Congressional Medal of Honor Society; U.S. Army, U.S. Dept. of Defense

(as of Sept. 3, 2022)

The Medal of Honor is the highest military award for individual bravery in the U.S. On Dec. 21, 1861, Pres. Abraham Lincoln signed a bill to create the Navy Medal of Honor. Lincoln, on July 14, 1862, approved a resolution providing for the presentation of Medals of Honor to enlisted men of the Army and Voluntary Forces. The law was amended on Mar. 3, 1863, so that officers as well as enlisted men were eligible. The first Army Medals of Honor were awarded on Mar. 25, 1863; the first Navy medals went to sailors and Marines on Apr. 3, 1863.

The Medal of Honor is awarded in the name of Congress to a person who, while a member of the armed forces, distinguishes himself or herself conspicuously by gallantry and intrepidity at the risk of life above and beyond the call of duty while engaged in an action against any enemy of the U.S.; while engaged in military operations involving conflict with an opposing foreign force; or while serving with friendly foreign forces engaged in an armed conflict against an opposing armed force in which the U.S. is not a belligerent party.

The deed performed must have been one of personal bravery or self-sacrifice so conspicuous as to clearly distinguish the individual above his or her comrades and must have involved risk of life. Incontestable proof of the performance of service is required, and each recommendation for award of this decoration is considered on the standard of extraordinary merit.

Prior to World War I, the 2,625 Army Medal of Honor awards up to that time were reviewed to determine which met new stringent criteria. The Army removed 911 names from the list, most of them former members of a Civil War volunteer infantry group who had been induced to extend their enlistments when they were promised the medal. However, the medal was restored to Dr. Mary Walker in 1977 and to Buffalo Bill Cody and seven other scouts in 1989.

* = Awarded posthumously. (1) Rank at date of award.

Other Selected Awards

Source: The Institute of Heraldry, U.S. Army; Navy Department Awards Web Service; Air Force Personnel Center

Distinguished Service Cross

Established by Congress July 9, 1918, on recommendation of Gen. John J. "Black Jack" Pershing, and awarded for extraordinary heroism not justifying the award of a Medal of Honor. The act or acts of heroism must have been so notable and have involved risk of life so extraordinary as to set the individual apart from his or her comrades. The Navy Cross and Air Force Cross are equivalent.

Silver Star

Third-highest military combat honor. An earlier version of this award, the Citation Star, was established by Congress on July 19, 1918, and retroactively awarded to soldiers for "gallantry in action," back to the Spanish-American War. The Silver Star medal replaced the Citation Star in 1932 and is awarded for gallantry in action which, while of a lesser degree than that required for award of the Distinguished Service Cross, must nevertheless have been performed with marked distinction.

Distinguished Flying Cross

Established by Congress July 2, 1926, and awarded for heroism or extraordinary achievement while participating in aerial flight. Awards are made only to recognize single acts of heroism or extraordinary achievement, not sustained operational activities against an armed enemy. Initial awards were given to persons who made record-breaking long-distance and endurance flights or who set altitude records.

Soldier's Medal

Established by Congress July 2, 1926, to recognize acts of heroism not involving actual conflict with an enemy. The same degree of heroism is required as for the award of the Distinguished Flying Cross. The performance must have involved personal hazard or danger and the voluntary risk of life under conditions not involving conflict with an armed enemy. Awards are not made solely on the basis of having saved a life.

Bronze Star

Established by executive order Feb. 4, 1944, largely to raise the morale of ground troops in WWII, on the recommendation of Gen. George C. Marshall. It is awarded to any person who, while serving in any capacity in or with the U.S. military, distinguishes himself or herself by heroic or meritorious achievement or service not involving participation in aerial flight.

Purple Heart

The original Purple Heart, designated as the Badge of Military Merit, was established by Gen. George Washington on Aug. 7, 1782. Following the American Revolution, the badge fell into disuse until 1932, the 200th anniversary of Washington's birth. During WWII, the Order of the Purple Heart was awarded for both wounds received in action and for meritorious service. Following the introduction of the Legion of Merit, the Purple Heart was awarded only for combat wounds. Today, it is awarded to any armed forces member who, while serving with the U.S. Armed Services, has been wounded or killed, or who has died or may hereafter die after being wounded in action against an enemy of the U.S. or in an armed conflict in which the U.S. or friendly foreign forces are engaged; as the result of an act of any hostile foreign force; as a result of an international terrorist attack against the U.S. or a friendly foreign nation; or as a result of military operations outside the U.S. as part of a peacekeeping force. Wounds must be inflicted directly by enemy action, including while held as a prisoner of war or while being taken captive.

U.S. Army, Navy, Air Force, Marine Corps, and Coast Guard Insignia

Source: Dept. of the Army, Dept. of the Navy, Dept. of the Air Force, U.S. Dept. of Defense; U.S. Coast Guard, U.S. Dept. of Homeland Security

Army

General of the Armies—Gen. John J. Pershing (1860-1948), the only person to have held this rank while living, was authorized to

prescribe his own insignia but never wore in excess of four stars. Congress established the rank in 1799 to be bestowed on George Washington; Washington was finally promoted to the rank by joint resolution of Congress, approved by Pres. Gerald Ford, Oct. 19, 1976.

General of the Army—Five silver stars fastened together in a circle and the coat of arms of the U.S. in gold color metal with shield and crest enameled. Reserved for wartime use only.

Rank	Insignia
General of the Army*	Five silver stars
General	Four silver stars
Lieutenant General	Three silver stars
Major General	Two silver stars
Brigadier General	One silver star
Colonel	Silver eagle
Lieutenant Colonel	Silver oak leaf
Major	Gold oak leaf
Captain	Two silver bars
First Lieutenant	One silver bar
Second Lieutenant	One gold bar

Warrant Officers

Grade Five—Silver bar with enamel black line.

Grade Four—Silver bar with 4 enamel black squares.

Grade Three—Silver bar with 3 enamel black squares.

Grade Two—Silver bar with 2 enamel black squares.

Grade One—Silver bar with 1 enamel black square.

Noncommissioned Officers

Sergeant Major of the Army (E-9)—Three chevrons above 3 arcs, with a U.S. coat of arms centered on the chevrons, flanked by

2 stars—1 star on each side of the eagle. Also distinctive red-and-white shield collar insignia.

Command Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star with a wreath around the star between the chevrons and arcs.

Sergeant Major (E-9)—Three chevrons above 3 arcs with a 5-pointed star between the chevrons and arcs.

First Sergeant (E-8)—Three chevrons above 3 arcs with a lozenge between the chevrons and arcs.

Master Sergeant (E-8)—Three chevrons above 3 arcs.

Sergeant First Class (E-7)—Three chevrons above 2 arcs.

Staff Sergeant (E-6)—Three chevrons above 1 arc.

Sergeant (E-5)—Three chevrons.

Corporal (E-4)—Two chevrons.

Specialists

Specialist (E-4)—Eagle device only.

Other Enlisted

Private First Class (E-3)—One chevron above 1 arc.

Private (E-2)—One chevron.

Private (E-1)—None.

*Rank reserved for wartime use only.

Air Force

Insignia for Air Force officers are identical to those of the Army. Insignia for enlisted personnel are worn on both sleeves and consist of 1 star and an appropriate number of rockers. Chevrons appear above 5 rockers for the top three noncommissioned officer ranks, as follows (in ascending order): Master Sergeant, 1 chevron; Senior Master Sergeant, 2 chevrons; Chief Master Sergeant, 3 chevrons. The insignia of the Chief Master Sergeant of the Air Force has 3 chevrons and a wreath around the star design, while the Command Chief Master Sergeant insignia features an additional star. General of the Air Force is reserved for wartime use only.

Navy

The following stripes are worn on the lower sleeves of the Service Dress Blue uniform. They are of gold embroidery.

Rank	Insignia
Fleet Admiral*	1 two inch with 4 one-half inch
Admiral	1 two inch with 3 one-half inch
Vice Admiral	1 two inch with 2 one-half inch
Rear Admiral (upper half)	1 two inch with 1 one-half inch
Rear Admiral (lower half)	1 two inch
Captain	4 one-half inch
Commander	3 one-half inch
Lieutenant Commander	2 one-half inch with 1 one-quarter inch between
Lieutenant	2 one-half inch
Lieutenant (jr. grade)	1 one-half inch with 1 one-quarter inch above
Ensign	1 one-half inch
Warrant Officer W-5	1/2" stripe under 1/8" blue strip with 1 break
Warrant Officer W-4	1/2" stripe with 1 break
Warrant Officer W-3	1/2" stripe with 2 breaks, 2" apart
Warrant Officer W-2	1/2" stripe with 3 breaks, 2" apart

Enlisted personnel (noncommissioned petty officers)—Rating badge worn on the upper left sleeve consisting of a spread eagle, appropriate number of chevrons, and centered specialty mark.

* = Rank reserved for wartime use only.

Marine Corps

Marine Corps' distinctive cap and collar ornament is the Marine Corps emblem—a combination of the American eagle, a globe, and

an anchor. Marine Corps and Army officer insignia are similar. Marine Corps enlisted insignia, although basically similar to the Army's, feature crossed rifles beneath the chevrons. Marine Corps enlisted rank insignia are as follows:

Sergeant Major of the Marine Corps (E-9)—Same as Sergeant Major (below) but with Marine Corps emblem in the center with a 5-pointed star on both sides of the emblem.

Sergeant Major (E-9)—Three chevrons above 4 rockers with a 5-pointed star in the center.

Master Gunnery Sergeant (E-9)—Three chevrons above 4 rockers with a bursting bomb insignia in the center.

First Sergeant (E-8)—Three chevrons above 3 rockers with a diamond in the middle.

Master Sergeant (E-8)—Three chevrons above 3 rockers with crossed rifles in the middle.

Gunnery Sergeant (E-7)—Three chevrons above 2 rockers with crossed rifles in the middle.

Staff Sergeant (E-6)—Three chevrons above 1 rocker with crossed rifles in the middle.

Sergeant (E-5)—Three chevrons above crossed rifles.

Corporal (E-4)—Two chevrons above crossed rifles.

Lance Corporal (E-3)—One chevron above crossed rifles.

Private First Class (E-2)—One chevron.

Private (E-1)—None.

Coast Guard

Coast Guard insignia follow Navy custom, with certain minor changes such as the officer cap insignia. The Coast Guard shield is worn on both sleeves of officers and on the right sleeve of all enlisted personnel.

Federal Service Academies

U.S. Military Academy, West Point, NY. Founded 1802. Awards B.S. degree and Army commission for a 5-year service obligation. **Website:** www.usma.edu

Casualties in Principal Wars of the U.S.

Source: U.S. Dept. of Defense; U.S. Coast Guard, U.S. Dept. of Homeland Security

Data prior to World War I are based on incomplete records in many cases. Casualty data are confined to dead and wounded personnel and, therefore, exclude personnel captured or missing in action who were subsequently returned to military control.

<p>— = Not available. Off. = Officers. Note: As of Aug. 2022, there were 1,845 battle deaths, 503 non-hostile deaths, and 20,149 wounded in Op. Enduring Freedom (Oct. 7, 2001-Dec. 31, 2014), mostly in Afghanistan and the Persian Gulf area; 77 battle deaths, 30 non-hostile deaths, and 620 wounded in Operation Freedom's Sentinel (Jan. 1, 2015-Aug. 30, 2021) in Afghanistan, including 13 killed in attack on Kabul's airport in Aug. 2021 during U.S. withdrawal; 20 battle deaths, 87 non-hostile deaths, and 272 wounded in Operation Inherent Resolve (Aug. 8, 2014-) against ISIS in Iraq and Syria. (1) Marine Corps data for Iraq War, World War II, Spanish-American War, and prior wars represent the number of individuals wounded, whereas all other data in this column represent the total number (incidence) of wounds. (2) Totals for all branches do not include categories for which no data are listed. (3) From the final report of the Provost Marshal General, 1863-66. Authoritative statistics for the Confederate forces are not available. In addition, an estimated 26,000-31,000 Confederate personnel died in Union prisons. New estimates published in <i>Civil War History</i> in 2012 recalculated the death toll for both sides and determined that it was 20% higher than previously thought, at 750,000. (4) Data are for Dec. 1, 1941, through Dec. 31, 1946, when hostilities were officially terminated by presidential proclamation; few battle deaths or wounds not mortal were incurred after Japanese acceptance of Allied peace terms on Aug. 14, 1945. Numbers serving Dec. 1, 1941-Aug. 31, 1945: Total—14,903,213; Army—10,420,000; Navy—3,883,520; Marine Corps—599,693. (5) As a result of an ongoing Dept. of Defense review of available Korean War casualty record information, updates have been made to previously reported figures for battle deaths and other deaths. (6) Number serving Aug. 5, 1964-Jan. 27, 1973 (date of cease-fire). Includes casualties incurred in Mayaguez incident. Wounds not mortal exclude 150,341 persons not requiring hospital care. (7) Military deaths during the invasion phase, which ended Apr. 30, 2003, totaled 115 combat-related and 23 other. (8) Then known as the U.S. Revenue Cutter Services, predecessor to the U.S. Coast Guard. (9) Number serving Apr. 21-Aug. 13, 1898, while dead and wounded data are for May 1-Aug. 31, 1898. Active hostilities ceased on Aug. 13, 1898, but the U.S. and Spain did not exchange ratifications of the treaty of peace until Apr. 11, 1899. (10) Includes Army Air Forces battle deaths and wounds not mortal, as well as casualties suffered by American forces in northern Russia to Aug. 25, 1919, and in Siberia to Apr. 1, 1920. Other deaths cover Apr. 1, 1917-Dec. 31, 1918. (11) Includes Army Air Forces. (12) Battle deaths and wounds not mortal include casualties incurred in Oct. 1941 due to hostile action. (13) Estimated. (14) As reported by Commissioner of Pensions in his Annual Report for Fiscal Year 1903. (15) Number serving as of Mar. 31, 2003, i.e., does not include numbers of troops deployed since then.</p>					

Timeline of Major Wars Since 1066

Norman Conquest 1066-71	William I, duke of Normandy, landed on the English coast near Hastings on Sept. 28, 1066, and defeated Harold II, Saxon king of England, at Battle of Hastings Oct. 14. William crowned king Dec. 25 in Westminster Abbey. Most revolts were suppressed by 1071.
-----------------------------------	--

Conquest linked England's interests with those of the continent and led to its rise as a powerful monarchy.

Crusades 1095-1270/1291	Military expeditions undertaken by Western European Christians , usually at the behest of the papacy , to recover Jerusalem and other Biblical places of pilgrimage from Muslim control. In the long term, stimulated trade and flow of ideas between East and West. Pope Urban II called Nov. 27, 1095, for the First Crusade ; Crusaders took Jerusalem on July 15, 1099, massacred inhabitants, and founded four temporary states: Antioch, Edessa, Jerusalem, and Tripoli. The failed Second Crusade was prompted by Muslims' capture of Edessa in 1144. Jerusalem was captured by Ayyubid sultan Saladin on Oct. 2, 1187, leading to the Third Crusade , which involved the Holy Roman emperor, Frederick I (Barbarossa); the French king, Philip II (Augustus); and the English king, Richard I (Lion-Heart) but did not lead to a Crusader victory. The Fourth Crusade sacked Constantinople on Apr. 13, 1204. The Fifth Crusade began with capture of Damietta in Egypt (1219) but failed at Cairo. A Sixth Crusade led to the Treaty of Jaffa in 1229, giving Jerusalem to the Crusaders until 1244, when its seizure by the Khwarezmians led to the launch of a Seventh Crusade . The last crusade abruptly ended when its leader, French King Louis IX, died in 1270. The last major Crusader stronghold, Acre, was lost on May 18, 1291.
Hundred Years War 1337-1453	Series of armed conflicts over rival claims to the French throne, broken by a number of truces and peace treaties. Edward III declared self king of France in 1338 and invaded, with victories at Crécy (1346) and Poitiers (1356). Treaty of Brétigny signed May 8, 1360, but French king Charles V renewed fighting in 1369. Truce from 1396 until Henry V of England invaded in 1415 and defeated French army at Agincourt , capturing land north of Loire River, including Paris. Treaty of Troyes in 1420 made Henry VI heir of both thrones. The siege of French stronghold Orléans, lifted in 1429 with help from Joan of Arc , turned tide in favor of French, who won last battle (1453). War ended English claims to France, paved way for French absolute monarchy.
Wars of the Roses 1455-85	Series of dynastic civil wars for the throne in England fought by the rival houses of Lancaster and York . Richard, third duke of York, in conflict with the Lancastrian King Henry VI , won victories at St. Albans (1455) and Northampton (1460); Richard died at Battle of Wakefield on Dec. 30, 1460, before coronation, leaving his son to become King Edward IV. Henry VI imprisoned in Tower of London, 1465. Edward died in 1483; his brother became Richard III after usurping throne from Edward V, nephew. Henry Tudor defeated Richard III at the Battle of Bosworth Field (1485). As Henry VII, he married Edward IV's daughter Elizabeth, 1486, uniting the houses.
Thirty Years' War	A series of religious and political conflicts involving most countries of Western Europe ; majority of fighting in Germany,

1618-48	<p>devastating it. Protestants stormed Habsburg palace in the “Defenestration of Prague” (May 23, 1618). Major conflicts included defeat of King Christian IV of Denmark and Norway by Catholic League (1626); victories by Lutheran King Gustav II Adolph of Sweden at Breitenfeld (1631) and Lützen (1632). France, under cardinal and statesman Richelieu, chief minister of King Louis XIII, declared war on the Habsburgs in May 1635; defeated Austro-Bavarian army (Aug. 3, 1645), leading to Truce of Ulm. Peace of Westphalia signed at Münster on Oct. 24, 1648, bringing peace by recognizing the rulers’ sovereignty within their lands and their right to determine the religious beliefs of their subjects.</p>
English Civil Wars 1638-60	<p>Series of conflicts between followers of King Charles (Cavaliers) and of Parliament (Roundheads), over divine right of king versus Parliament’s right to control national finances. Presbyterian Scots, allied with Parliament, rioted and in 1640 occupied the northern counties of England. Oliver Cromwell, second in command of Parliament’s New Model Army, destroyed the king’s army at Battle of Naseby (June 14, 1645); first civil war ended May 1646 when Charles surrendered to the Scots. Charles later allied with Scots but was defeated by Cromwell at Preston Aug. 17-19, 1648, and executed Jan. 30, 1649. Parliament abolished monarchy and House of Lords. Cromwell suppressed Irish and Scottish rebellions, was briefly succeeded by son Richard after death (1658). Charles II restored to the throne by the “Long Parliament,” May 1660.</p>
War of the Spanish Succession 1701-14	<p>War fought by the Grand Alliance (originally England, Netherlands, Denmark, and Austria; later also Portugal), against coalition of France, Spain, and a number of small Italian and German principalities to preserve balance of power after death of Spanish king Charles II. Opened with invasion of Italy, via Venice, by an Austrian army under Prince Eugène of Savoy in May 1701. French forced to withdraw from Netherlands and Italy in 1706 and were finally defeated in 1709 in bloodiest battle of the war at French village of Malplaquet. Treaties of Rastatt and Baden signed in 1714; Austria given control of Spanish Netherlands, and peace settled between Austria and France.</p>
War of the Austrian Succession 1740-48	<p>Conflict over rival claims for the hereditary dominions of the Habsburg family, following death (1740) of Charles VI, Holy Roman emperor and archduke of Austria. An alliance of Bavaria, France, Spain, Sardinia, Prussia, and Saxony fought against Austria, allied with Holland and Great Britain. King Frederick the Great of Prussia captured Silesia from Austria in the First (1740-42) and Second (1744-45) Silesian Wars. British king George II defeated French army at Battle of Dettingen am Main (June 27, 1743). French conquered Austrian Netherlands (1745-46). Treaty of Aix-la-Chapelle Oct. 18, 1748, restored most original borders; Prussia became significant force.</p>
Seven Years’	<p>Worldwide conflicts fought for control of Germany and for</p>

War 1756-63	supremacy in colonial N America and India. French defeated British Gen. Edward Braddock in Battle of Monongahela in 1754, leading to formal declaration of French-Indian War , May 1756. Frederick II of Prussia invaded Saxony on Aug. 29, 1756; defeated French at Rossbach (1757), Austrians at Leuthen (1757), Russians at Zorndorf (1758). By 1760, British conquered French Canada. Peter III of Russia signed armistice with Prussia, 1762. Treaty of Paris signed Feb. 10, 1763; Peace of Hubertusburg Feb. 15, 1763, between Prussia and Austria. England emerged as leading world naval power.
American Revolution 1775-83	Conflict between Great Britain and 13 British colonies in eastern N America. George Washington took command of the Continental Army, July 3, 1775, and King George III declared colonies traitors on Aug. 23. Declaration of Independence of colonies adopted July 4, 1776. France recognized the colonies' independence Feb. 6, 1778, followed by Spain on June 21, 1779; both pledged support. French fleet drove British fleet under Adm. Thomas Graves from Chesapeake Bay on Sept. 5, 1781. French and Americans laid siege to Yorktown, VA, Sept. 28-Oct. 19, forcing British Gen. Cornwallis to surrender. Treaty of Paris (Sept. 3, 1783) recognized U.S. independence.
Wars of French Revolution and Napoleonic Wars 1792-1815	Large-scale wars fought between France and two multinational coalitions. France declared war on the Austrian part of the Holy Roman Empire, Apr. 20, 1792. Newly created French Republic declared war on monarchs of Britain and Holland, Feb. 1, 1793, and of Spain, Mar. 7. Napoleon Bonaparte defeated Austria in N Italy (1796-97), captured Egypt from Britain (1798-99; Battle of the Pyramids, July 21, 1798), and became First Consul after coup d'état of Nov. 9-10, 1799. French Grande Armée later swept through Europe using innovative and aggressive tactics. French navy defeated by British under Adm. Horatio Nelson at Trafalgar (Oct. 21, 1805), but Napoleon defeated Austro-Russian forces at Austerlitz (Dec. 2) and controlled most of Europe except Russia and Great Britain by 1808. France suffered its first major defeat by Austria at Aspern-Essling, May 21-22, 1809. Napoleon invaded Russia , captured Moscow Sept. 14, 1812, but fled the bitter Russian winter and abandoned Germany after defeat at Leipzig, Oct. 16-19, 1813. Paris captured by Allied armies Mar. 30-31, 1814. Napoleon exiled to Elba May 4 but returned for "Hundred Days" reign, Mar. 20-June 28, 1815; final defeat at Waterloo by British and Prussian troops (June 18). The Bourbon monarchy was restored under Louis XVIII , and Britain, Prussia, Russia, and Austria maintained European peace.
Crimean War 1853-56	Conflict between Russia and coalition of Great Britain, France, Sardinia, and Turkey for influence over Balkans and the straits between the Black Sea and Mediterranean. Russia destroyed Turkish fleet at Sinope on Nov. 30, 1853. Britain and France declared war in Mar. 1854 and with Turkish troops defeated Russians at Battle of Alma River, Sept. 20. Lord Lucan of Britain prevented Russia from

capturing Balaklava on Oct. 25 ("Charge of the Light Brigade" led by Lord Cardigan). Siege of Sevastopol ended when Russia evacuated Sept. 8, 1855. Treaty of Paris signed Mar. 30, 1856; **curbed Russian expansion and loosened European power alignments.**

American Civil War 1861-65	Conflict between the U.S. (the Union) and 11 secessionist Southern states (the Confederate States of America). Union garrison at Fort Sumter in harbor of Charleston, SC, surrendered to Brig. Gen. P.G.T. Beauregard (Apr. 12-13, 1861). Under Beauregard, 22,000 Confederates repelled 35,000 Union troops under Gen. Irvin McDowell along Bull Run stream near Manassas, VA (July 21). The <i>Merrimack</i> (renamed <i>Virginia</i>) battled the <i>Monitor</i> Mar. 9, 1862. In Battle of Antietam, MD (Sept. 17), some 12,000 Northerners and 12,700 Southerners were killed or wounded. Pres. Abraham Lincoln announced Emancipation Proclamation Sept. 22. Confederate Gen. Robert E. Lee's 75,000 forces battled 88,000 Union troops under Gen. George Meade at Gettysburg , PA, July 1-3, 1863; Lee's army forced across the Potomac R. Lee surrendered to Ulysses S. Grant at Appomattox Court House in Virginia (Apr. 9, 1865). The Union was preserved and slavery subsequently abolished.
Franco-Prussian War 1870-71	German states led by Prussia defeated France, seizing Alsace and part of Lorraine. French defeated in several major battles, culminating at Sedan Sept. 1, 1870, when Prussian forces decisively defeated the French army and captured emperor Napoleon III. Prussian king William I was made emperor of unified Germany, Jan 18, 1871. France surrendered Jan. 28. Final treaty signed May 10; set the stage for later German imperialistic expansion.
Spanish-American War 1898	War waged by the U.S. to liberate Cuba from Spanish rule. A mysterious explosion, blamed on Spain by American newspapers, sank the U.S. battleship <i>Maine</i> in Havana's harbor (Feb. 15, 1898), killing 260. The U.S. called for Spain's withdrawal from Cuba, and Spain declared war (Apr. 24). William Rufus Shafter led 17,000 U.S. troops from Daiquirí to Santiago de Cuba, taking San Juan Hill with help of the Rough Riders under Teddy Roosevelt. Santiago de Cuba surrendered July 17. The Treaty of Paris (Dec. 10, 1898) provided for the independence of Cuba and the cession by Spain to the U.S. of Puerto Rico, Guam, and for a \$20 mil payment, the Philippine Islands.
World War I 1914-18	Local European war that grew into a global war involving 32 nations: the Allies and the Associated Powers—28 nations including Great Britain, France, Russia, Italy, and the U.S.—versus the Central Powers of Germany, Austria-Hungary, Turkey, and Bulgaria. Archduke Francis Ferdinand of Austria assassinated in Sarajevo, Bosnia (June 28, 1914). Germany invaded France through Belgium; advance on Paris halted by the French under Gen. Joseph Jacques Césaire Joffre at the First Battle of the Marne , Sept. 5-12. Germany checked the Russian army at the Battle of Tannenberg, Aug. 26-30. The British suffered 57,470 casualties (19,240 dead) in the opening day of the

First Battle of the Somme (July 1-Nov. 18, 1916), first of 12 battles that forced Germany back to Hindenburg Line. **U.S. declared war on Germany Apr. 6, 1917.** Russian involvement ended when Bolshevik party seized power on Nov. 7; signed armistice Dec. 15. German offensive halted by U.S. and French troops at **Second Battle of the Marne** (July 15-Aug. 5, 1918), turning point of the war. Allied counteroffensive broke the fortified defensive Hindenburg Line, and an armistice was signed Nov. 11.

World War II
1939-45

Global military conflict stemming from European unrest after World War I and Japan's aggressive expansion into Asia and the Pacific. **War in Europe:** Nazi-Soviet nonaggression pact (Aug. 23, 1939) freed Germany and the Soviet Union to attack Poland in Sept. **Britain and France declared war on Germany** Sept. 3. German forces raced through Europe (Apr.-June 1940), captured Paris June 14. **Italy declared war on France and Britain** June 10. German-Italian campaigns won the Balkans and N Africa by June 1941. U.S. entered war Dec. 1941. Three million Axis troops invaded Russia June 22, 1941, but Russian counterthrusts stopped the German advance (**Stalingrad**, Aug. 20, 1942-Feb. 2, 1943), and Allies took N Africa (Nov. 8, 1942-May 13, 1943), Italy (July 10, 1943-May 2, 1945). Normandy invaded on **D-Day**, June 6, 1944; Paris liberated Aug. 25. Leaders at Yalta Conference (Feb. 4-11, 1945) discussed defeat and division of Germany into four. Adolf Hitler committed suicide Apr. 30. **Germany surrendered unconditionally** May 7. **War in the Pacific:** Japan invaded China (July 7, 1937), joined alliance with Germany and Italy (Sept. 27, 1940), and signed nonaggression pact with Russia (Apr. 13, 1941); attacked Hawaii's Pearl Harbor, Dec. 7, 1941; U.S. declared war on Japan Dec. 8. **Battle of Midway** (June 4-7, 1942) repulsed Japanese advance. Marines landed on Guadalcanal Aug. 7. Navy defeated Japanese fleet at **Leyte Gulf**, Oct. 23-26, 1944. B-29 bombing raids on Japan began in Nov. Marines invaded Iwo Jima (Feb. 19-Mar. 16, 1945) with heavy casualties, then Okinawa (Apr. 1-June 21). **U.S. atom bombs dropped** on Hiroshima (Aug. 6) and Nagasaki (Aug. 9) and Soviet invasion of Manchuria (Aug. 8) **forced Japan to agree, on Aug. 14, to surrender**; formal surrender on Sept. 2.

Korean War
1950-53

Military struggle fought on the Korean Peninsula between the Democratic Peoples' Republic of Korea (N Korea) and the Republic of Korea (S Korea) that developed into an international war involving China allied with N Korea against the U.S. and other nations under the UN flag. DPRK army crossed the 38th parallel and invaded S Korea (June 25, 1950), entering Seoul (June 26). Amphibious assault launched at **Inchon** by Gen. Douglas MacArthur (Sept. 15) helped U.S. forces rout DPRK close to Yalu River by Nov. 24. The Chinese, in counterattack, retook Seoul (Jan. 4, 1951) but were forced back to the 38th parallel by Apr. 22. Armistice was signed (July 27, 1953) by

the UN, DPRK, and China, but not ROK, **leaving the peninsula partitioned at about the 38th parallel.**

Vietnam War 1959-75	Struggle primarily in S Vietnam that widened into a war between S Vietnam supported mainly by the U.S. and N Vietnam supported by the USSR and China. Viet Minh, led by Communist leader Ho Chi Minh, formed the Democratic Republic of Vietnam (Sept. 2, 1945). Colonial power France withdrew after fortress at Dien Bien Phu fell (May 8, 1954). Pres. John F. Kennedy pledged U.S. commitment to S Vietnamese independence Dec. 14, 1961. USS <i>Maddox</i> destroyer damaged in Gulf of Tonkin (Aug. 2, 1964), prompting Congress to increase involvement. Regular bombing of N Vietnam began (Feb. 24, 1965), and the first U.S. combat ground forces arrived (Mar. 6). N Vietnamese Army siege of Khe Sanh (Jan. 21-Apr. 7, 1968) and the "Tet" offensive (Jan. 30) aimed to cause insurrection in the S. My Lai Massacre by U.S. soldiers of civilians (Mar. 16, 1968) created scandal, fueled U.S. disaffection with war. U.S. forces peaked at 543,400 in Apr. 1969. NVA "Easter Offensive" (Mar. 30, 1972) rebuffed, and U.S. responded with aerial bombings in May and Dec. U.S. withdrew after cease-fire, Jan. 1973. NVA offensive captured Saigon, Apr. 30, 1975, and unified Vietnam under Communist rule.
Persian Gulf Wars 1991, 2003-10	Conflicts fought principally between Iraq and the U.S. concerning Iraq's influence in the Middle East and its development of weapons of mass destruction. First Gulf War: Iraq under dictator Saddam Hussein invaded Kuwait Aug. 2, 1990, and annexed it; UN Security Council ordered Iraqi forces to withdraw by Jan. 15, 1991. Beginning Jan. 17, a U.S.-led multinational force (Operation Desert Storm) bombed military targets in Iraq and Kuwait. A coordinated air-land offensive (Operation Desert Sabre , begun Feb. 24) retook Kuwait City Feb. 26, and permanent cease-fire was signed on Apr. 6. Iraq was ordered to pay reparations to Kuwait, reveal locations of biological and chemical weapons, and eliminate weapons of mass destruction. Second Gulf War: The U.S. and UK mistakenly asserted that Iraq was still producing WMDs and posed an imminent threat. The UN passed Resolution 1441, Nov. 8, 2002, warning Iraq of "serious consequences" if it failed to cooperate fully and unconditionally with UN weapons inspectors. Iraq rejected a Mar. 17, 2003, U.S. ultimatum demanding Hussein and his sons leave Iraq. U.S. launched Operation Iraqi Freedom Mar. 19, 2003, with support from UK and other allies, but without full UN Security Council support. Baghdad fell Apr. 9, and major combat operations declared over May 1. Hussein was captured Dec. 13, 2003, but guerrilla opposition to U.S. troops and insurgent violence continued. U.S. combat operations in Iraq formally ended Aug. 31, 2010.

Note: 2021 data are preliminary. All data subject to revision by the FNS. (1) Formerly known as the Food Stamp Program. Includes benefits and admin. expenses. (2) Provides benefits analogous to SNAP. (3) Nine-month averages (summer months excluded). (4) Cash payments based on federal reimbursement rates to states. (5) Includes food benefits, nutrition services and admin. funds, Farmers' Market Nutrition Program, infrastructure, breastfeeding promotion and peer counseling, program evaluation, and technical assistance. (6) Includes cash payments, entitlement and bonus commodities, and the federal share of state and sponsor admin. costs. (7) Includes cash payments, entitlement and bonus commodities, cash-in-lieu of commodities, sponsor admin. costs, start-up costs, and audits. (8) For 2003 and on, Nutrition Services Incentive Program administered by the Agency on Aging, Dept. of Health and Human Services; FNS costs limited to value of commodities distributed. (9) Includes cost of commodity distrib. (entitlement and bonus) and federal share of state admin. expenses. (10) Includes summer camps. (11) Includes cost of commodities to hunger relief orgs. (e.g., food banks, soup kitchens) and federal share of state admin. expenses. (12) Does not include federal share of state admin. costs for some programs not shown.

4-person family⁴

Note: As of June 2022. A basis of all four food plans is that all meals and snacks are prepared at home. All costs are rounded to nearest 10 cents. Monthly costs are calculated by multiplying the weekly costs by 4.333. (1) Represents a nutritious, practical, cost-effective diet. The nutritional bases are the Dietary Reference Intakes and the *Dietary Guidelines for Americans, 2020-2025*. For specific foods and quantities, see *Thrifty Food Plan, 2021*. Plan is based on 2013-16 consumption and 2015-16 price data and updated to current dollars by using the Consumer Price Index for specific food items. (2) Represents a nutritious diet at three different cost levels. The nutritional bases of the food plans are the 1997-2005 Dietary Reference Intakes, 2005 Dietary Guidelines for Americans, and 2005 MyPyramid food intake recommendations. In addition to cost, differences among plans are in specific foods and quantities of foods. For specific foods and quantities of foods in the food plans, see *The Low-Cost, Moderate-Cost, and Liberal Food Plans, 2007*. All three food plans are based on 2001-02 data and updated to current dollars by using the Consumer Price Index for specific food items. (3) Age range varies slightly from standard: 14-19 years and 20-50 years, replacing 14-18 years and 19-50 years, respectively. (4) Defined as a couple (male and female), 20-50 years old, and two children ages 6-8 and 9-11 years.

NA = Not reported. **Note:** Low food security households report food acquisition problems and reduced diet quality but typically few, if any, indications of reduced food intake. The very low food security category identifies households in which the food intake of one or more members was reduced and eating patterns disrupted because of insufficient money and other resources for food. (1) Totals exclude households of unknown food security status. Exclusions represented 0.2% of all households in 2021. (2) Households with children in complex living arrangements, e.g., children of other relatives or unrelated roommate or boarder. (3) Hispanics may be of any race. (4) Based on 2013 Office of Management and Budget delineations of metropolitan areas. (5) Households within incorporated areas of the largest cities in each metropolitan area. Residence inside or outside of principal cities unknown for about 15% of households in metropolitan statistical areas.

Trends in U.S. Food Insecurity in U.S. Households, 1998-2020

Source: Economic Research Service, U.S. Dept. of Agriculture

(1) Those with low or very low food security among adults or children or both. (2) In some food-insecure households with children, only adults were food insecure. Households with food-insecure children are those with low or very low food security among children.

U.S. Annual Per Capita Consumption of Selected Foods, 1970-2019

Estimated Calorie Requirements

Source: *Dietary Guidelines for Americans, 2020-2025*, U.S. Dept. of Agriculture and U.S. Dept. of Health and Human Services

Estimated amount of calories, rounded to the nearest 200, needed to maintain energy balance by sex, for various age groups and levels of physical activity. In adults ages 19 and older, calorie needs generally decrease with age.

	Age (years)	Sedentary ¹	Moderately active ²	Active ³
Female ⁴	2-3	1,000	1,000-1,200	1,000-1,400
	4-8	1,200-1,400	1,400-1,600	1,400-1,800
	9-13	1,400-1,600	1,600-2,000	1,800-2,200
	14-18	1,800	2,000	2,400
	19-30	1,800-2,000	2,000-2,200	2,400
	31-50	1,800	2,000	2,200
	51+	1,600	1,800	2,000-2,200

	Age (years)	Sedentary ¹	Moderately active ²	Active ³
Male	2-3	1,000	1,000-1,400	1,000-1,400
	4-8	1,200-1,400	1,400-1,600	1,600-2,000
	9-13	1,600-2,000	1,800-2,200	2,000-2,600
	14-18	2,000-2,400	2,400-2,800	2,800-3,200
	19-30	2,400-2,600	2,600-2,800	3,000
	31-50	2,200-2,400	2,400-2,600	2,800-3,000
	51+	2,000-2,200	2,200-2,400	2,400-2,800

Note: Based on Estimated Energy Requirements (EER) equations, using reference heights and weights. The reference man is 5 ft 10 in. tall and weighs 154 lbs. The reference woman is 5 ft 4 in. tall and weighs 126 lbs. (1) Includes only the physical activity of independent living. (2) Includes physical activity equivalent to walking 1.5-3 mi per day at 3-4 mph. (3) Includes physical activity equivalent to walking more than 3 mi per day at 3-4 mph. (4) Calorie needs during the first trimester of pregnancy generally do not increase compared to prepregnancy needs. Additional calories needed for the later trimesters and during lactation include approximately 300-400 additional calories.

Understanding Food Components

Water dissolves and transports other nutrients throughout the body, aiding in the processes of digestion, absorption, circulation, and excretion. It helps regulate body temperature.

Macronutrients

Carbohydrates, of which sugars, fibers, and starches are the major types, are the most important source of energy for the body. The digestive system changes carbohydrates into glucose, which the body uses for energy for cells, tissues, and organs. The body stores extra sugar in the liver and muscles. Best sources: grains, beans, vegetables, fruits.

Fats provide energy by furnishing calories to the body. They also help the body absorb vitamins A, D, E, and K. Best sources of polyunsaturated and monounsaturated fats: olive, canola, and peanut oils; nuts and nut butters; fatty fish; olives; avocado. Sources of saturated fats: meats, cheeses, butter, cream, milk, lard.

Fiber is the portion of plant foods that our bodies cannot digest. There are two basic types: insoluble and soluble. Insoluble fibers help move food materials through the digestive tract; soluble fibers tend to slow them down. Both types absorb water, thus preventing constipation. Soluble fibers are also helpful in reducing blood cholesterol levels. Best sources: beans, bran, fruits, whole grains, vegetables.

Proteins, composed of amino acids, are essential to good nutrition. They build, maintain, and repair the body. Proteins from animal sources (eggs, meat, fish, milk) supply adequate amounts of all indispensable amino acids and are thus called complete. Proteins from plants, legumes, nuts, seeds, and vegetables can be combined to complete protein needs.

Vitamins

Vitamin A promotes good eyesight; plays a role in bone growth, reproduction, the immune system. Best sources: liver, sweet potatoes, carrots, kale, cantaloupe, fortified milk.

Vitamin B₁ (thiamin) is essential to energy metabolism and the growth, development, and function of cells. Best sources: whole grains, fortified bread and cereal, pork, fish.

Vitamin B₂ (riboflavin) is essential to growth, red blood cell production, and energy metabolism. Best sources: eggs, dairy

products, organ meats, lean meats, bread products, fortified cereal, spinach.

Vitamin B₆ (pyridoxine and related compounds) is important in making antibodies and hemoglobin, maintaining normal nerve function, and protein metabolism. Best sources: fish, organ meats, dried beans, poultry, noncitrus fruits, chickpeas.

Vitamin B₁₂ (cobalamin) is needed to form red blood cells. Best sources: beef liver, clams, meat, fish, poultry, eggs.

Folate (vitamin B₉; folic acid is a synthetic form used in supplements and fortified foods) is required for making DNA and other genetic material and for cell division. Best sources: liver, dark green leafy vegetables, fruit, fruit juice, peanuts, beans, enriched breads, fortified cereals.

Niacin (vitamin B₃) helps turn food into energy and is important for cell development and function. Best sources: poultry, nuts, fish.

Other B vitamins include pantothenic acid and biotin.

Vitamin C (ascorbic acid) acts as an antioxidant; also needed to make collagen, a protein necessary for wound healing. Best sources: citrus fruits, broccoli, strawberries, cantaloupe, kiwi, Brussels sprouts, potatoes, tomatoes, red and green peppers.

Vitamin D is important for bone development. Best sources: sunlight, fortified dairy products, tuna, salmon.

Vitamin E is an antioxidant and enhances immune function. Best sources: vegetable oils, nuts, seeds, green leafy vegetables.

Vitamin K is necessary for formation of prothrombin, which helps blood to clot. Best dietary sources: green leafy vegetables, plant oils. Also made by intestinal bacteria.

Minerals

Calcium is needed to build and maintain bones and teeth. Best sources: dairy, leafy green vegetables.

Iron is a component of hemoglobin, which transports oxygen within blood, and myoglobin, which supplies oxygen to the muscles. Best sources: lean meats, beans, green leafy vegetables, seafood, whole grains, fortified cereal.

Phosphorus is present in every cell of the body, and the majority of it can be found in bones and teeth. Best sources: cheese, milk, meats, poultry, fish.

Other minerals include chloride, chromium, copper, fluoride, iodine, magnesium, manganese, molybdenum, potassium, selenium, sodium, zinc.

Understanding Food Label Claims

Source: Center for Food Safety and Applied Nutrition, U.S. Food and Drug Admin. (FDA), U.S. Dept. of Health and Human Services; Food Safety and Inspection Service, Agricultural Marketing Service, U.S. Dept. of Agriculture (USDA)

Nutrition Packaging Terms

Manufacturers can make certain claims on processed food labels only if they meet the definitions specified here.

SUGAR. Sugar free: less than 0.5 g per serving; **No added sugars; Without added sugars:** no sugars or sugar-containing ingredients added during processing; must state if food is not “low calorie” or “reduced calorie”; **Unsweetened; No added sweeteners:** factual statements; **Reduced sugar:** at least 25% less sugar per serving than reference food.

FAT. Fat free: less than 0.5 g of total fat per serving; **Saturated fat free:** less than 0.5 g of saturated fat and less than 0.5 g of trans fatty acids per serving; **Low fat:** 3 g or less of total fat per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Low saturated fat:** 1 g or less per serving and not more than 15% of calories from saturated fat; **Reduced fat; Less fat:** at least 25% less total fat per serving than reference food.

FIBER. High fiber: 20% or more of the daily value per serving; **Good source of fiber:** 10%-19% of the daily value per serving; **More fiber; Added fiber:** 10% or more of the daily value per serving than reference food.

SODIUM. Sodium free: less than 5 mg per serving; **Low sodium:** 140 mg or less per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Very low sodium:** 35 mg or less per serving (and per 50 g if the serving size is small); **Reduced**

sodium; Less sodium: at least 25% less per serving than reference food.

CALORIES. Calorie free: less than 5 calories per serving; **Low calorie:** 40 calories or less per serving (and per 50 g if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Reduced calories; Fewer calories:** at least 25% fewer calories per serving than reference food.

CHOLESTEROL. Cholesterol claims are only permitted when food contains 2 g or less saturated fat per serving. **Cholesterol free:** less than 2 mg of cholesterol; **Low cholesterol:** 20 mg or less of cholesterol (and per 50 g of food if the serving size is small, i.e., 30 g or less, 2 tbs or less); **Reduced cholesterol; Less cholesterol:** at least 25% less per serving than reference food.

Other Packaging Terms

The FDA allows food producers and marketers to use language on their packaging that advertises the health benefits and production methods of their products. Products marked “certified” have been formally evaluated by a USDA National Organic Program-authorized certifying agent. Below are some common packaging terms and their meanings.

Organic: Organic operations must demonstrate that their practices foster cycling of resources, promote ecological balance, and conserve biodiversity. Before a product can be labeled organic, a farm or business must pass a site inspection by a USDA-accredited certifying agent. Organic foods must be produced without irradiation, sewage sludge, synthetic fertilizers, and genetic engineering.

Foods that contain all organic ingredients may advertise “100 percent organic” on the “principal display panel” (generally the front of the packaging) along with the USDA organic seal. Foods with at least 95% organic ingredients may be called “organic” and may place the official seal on their packaging. Products with at least 70% organic ingredients may display “made with organic ____” but may not use the organic seal. Products with less than 70% organic

ingredients may not make any organic claims on the principal display panel but may list organic ingredients on the information panel.

Natural: Product contains no artificial ingredient or added color and is only minimally processed (i.e., does not fundamentally alter the product).

Free range or free roaming: Producers must demonstrate that poultry has been allowed access to the outside.

Fresh poultry: Whole poultry and cuts that have never been below 26°F.

Frozen poultry: Temperature of raw, frozen poultry is 0°F or below.

Gluten free: Products with a gluten limit of 20 parts per million.

Halal and Zabiah Halal: Produced in federally inspected meat packing plants and handled in accordance with Islamic law and under Islamic authority.

Kosher: Meat and poultry products prepared under rabbinical supervision.

No hormones: Hormones are not allowed in the raising of hogs or poultry, so those products may not make this claim. If sufficient documentation is provided to the USDA, this term may appear on packages of beef.

No antibiotics: Claim may be made on a package (red meat and poultry) if sufficient documentation is provided to the USDA showing that the animals were raised without antibiotics.

Dietary Guidelines for Americans, 2020-25: Key Recommendations

Source: *Dietary Guidelines for Americans, 2020-2025*, U.S. Dept. of Agriculture and U.S. Dept. of Health and Human Services

The government revises its dietary guidelines every five years. The most recent edition marks the first time the guidelines provide recommendations by life stage, from birth through older adulthood. Each stage of life is distinct and has unique needs that affect health and disease risk. Early food preferences influence food and beverage choices later. And the science has evolved to focus on the

importance of a healthy dietary pattern over time. The science also shows it is never too late to start and maintain a healthy dietary pattern, which can yield health benefits in the short term and cumulatively over years.

Core elements of a healthy dietary pattern:

- **Vegetables** of all types—dark green; red and orange; beans, peas, and lentils; starchy; and other vegetables.
- **Fruits**, especially whole fruit.
- **Grains**, at least half of which are whole grain.
- **Dairy**, including fat-free or low-fat milk, yogurt, and cheese, and/or lactose-free versions and fortified soy beverages and yogurt as alternatives.
- **Protein foods**, including lean meats, poultry, and eggs; seafood; beans, peas, and lentils; and nuts, seeds, and soy products.
- **Oils**, including vegetable oils and oils in food, such as seafood and nuts.

Dietary components to limit:

- **Added sugars**—Less than 10% of calories per day starting at age 2. Avoid foods and beverages with added sugars for those younger than age 2.
- **Saturated fat**—Less than 10% of calories per day starting at age 2.
- **Sodium**—Less than 2,300 milligrams per day, and even less for children younger than age 14.
- **Alcoholic beverages**—Adults of legal drinking age can choose not to drink, or to drink in moderation by limiting intake to 2 drinks or less in a day for men and 1 drink or less in a day for women, when alcohol is consumed. Drinking less is better for health than drinking more. There are some adults who should not drink alcohol, such as people who are pregnant.

U.S. Annual Per Capita Consumption of Meat and Dairy, 1910-2019

Source: Economic Research Service, U.S. Dept. of Agriculture (in pounds per capita per year, unless otherwise noted)

b = bale; bu = bushel; bx = box; cwt = hundred weight; lb = pound; t = ton. **Note:** Some 2021 figures are preliminary estimates. (1) Harvested for nuts. (2) Harvested for beans. (3) Utilized production only. (4) Crop year ending in year cited.

Animal Products: Average Prices Received by U.S. Farmers, 1940-2021

Source: National Agricultural Statistics Service, U.S. Dept. of Agriculture

Figures represent dollars per 100 lb for veal calves, beef cattle, hogs, lambs, milk (wholesale), and sheep; dollars per head for milk cows; cents per lb for broilers, chickens, turkeys, and wool; and cents per dozen for eggs. Weighted calendar year prices for livestock and livestock products other than wool. For 1943-63, wool prices were weighted on marketing year basis. The marketing year was changed in 1964 from a calendar year to a Dec.-Nov. basis for broilers, chickens, eggs, and hogs.

(1) Incl. visits to physician offices and hospital outpatient and emergency departments.
Prior to 2006, visits to community health centers were not included in survey.

Most Frequently Mentioned Drugs at Office Visits, 2018

Source: National Ambulatory Medical Care Survey, National Center for Health Statistics, Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services

Rank	Therapeutic drug category ¹	No. of mentions (thous.)	% of total ²
1.	Analgesics ³	285,097	10.7%
2.	Antihyperlipidemic agents	137,462	5.1
3.	Antidepressants	126,167	4.7
4.	Antidiabetic agents	113,738	4.2
5.	Vitamins	113,157	4.2
6.	Antiplatelet agents	99,057	3.7
7.	Anxiolytics, sedatives, and hypnotics	96,965	3.6
8.	Dermatological agents	93,742	3.5
9.	Bronchodilators	89,713	3.4
10.	Beta-adrenergic blocking agents	87,771	3.3
11.	Anticonvulsants	84,174	3.1%
12.	Proton pump inhibitors	71,833	2.7
13.	Immunostimulants	67,608	2.5
14.	Ophthalmic preparations	65,862	2.5
15.	Vitamin and mineral combinations	63,534	2.4
16.	Calcium channel blocking agents	63,315	2.4
17.	Diuretics	61,681	2.3
18.	Minerals and electrolytes	53,880	2.0
19.	ACE ⁴ inhibitors	52,959	2.0
20.	Antihistamines	50,777	1.9

Note: A mention is documentation in a patient's record of a drug provided, prescribed, or continued at a visit to a nonfederal office-based patient care physician. (1) Based on the Multum Lexicon second-level therapeutic drug category. (2) Based on an estimated 2,676,847,000 drug mentions. (3) Incl. narcotic and nonnarcotic analgesics and nonsteroidal anti-inflammatory drugs. (4) Angiotensin-converting enzyme.

U.S. Organ Transplants

Source: Organ Procurement and Transplantation Network (OPTN), United Network for Organ Sharing (UNOS)

Waiting List, Sept. 2022		
Type of transplant	Candidates	% of total
All organs	105,908	100.0%
Kidney	90,002	85.0
Liver	11,102	10.5
Heart	3,373	3.2
Kidney-pancreas	1,906	1.8
Lung	1,040	1.0
Pancreas	872	0.8
Intestine	206	0.2
Heart-lung	31	0.03

Transplants Performed, 2021		
Type of transplant	Number	% of total
All organs	41,356	100.0%
Kidney	24,670	59.7
Liver	9,236	22.3
Heart	3,818	9.2
Lung	2,524	6.1
Kidney-pancreas	820	2.0
Pancreas	143	0.3
Intestine	96	0.2
Heart-lung	45	0.1

Note: Waiting list as of Sept. 14; numbers may not add up to total because of patients waiting for multiple organs. Total transplants performed include organs not shown separately.

Illicit Drug Use Among Persons Age 12 or Older, 2002-20

Source: National Survey on Drug Use and Health, SAMHSA, U.S.
Dept. of Health and Human Services

Of all those age 12 or older who used an illicit drug in the past month in 2020, approximately 1.7 mil were adolescents aged 12-17 (making 6.7% of that age group current drug users). About 8.0 mil current users were young adults aged 18-25 (or 23.9% of that age group).

— = Not comparable due to methodological changes or not reported due to measurement issues. **Note:** Misuse is defined as use in any way not directed by a doctor, including use without a prescription or use in greater amounts, more often, or for a longer period of time. Caution should be used when comparing estimates for 2020 and prior years because of methodological changes for 2020. (1) Includes marijuana, cocaine (including crack), heroin, hallucinogens, inhalants, methamphetamine, the misuse of psychotherapeutics, and opioids. (2) Includes four categories of prescription drugs (pain relievers, stimulants, tranquilizers, sedatives) but not over-the-counter drugs. (3) Includes the misuse of prescription opioid pain relievers and the use of heroin.

Lifetime Prevalence of Drug Use in 12th Graders, 1975-2021

HS = high school. **Note:** Figures may not add up to totals because of rounding. (1) Avg. highest level of education attained by respondent's mother and father. (2) For each of these groups, data for the specified year and previous year have been combined to increase sample size and thus provide more stable estimates.

Tobacco Use by High School and Middle School Students, 2021

Source: National Youth Tobacco Survey, Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

In 2021, about one in 10 high school and middle school students (9.3%) in the U.S. reported current use—defined as use on one or more days in the past 30 days—of a tobacco product. While the use of cigarettes, cigars, and smokeless tobacco has declined significantly among students since 2011, electronic cigarette (e-cigarette) use has increased over the same time period. Since 2014, e-cigarettes have been the most commonly used tobacco product among students in grades 6 through 12.

Tobacco product	High school students using tobacco			
	Female	Male	All students	Estimated no. of users ¹
E-cigarettes	11.9%	10.7%	11.3%	1,720,000

— = Not available. **Note:** To derive percentages for each race/ethnicity subgroup, data for the specified year and previous year have been combined to increase sample size and thus provide more stable estimates. Because of insufficient data for 2020 estimates, changes across 2019-21 total samples are provided for comparison. (1) In 1993, the alcohol question was changed slightly to indicate that a “drink” is defined as “more than a few sips.” (2) Five or more drinks in a row (binge drinking) on one or more occasions.

Acquired Immune Deficiency Syndrome (AIDS)

Source: Centers for Disease Control and Prevention (CDC), U.S.
Dept. of Health and Human Services

AIDS (Acquired Immune Deficiency Syndrome) is caused by the human immunodeficiency virus (HIV). HIV disables or kills crucial immune cells known as CD4 cells (also called T cells, or T-lymphocyte or T-helper cells), progressively destroying the body’s ability to fight disease.

HIV is commonly spread through unprotected sexual contact with an infected partner’s semen or vaginal fluids. It is also spread through contact with infected blood. Modern screening techniques make HIV transmission through transfusions or organ/tissue transplants, rare, but HIV can spread among intravenous drug users who share syringes and similar equipment. A woman can also transmit HIV to her child during pregnancy or delivery or through breastfeeding. With treatment, a woman can reduce her

transmission rate from about 25% to 1% or less. There is no evidence HIV can spread through saliva or casual contact such as shaking hands or the sharing of food utensils, towels and bedding, or toilet seats.

About two-thirds of people experience flu-like symptoms within 2-4 weeks of being infected with HIV in what is called the acute HIV infection stage. The second stage is chronic infection, also referred to as asymptomatic HIV infection or clinical latency. Even though a person may not have any symptoms, the HIV continues to multiply, infect, and kill CD4 cells.

The term AIDS applies to the final (third) stage of HIV infection. According to the CDC's official case definition, an HIV-infected person 6 years of age or older with fewer than 200 CD4 cells per cubic millimeter of blood can be said to have AIDS. (Healthy adults usually have 500-1,600 CD4 cells per cu mm.) An HIV-infected person who develops an AIDS-defining opportunistic infection (OI) can also be diagnosed with AIDS. In the U.S., the most common OIs include the herpes simplex virus 1, salmonella, candidiasis, and toxoplasmosis.

Months or years prior to the onset of AIDS, people may experience such symptoms as swollen glands, lack of energy, fevers and sweats, and memory loss or other neurologic disorders. Children with AIDS may have delayed development or fail to thrive.

HIV is primarily detected by testing blood for the presence of antibodies (disease-fighting proteins of the immune system) to HIV. HIV antibodies can be detected within 3-12 weeks of exposure. Combination HIV tests that look for both HIV antibodies and parts of the virus called antigens can detect an infection in 18-90 days. A nucleic acid test can detect the presence of HIV in blood 10-33 days after exposure, but the test is expensive and not used in routine screening.

Since 1987, when the U.S. Food and Drug Administration (FDA) approved a drug called zidovudine (or AZT) for the treatment of HIV, around 46 drugs and drug combinations (fixed doses of two or more medications in a single pill) have received approval. These drugs are grouped into classes: nucleoside reverse transcriptase inhibitors

(NRTIs), non-nucleoside reverse transcriptase inhibitors (NNRTIs), protease inhibitors (PIs), fusion inhibitors, CCR5 antagonists, integrase strand transfer inhibitors (INSTIs), attachment inhibitors, and post-attachment inhibitors. Each class of drug attacks the virus at a different point in its life cycle. Patients generally take three different HIV medicines from at least two different classes as part of antiretroviral therapy (ART), which extends the period between HIV infection and the development of serious illness.

Without a vaccine or cure for AIDS, the best way to prevent HIV infection is to avoid activities that carry a risk. The CDC recommends abstinence, mutual monogamy with an uninfected partner, limiting the number of sexual partners, never sharing needles, and using condoms correctly and consistently. People who do not have HIV but are at high risk of exposure can take medication daily to prevent HIV infection, called pre-exposure prophylaxis (PrEP). Daily PrEP reduces the risk of getting HIV from sex by about 99% and from injection drug use by at least 74%. Post-exposure prophylaxis (PEP) is the emergency use of HIV medicines after a single high-risk event. PEP must be started within 72 hours of exposure to HIV, and it is not always effective.

Note: Deaths of persons with HIV infection, stage 3 (AIDS) may be due to any cause. Numbers are cumulative from the beginning of the epidemic, in 1981, through 2020 in the 50 states, DC, and 6 dependent areas. Numbers may not add up to totals as they are calculated independently. (1) Based on sex assigned at birth. Classified based on risk factor most likely responsible for HIV transmission. (2) Sexual contact with a person known to have or to be at high risk for HIV infection. (3) Individual 13 years of age or older at time of death. (4) Incl. hemophilia, blood transfusion, and risk factor not reported or not identified. (5) Incl. persons of unknown race/ethnicity.

Allergies and Asthma

Source: Asthma and Allergy Foundation of America (AAFA),
Centers for Disease Control and Prevention (CDC)

An estimated one in six Americans suffers from allergies each year. People with allergies have immune systems that overreact to a normally harmless substance, called an allergen. Common allergens include plant pollens, dust mites, or animal dander; plants such as poison ivy; and certain drugs, such as penicillin. The major food allergens are milk, eggs, fish, shellfish, tree nuts, peanuts, wheat, soybeans, and sesame.

The tendency to develop allergies is usually inherited. Though allergies typically manifest in childhood, they can show up at any age. Food allergies and eczema (inflamed or irritated skin) are common allergies among infants. Older children and adults may develop allergic rhinitis, or hay fever, in reaction to an inhaled allergen. Allergic rhinitis symptoms include nasal congestion, runny nose, and sneezing.

People with allergies should avoid contact with an allergen, if feasible. Medications, such as antihistamines and nasal corticosteroids, may be used to decrease an allergic reaction. Other effective allergy treatments include decongestants, eye drops, and ointments. Allergy shots, a form of immunotherapy, aim to desensitize a patient to an allergen through gradual exposure to increasingly higher doses of it. People at risk of anaphylaxis—a severe, whole-body allergic reaction that occurs rapidly—should have access to injectable epinephrine, an emergency medication.

Some allergy sufferers also have asthma. About 25.3 mil Americans in 2020 had a current diagnosis of asthma. Asthma is a chronic inflammation disease that can develop at any age. It affects the passageways that carry air into and out of the lungs. During an asthma attack, these airways become inflamed and fill with mucus. A person may experience wheezing, tightening of the chest, and coughing. Asthma can become life-threatening if not controlled in its early stages. The following symptoms may be indicative of an emergency: the patient shows no improvement minutes after initial treatment; struggles to breathe while hunched with chest and neck pulled in; has trouble walking or talking; and develops gray or blue lips or fingernails.

Exposure to an allergen can set off an asthma attack. Tobacco smoke, cold air, and expressing strong emotion can also trigger an attack, as can respiratory infections and physical exercise. An accurate diagnosis by a physician is important. Although there is no cure for asthma or allergies, they can be controlled through lifestyle changes and quick-relief and long-term medications.

Race/ethnicity¹		
White non-Hispanic	15,286	7.6
Black non-Hispanic	4,025	10.8
Asian non-Hispanic	633	3.5
Amer. Ind./Alaska Native non-Hispanic	417	10.8
Hispanic (any race)	3,770	6.7
Mexican	1,829	5.5
Other Hispanic	1,916	8.7

Note: Includes only those with a current asthma diagnosis. Numbers may not add up to totals due to rounding. (1) Data are for 2018-20.

Alzheimer's Disease

Source: Alzheimer's Association

Alzheimer's disease is a degenerative disease in which nerve cells in the brain deteriorate and die. It is the most common cause of dementia. Early symptoms include forgetting newly learned information and apathy or depression. As the disease advances, a person may exhibit disorientation and behavior changes; confusion

about events, time, and place; and suspicion towards family, friends, and caregivers.

The rate of the disease's progression varies. Changes to the brain might begin 20 or more years before they are measurable in a stage researchers call preclinical Alzheimer's disease. For example, decreased glucose metabolism, a known biological marker for Alzheimer's disease, can be picked up by a brain scan. In the next stage—mild cognitive impairment (MCI) due to Alzheimer's disease—a person can still perform everyday activities without significant trouble. The disease's third stage, dementia due to Alzheimer's disease, can range from mild to moderate to severe. While a person could remain independent with assistance early on, they ultimately lose the ability to perform basic bodily functions, such as walking or swallowing, making them susceptible to infections of the lungs, urinary tract, and other organs. The average length of time from diagnosis of Alzheimer's dementia until death is 4-8 years for those age 65 and older.

Within the U.S. population, an estimated 10.7% of persons age 65 and older and 33.2% of those age 85 and older have Alzheimer's dementia. Almost two-thirds of Americans with Alzheimer's are women. Alzheimer's dementia is also more prevalent in the older Black and Hispanic populations than in other racial or ethnic groups.

Diagnosis involves a comprehensive evaluation that may include a complete health history, physical examination, neurological and mental status assessments, and other tests. Depression, drug interactions, nutritional imbalances, and excessive alcohol consumption can cause symptoms that look similar to dementia. Parkinson's disease, frontotemporal lobar degeneration, and cerebrovascular disease can also cause dementia.

Treatments for cognitive and behavioral symptoms are available, and clinical trials are ongoing for ways to prevent Alzheimer's or to slow its course. The U.S. Food and Drug Administration (FDA) has approved six drugs, five of which temporarily treat symptoms. The sixth drug, which received accelerated FDA approval in 2021, targets the underlying disease process.

Age is the greatest risk factor for Alzheimer's disease. Having the e4 form of the APOE (apolipoprotein E) gene and a family history of the disease are also risk factors. Staying physically and mentally active and socially connected may be associated with a lower risk for the disease.

An estimated 6.5 mil Americans age 65 and older were living with Alzheimer's dementia in 2022. The U.S. cost in 2022 of diagnosing, treating, and providing long-term care for persons age 65 and older with Alzheimer's or other dementias was an estimated \$321 bil. That estimate does not include the hours of unpaid care that family members, friends, and others provide, valued at around \$271.6 bil in 2021.

Website: www.alz.org

Warning Signs of Alzheimer's Disease

- Memory loss that disrupts daily life
- Challenges in planning or solving problems
- Difficulty completing familiar tasks at home, at work, or at leisure
- Confusion with time or place
- Trouble understanding visual images and spatial relationships
- New problems with words in speaking or writing
- Misplacing things and losing the ability to retrace steps
- Decreased or poor judgment
- Withdrawal from work or social activities
- Changes in mood and personality

Arthritis

Source: Arthritis Foundation; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

The term arthritis refers to more than 100 different diseases that cause pain, aching, stiffness, and swelling in or around the joints. An estimated 20.9% of the adult population aged 18 and over reported having doctor-diagnosed arthritis in 2020. The cause of most types of arthritis is unknown; scientists are studying the role of genetics, lifestyle, and environment.

Of the three most prevalent forms of arthritis, **osteoarthritis** (OA), also called degenerative arthritis, is the most common, affecting over 32.5 mil Americans. With OA, protective cartilage at a joint breaks down. When the bones of the joint thus rub together, pain and stiffness may result. The most commonly affected joints are in the lower back, hips, knees, hands, and feet.

Fibromyalgia, another common arthritis condition, affects about 2% of American adults, with women twice as likely as men to have it. People suffering from fibromyalgia experience widespread pain, abnormal pain processing, sleep disturbance, and psychological distress. Other symptoms include tingling or numbness in hands and feet and problems with thinking and memory.

Rheumatoid arthritis (RA) is an autoimmune disease that affects an estimated 1.3 mil U.S. adults (or 0.6%–1% of the adult population). It is one of the most serious and disabling forms of arthritis, which women experience at 2-3 times the rate of men. With RA, the body's immune system attacks healthy cells in the joints, causing inflammation that can lead to cartilage and bone damage.

Other forms of arthritis and related conditions include lupus, gout, scleroderma, and Sjögren's syndrome. To diagnose arthritis, a doctor will record a patient's symptoms and look for any swelling or limited movement during a physical. Other signs of arthritis include rashes, mouth sores, and dry eyes. A doctor may test a patient's blood, urine, or joint fluid or take joint X-rays.

Medications that relieve pain and swelling, such as analgesics and anti-inflammatory drugs, can be used to treat arthritis. Regular physical activity, in particular low-impact sports like walking or swimming, can improve mood and ease pain. Maintaining a healthy weight puts less stress on joints. Surgery to replace a joint is an option if OA gets to be too severe.

Website: www.arthritis.org

Attention-Deficit/Hyperactivity Disorder (ADHD)

Source: Centers for Disease Control and Prevention; Natl. Institute of Mental Health; Children and Adults with Attention-Deficit/Hyperactivity Disorder (CHADD)

Attention-deficit/hyperactivity disorder, or ADHD, is one of the most common neurodevelopmental disorders of childhood, when it is usually first diagnosed. Individuals with ADHD may have trouble paying attention and controlling impulsive behaviors.

Signs and Symptoms of ADHD

- Daydreaming a lot
- Forgetting or losing things frequently
- Squirming or fidgeting
- Talking too much
- Making careless mistakes or taking unnecessary risks
- Having a hard time resisting temptation
- Having trouble taking turns
- Having difficulty getting along with others

ADHD may manifest in one of three ways. A person who is **predominantly inattentive** is easily distracted or forgets details of daily routines. Someone who is **predominantly hyperactive-impulsive** may feel restless and impulsive. In the third type, **combined presentation**, an individual displays symptoms of both inattentiveness and hyperactivity-impulsivity. The cause of ADHD is unknown, but current research shows that genetics plays a significant role. Alcohol, tobacco, or drug use during pregnancy; low birth weight; and brain injury are being studied as other possible risk factors.

According to the 2019-20 National Survey of Children's Health, 8.9% of children age 3-17 years in the U.S. have a current diagnosis of ADHD. Boys are more likely to be diagnosed because girls with ADHD tend to present more inattentive symptoms. At least one-third of children with ADHD will continue to have it as adults. Studies have found that young adults with ADHD are more likely than those who have never been diagnosed with it to drop out of high school, to be unemployed, or to work an unskilled job.

In most cases, ADHD is treated with a combination of medication (stimulants and nonstimulants) and behavior therapy.

Breast Cancer

Source: American Cancer Society, Inc.; National Cancer Institute, National Institutes of Health

In 2022, an estimated 287,850 women and 2,710 men in the U.S. will be newly diagnosed with breast cancer, and about 43,250 women and 530 men will die from it. More than 3.8 mil women live with a history of breast cancer, but mortality rates have been declining, especially among older women, probably because of earlier detection and improved treatment.

The risk for breast cancer is higher for women and increases with age. It is higher for women with a personal or family history of cancer (particularly breast cancer), a longer menstrual history (menstrual periods that started early and ended later in life), recent use of hormonal birth control, use of menopausal hormone therapy, and in those who have no children or had no live birth until after age 30. Other risk factors include alcohol consumption, physical inactivity, and being overweight or obese. About 5%-10% of breast cancers are probably due to inherited mutations, the most common being those in the BRCA1 and BRCA2. Most women who develop breast cancer have no family history of it.

Breast cancer often manifests first as a new lump or mass. Other symptoms include swelling, distortion, tenderness, skin irritation, redness, scaliness, or nipple abnormalities, such as ulceration, retraction, or spontaneous discharge.

Studies show that early detection increases survival and treatment options. Although most detected breast lumps are noncancerous, any suspicious lump should be biopsied.

Treatment for breast cancer may involve breast-conserving surgery (removal of the tumor and surrounding tissue), mastectomy (surgical removal of the breast), radiation, chemotherapy, hormone therapy, and/or targeted therapy. The five-year relative survival rate for female breast cancer patients has improved from 74.8% in 1975-77 to 90.6% in 2012-18; for women diagnosed with localized breast cancer (cancer that has not spread to lymph nodes or other locations outside the breast), survival is 99.1%.

Website: www.cancer.org

Prostate Cancer

Source: Prostate Cancer Foundation; American Cancer Society, Inc.; National Cancer Institute, National Institutes of Health

The prostate is a male gland located between the bladder and scrotum that secretes seminal fluid. Among men in the U.S., prostate cancer is the most commonly diagnosed non-skin cancer and the second-most common cause, after lung and bronchus cancer, of cancer deaths. In 2022, an estimated 268,490 men will be newly diagnosed with prostate cancer, and about 34,500 will die from the disease. More than 3.1 mil men in the U.S. are living with a history of prostate cancer today.

The most identifiable risk factors for prostate cancer are age, family history, and African ancestry. The median age at diagnosis is 66, and the chances of developing the disease rise dramatically with age. Black men in the U.S. and Caribbean have the world's highest documented incidence rate of prostate cancer. The cause for this disparity remains unclear.

Usually, the disease has no symptoms in its early stages. As the disease advances, a man may experience weak or interrupted urine flow; inability to urinate or difficulty starting or stopping the urine flow; the need to urinate frequently, especially at night; blood in the urine; or pain or burning with urination. Advanced prostate cancer commonly spreads to the bones, causing pain in areas such as the hips, spine, or ribs.

The American Cancer Society recommends that at age 50, men at average risk of prostate cancer should speak with their health care provider about the benefits and limitations of prostate-specific antigen (PSA) testing. An increased PSA level may indicate a higher chance of having prostate cancer, but older age and the use of certain medications, among other factors, can raise or lower PSA levels. Black men or those with a family history of the disease (a close relative who was diagnosed before age 65) should be aware of their screening options beginning at age 45. Men with more than one close relative with prostate cancer should discuss screening at 40. The U.S. Preventive Services Task Force recommends that men

ages 55-69 screen for prostate cancer based on individual risk. It advises against routine screening in men age 70 and older. Because prostate cancer is slow-growing, testing is not likely to help men with a life expectancy of less than 10 years. Men under 40 seldom get prostate cancer.

Prostate cancer treatment may include surgery, radiation, hormonal therapy, chemotherapy, or some combination. If caught early on, while tumor cells are localized within the prostate, the five-year relative survival rate approaches 100.0%.

Skin Cancer

Source: American Cancer Society, Inc; National Cancer Institute, National Institutes of Health.

Skin cancer—the most common cancer diagnosed in the U.S.—is generally divided into the following types: **basal and squamous cell skin cancers** (or nonmelanomas) and **melanomas**. Invasive melanoma accounts for only about 1% of all skin cancers but the majority of skin cancer deaths. Risk factors include heavy exposure to UV light, multiple moles (more than 50), fair skin, family or personal history of skin cancers, a history of sunburns, and occupational exposure to certain compounds.

Melanomas generally look like abnormal moles on the surface of the skin. Abnormal moles differ from regular skin cells and may be a sign of skin cancer. An irregular mole should be examined by a doctor as soon as possible.

If caught early, melanoma is highly curable. In 2012-18, the five-year relative survival rate for melanoma at the localized stage was 99.5%; at the regional stage, 70.6%; and 31.9% at the distant stage.

Treatment may include simple removal of the melanoma; amputation if the cancer is found on a finger or toe; or chemotherapy, immunotherapy, and/or radiation if the melanoma has spread to other parts of the body.

Warning Signs of Abnormal Moles

- **Asymmetry:** one half does not match the other half

- **Border:** edges are irregular, ragged, notched, or blurred
- **Color:** not uniform; may be shades of brown or black, and patches of pink, red, blue, or white
- **Diameter:** moles wider than ¼ inch are abnormal (however, melanomas can be smaller)
- **Evolving:** mole changes size, shape, or color over time

Website: www.cancer.org

Cancer Risk Factors

Source: American Cancer Society, Inc., www.cancer.org; National Cancer Institute, National Institutes of Health

Alcohol: Alcohol consumption increases the risk of cancers of the mouth, pharynx, larynx, esophagus, liver, colorectum, breast, and possibly pancreas. Alcohol consumption combined with tobacco use increases the risk of cancers of the mouth, pharynx, larynx, and esophagus far more than either drinking or smoking alone.

Diet and physical activity: Overweight and obesity are associated with increased risk for developing many cancers, including cancers of the breast in postmenopausal women, colorectum, kidney, pancreas, and esophagus. Overweight and obesity may also be associated with increased risk of fatal prostate cancer, non-Hodgkin lymphoma, and male breast cancer. It's not yet known for certain how diet, nutrition intake, and the amount and distribution of body fat factor into the development of certain cancers.

Environmental hazards: Exposure to certain substances, called carcinogens, can increase the risk of various cancers. Carcinogens like arsenic or radon may occur naturally, or they may be manufactured, like vinyl chloride. The risk of lung cancer from asbestos exposure is greatly increased among smokers.

Estrogen: Menopausal hormone therapy (MHT, formerly called hormone replacement therapy) without the use of progestin can increase the risk of endometrial and ovarian cancer. Combining progestin with estrogen MHT may help minimize that risk. Studies, however, suggest that use of MHT increases the risk of breast

cancer. The benefits and risks of the use of estrogen should be discussed carefully with one's doctor.

HPV infection: Although most HPV infections do not cause cancer, almost all cervical cancers are caused by a persistent HPV infection. Persistent HPV infections also cause over 90% of anal cancers, and 70% of oropharyngeal, vaginal, vulvar, and penile cancers. The Centers for Disease Control and Prevention (CDC) estimates that most people in the U.S. will acquire HPV at some point in their lives. It recommends routine vaccination at age 11-12, although the current vaccine only protects against certain types of HPV.

Radiation: Excessive exposure to ionizing radiation can increase cancer risk. Medical and dental X-rays are adjusted to deliver the lowest dose possible without sacrificing image quality. Excessive radon exposure in the home may increase lung cancer risk, especially in cigarette smokers. Radon is estimated to be the second-leading cause of U.S. lung cancer deaths.

Smokeless tobacco: Use of chewing tobacco, snuff, snus, and other tobacco products that are not smoked increase the risk of oral, esophageal, and pancreatic cancers.

Smoking: Smoking is responsible for about 30% of cancer deaths and about 80% of lung cancer deaths in the U.S. Exposure to secondhand smoke is also responsible for lung cancer cases in adults who have never smoked. Cigarette smoking also increases the risk of the following cancers: larynx, oral cavity and pharynx, esophagus, stomach, pancreas, uterine cervix, kidney, bladder, stomach, colorectum, and acute myeloid leukemia. While electronic cigarettes (e-cigarettes) generally have lower carcinogen levels than combustible tobacco products, the long-term risks of use are not yet clear. Adolescents and young adults who use e-cigarettes may also be more likely to begin using combustible tobacco products according to early research.

Sunlight: Many of the 5.4 mil skin cancers diagnosed annually in the U.S. could have been prevented by protection from the sun's rays and avoiding indoor tanning. Epidemiological evidence shows

that sun exposure is a major factor in the development of melanoma and that incidence rates are increasing.

Screening Guidelines for Early Detection of Cancer

Cancer site	Population	Test or procedure	Frequency
Breast	Women, age 40+	Mammography	The American Cancer Society (ACS) no longer recommends regular breast self-exams or clinical breast exams; research has not found that they reduce the risk of dying from breast cancer. Women should be familiar with how their breasts look and feel and report any changes to a health care professional. For women at average risk (e.g., lack of strong family history of breast cancer), at age 40: begin annual mammography if desired; for ages 45-54: annual mammograms; for ages 55+: mammograms yearly or every two years for those in good health with a life expectancy of 10 or more years. Women at high risk for breast cancer, such as a BRCA1 or BRCA2 gene mutation, should get a breast MRI and mammogram yearly.
Cervix	Women, age 21+ or 25+	Pap test, HPV test	The ACS recommends all women begin screening at age 25; the U.S. Preventive Services Task Force [USPSTF] recommends screening start at age 21. For ages 25-65, a primary HPV test every 5 years is preferred. If HPV testing alone is not available, then an HPV/Pap co-test every 5 years or a Pap test every 3 years is acceptable. For ages 65+: women who have had regular screenings with normal results in the previous 10 years should no longer be tested; women with a history of abnormal test results or cervical

precancers should continue to be tested for at least 20 years after diagnosis. Women who have had a total hysterectomy for reasons unrelated to cervical cancer should not be screened. Women should not be screened annually by any method at any age.

Colorectal	Men and women, ages 45-75 or 50-75	Guaiac-based fecal occult blood test (gFOBT) or fecal immunochemical test (FIT) or	The ACS recommends starting at age 45; the USPSTF recommends screening begin at age 50. Annual, for people with average risk. Testing at home with adherence to instructions for collection and number of samples is recommended. An FOBT or FIT done with a stool sample collected during a digital rectal examination in a health care setting is not sufficient for screening.
		Stool DNA test (MT-sDNA), or	Every 3 years, starting at age 45 or 50.
		Flexible sigmoidoscopy (FSIG), or	Every 5 years, starting at age 45 or 50. Can be performed every 10 years if an FIT is done yearly.
		CT, or virtual, colonography, or	Every 5 years, starting at age 45 or 50.
		Colonoscopy	Every 10 years, starting at age 45 or 50. A colonoscopy should also be done if any of the above tests is positive.
Endometrial	Women, at menopause	Women at average risk should be informed about risks and symptoms of endometrial cancer and encouraged to report any unexpected bleeding or discharge to their physician.	
Lung	Current or former smokers, ages 50-80	Low-dose CT scan (LDCT)	People aged 50 to 80 years with a 20 pack-year or more smoking history (number of packs smoked per day multiplied by number of years smoked) who currently smoke or have quit within the past 15 years should be screened annually. People who are older than age 80, or have not smoked for 15 years, or have a limited life

			expectancy making surgery unlikely should discontinue screening.
Prostate	Men, age 40+ or 55-69	Digital rectal examination (DRE) and prostate-specific antigen test (PSA)	The ACS recommends men with an average risk and an expected life span of 10+ years should talk with their health care provider at age 50 about the benefits and risks of screening. African Americans—who have a higher rate of prostate cancer—and men with a first-degree relative diagnosed with prostate cancer before age 65 should have this talk at age 45. Men with more than one first-degree relative diagnosed at an early age should have the talk at age 40. The USPSTF recommends PSA-based screening for men ages 55-69 based on individual risk.

New U.S. Cancer Cases and Deaths for Leading Sites, 2022

Source: *Cancer Facts & Figures 2022*, American Cancer Society

The following estimates exclude basal cell and squamous cell skin cancers, also referred to as nonmelanoma skin cancers, and in situ carcinomas (i.e., noninvasive cancers) except of the urinary bladder. In 2022, an estimated 51,400 cases of female breast ductal carcinoma in situ and 97,920 cases of melanoma in situ are expected to be diagnosed. An est. 5.4 mil cases of basal cell and squamous cell skin cancer were diagnosed among 3.3 mil people in 2012 according to the most recent study available.

Estimated New Cases

Depression

Source: Substance Abuse and Mental Health Services Admin. and National Institutes of Health, U.S. Dept. of Health and Human Services

Depression is a serious illness that affects thoughts, feelings, and the ability to function in everyday life. It is one of the most common mental disorders in the U.S., affecting all age groups. In 2020, an estimated 21.0 mil adults age 18 and older (or 8.4% of the adult population) in the U.S. had at least one major depressive episode. Over the same 12-month period, 17.0% of persons age 18-25 years experienced at least one major depressive episode versus 5.4% of those 50 or older. More women (13.5 mil) than men (7.4 mil) reported at least one major depressive episode in 2020.

Available treatments can alleviate symptoms. But many depressed people—and those around them—fail to realize that they have an illness or could benefit from medical help.

Symptoms and Types of Depression

- Depressed mood most of the day
- Loss of interest or pleasure in daily activities
- Significant weight loss with appetite and/or weight changes
- Insomnia or hypersomnia (excessive daytime sleepiness or prolonged nighttime sleep)
- Restlessness or moving/talking more slowly
- Fatigue or loss of energy
- Feelings of worthlessness
- Difficulty concentrating, thinking, or making decisions
- Recurrent thoughts of death or suicide, or suicide attempts

A diagnosis of **major depressive disorder** (or **clinical depression**) is made if an individual reports experiencing five or more of these symptoms in the same two-week period.

Bipolar disorder (formerly known as manic-depressive illness), while distinct from depression, is characterized by depressive episodes alternating with manic episodes, when a person may

experience an abnormally elevated mood, less need for sleep, increased talkativeness, racing thoughts, agitation, and engagement in risky activities (e.g., spending a lot of money, unprotected sex).

Depression in women who are pregnant or who recently gave birth (**postpartum depression**); **psychotic depression**, where a person also has some type of psychosis, such as delusions or hallucinations; and **seasonal affective disorder** are other forms of depression.

Treatments for Depression

Depression can be treated with medication, psychotherapy, or a combination of the two, which studies have shown to be most effective in treating moderate-to-severe depression. Antidepressants influence the functioning of certain neurotransmitters in the brain. The most popular antidepressants are selective serotonin reuptake inhibitors (SSRIs). Serotonin and norepinephrine reuptake inhibitors (SNRIs) and bupropion are also commonly prescribed as they have fewer side effects than drugs from older classes, such as tricyclics and monoamine oxidase inhibitors (MAOIs). Some people respond better, however, to the older antidepressants.

Research has shown that certain types of psychotherapy, particularly cognitive-behavioral therapy (CBT) and interpersonal therapy (IPT), can help relieve depression. CBT helps patients change the negative thinking and behavior patterns often associated with depression. IPT focuses patients on working through personal relationships that may contribute to depression.

Electroconvulsive therapy (ECT) has been found effective in treating some cases of severe depression, particularly those that have not responded to other treatment. ECT involves using electric currents to produce a seizure in the brain of a patient under general anesthesia. Headaches and memory loss, though common side effects, are typically short-lived. Other types of treatment involving brain stimulation are being studied.

Diabetes

Source: American Diabetes Association; Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services

Diabetes is a chronic disease in which the body does not produce or properly use the hormone **insulin**. Insulin is needed to convert sugar, starches, and other foods into energy. Both genetics and environment appear to play roles in the onset of diabetes. This disease, which has no cure, was the eighth leading cause of death in the U.S. in 2020 (102,188 deaths). In 2019, an est. 23.7 mil Americans (6.3% of the population) had diagnosed diabetes. Diagnosed diabetes in the U.S. cost an estimated \$327 bil in direct medical costs and in reduced productivity in 2017.

The American Diabetes Association supports studies proving that detection at an earlier stage and modest lifestyle changes, such as eating better and exercising more, will help prevent or delay complications.

There are two major types of diabetes:

Type 1 (formerly known as insulin-dependent or juvenile diabetes). The body does not produce insulin; the disease is usually diagnosed in children and young adults. People with type 1 diabetes must take daily insulin to stay alive.

Type 2 (formerly known as non-insulin dependent or adult-onset diabetes). The body does not produce enough or cannot properly use insulin. It is the most common form of the disease (90%-95% of all diabetes cases) and often begins later in life.

Prediabetes

In 2019, 96.0 mil Americans age 18 and older (or about 1 in 3 adults) had prediabetes, the state that occurs when a person's blood glucose levels are higher than normal but not high enough for a diagnosis of diabetes. People with prediabetes are at increased risk of developing type 2 diabetes unless lifestyle changes are made.

Complications From Diabetes

People often have diabetes for many years before it is diagnosed. During that time, serious complications may develop.

Potential complications include the following:

Diabetic eye disease. High blood glucose can damage blood vessels to the eyes. In 2019, about 25.6% of adults age 18 and older with diagnosed diabetes had severe vision difficulty or blindness. Diabetic retinopathy is the most common cause of vision loss among those with diabetes. People with diabetes are also more likely to develop glaucoma or cataracts.

Kidney disease. In 2018, 62,012 people with diagnosed diabetes (181.9 per 100,000 of the total diabetic population) had end-stage renal disease.

Amputations. Diabetes is the most frequent cause for nontraumatic lower-limb amputations. About 1.2 per 1,000 adults age 18 and older with diabetes were hospitalized in 2019 for amputation below the knee; the rate was 0.4 per 1,000 for amputation above the knee and 2.0 for amputation of the foot.

Heart disease and stroke. Among adults age 35 and older with diabetes, 23.5% had major heart disease or a stroke in 2019.

Common Diabetes Symptoms

- Frequent urination
- Thirst
- Hunger
- Fatigue
- Blurry vision
- Cuts and bruises that are slow to heal
- Weight loss, nausea, vomiting (type 1)
- Tingling or numbness in hands or feet (type 2)

Gestational Diabetes

Gestational diabetes mellitus (GDM) is a form of diabetes that develops during or is diagnosed during pregnancy. Hormones released during pregnancy can cause insulin resistance, allowing blood glucose levels to rise. Usually there are no symptoms, or the symptoms are mild. Because GDM usually starts around the 24th

week, pregnant women should receive a glucose tolerance test between the 24th and 28th week of pregnancy. Diet and exercise can help keep blood glucose levels within normal limits. Treatment may also include daily blood glucose testing and insulin injections. Women with GDM tend to have larger babies at birth, which can complicate delivery. Glucose levels usually return to normal after delivery, but the odds of recurrence in future pregnancies and development of type 2 diabetes later in life increase. GDM is a common complication, affecting 2%-10% of U.S. pregnancies annually. In 2020, 7.8 of 100 live births in the U.S. were to women with GDM.

Eating Disorders

Source: National Institute of Mental Health (NIMH), National Institutes of Health, U.S. Dept. of Health and Human Services

Eating disorders are medical illnesses that involve serious disturbances in eating behavior, usually in an extreme and unhealthy reduction of food intake or severe overeating. The main types are anorexia nervosa, bulimia nervosa, and binge-eating disorder. Though they can develop at any age, the median age of onset for anorexia nervosa and bulimia nervosa is 18 years old and 21 years old for binge-eating disorder. They may be caused by a combination of genetics, behavioral, psychological, and social factors. Eating disorders often occur with other illnesses such as depression, substance abuse, and anxiety disorders. If not treated, eating disorders can lead to serious complications, including heart conditions and kidney failure, which may result in death.

Anorexia nervosa affects an estimated 0.6% of the U.S. adult population and three times as many women as men. It has the highest mortality rate of any mental disorder in the U.S. Symptoms include resistance to maintaining weight at minimally healthy levels, intense fear of gaining weight, exaggerated importance of body weight or shape in one's self image, and infrequent or absent menstrual periods. Anorexics see themselves as overweight even when they are dangerously thin. In response, they avoid food and

take other extreme measures to lose weight, such as exercising compulsively or purging by means of vomiting or laxatives and enemas. While some anorexics fully recover after a single episode, others may relapse frequently or experience chronic deterioration.

Bulimia nervosa affects an estimated 1.0% of the U.S. adult population. It is five times more prevalent in women than men. It is characterized by recurrent uncontrolled binge-eating episodes followed by what is believed to be compensatory behavior to prevent weight gain, such as self-induced vomiting, use of laxatives or diuretics, exercising excessively, or fasting. Persons with bulimia can weigh within the normal range for their age and height, but they still fear gaining weight and are intensely dissatisfied with their bodies. They often perform their behaviors in secret, feeling shame when they binge and relief when they purge.

Binge-eating disorder affects an estimated 2.8% of the U.S. adult population, with women twice as likely than men to have it. As with bulimia, a binge-eating disorder involves episodes of excessive eating during which the sufferer may feel a complete lack of control. But individuals with this disorder do not compensate by purging, exercising, or fasting. Many are thus overweight or obese, and the shame they feel can lead to further binge-eating.

Early diagnosis and a comprehensive treatment program are essential to recovery. Some patients may need immediate hospitalization. For anorexia, treatment usually follows three established steps: weight restoration, usually in an inpatient hospital setting; treatment of any accompanying psychological disturbances, including the use of medications; and achieving long-term remission or recovery by reducing or eliminating negative thoughts and behaviors.

Heart and Blood Vessel Disease

Source: American Heart Assn. (AHA); Natl. Ctr. for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention; Natl. Heart, Blood, and Lung Inst., Natl. Insts. of Health (NIH), U.S. Dept. of Health and Human Services

Warning Signs of Heart Attack

- Discomfort in chest. Most heart attacks involve discomfort, such as pressure, squeezing, or pain, in the center of the chest that lasts more than a few minutes or occurs intermittently. Most common symptom in men and women
- Discomfort in other upper body areas, including one or both arms, the back, neck, jaw, or stomach
- Shortness of breath, with or without chest discomfort
- Breaking out in a cold sweat, nausea, or lightheadedness, among other signs

While chest discomfort is the most common symptom of a heart attack, women are more likely to experience the other symptoms, such as abdominal pain, shortness of breath, dizziness, fainting, and extreme fatigue, without having any chest pain. The AHA advises calling 911 at onset of symptoms so that emergency medical services can begin treatment on the way to the hospital.

Warning Signs of Stroke

- **F**ace drooping or weakness on one side
- **A**rm weakness
- **S**peech difficulty, including slurring
- **T**ime to call 911 Other stroke symptoms, which may appear separately or in combination with F.A.S.T.:
- Sudden numbness or weakness of the face, arm, or leg, especially on one side of the body
- Sudden confusion or trouble speaking or comprehending
- Sudden vision difficulty in one or both eyes
- Sudden trouble walking, dizziness, or loss of coordination
- Sudden severe headache with no known cause

If someone has one or more stroke symptoms, immediately call 911 or the emergency medical service number so an ambulance,

ideally one with advanced life support, can be sent. Prompt treatment of a stroke can prevent death or lessen the long-term effects.

A transient ischemic attack (TIA), also referred to as a mini stroke, is when blood flow to the brain is blocked temporarily, with symptoms typically lasting under five minutes. Immediate medical treatment is still necessary as a TIA could signal a future stroke.

Major Modifiable Risk Factors

Major risk factors for heart and blood vessel (cardiovascular) disease are age, gender, and heredity. People 65 years of age or older are more likely to die of coronary heart disease. Men are at greater risk, as well as African Americans and those with a family history of heart disease. Major risk factors that can be modified include the following:

High blood pressure. High blood pressure, or hypertension, increases the risk of stroke, heart attack, kidney failure, and congestive heart failure. It affects men and women of all races, ethnic origins, and ages. But obesity, physical inactivity, and an unhealthy diet can contribute to this often symptomless disease. Everyone 3 years of age and older should have a blood pressure reading at least once a year.

A blood pressure reading consists of two measurements written one above the other, such as 122/78 mmHg (millimeters of mercury). The upper number (systolic pressure) represents the amount of pressure in the arteries when the heart contracts (beats) and pushes blood through the circulatory system. The lower number (diastolic pressure) represents the pressure in the arteries between beats, when the heart is resting. According to guidelines revised in 2017, a blood pressure reading below 120/80 is considered normal, while a reading of 130/80 or higher indicates hypertension, of which there are two stages:

Stage 1 is 130-139 (systolic) over 80-89 (diastolic);

Stage 2 is 140+ (systolic) over 90+ (diastolic).

The diagnosis can be based on either the systolic or diastolic reading. Any reading higher than 180/120 is a hypertensive crisis

that must be addressed by a doctor immediately.

High blood pressure usually cannot be cured, but it can be controlled in a variety of ways, including through diet, exercise, quitting smoking (where applicable), and medication. Treatment should be at the direction and under the supervision of a physician.

High blood cholesterol. Cholesterol is a waxy fat-like substance produced by the liver and found in all cells of the body. Dietary cholesterol exists in animal foods. Excess levels of cholesterol increase the risk of heart disease. High cholesterol in itself usually does not cause symptoms, so many people are unaware that they have a problem.

There are two major kinds of cholesterol: LDL (low-density lipoprotein), often called “bad” cholesterol, can build up on the inside walls of blood vessels, narrowing them. HDL (high-density lipoprotein), known as “good” cholesterol, helps reduce that risk.

NIH guidelines classify healthy total cholesterol levels (determined by a blood test) as less than 170 mg/dL for those age 19 or younger and 125 to 200 mg/dL for persons age 20 or older. LDL levels of less than 100 mg/dL are considered healthy. Healthy levels of HDL are more than 45 mg/dL for those age 19 or younger, 40 mg/dL or higher for men ages 20+, and 50 mg/dL or higher for women ages 20+. Among U.S. adults age 20 and over, 11.5% had high cholesterol (i.e., total cholesterol level equal to or greater than 240 mg/dL) in 2015-18.

As with high blood pressure, high blood cholesterol can be controlled by lifestyle changes and medication and should be treated by a physician.

Triglycerides, another form of fat in the blood, can also raise the risk of heart disease. Levels that are borderline high (150-199 mg/dL), high (200-499 mg/dL), or very high (500 mg/dL or more) may need treatment.

Diabetes. Adults with diabetes mellitus are two to three times more likely to die of heart disease or stroke.

Tobacco smoke. Cigarette smokers and nonsmokers exposed to secondhand smoke are more likely to develop coronary heart disease (CHD).

Obesity. People with excess body fat, especially around the waist (more than 40 in. for men, more than 35 in. for women), are more likely to develop heart and blood vessel disease even without any other risk factors.

Physical inactivity. A sedentary lifestyle is a risk factor for CHD. The risk increase is comparable to that observed for high blood cholesterol, high blood pressure, or cigarette smoking.

Women and Cardiovascular Disease

Heart disease was the number one cause of death for women in the United States in 2019, accounting for 21.8% of all female deaths. (Stroke was the third leading cause, at 6.2%.) Because heart disease was long viewed as a “man’s” disease, many of the major cardiovascular studies were conducted only on men. Researchers are now trying to understand the influence of gender on cardiovascular disease risk and prevention.

One problem in **diagnosis** is that women tend to have heart attacks later in life than men, so symptoms may be masked by other age-related diseases such as arthritis or osteoporosis. Even certain diagnostic tests and procedures such as the exercise stress test may not be as accurate in women, with the result that the disease process leading to heart attack or stroke may not be detected early on, with potentially serious consequences.

COVID-19

Source: National Center for Immunization and Respiratory Diseases, Centers for Disease Control and Prevention

COVID-19 (coronavirus disease 2019) was discovered in Dec. 2019 in Wuhan, China, and quickly spread around the world. COVID-19 is caused by a virus called SARS-CoV-2. It is part of the coronavirus family, which includes common viruses that cause a variety of diseases from the common cold to acute bronchitis to more severe diseases like severe acute respiratory syndrome (SARS) and Middle East respiratory syndrome (MERS). Like many other respiratory viruses, coronaviruses spread through droplets projected from the mouth or nose when an infected person breathes, coughs, sneezes, or speaks.

The word *corona* means crown and refers to the appearance of coronaviruses, which have spike proteins on their surfaces. These spike proteins allow the virus to attach to a human cell in order to infect it, replicating inside of the cell and spreading to other cells.

COVID-19 most often causes respiratory symptoms that can feel much like a cold, a flu, or pneumonia. Most people with COVID-19 have mild symptoms, but some become severely ill. After infection, some people—even those who experienced minor or no symptoms—may suffer long-term effects, known as post-COVID conditions, or long COVID. Older adults, people who have certain underlying medical conditions, and pregnant people are at increased risk of severe illness from COVID-19. Vaccines against COVID-19 are safe and effective; the first vaccines were made available in the U.S. beginning in Dec. 2020 under emergency authorization.

Symptoms of COVID-19

Symptoms may appear 2-14 days after exposure to the virus. Anyone can have mild to severe symptoms, including the following:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing

- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

U.S. COVID-19 Cases, Deaths, and Vaccination Rates

Source: Centers for Disease Control and Prevention, U.S. Dept. of Health and Human Services

As of July 22, 2022, except for vaccination rates, which are as of July 20. Counts include numbers of confirmed and probable cases and deaths since Jan. 21, 2020. Suspected cases and deaths are excluded. People who are infected but do not get tested or seek medical care are less likely to be reported as cases. All data are provisional.

NA = Not available. (1) Defined as having received two doses on different days of two-dose series or one dose of single-dose vaccine. (2) Excl. New York City, except for vaccination rates, which are for the entire state. (3) U.S. data incl. counts from jurisdictions not shown separately in table, incl. three countries in free association compacts (Marshall Islands, Fed. States of Micronesia, Palau).

Common Infectious Diseases

Source: Centers for Disease Control and Prevention (CDC), U.S. Dept. of Health and Human Services; World Health Organization

State and local officials, in connection with the CDC, monitor certain diseases in the interests of public health. Some diseases must be confirmed in a laboratory while others may be diagnosed based on epidemiologic data (e.g., exposure to a foodborne pathogen linked to confirmed cases of illness in other patients). Statistics may thus appear uneven because of different reporting methods for each disease. This list is meant to be used for reference purposes only and not as a diagnostic tool.

Chickenpox

(Varicella-zoster virus, or VZV) Highly contagious disease commonly associated with children that can be especially serious in babies, adults, pregnant women, and people with weakened immune systems. A person who has had chicken-pox may develop shingles later in life if the virus reactivates. **Transmission:** direct contact with rash or through the air when an infected person coughs or sneezes. **Symptoms:** blister-like rash that can last up to 7 days, fever. **Vaccine:** available since 1995. **Treatment:** for relief of symptoms; antivirals only for those at risk of complications. **Annual U.S. cases:** before 1995, about 4 mil, mostly children; in 2020, 3,048 (provisional).

Chlamydia

(*Chlamydia trachomatis*) One of the most widely spread sexually transmitted diseases (STDs), and the most common condition reported to the CDC of the diseases that it tracks. **Transmission:** sexually transmitted. A mother can pass an infection to her baby during delivery. **Symptoms:** Most of those infected show no symptoms. In women, abnormal vaginal discharge, infection of the cervix and urinary tract; can cause pelvic inflammatory disease. In men, infection of urinary tract and pain and swelling in one or both testicles; can also infect the throat, rectum, and eyes. **Treatment:**

curable with antibiotics. **Annual U.S. cases:** 1,579,885 in 2020 (or 481.3 per 100,000 pop.).

Common cold

(More than 200 different viruses, rhinoviruses being most common) An upper respiratory viral infection. **Transmission:** touching one's nose, eyes, or mouth after touching something contaminated by the virus; inhalation of airborne virus. **Symptoms:** irritated nose or scratchy throat, sneezing and watery green or yellow nasal discharge, coughing, muscle aches, headaches, postnasal drip (mucus dripping down throat). **Treatment:** no cure. Over-the-counter remedies can relieve symptoms. **Annual U.S. cases:** about 1 bil.

Gonorrhea

(*Neisseria gonorrhoeae*) Very common bacterial STD. **Transmission:** sexually transmitted. Can pass from mother to infant during delivery. **Symptoms:** pain or burning during urination. In men, white, yellow, or green discharge from urethra; in women, increased vaginal discharge, vaginal bleeding between periods. Many men and most women do not present symptoms. **Treatment:** curable with antibiotics, although bacteria has become increasingly resistant. **Annual U.S. cases:** 677,769 in 2020 (or 206.5 per 100,000 pop.).

Hepatitis

A viral disease that causes inflammation of the liver. In the U.S., five forms are endemic: A, B, C, D, and E. Forms A, B, and C are the most common. HBV and HCV can cause chronic disease. **Symptoms:** all forms have generally similar symptoms including jaundice, fatigue, abdominal pain, loss of appetite, nausea, mild flu-like symptoms. Many cases cause no symptoms. In extreme cases, infected persons may develop end-stage liver disease.

Hepatitis A (*Hepatovirus picornaviridae*). **Transmission:** consuming food or water contaminated with feces from infected persons. **Vaccine:** effective. (In developing countries, older children and adults may generally be immune after having been infected

when young.) **Treatment:** disease usually resolves on its own; alcohol consumption should be avoided. **Annual U.S. cases:** 9,952 acute (i.e., newly acquired) in 2020 (provisional).

Hepatitis B (*Orthohepadnavirus hepadnaviridae*). **Transmission:** unsterilized needle sharing; contaminated blood transfusions; sexual contact; infants during childbirth. **Vaccine:** highly effective. **Treatment:** for chronic cases, drug treatment is necessary. For acute cases, disease usually resolves itself. **Annual U.S. cases:** 2,157 acute, 10 perinatal (pregnant person to child) in 2020 (provisional).

Hepatitis C (*Hepacivirus flavinviridae*). **Transmission:** unsterilized needle sharing; contaminated blood transfusions; sexual contact; infants during childbirth. **Vaccine:** none. **Treatment:** chronic cases treated with drugs, which can eliminate the virus in more than 90% of patients. For acute cases, the CDC recommends monitoring by a doctor and starting treatment if the infection becomes chronic. **Annual U.S. cases:** 4,798 acute (confirmed), 165 perinatal in 2020 (provisional).

HPV

(More than 200 related human papillomaviruses) Most common sexually transmitted infection in U.S.; causes nearly all cases of cervical cancer, 91% of anal cancers. **Transmission:** sexually transmitted. **Symptoms:** most of those infected have no symptoms though in some cases, low-risk HPVs result in genital warts and precancerous bumps on anus, cervix or vulva, or penis. High-risk HPVs can persist for years and lead to cell changes that become cancerous, possibly producing symptoms. **Vaccine:** recommended at age 11 or 12. **Treatment:** while there is no cure, a healthy immune system can usually fight off HPV on its own. Women age 21 and older should be regularly screened for cervical cancer. **Annual U.S. cases:** est. 13 mil new infections, 42.5 mil currently infected in 2020.

Influenza

(Various influenza viruses) Highly contagious viral respiratory infection. **Transmission:** airborne; contact with face after touching

infected surface. **Symptoms:** chills, fatigue, fever, headaches, sore throat, sinus congestion, coughing. (“Stomach flu” is not influenza.) **Vaccine:** yearly vaccinations recommended; available as injection or nasal spray. **Treatment:** antiviral drugs; disease normally runs its course in a matter of days. **Annual U.S. cases:** est. 34.9 mil flu-related illnesses, 380,209 flu-related hospitalizations, and 20,342 flu-related deaths during the 2019-20 influenza season. Adults 65 years of age and older made up 45.0% of all those hospitalized and 58.7% of deaths from influenza.

Lyme disease

(*Borrelia burgdorferi*) Bacterial inflammatory disease, first identified 1975 in Old Lyme, CT, most common vector-borne disease in the U.S. Concentrated in New England, the mid-Atlantic and upper Midwest U.S., usually in areas with large deer populations. Also on the West Coast, particularly Northern California. **Transmission:** bite from infected blacklegged (or deer) tick. Mice and deer are most common tick hosts. **Symptoms:** mimic those of other diseases. Flu-like symptoms: fatigue, stiff neck, joints. A roughly circular rash may appear at site of tick bite and expand to look like a bull’s eye. **Treatment:** antibiotics in early stages; anti-inflammatory drugs to relieve symptoms. Without treatment, long-term complications (some fatal) involving joints, heart, and nervous system. **Annual U.S. cases:** from 9,465 reported cases in 1991—the first year the CDC began collecting Lyme disease data—to 34,945 cases (23,453 confirmed; 11,492 probable) in 2019. The CDC estimates about 476,000 people get Lyme disease each year.

Malaria

(*Plasmodium* parasite) Mosquito-borne disease that mostly occurs in tropical and subtropical regions. **Transmission:** bite from infected *Anopheles* mosquito. **Symptoms:** high fever, shaking chills, heavy sweating, headaches, fatigue, enlarged spleen. If left untreated, organ damage and death. **Treatment:** antimalarial drugs, such as doxycycline, for treatment and prevention. **Annual cases:** 1,936 confirmed in 2019, 569 in 2020 (provisional) in the U.S.; est.

241 mil cases and 627,000 deaths worldwide in 2020, with four African countries accounting for just over half of global malaria deaths.

Measles

(*Rubeola* virus) Declared eliminated in the U.S. in 2000; spreads mostly via unvaccinated travelers from abroad **Transmission:** airborne transmission. The virus can survive for up to two hours in the air where an infected person has coughed or sneezed. **Symptoms:** itchy and raised rash, cough, watery eyes, high fever. Complications include ear infections, pneumonia, brain swelling, premature birth, or even death. **Vaccine:** highly effective. **Treatment:** no specific treatment; relief of symptoms. **Annual U.S. cases:** 1,274 in 2019, 13 confirmed in 2020 (both years preliminary).

Mumps

(Mumps virus) Acute and contagious viral infection. **Transmission:** direct contact with mucus or saliva of infected persons. **Symptoms:** headaches, fever, loss of appetite may precede painful, visible swelling of the salivary glands under one or both ears. In severe cases, inflammation of testes, pancreas, ovaries; brain swelling; deafness. **Vaccine:** MMR (measles, mumps, and rubella) vaccine is effective. **Treatment:** no specific treatment; symptoms may be relieved by applying cold or warm compress to swollen glands. **Annual U.S. cases:** 3,780 in 2019; 616 in 2020 (preliminary).

Peptic ulcer

(Most from *Helicobacter pylori* [*H. pylori*] bacteria; also long-term use of aspirin or other anti-inflammatory drugs) Weakening of the stomach or duodenum's protective mucous coating, allowing stomach acid and bacteria to irritate the lining and cause a sore. **Transmission:** *H. pylori* may be transmitted through food and water; possibly through close contact between infected persons. **Symptoms:** indigestion; bloating; dull, transient abdominal pain or

discomfort; nausea; vomiting. **Treatment:** antibiotics, drugs to reduce stomach acid. **Annual U.S. cases:** 4.6 mil people.

Pertussis or Whooping cough

(*Bordetella pertussis*) Upper respiratory bacterial infection. **Transmission:** airborne transmission by infected persons; highly contagious. **Symptoms:** initially, mild cold-like symptoms, fever, difficulty breathing; later, violent coughing with characteristic “whooping” sound when patient tries to breathe between coughs, vomiting. Many babies, instead of coughing, may stop breathing and turn blue. **Vaccine:** available as part of Tdap (tetanus, diphtheria, pertussis) combination vaccine. **Treatment:** antibiotics in early cases; otherwise, disease must run its course. **Annual U.S. cases:** 18,617 in 2019; 5,818 in 2020 (provisional).

Salmonella or Salmonellosis

(*Salmonella*) Bacterial infection. **Transmission:** eating foods contaminated by feces carrying the bacteria or eating undercooked meats or raw eggs contaminated by bacteria. Contact with infected domestic animals. **Symptoms:** fever, diarrhea, abdominal cramps. **Treatment:** no standard treatment. Runs its course in 4-7 days. Antibiotics in severe cases. **Annual U.S. cases:** (excluding Paratyphi and Typhi infections) 58,371 in 2019; 43,772 in 2020 (provisional).

Shigellosis

(Four species of *Shigella* bacteria) Diarrheal disease. **Transmission:** swallowing water or consuming food contaminated by infected feces. **Symptoms:** sometimes bloody diarrhea, fever, stomach pain usually lasting 5-7 days. **Treatment:** replacement of fluids and salts to prevent dehydration. Antibiotics in severe cases. Antidiarrheal medicines may make illness worse. **Annual U.S. cases:** 18,574 in 2019; 8,768 in 2020 (provisional).

Syphilis

(*Treponema pallidum*) Bacterial infection that can cause significant health problems if left untreated. **Transmission:** sexually

transmitted; pregnant women can transmit during fetal development or at birth. **Symptoms:** primary stage: painless sore, called a chancre, where bacteria entered the body; usually heals in 3-6 weeks with or without treatment. Without treatment, disease enters secondary stage: skin rash as chancre is healing or weeks after it has healed. Without treatment, enters latent stage (no visible symptoms). Very rarely, can move into tertiary stage 10-30 years after infection and cause death. Syphilis can spread to the brain and nervous system (neurosyphilis) or eyes (ocular syphilis) at any stage; symptoms include fever, fatigue, dementia, vision changes. **Treatment:** antibiotics, though reinfection is possible. **Annual U.S. cases:** 133,945 (41,655 primary and secondary) in 2020.

Tetanus or Lockjaw

(*Clostridium tetani*) Bacterial infection. **Transmission:** spores of bacteria commonly found in soil entering body through broken skin. **Symptoms:** muscle stiffness; spasms or “locking” of muscles of the jaw, neck, limbs; seizures, fever. Breathing difficulties may lead to death in 1-2 of every 10 cases. **Vaccine:** four forms of immunization. **Treatment:** tetanus immune globulin to fight infection, drugs to control spasms. **Annual U.S. cases:** 26 in 2019; 15 in 2020 (provisional).

Tuberculosis

(*Mycobacterium tuberculosis*) Bacterial infection that primarily affects the lungs. **Transmission:** airborne transmission by persons with TB disease. **Symptoms:** no symptoms in person with latent TB infection. Person with TB disease may have weight loss, fever, cough with discharge (sometimes with bloody sputum) lasting 3 or more weeks, night sweats. **Vaccine/treatment:** BCG (bacille Calmette-Guérin) vaccine for children where TB is prevalent. Not recommended for use in the U.S. because of low infection risk and variable effectiveness in adults. Antibiotics to treat TB disease or to prevent latent infection from becoming active. **Annual U.S. cases:** 7,173 in 2020; 7,860 in 2021 (provisional).

Yellow fever

(Yellow fever virus, in *flavivirus* genus) Viral infection endemic in tropical areas of Africa and Central and South America.

Transmission: bite from virus-carrying mosquito. **Symptoms:** head and body aches, nausea and vomiting, fatigue; more severely, fever, jaundice (yellowing skin), organ failure, coma, and death. Most infected people exhibit no symptoms or only mild symptoms.

Vaccine: safe and effective, conferring lifetime immunity to most who receive it. **Treatment:** symptoms treated until disease runs its course. **Annual cases:** none in the U.S. in 2019 or 2020; est. 200,000 cases and 30,000 deaths worldwide (90% in Africa).

Weight Guidelines

Source: National Center for Health Statistics, CDC, U.S. Dept. of Health and Human Services

Federal clinical guidelines on the identification, evaluation, and treatment of overweight and obesity in adults age 20 and over were first released in 1998. The guidelines define overweight and obese in terms of **body mass index (BMI)**. BMI, based on a person's weight and height, can be an indicator of total body fat. A BMI of 18.5-24.9 is within a healthy weight range. A BMI of less than 18.5 is **underweight** while 25-29.9 is considered **overweight**; a BMI of 30 or higher indicates **obesity**. Obesity can be further subdivided into three classes, with class 3 obesity (BMI of 40 or higher) described as severe obesity. BMI can be calculated at www.nhlbi.nih.gov/health/educational/lose_wt/BMI/bmicalc.htm. (BMI in persons ages 2 through 19 is age- and sex-specific. For example, a 10-year-old boy would be at a healthy weight if his BMI were in the 5th to less than 85th percentile of all 10-year-old boys in the reference population.)

Waist circumference should be evaluated along with BMI. Men with a waist circumference of more than 40 inches and non-pregnant women with a waist circumference of more than 35 inches may be at

increased risk for disease because of excess abdominal fat. BMI and waist circumference are screening tools, not diagnostics. A health-care provider should also perform other assessments to evaluate risk and diagnose disease, taking into consideration such factors as blood pressure, cholesterol levels, and family medical history.

The National Center for Health Statistics notes that 41.9% of American adults (ages 20 and over) and 19.7% of youth (ages 2-19) in 2017-Mar. 2020 were obese. The prevalence of obesity has increased over time, from 30.5% of adults and 13.9% of youth in 1999-2000 to its current levels. Among all age groups, obesity was more prevalent in the non-Hispanic Black and Hispanic population than among non-Hispanic whites and non-Hispanic Asians.

A high prevalence of overweight and obesity is a public health concern because higher body weights increase a person's risk of developing type 2 diabetes, hypertension, dyslipidemia, cardiovascular disease, stroke, gallbladder disease, sleep and respiratory problems, osteoarthritis, and certain cancers.

— = Not available. **Note:** Measures of physical activity reflect the federal 2008 Physical Activity Guidelines for Americans, which recommend that for substantial health benefits, adults each week perform at least 150 min. of moderate-intensity, 75 min. of vigorous-intensity, or an equivalent combination of moderate- and vigorous-intensity aerobic activity. Aerobic activity should be performed in episodes of at least 10 min., preferably spread throughout the week. The guidelines also recommend that adults perform muscle-strengthening activities that are moderate or high intensity and involve all major muscle groups on two or more days a week. (1) Persons reporting only one race, unless otherwise noted. Persons of Hispanic origin may be of any race.

— = Estimate is considered unreliable. * = Estimate has a high relative standard error.

Note: Obesity is defined as body mass index (BMI) at or above the sex- and age-specific 95th percentile of the 2000 CDC growth charts. (1) Ratio of family's household income to contemporary federal poverty guidelines.

Basic First Aid

Source: Courtesy of the American National Red Cross, www.redcross.org. All rights reserved in all countries.

Note: This information is not intended to be a substitute for formal training. It is recommended that you contact your local American Red Cross chapter to sign up for a First Aid/CPR/AED (automated external defibrillator) course. Similar courses are also offered by organizations like the American Heart Association and National Safety Council.

In an emergency, it is important to get medical assistance as soon as possible, but knowing what to do until a doctor or other trained person gets to the scene can save a life, especially in cases of severe bleeding, choking, poisoning, and shock. The Stop the Bleed initiative provides free training in bleeding control techniques to the general public. **Website:** www.StopTheBleed.org

People with special medical problems, such as diabetes, cardiovascular disease, epilepsy, or allergies, are urged to wear some sort of emblem identifying the problem as a safeguard against receiving medication that might be harmful or even fatal. Emblems can be purchased from MedicAlert Foundation, 101 Lander Ave., Turlock, CA 95380; (800) 432-5378; www.medicalert.org.

Allergic reaction and anaphylaxis: If you know the person has a severe allergy or is having difficulty breathing, call 911 or the local emergency number. Have the person use any emergency medication they might carry, such as epinephrine.

Animal bite: Call 911 or the local emergency number if the wound is bleeding seriously or if the animal was wild or a stray or you suspect it of having rabies. Control any bleeding. Wash minor wounds with soap under running water and apply antibiotic ointment and a dressing. In the U.S., people most commonly get rabies through contact with a bat, which may not leave a noticeable bite mark. When possible, proper authorities should test the animal for rabies.

Bleeding: Use a barrier between your hand and the wound to help prevent infection. Cover wound with a sterile dressing. Apply direct pressure until bleeding stops. Cover compress with a bandage. Call 911 or the local emergency number if bleeding is severe.

Burn: Check for life-threatening conditions. If the burn is mild, with skin unbroken and no blisters, flush with cold running water for at least 10 minutes (at least 15 minutes if the burn was caused by a chemical). Gently wash with soap and water and pat dry. Apply a thin layer of antibiotic ointment and then a loose, sterile dry dressing to prevent infection. If the burn is severe, call 911 or the local emergency number. Care for shock (see separate entry). Keep the person from getting chilled or overheated until advanced medical assistance arrives. Do not try to clean a severe burn or break blisters.

Chemical in eye: Call 911 or the local emergency number. Turn the person's head to the side so that the affected eye is lower than the unaffected eye. Flush the affected eye with large amounts of water for at least 20 minutes.

Choking: See **First Aid for Choking** below.

Convulsions (seizures): Ease the person to the floor and roll them onto one side. Place something soft and flat, like a folded jacket, under the person's head. Do not hold the person down or put anything in their mouth. Stay with the person until they are fully conscious. If convulsions last for longer than 5 minutes or the person has a health condition like diabetes or is pregnant, call 911 or the local emergency number.

Cut (minor): Use a clean barrier between your hand and the wound to prevent infection. Apply direct pressure for a few minutes to control any bleeding. Wash the wound thoroughly with soap and water and apply a thin layer of antibiotic ointment or a microthin film dressing. Cover the wound with a sterile dressing and a bandage.

Diabetic emergency: A person experiencing a diabetic emergency might have a headache or even appear intoxicated, slurring their speech and moving with difficulty. Offer the person some form of sugar only if they are conscious and able to swallow. Call 911 if the person is unresponsive.

Foreign object in eye: If an object is embedded in someone's eye, do not remove it. If the object is not embedded, have the person blink several times. If the object doesn't come out, gently flush the eye with saline solution or water. Do not rub the eye. Seek medical attention if the foreign object remains.

Frostbite: Handle the frostbitten area gently. Do not rub. If there is no danger of the affected area refreezing, soak it in warm water (not warmer than 105°F), without allowing it to touch the side of

the water container, until normal color returns and it feels warm. Loosely bandage the area with dry, sterile dressings. Put cotton or gauze between any frostbitten fingers or toes. Do not break any blisters. Call 911 or seek emergency help as soon as possible.

Heart attack and stroke: See **Heart and Blood Vessel Disease** earlier in chapter.

Heat stroke: Remove the person from the heat. Loosen any tight clothing. Immerse person in cold water until they become alert. If a large enough source of water is not available, drench the person with cold water and fan constantly. If the person is conscious, have them slowly drink some cool water. Call 911 if the person's condition does not improve.

Hypothermia: Call 911 or the local emergency number. For mild hypothermia, cover all exposed skin. Replace wet clothes with something dry. If the person is alert, give them simple carbohydrates to eat and warm, nonalcoholic, decaffeinated liquids to drink. Apply heat pads or other heat sources if available but do not place against bare skin.

Loss of limb: Call 911 or the local emergency number and care for any life-threatening conditions. If a limb is severed, properly protect it for possible reattachment. After the victim is cared for, the limb should be wrapped in sterile gauze and placed in a plastic bag. Place bag in a larger bag or container of an ice and water slurry, not ice alone. Be sure the limb accompanies the victim to the hospital.

Poisoning: Care for any life-threatening conditions. Contact the National Capital Poison Center (800-222-1222, or access their online tool at www.poison.org), 911, or the local emergency number. Do not give the person any food or drink or induce vomiting unless specified to do so by medical professionals. In

cases of **alcohol poisoning**, place the person in a position that keeps their airway clear. In cases of **carbon monoxide poisoning**, remove the person from the area if you can do so safely. Naloxone can be administered as a nasal spray or autoinjectable to reverse an **opioid overdose**. All 50 states and DC have enacted naloxone access laws, which allow for it to be dispensed to persons other than a patient.

Shock (injury-related): Monitor breathing and consciousness. Have the person lie down and keep them as comfortable as possible. Do not give the person anything to eat or drink as it increases the risk of vomiting or aspiration. If the weather is cold or damp, place blankets or extra clothing over and under the person; if the weather is hot, provide shade.

Snakebite: Call 911 or the local emergency number immediately if you're not sure whether or not the snake was venomous. Do not wait for symptoms to appear. Gently wash the injury with soap and water and keep the area below the level of the heart. Have the person remain still if possible. Do not cut, suck at, or apply a tourniquet or ice to a snakebite. Applying an elastic roller bandage may help slow the spread of venom.

Sprains and strains: Splint any injured bone or joint that the person cannot use.

Sting from bee or wasp: If possible, remove the stinger by scraping it away with your finger or a plastic card (like a credit card) or using tweezers. If you use tweezers, grasp the stinger, not the venom sac. Wash the area with soap and water and cover it with a bandage. Apply cold to the area to reduce swelling and pain. Call 911 or the local emergency number immediately if the wound does not stop swelling, the person collapses, or they are known to be allergic to the sting.

Tick bite: Promptly remove any ticks to lower the chance of infection. Use tweezers to grasp it at its head as close to the skin as possible. Pull it slowly and steadily out. Do not use a match or petroleum jelly to remove an embedded tick. Wash and dress the bite area.

Unconsciousness: Call 911 or the local emergency number immediately. Do not move the person if a spinal injury is suspected.

First Aid for Choking

The recommended first aid for a conscious choking victim who is unable to speak, cough, or breathe is to deliver a series of five blows to the back followed by five thrusts to the abdomen. Have another person call 911 or the local emergency number. Obtain consent from the victim to treat them. Apply the back blows by leaning the victim forward and striking between the shoulder blades with the heel of your hand. If the victim is still choking, stand or kneel behind the victim and wrap your arms around their waist. Make a fist with one hand and place the thumb side against the middle of the person's abdomen, just above the navel and well below the lower tip of the breastbone. Grasp your fist in your other hand and quickly thrust upwards into the abdomen. Continue back blows and abdominal thrusts until the object is dislodged, and the person can breathe or cough forcefully, or the person loses consciousness.

Note: Rates are per 1,000 population; population counts are enumerated as of Apr. 1 for decennial census years and estimated as of July 1 for all other years. Beginning in 1970, statistics exclude births and deaths among nonresidents of the U.S. (1) Provisional. (2) Not directly comparable to previous years due to difference in calculation.

Marriage and Divorce Rates in the U.S., 1920-2020

Source: National Center for Health Statistics (NCHS), CDC, U.S. Dept. of Health and Human Services

(Per 1,000 total population. Rates for 2000-20 may exclude data and populations from nonreporting states. Some data are provisional.)

The U.S. marriage rate dipped during the Depression and peaked sharply just after World War II; the trend after that has been more gradual. The divorce rate generally rose from the 1920s through 1981, when it peaked at 5.3 per 1,000 population, before declining somewhat. The graph below shows marriage and divorce rates since 1920.

U.S. Median Age at First Marriage, 1890-2021

Sexual Orientation and Gender Identity by Age Group, 2022

Source: *Accelerating Acceptance 2022*, a national survey among U.S. adults conducted by research firm Cint on behalf of GLAAD (percent of survey respondents)

Sexual orientation	Age				
	18-22	23-38	39-54	55-73	74+
Strictly straight/heterosexual	60%	77%	88%	92%	97%
Non-heterosexual	40	23	12	8	3
Bisexual	17	14	6	1	—
Gay or lesbian	7	4	3	5	2
Pansexual	5	3	1	0	—
Queer	5	1	1	0	—
Asexual	3	1	0	1	1
Unsure or questioning	3	1	1	1	—

Gender identity	Age				
	18-22	23-38	39-54	55-73	74+
Cisgender	80%	89%	95%	97%	99%
Non-cisgender	20	11	5	3	1
Transgender	7	2	1	0	—
Nonbinary	12	5	1	1	—
Unsure or questioning	5	5	3	1	1

Gender identity	Age				
	18-22	23-38	39-54	55-73	74+
— = Option not selected. Note: Asexual: not experiencing sexual attraction; bisexual: experiencing sexual or romantic attraction to more than one gender; cisgender: strictly identifying with the sex assigned at birth; gay/lesbian: experiencing sexual attraction to the same gender; nonbinary: identifying outside of, or beyond, the binary of male and female gender including gender queer, agender, and bigender; pansexual: experiencing sexual or romantic attraction to people of any or all gender identities; queer: experiencing sexual or romantic attraction in a way that does not fit into the dominant norms; transgender: identifying with a gender that does not correspond to the sex assigned at birth.					

Sexual Orientation Among U.S. Adults, 2018

Asian/Pacific Islander	45.6	32.3	3.0	1.6	14.9	2.6
Two or more races	39.8	34.5	4.3	4.2	15.5	1.7

Note: Detail may not sum to totals because of rounding and because children in multiple care arrangements are included under the category in which the child spent the most time. (1) Includes day care centers, Head Start programs, preschools, prekindergartens, and other early childhood programs. (2) Mean hours per week per child, among preschool children enrolled in any type of nonparental care arrangement. For children with more than one arrangement, the hours of each weekly arrangement were summed to calculate the total amount of time in child care per week. (3) Children who spent an equal number of hours per week in multiple nonparental care arrangements. (4) Race categories exclude persons of Hispanic ethnicity (Hispanic persons can be of any race).

(1) When riding in a car driven by someone else. (2) In a car or other vehicle, one or more times during the 30 days before the survey. (3) Among the 59.9% of students who had driven a car or other vehicle one or more times during the 30 days before the survey. (4) Among the 60.1% of students who had driven a car or other vehicle on at least one day during the 30 days before the survey.

U.S. Motor Vehicle Crashes, 2020

Source: National Safety Council (NSC) website: injuryfacts.nsc.org; Natl. Highway Traffic Safety Admin. (NHTSA)

An estimated 42,339 people in the U.S. were killed in motor vehicle crashes in 2020, up 8.3% from the total for 2019. The number of licensed drivers (228 mil) and vehicle miles driven (2.904 tril) decreased in 2020; the death rate per 100 mil vehicle miles increased 21.7% to 1.46.

Motor vehicle deaths per 10,000 registered vehicles was 1.53 in 2020. In comparison, the death rate was 1.41 in 2019 and 1.41 in 2010, which represents a 8.5% increase over 10 years. The number of fatalities per 100,000 population increased 13.2% between 2010 and 2020 and increased 8.4% in 2019-20.

In 2020, 5.4 mil male drivers were involved in crashes, whereas 3.7 mil female drivers were involved in crashes. About 75% of fatal crashes (or 39,393) involved male drivers, compared with fatal crashes involving female drivers (13,033).

In 2020, 11,654 motor vehicle traffic fatalities (30%) involved an alcohol-impaired (blood alcohol concentration of 0.08% or greater) driver or motorcycle operator.

Seat belt use was 90.4% in 2021. The least likely seat belt users were those traveling in light traffic (82%) and occupants of pickup trucks (85%). In 2020, the most recent year for which data was

available, 51% of passenger vehicle occupants killed in traffic crashes were unrestrained.

Crashes	Deaths	Injuries
All motor vehicle crashes	42,339	4,802,000
Collision between motor vehicles	17,500	3,680,000
Collision with fixed object	12,017	690,000
Collision with pedestrian	8,003	140,000
Noncollision accidents (e.g., rollovers)	3,300	140,000
Collision with pedalcycle	1,403	120,000
Collision with animal or animal-drawn vehicle	106	32,000
Collision with railroad train	87	0

Note: NSC numbers are estimates.

U.S. Life Expectancy at Selected Ages, 2021

Source: National Center for Health Statistics (NCHS), CDC, U.S. Dept. of Health and Human Services

In 2021, U.S. life expectancy fell for the second straight year, primarily due to deaths from COVID-19. Life expectancy in 2021 was 76.1 years, declining by 0.9 year from 77.0 in 2020 and by 2.7 years from 78.8 in 2019. The non-Hispanic American Indian or Alaska Native population (not shown separately on the table) saw the largest decline between 2019 and 2021 (6.6 years). Overall, the 2021 life expectancy was the lowest since 1996.

Edwin M. Stanton, 1814-69, (U.S.) sec. of war, 1862-68.

Alexander Stephens, 1812-83, (U.S.) vice pres. of the Confederacy.

Edward R. Stettinius Jr., 1900-49, (U.S.) industrialist; sec. of state who coordinated aid to WWII allies.

Adlai E. Stevenson, 1900-65, (U.S.) Democratic leader, diplomat, governor (IL), presidential nominee (1952, '56).

Henry L. Stimson, 1867-1950, (U.S.) statesman; served in five administrations, foreign policy adviser in 1930s and 1940s.

Carl Stokes, 1927-96, (U.S.) first Black mayor of a major American city (Cleveland, 1967-72).

Suharto, 1921-2008, (Indon.) former longtime Indonesian ruler.

Sukarno, 1901-70, (Indon.) dictatorial first pres. of the Indonesian republic.

Sun Yat-sen, 1866-1925, (China) revolutionary; leader of Kuomintang political party, regarded as father of modern China.

Robert A. Taft, 1889-1953, (U.S.) conservative Senate leader (OH); called "Mr. Republican."

Charles de Talleyrand, 1754-1838, (Fr.) statesman, diplomat; the major force of the Congress of Vienna of 1814-15.

U Thant, 1909-74, (Burma) statesman, UN sec.-general.

Margaret Thatcher, 1925-2013, (Br.) conservative British prime min., 1979-90; first woman UK prime min.

Norman M. Thomas, 1884-1968, (U.S.) social reformer; six times Socialist party presidential candidate.

Josip Broz Tito, 1892-1980, (Yugo.) pres. of Yugoslavia, 1953-80; WWII guerrilla chief, postwar rival of Stalin.

Palmiro Togliatti, 1893-1964, (It.) major Italian Communist leader.

Hideki Tojo, 1885-1948, (Jpn.) statesman, soldier; prime min. during most of WWII.

François Toussaint L'Ouverture, c. 1744-1803, (Haiti) patriot, martyr; thwarted French colonial aims.

Leon Trotsky, 1879-1940, (Russ.) revolutionary; founded Red Army, expelled from party in conflict with Stalin; assassinated.

Pierre Elliott Trudeau, 1919-2000, (Can.) longtime liberal prime min. of Canada, 1968-79, 1980-84; achieved native Canadian constitution.

Rafael L. Trujillo Molina, 1891-1961, (Dom. Rep.) dictator of Dominican Republic, 1930-61; assassinated.

Moise K. Tshombe, 1919-69, (Congo) pres. of secessionist Katanga prov., prem. of Congo (now Dem. Rep. of the Congo).

William M. Tweed, 1823-78, (U.S.) political boss of Tammany Hall, New York City's Democratic political machine.

Walter Ulbricht, 1893-1973, (Ger.) Communist leader of German Democratic Republic.

Arthur H. Vandenberg, 1884-1951, (U.S.) senator (R, MI); proponent of bipartisan anti-Communist foreign policy.

Eleutherios Venizelos, 1864-1936, (Gr.) most prominent Greek statesman of early 20th cent.

Hendrik F. Verwoerd, 1901-66, (S. Afr.) prime min.; rigorously applied apartheid policy despite protest.

Kurt Waldheim, 1918-2007, (Austria) UN sec.-gen., Austrian pres.

George Wallace, 1919-98, (U.S.) former segregationist governor of Alabama, pres. candidate.

Robert Walpole, 1676-1745, (Br.) statesman; generally considered Britain's first prime min.

Nancy Ward (Nan'yehi), 1738?-1824?, (Amer. Ind.) Cherokee peace leader.

Robert C. Weaver, 1907-97, (U.S.) first African American appointed to cabinet; sec. of Housing and Urban Development.

Daniel Webster, 1782-1852, (U.S.) orator, politician; advocate of business interests during Jacksonian agrarianism.

Caspar Weinberger, 1917-2006, (U.S.) business exec.; former defense sec., other cabinet posts.

Chaim Weizmann, 1874-1952, (Russ.-Isr.) Zionist leader, scientist; first Israeli pres.

Kevin White, 1929-2012, (U.S.) Boston mayor, 1967-84.

Wendell L. Willkie, 1892-1944, (U.S.) Republican who tried to unseat Franklin D. Roosevelt when he ran for his third term.

Harold Wilson, 1916-95, (Br.) Labour party leader; prime min., 1964-70, 1974-76.

Boris Yeltsin, 1931-2007, (Russ.) first freely elected pres. of post-Soviet Russia.

Emiliano Zapata, c. 1879-1919, (Mex.) revolutionary; major influence on modern Mexico.

Todor Zhivkov, 1911-98, (Bulg.) Communist ruler of Bulgaria from 1954 until ousted in a 1989 coup.

Zhou Enlai, 1898-1976, (China) diplomat, prime min.; a leading figure of the Chinese Communist party.

Scientists of the Past

Revised by Peter Barker, Prof. and Chair, Dept. of the History of Science, Univ. of Oklahoma.

For pre-modern scientists, see also [Philosophers and Religious Figures of the Past](#) and the [Historical Figures](#) chapter.

Albertus Magnus, c. 1200-80, (Ger.) theologian, philosopher; helped found medieval study of natural science.

Alhazen (Ibn al-Haytham), c. 965-c. 1040, (Arab.) mathematician, astronomer, optical theorist.

Andre-Marie Ampère, 1775-1836, (Fr.) mathematician, chemist; founder of electrodynamics.

Mary Anning, 1799-1847, (Br.) paleontologist.

Neil Armstrong, 1930-2012, (U.S.) astronaut; first man to walk on the Moon.

John V. Atanasoff, 1903-95, (U.S.) physicist; co-invented Atanasoff-Berry electronic digital computer (1939-41).

Amedeo Avogadro, 1776-1856, (It.) chemist, physicist; proposed that equal volumes of gas contain equal numbers of molecules, permitting determination of molecular weights.

John Bardeen, 1908-91, (U.S.) double Nobel laureate in physics (transistor, 1956; superconductivity, 1972).

A. H. Becquerel, 1852-1908, (Fr.) physicist; discovered radioactivity in uranium (1896).

Alexander Graham Bell, 1847-1922, (U.S.) inventor; first to patent and commercially exploit the telephone (1876).

Daniel Bernoulli, 1700-82, (Switz.) mathematician; developed fluid dynamics and kinetic theory of gases.

Clifford Berry, 1918-63, (U.S.) collaborated with John V. Atanasoff on the ABC electronic digital computer (1939-41).

Jöns Jakob Berzelius, 1779-1848, (Swed.) chemist; developed modern chemical symbols and formulas.

Henry Bessemer, 1813-98, (Br.) engineer; invented Bessemer steel-making process.

Hans Bethe, 1906-2005, (Ger.-U.S.) physicist; won Nobel Prize in 1967 for describing how stars generate energy.

Bruno Bettelheim, 1903-90, (Austria-U.S.) psychoanalyst; studied disturbed children; *Uses of Enchantment* (1976).

Louis Blériot, 1872-1936, (Fr.) engineer; monoplane pioneer.

Franz Boas, 1858-1942, (Ger.-U.S.) founded modern anthropology; studied Pacific Coast tribes.

Niels Bohr, 1885-1962, (Den.) atomic and nuclear physicist; founded quantum mechanics.

Norman Borlaug, 1914-2009, (U.S.) plant pathologist and geneticist; father of “green” (agricultural) revolution.

Max Born, 1882-1970, (Ger.) atomic and nuclear physicist; helped develop quantum mechanics.

Satyendranath Bose, 1894-1974, (India) physicist; forerunner of modern quantum theory for integral-spin particles.

Louis de Broglie, 1892-1987, (Fr.) physicist; proposed quantum wave-particle duality.

Robert Bunsen, 1811-99, (Ger.) chemist; pioneered spectroscopic analysis; discovered rubidium, caesium.

Luther Burbank, 1849-1926, (U.S.) naturalist; developed plant breeding into a modern science.

Vannevar Bush, 1890-1974, (U.S.) electrical engineer; developed differential analyzer, an early analogue computer; led WWII Office of Scientific Res. and Dev.

Marvin Camras, 1916-95, (U.S.) inventor, electrical engineer; invented magnetic tape recording.

Alexis Carrel, 1873-1944, (Fr.) surgeon, biologist; developed methods of suturing blood vessels, transplanting organs.

Rachel Carson, 1907-64, (U.S.) marine biologist, environmentalist; *Silent Spring* (1962).

George Washington Carver, 1864-1943, (U.S.) chemist and botanist; promoted alternative crops.

James Chadwick, 1891-1974, (Br.) physicist; discovered the neutron (1932); led Brit. team on Manhattan Project in U.S.

Eugenie Clark, 1922-2015, (U.S.) ichthyologist and oceanographer.

Albert Claude, 1898-1983, (Belg.-U.S.) a founder of modern cell biology; determined role of mitochondria.

Samuel Cohen, 1921-2010, (U.S.) physicist who invented the neutron bomb.

Barry Commoner, 1917-2012, (U.S.) biologist; noted environmentalist.

Nicolaus Copernicus, 1473-1543, (Pol.) first modern astronomer to propose Sun as center of the planets' motions.

Jacques Yves Cousteau, 1910-97, (Fr.) oceanographer; co-inventor, with Emile Gagnan (Fr.), of the Aqualung (1943).

Seymour Cray, 1925-96, (U.S.) computer industry pioneer; developed supercomputers.

Francis Crick, 1916-2004, (Br.) biophysicist; co-discoverer of genetic code; shared 1962 Nobel Prize in Physiology/Medicine.

Marie, 1867-1934, (Pol.-Fr.) and **Pierre Curie**, 1859-1906, (Fr.) physical chemists; pioneer investigators of radioactivity; discovered radium and polonium (1898).

Gottlieb Daimler, 1834-1900, (Ger.) engineer, inventor; pioneer automobile manufacturer.

John Dalton, 1766-1844, (Br.) chemist, physicist; formulated atomic theory, made first table of atomic weights.

Charles Darwin, 1809-82, (Br.) naturalist; established theory of organic evolution; *Origin of Species* (1859).

Lee De Forest, 1873-1961, (U.S.) inventor of triode; pioneer in wireless telegraphy, sound pictures, television.

Pierre-Gilles de Gennes, 1932-2007, (Fr.) physicist whose research aided development of liquid-crystal display (LCD); awarded 1991 Nobel Prize for Physics.

Max Delbrück, 1906-81, (Fr.-Ger.-U.S.) a founder of molecular biology.

Rudolf Diesel, 1858-1913, (Ger.) mechanical engineer; patented Diesel engine (1892).

Theodosius Dobzhansky, 1900-75, (Russ.-U.S.) biologist; reconciled genetics and natural selection.

Christian Doppler, 1803-53, (Austria) physicist; showed change in wave frequency caused by motion of source, now known as Doppler effect.

J. Presper Eckert Jr., 1919-95, (U.S.) co-inventor, with John W. Mauchly, of the ENIAC computer (1943-45).

Thomas A. Edison, 1847-1931, (U.S.) inventor; held more than 1,000 patents, including incandescent electric lamp.

Robert Edwards, 1925-2013, (Br.) physiologist; pioneered in vitro fertilization.

Paul Ehrlich, 1854-1915, (Ger.) medical researcher in immunology and bacteriology; pioneered antitoxin production.

Albert Einstein, 1879-1955, (Ger.-U.S.) theoretical physicist; founded relativity theory.

John F. Enders, 1897-1985, (U.S.) virologist; helped discover vaccines against polio, measles, mumps, and chicken pox.

Erik Erikson, 1902-94, (U.S.) psychoanalyst, author; theory of developmental stages of life; *Childhood and Society* (1950).

Leonhard Euler, 1707-83, (Switz.) mathematician, physicist; pioneer of calculus, revived ideas of Fermat.

Gabriel Fahrenheit, 1686-1736, (Ger.) physicist; improved thermometers and introduced Fahrenheit temperature scale.

Michael Faraday, 1791-1867, (Br.) chemist, physicist; discovered electrical induction and invented dynamo (1831).

Philo T. Farnsworth, 1906-71, (U.S.) inventor; built first television system (San Francisco, 1928).

Pierre de Fermat, 1601-65, (Fr.) mathematician; founded modern theory of numbers.

Enrico Fermi, 1901-54, (It.-U.S.) nuclear physicist; demonstrated first controlled chain reaction (Chicago, 1942).

Richard Feynman, 1918-88, (U.S.) theoretical physicist, author; founder of Quantum Electrodynamics (QED).

Alexander Fleming, 1881-1955, (Br.) bacteriologist; discovered penicillin (1928).

Dian Fossey, 1932-85, (U.S.) primatologist.

Jean B. J. Fourier, 1768-1830, (Fr.) introduced Fourier Series, method of analysis in math and physics.

Sigmund Freud, 1856-1939, (Austria) psychiatrist; founder of psychoanalysis; *Interpretation of Dreams* (1901).

Erich Fromm, 1900-80, (U.S.) psychoanalyst; *Man for Himself* (1947).

Galileo Galilei, 1564-1642, (It.) physicist; used telescope to vindicate Copernicus, founded modern science of motion.

Carl Friedrich Gauss, 1777-1855, (Ger.) mathematician; completed work of Fermat and Euler in number theory.

Josiah W. Gibbs, 1839-1903, (U.S.) theoretical physicist, chemist; founded chemical thermodynamics.

John Glenn, 1921-2016, (U.S.) astronaut, first American to orbit Earth (1962).

Robert H. Goddard, 1882-1945, (U.S.) physicist; invented liquid fuel rocket (1926).

George W. Goethals, 1858-1928, (U.S.) chief engineer who completed Panama Canal (1907-14).

William C. Gorgas, 1854-1920, (U.S.) physician; pioneer in prevention of yellow fever and malaria.

Stephen Jay Gould, 1941-2002, (U.S.) paleontologist, evolutionary biologist, writer.

Ernest Haeckel, 1834-1919, (Ger.) zoologist, evolutionist; early Darwinist, introduced concept of "ecology."

Otto Hahn, 1879-1968, (Ger.) chemist; with Lise Meitner discovered nuclear fission (1938).

Edmund Halley, 1656-1742, (Br.) astronomer; predicted return of 1682 comet (Halley's Comet) in 1759.

William Harvey, 1578-1657, (Br.) physician, anatomist; discovered circulation of the blood (1628).

Stephen Hawking, 1942-2018, (Br.) physicist; explored gravity, black holes; *A Brief History of Time* (1988).

Werner Heisenberg, 1901-76, (Ger.) physicist; developed matrix mechanics and uncertainty principle (1927).

Hermann von Helmholtz, 1821-94, (Ger.) physicist, physiologist; formulated principle of conservation of energy.

Caroline Herschel, 1750-1848, (Ger.-Br.) astronomer.

William Herschel, 1738-1822, (Ger.-Br.) astronomer; discovered Uranus (1781).

Heinrich Hertz, 1857-94, (Ger.) physicist; discovered radio waves and photo-electric effect (1886-87).

David Hilbert, 1862-1943, (Ger.) mathematician; contributed to algebra, calculus, and foundational studies (formalism).

Albert Hofmann, 1906-2008, (Switz.) chemist; inventor of LSD.

Edwin P. Hubble, 1889-1953, (U.S.) astronomer; discovered observational evidence of expanding universe.

Alexander von Humboldt, 1769-1859, (Ger.) naturalist; explored Central, S. America, ideated ecology.

Edward Jenner, 1749-1823, (Br.) physician; pioneered vaccination, introduced term "virus."

Katherine Johnson, 1918-2020, (U.S.) NASA mathematician.

James Joule, 1818-89, (Br.) physicist; found relation between heat and mechanical energy (conservation of energy).

Carl Jung, 1875-1961, (Switz.) psychiatrist; founder of analytical psychology.

Ernest Everett Just, 1883-1941, (U.S.) marine biologist; studied egg development; *Biology of Cell Surfaces* (1941).

Johannes Kepler, 1571-1630, (Ger.) astronomer; discovered laws of planetary motion.

Al-Khwarizmi, early 9th cent., (Arab.) mathematician; regarded as founder of algebra.

Robert Koch, 1843-1910, (Ger.) bacteriologist; isolated bacterial causes of tuberculosis and other diseases.

Georges Köhler, 1946-95, (Ger.) immunologist; with César Milstein, developed monoclonal antibody technique.

Willem Kolff, 1911-2009, (Neth.-U.S.) physician, biomedical engineer; developed first practical kidney dialysis machine; considered the “father of artificial organs.”

Jacques Lacan, 1901-81, (Fr.) influential psychoanalyst.

Joseph Lagrange, 1736-1813, (Fr.) geometer, astronomer; showed that gravity of Earth and Moon cancel, creating stable points in space around them.

Jean B. Lamarck, 1744-1829, (Fr.) naturalist; forerunner of Darwin in evolutionary theory.

Pierre Simon de Laplace, 1749-1827, (Fr.) astronomer, physicist; proposed nebular origin for solar system.

Lewis H. Latimer, 1848-1928, (U.S.) African American scientist; associate of Edison; supervised installation of first electric street lighting in New York City.

Antoine Lavoisier, 1743-94, (Fr.) a founder of modern chemistry.

Ernest O. Lawrence, 1901-58, (U.S.) physicist; invented the cyclotron.

Louis, 1903-72, and **Mary Leakey**, 1913-96, (both Br.) early hominid paleoanthropologists; discovered remains in Africa.

Richard Leakey, 1944-2022, (Kenya) anthropologist, paleontologist, conservationist.

Anton van Leeuwenhoek, 1632-1723, (Neth.) founder of microscopy.

Jerome Lejeune, 1927-94, (Fr.) geneticist; discovered chromosomal cause of Down syndrome (1959).

Claude Lévi-Strauss, 1908-2009, (Belg.-Fr.) cultural anthropologist, sociologist, philosopher.

Kurt Lewin, 1890-1947, (Ger.-U.S.) social psychologist; studied human motivation and group dynamics.

Justus von Liebig, 1803-73, (Ger.) founded quantitative organic chemistry.

Joseph Lister, 1827-1912, (Br.) physician; pioneered antiseptic surgery.

Hendrik Lorentz, 1853-1928, (Neth.) physicist; developed electron theory of matter, contributed to relativity theory.

Konrad Lorenz, 1903-89, (Austria) ethologist; pioneer in study of animal behavior.

Bernard Lovell, 1913-2012, (Br.) physicist and radio astronomer.

Percival Lowell, 1855-1916, (U.S.) astronomer; predicted the existence of Pluto.

Louis, 1864-1948, and **Auguste Lumière**, 1862-1954, (both Fr.) invented cinematograph, made first motion picture (1895).

Theodore H. Maiman, 1927-2007, (U.S.) physicist; invented the first workable laser, which he displayed in 1960.

Guglielmo Marconi, 1874-1937, (It.) physicist; developed wireless telegraphy.

John W. Mauchly, 1907-80, (U.S.) co-inventor, with J. Presper Eckert Jr., of computer ENIAC (1943-45).

James Clerk Maxwell, 1831-79, (Br.) physicist; unified electricity and magnetism, electromagnetic theory of light.

Maria Goeppert Mayer, 1906-72, (Ger.-U.S.) physicist; developed shell model of atomic nuclei.

Barbara McClintock, 1902-92, (U.S.) geneticist; showed that some genetic elements are mobile.

Lise Meitner, 1878-1968, (Austria) co-discoverer, with Otto Hahn, of nuclear fission (1938).

Gregor J. Mendel, 1822-84, (Austria) botanist, monk; his experiments became the foundation of modern genetics.

Dmitri Mendeleev, 1834-1907, (Russ.) chemist; established Periodic Table of the Elements.

Bruce R. Merrifield, 1921-2006, (U.S.) chemist; discovered how to synthesize proteins quickly and efficiently.

Franz Mesmer, 1734-1815, (Ger.) physician; introduced hypnotherapy.

Albert A. Michelson, 1852-1931, (U.S.) physicist; invented interferometer.

Robert A. Millikan, 1868-1953, (U.S.) physicist; measured electronic charge.

Thomas Hunt Morgan, 1866-1945, (U.S.) geneticist, embryologist; established role of chromosomes in heredity.

John F. Nash Jr., 1928-2015, (U.S.) mathematician; Nobel Prize winner (1994) in economics for work on game theory.

Isaac Newton, 1642-1727, (Br.) natural philosopher; discovered laws of gravitation, motion; with Gottfried Wilhelm von Leibniz, founded calculus.

Robert N. Noyce, 1927-90, (U.S.) invented microchip.

J. Robert Oppenheimer, 1904-67, (U.S.) physicist; scientific director of Manhattan Project.

Wilhelm Ostwald, 1853-1932, (Ger.) chemist, philosopher; main founder of modern physical chemistry.

Louis Pasteur, 1822-95, (Fr.) chemist; showed that germs cause disease and fermentation; originated pasteurization.

Linus C. Pauling, 1901-94, (U.S.) chemist; studied chemical bonds; campaigned for nuclear disarmament.

Jean Piaget, 1896-1980, (Switz.) psychologist; four-stage theory of intellectual development in children.

Max Planck, 1858-1947, (Ger.) physicist; introduced quantum hypothesis (1900).

Jules Henri Poincaré, 1854-1912, (Fr.) mathematician; founded algebraic topology, many other discoveries.

Walter S. Reed, 1851-1902, (U.S.) Army physician; proved mosquitoes transmit yellow fever.

Theodor Reik, 1888-1969, (Austria-U.S.) psychoanalyst; major Freudian disciple.

Sally Ride, 1951-2012, (U.S.) astronaut; 1st U.S. woman in space.

Bernhard Riemann, 1826-66, (Ger.) mathematician; developed non-Euclidean geometry used by Einstein.

Norbert Rillieux, 1806-94, (U.S.) African American inventor of a vacuum pan evaporator (1846); revolutionized sugar-refining industry.

Wilhelm Roentgen, 1845-1923, (Ger.) physicist; discovered X-rays (1895).

Carl Rogers, 1902-87, (U.S.) psychotherapist, author; originated nondirective therapy.

Ernest Rutherford, 1871-1937, (Br.) physicist; pioneer investigator of radioactivity, identified the atomic nucleus.

Albert B. Sabin, 1906-93, (Russ.-U.S.) developed oral polio live-virus vaccine.

Carl Sagan, 1934-96, (U.S.) astronomer, author.

Jonas Salk, 1914-95, (U.S.) developed first successful polio vaccine, widely used in U.S. after 1955.

Allan Sandage, 1926-2010, (U.S.) astronomer; refined the Hubble Constant, a measure of the universe's expansion.

Frederick Sanger, 1918-2013, (Br.) biochemist; detailed molecular structure of insulin.

Giovanni Schiaparelli, 1835-1910, (It.) astronomer; reported canals on Mars.

Erwin Schrödinger, 1887-1961, (Austria) physicist; developed wave equation for quantum systems.

Glenn T. Seaborg, 1912-99, (U.S.) chemist; Nobel Prize winner (1951); co-discoverer of plutonium.

Harlow Shapley, 1885-1972, (U.S.) astronomer; mapped galactic clusters and position of Sun in Milky Way Galaxy.

Norman E. Shumway, 1923-2006, (U.S.) surgeon; performed world's first successful heart-lung transplant.

B. F. Skinner, 1904-90, (U.S.) psychologist; leading advocate of behaviorism.

Richard E. Smalley, 1943-2005, (U.S.) chemist; with three other scientists, discovered buckminsterfullerenes, a previously unknown class of carbon molecules.

Roger W. Sperry, 1913-94, (U.S.) neurobiologist; established different functions of right and left sides of brain.

Benjamin Spock, 1903-98, (U.S.) pediatrician, child care expert; *Common Sense Book of Baby and Child Care*.

Charles P. Steinmetz, 1865-1923, (Ger.-U.S.) electrical engineer; developed basic ideas on alternating current.

Ernst Stuhlinger, 1913-2008, (Ger.) rocket scientist; electric propulsion for NASA in early space age.

Leo Szilard, 1898-1964, (Hung.-U.S.) physicist; helped on Manhattan Project, later opposed nuclear weapons.

Edward Teller, 1908-2003, (Hung.-U.S.) physicist; aided on Manhattan Project, had key role in development of H-bomb.

Nikola Tesla, 1856-1943, (Serb.-U.S.) invented electrical devices including AC dynamos, transformers, and motors.

William Thomson (Lord Kelvin), 1824-1907, (Br.) physicist; aided in success of transatlantic telegraph cable (1865); proposed Kelvin absolute temperature scale.

Alan Turing, 1912-54, (Br.) mathematician; helped develop basis for computers.

James Van Allen, 1914-2006, (U.S.) physicist; discovered the presence of radiation belts around Earth (Van Allen belts).

Rudolf Virchow, 1821-1902, (Ger.) pathologist; pioneered the modern theory that diseases affect the body through cells.

Alessandro Volta, 1745-1827, (It.) physicist; electricity pioneer.

Wernher von Braun, 1912-77, (Ger.-U.S.) aerospace engineer; developed rockets for warfare and space exploration.

John von Neumann, 1903-57, (Hung.-U.S.) mathematician; originated game theory; basic design for modern computers.

Alfred Russell Wallace, 1823-1913, (Br.) naturalist; proposed concept of evolution independently of Darwin.

John B. Watson, 1878-1958, (U.S.) psychologist; a founder of behaviorism.

James E. Watt, 1736-1819, (Br.) mechanical engineer, inventor; invented modern steam engine (1765).

Alfred L. Wegener, 1880-1930, (Ger.) meteorologist, geophysicist; postulated continental drift.

Norbert Wiener, 1894-1964, (U.S.) mathematician; founder of cybernetics.

Daniel Hale Williams, 1858-1931, (U.S.) African American surgeon; performed one of first two open-heart operations (1893).

Sewall Wright, 1889-1988, (U.S.) evolutionary theorist; helped found population genetics.

Wilhelm Wundt, 1832-1920, (Ger.) founder of experimental psychology.

Qian Xuesen, 1911-2009, (China) rocket scientist; helped found Jet Propulsion Lab, father of China's space program.

Rosalyn Yalow, 1921-2011, (U.S.), physicist; co-developer of radioimmunoassay.

Chuck Yeager, 1923-2020, (U.S.) test pilot, broke the sound barrier.

Ferdinand von Zeppelin, 1838-1917, (Ger.) soldier, aeronaut, airship designer.

Social Reformers, Activists, and Humanitarians of the Past

Ralph David Abernathy, 1926-90, (U.S.) Black civil rights activist; pres., 1968, Southern Christian Leadership Conf.

Jane Addams, 1860-1935, (U.S.) cofounder of Hull House; won Nobel Peace Prize, 1931.

Susan B. Anthony, 1820-1906, (U.S.) a leader in temperance, antislavery, and woman suffrage movements.

Dennis Banks, 1937-2017, (Amer. Ind.) civil rights activist.

Thomas Barnardo, 1845-1905, (Br.) social reformer; pioneer in care of destitute children.

Clara Barton, 1821-1912, (U.S.) organized American Red Cross.

Poets Laureate

In England, Henry III (1216-72) reportedly had a Versificator Regis, or King's Poet, paid 100 shillings per year. Other poets said to have filled the role of poet laureate include Geoffrey Chaucer (d 1400), Edmund Spenser (d 1599), Ben Jonson (d 1637), and William d'Avenant (d 1668). The first official English poet laureate was John Dryden, appointed 1668, for life. Then came Thomas Shadwell, in 1689; Nahum Tate, 1692; Nicholas Rowe, 1715; Rev. Laurence Eusden, 1718; Colley Cibber, 1730; William Whitehead, 1757; Rev. Thomas Warton, 1785; Henry James Pye, 1790; Robert Southey, 1813; William Wordsworth, 1843; Alfred, Lord Tennyson, 1850; Alfred Austin, 1896; Robert Bridges, 1913; John Masefield, 1930; C. Day Lewis, 1968; John Betjeman, 1972; Ted Hughes, 1984; Andrew Motion, 1999; Carol Ann Duffy, 2009; and Simon Armitage, 2019.

In the U.S., appointment is by the Librarian of Congress to a term of one year, which may be renewed: Robert Penn Warren, appointed 1986; Richard Wilbur, 1987; Howard Nemerov, 1988; Mark Strand, 1990; Joseph Brodsky, 1991; Mona Van Duyn, 1992; Rita Dove, 1993; Robert Hass, 1995; Robert Pinsky, 1997; Stanley Kunitz,

2000; Billy Collins, 2001; Louise Glück, 2003; Ted Kooser, 2004; Donald Hall, 2006; Charles Simic, 2007; Kay Ryan, 2008; W. S. Merwin, 2010; Philip Levine, 2011; Natasha Trethewey, 2012; Charles Wright, 2014; Juan Felipe Herrera, 2015; Tracy K. Smith, 2017; Joy Harjo, 2019; Ada Limón, 2022.
